Foreword

The Futura Curriculum has been a significant development for the trust. It has ensured that colleagues in each subject area have thought carefully about what we decide to teach our pupils: what knowledge, both substantive and disciplinary, is essential for pupils to succeed in a subject; how best do we sequence knowledge to support progress; how do ensure pupils are prepared for the next stage in their education; how do we enable pupils to have experiences beyond those in the national curriculum.

The collaborative work of subject experts from across the trust has produced the content outlined here, our first Futura curriculum. This has been a substantial undertaking and we are very grateful for their endeavours. As the curriculum is reviewed iteratively, the current version of each subject curriculum is shared via Sharepoint.

Gary Schlick

Director of Education, Futura Learning Partnership

‘It has ensured that colleagues in each subject area have thought carefully about what we decide to teach our pupils’

The Futura Curriculum

The Futura curriculum will be ambitious and inspirational. It will provide access and entitlement to powerful knowledge, ensuring enjoyment and promoting the very best life chances.

It will encapsulate our values:

Respect

- Each school has its own distinctive identity; this will be reflected in the local context of its curriculum.
- The curriculum will be planned progressively across the phases, to build on previous learning and prepare pupils for their next stage

Opportunities

- A rich and diverse curriculum, both inside and outside the classroom, which exceeds the full intent of the National Curriculum.
- A curriculum that enables success for all pupils regardless of their starting points.

Collaboration

- A coherently sequenced 2-19 curriculum curated by our subject experts.
- A curriculum that is enhanced by cross-trust experiences.

Aspiration

- The curriculum in each school will be designed to prepare learners for the next stage of their education, giving them the knowledge and cultural capital needed to succeed in their adult life.
- A curriculum that introduces pupils to a range of experiences and knowledge that broadens their horizons and prepares them for life as global citizens.
- A wider curriculum that promotes emotional, physical and spiritual wellbeing.

All our schools follow the Futura Curriculum that has been developed by cross-phase groups of passionate subject specialists. The curriculum has been planned vertically and horizontally giving thought to the optimum knowledge sequence for building secure schema. Progression through the curriculum is by shared age related expectations. At each phase, the curriculum focuses on closing gaps, early intervention, and developing the core literacy and numeracy skills for success at that level.

Futura Art and Design Curriculum Framework

Art and Design Curriculum Framework

Intent:

The Futura Learning Partnership intent for Art and Design is that learners will explore a diverse range of traditional and contemporary Artists, Craftspeople and Designers, fostering their curiosity and understanding of the world around them. Learners' experiences will enable them to develop an appreciation of their own and other cultures and how artistic styles have been influenced over time. Through high quality art lessons learners will become reflective critical thinkers with the abilities to express themselves creatively. They will learn to evaluate their own work and the work of others. A well-sequenced art curriculum will allow learners to make continued progression through the refinement of skills and building on prior knowledge. Learners will have the opportunity to apply their skills and knowledge in a range of contexts. Learners will be exposed to art in the local community, galleries and museums to inspire and inform their creative practice.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are the following key **substantive and disciplinary** concepts:

- developing ideas through investigations, demonstrating critical understanding of sources.
- refining work by exploring ideas, selecting and experimenting with appropriate media, materials, techniques and processes.
- recording and communicating ideas, observations and insights relevant to intentions as work progresses.
- presenting a personal and meaningful response that realises intentions and demonstrates understanding of visual language. (Final outcome)

Further details on these concepts, including how they progress from EYFS to Yr 11, on p20

<u>Year Group</u>	<u>Skills development and progression</u>	<u>Suggested lesson activities/projects</u>	<u>Suggested resources</u>	<u>Suggested artist/theme/concept</u>
EYFS	Creating with materials Nursery: <ul style="list-style-type: none"> ● Explores colour and how colours can be changed ● Develops an understanding of using lines to enclose a space, and begins to use drawing to represent actions and objects based on imagination, observation and experience ● Uses various construction materials, e.g. joining 	Drawing to music – representing sound with line. Colour could be added to the strongest shapes. Use the painting ‘Composition II in Red, Blue, and Yellow.’ Create their own Mondrian with black tape and paint. Use different size brushes to paint in the shapes in primary colours. All About Me Painting - Self Portraits, Family, Home, Pets etc.	Charcoal, pencils, crayons Poster paints, brushes	Kandinsky-Abstract Art Mondrian-Abstract/Modern Art

	<p>pieces, stacking vertically and horizontally, balancing, making enclosures and creating spaces</p> <ul style="list-style-type: none"> ● Uses tools for a purpose <p>Reception:</p> <ul style="list-style-type: none"> ● Uses their increasing knowledge and understanding of tools and materials to explore their interests and enquiries and develop their thinking ● Develops their own ideas through experimentation with diverse materials, e.g. light, projected image, loose parts, watercolours, powder paint, to express and communicate their discoveries and understanding. ● Expresses and communicates working theories, feelings and understandings using a range of art forms including visual art. <p>Being imaginative and expressive</p> <ul style="list-style-type: none"> ● Creates representations of both imaginary and real- 	<p>Harvest / Autumn</p> <p>Drawing / Printing leaves, fruit and vegetables</p> <p>Festivals and Celebrations</p> <p>Diwali / The Christmas Story (Printing, Painting, Textiles)</p> <p>Weather – Hot and Cold Colours</p> <p>Animals in hot and cold places</p> <p>Sculpture – Construct 3D Forms</p> <p>Chinese New Year -</p> <p>Textiles / Sculpture – Chinese Dragon</p> <p>Animals</p> <p>Easter – Cards / Baskets / Gifts</p> <p>Drawing/ Painting/ Printing/ Sculpture</p> <p>Growth and Change</p> <p>Drawing / Painting</p> <p>Our Community</p> <p>Traditional Stories</p>	<p>Poster paints, leaves, hands, potatoes etc</p> <p>Play dough, clay, salt dough, recycled and natural materials.</p> <p>A range of fabrics</p> <p>A range of card, crepe paper, tissue paper etc.</p> <p>Boxes, crepe paper, glitter, card tubes, material, ribbons, foil etc.</p> <p>Printing objects</p> <p>ICT, photographs, digital media</p>	
--	--	--	---	--

	<p>life ideas, events, people and objects</p> <ul style="list-style-type: none"> ● Initiates new combinations of colours and materials for their own imaginative purposes ● Uses combinations of art forms, e.g. moving and singing, making and dramatic play, drawing and talking, constructing and mapping ● Responds imaginatively to art works and objects, e.g. that sculpture is squishy. ● Introduces a storyline or narrative into their play <p>End of Reception ELG:</p> <p>- Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function;</p> <p>- Share their creations, explaining the process they have used.</p>			
1-2	<p>Drawing – Draw from observation, imagination and memory. Create different types of line, eg zig zag, wavy, curved. Colour within lines.</p>	<p>When drawing from observation start with a series of timed drawings and do them in pen so students cannot rub out. Continuous line drawing. Continuous line drawing using only straight lines. Wrong hand drawing. Then go on to produce a longer study.</p>	Pencil, biro, crayon	<p>Vincent Van Gogh</p> <p>Rembrandt</p> <p>Picasso</p>

	<p>Begin mark making to show pattern and texture.</p> <p>Painting – Mix primary colours to make secondary colours. Add white and black to make tints and tones. Create colour wheels.</p> <p>Printing – Use press print to create repeating or overlapping patterns. Use objects to create repeat patterns.</p> <p>Sculpture - Use a range of soft and hard materials to construct 3D forms from observation/imagination.</p>	<p>Use of sketchbooks</p> <p>Self-Portraits</p> <p>From observation, draw buildings in their local area.</p> <p>Food and Farming - Draw / paint / print with fruit and vegetables</p> <p>Religious Art / Festivals / Seasons</p> <p>Mixing colours to paint trees or flowers. Take their colour wheels outside and find the colours they have created.</p> <p>Wonderful Wildlife – Animal, leaf or flower printing</p> <p>Food and Farming – Printing with fruit and vegetables</p> <p>Investigating printing with a range of objects</p> <p>Dinosaur footprints</p> <p>Pirate flags</p> <p>Outdoor sculptures</p> <p>Dinosaur eggs, mould superheroes</p> <p>Installation art as inspiration</p>	<p>Poster paints</p> <p>Watercolours</p> <p>Different objects</p> <p>Poster paint</p> <p>Printing block made from card and string.</p>	<p>Monet</p> <p>Henri de Toulouse-Lautrec</p> <p>William Morris</p> <p>Georg Gerster</p> <p>Andy Goldsworthy</p> <p>Henry Moore</p>
--	--	---	--	---

	<p>Textiles – Join materials using glue or stitch. Weaving and plaiting. Applying colour to fabric.</p> <p>Digital media – Use a wide range of tools to create different textures, lines, colours and shapes. Eg Dazzle, paint, 2simple.</p>	<p>Dye / Tie n Dye T-Shirts</p> <p>Woven / plaited headbands (50s / 60s topic)</p> <p>Carnival/ animal masks</p> <p>Sewing stuffed shapes</p> <p>Drawing self - Portraits</p> <p>Drawing a digital alien</p> <p>Drawing a digital castle using 2D shapes</p> <p>Festival / Seasonal Art</p>	<p>Natural materials</p> <p>Clay, playdoh combined with rigid materials. Add texture with sand or glitter etc.</p> <p>Use wire frame to combine art work for sculpture.</p> <p>Salt dough</p> <p>Plasticine</p> <p>Card base and sticking sequins, wool, materials, tissue paper etc.</p> <p>Felt, needle and thread.</p> <p>IPad or computer- Dazzle, paint, 2simple etc.</p>	<p>Charles Rennie Mackintosh</p> <p>Anthony Gormley</p> <p>Michael Kalish</p> <p>Janet Brooke – buildings/city scenes</p> <p>Mateusz Urbanowicz – shop fronts</p> <p>Caroline Ashwood – Abstract flowers/trees.</p> 
--	--	--	--	---

3-4	<p>Drawing – Draw from observation, imagination and memory with increasing control. Use different grades of pencil to show line, tone and texture. Use mark making to show light and shadow. Begin to show an awareness of a third dimension and perspective.</p> <p>Painting - Mix primary colours to make secondary colours. Add white and black to make tints and tones. Create colour wheels. Mix colours effectively and be able to identify and create warm and cool colours. To understand colour families and create a colour wash.</p> <p>Printing - Use press print to create precise repeating or overlapping patterns with two or more colours. Use objects to create repeat patterns. Record patterns from observation. Make printing blocks (e.g from coiled string).</p> <p>Sculpture - Use a range of soft and hard materials to construct 3D</p>	<p>When drawing from observation start with a series of timed drawings and do them in pen so students cannot rub out. Continuous line drawing. Continuous line drawing using only straight lines. Wrong hand drawing. Then go on to produce a longer study. Apply marks to an observational drawing of an object.</p> <p>Self-Portraits</p> <p>Cave Paintings</p> <p>Colour wash with sunset backdrops with black card in front. Eg Stonehenge image.</p> <p>Use warm and cool colours- eg Van Gogh Sunflowers</p> <p>Seasonal Art</p> <p>Ancient Greek or Roman repeating patterns.</p>	<p>Water colours and card</p> <p>Poster paint Polystyrene blocks, or coiled string on card.</p> <p>Clay, mod roc</p>	<p>Pete Scully – Illustrator who uses mark making. His shoe drawings would be good to look at for this.</p> <p>Mary Anning</p> <p>Van Gogh- looking at warm and cool colours</p>

<p>forms from observation/imagination. Be able to use joining techniques. Carving/scoring in clay. Start to add detail to 3D forms to convey feelings, expression or movement.</p> <p>Textiles – Join materials using glue or stitch. Weaving and plaiting. Applying colour to fabric. Use a range of stitches. Quilt, pad and gather fabric. Add decoration using beads, buttons, feathers etc. Use techniques such as knotting, fraying, fringing and twisting.</p> <p>Digital media – Use a wide range of tools to create different textures, lines, colours and shapes. Eg Dazzle, paint, 2simple. Create and manipulate images, videos and sound recordings.</p>	<p>Mosaic Tessellations</p> <p>Egyptian/ Bronze Age Clay pots (coiled and joined)</p> <p>Recycling Collage</p>	<p>Fabric collages</p> <p>Weaving baskets or with natural materials in outdoor area.</p> <p>Batik art</p> <p>Use a range of stitches. Quilt, pad and gather fabric.</p> <p>Create and manipulate images, videos and sound recordings.</p>	<p>Fabric</p> <p>Weaving material</p> <p>Batik</p> <p>IPads</p> <p>Photo manipulation software</p>	<p>Barbara Hepworth</p> <p>Michelangelo</p> <p>Rodin</p> <p>Donatello</p> <p>Picasso</p> <p>Mario Testino</p> <p>Campbell</p>

Substantive and disciplinary concepts

Year Group	To develop ideas through investigations,	To refine work by exploring ideas, selecting	To record and communicate ideas,	To present a personal and meaningful response that
------------	--	--	----------------------------------	--

	demonstrating critical understanding of sources. To record and communicate ideas, observations and insights relevant to intentions as work progresses.	and experimenting with appropriate media, materials, techniques and processes.	observations and insights relevant to intentions as work progresses.	realises intentions and demonstrates understanding of visual language. (Final outcome).
EYFS	To state simple facts about what they can see in different pieces of art work.	To experiment with different materials or techniques. eg. printing with leaves compared to pine cones.	To communicate with an adult or peer about how they are going to make their desired creation and what they will use to make it.	Make simple evaluations about what is good about their work.
1	To respond to ideas. To explore ideas and collect visual information.	To discuss and collect different ideas.	To record their ideas and make a list of materials.	Evaluate their work stating what was successful and what could be improved.
2	To respond to ideas. To explore ideas and collect visual information. To explore different methods and materials as ideas develop.	To select and refine materials as ideas develop.	To record and refine ideas.	To say how improvements could be made.
3	To develop ideas from starting points throughout the curriculum.	To adapt and refine ideas as they progress.	To record, refine and communicate ideas and intentions.	To comment on their artwork using visual language.
4	To develop ideas from starting points throughout the curriculum. To collect information, sketches and resources.	To adapt and refine ideas as they progress. To explore ideas in a variety of ways.	To record, refine and communicate ideas and intentions.	To comment on their own and others artwork using visual language.
5	To develop and extend ideas from starting points throughout the curriculum.	To use the qualities of materials to enhance ideas.	To spot the potential in unexpected results as work progresses.	To be able to comment on artworks with a fluent grasp of visual language.

	To collect information, sketches and resources and present ideas in a sketch book.			
6	To develop and imaginatively extend ideas from starting points throughout the curriculum. To collect information, sketches and resources and present ideas imaginatively in a sketch book.	To use the qualities of materials to enhance ideas. To experiment with different materials to produce a variety of effects.	To spot the potential in unexpected results as work progresses. To follow through and extend new ideas.	To be able to comment on artworks with a fluent grasp of visual language. To be able to compare and contrast artworks by different artists.
7	Artists analysis, What, How, Why? Artists studies. Draft ideas. Critique. Labelling on ideas to explain thoughts.	Material experiments. Different techniques and processes. Labelling. Annotations to evaluate and reflect on experiments.	Mind maps. Mood boards. Observational drawing from primary and secondary sources. Annotations describing own thoughts on theme/topic.	Final Outcome e.g - Still life painting, sea creature sculpture, painted clay skull.
8	Artists analysis What, How, Why? Artists studies. Draft ideas. Critique. Annotations to describe thoughts and ideas.	Material experiments. Different techniques and processes. Labelling. Annotations to evaluate and reflect on experiments.	Mind maps. Mood boards. Observational drawing from primary and secondary sources. Annotations describing own thoughts on theme/topic.	Final Outcome e.g - Mixed media landscape, Coraline book, Character model.
9	Artists analysis What, How, Why? Artists studies. Draft ideas. Critique. Annotations to describe thoughts and ideas.	Material experiments. Different techniques and processes. Labelling. Annotations to evaluate and reflect on experiments.	Mind maps. Mood boards. Observational drawing from primary and secondary sources. Annotations describing own thoughts on theme/topic. Own photos relevant to theme/topic.	Final Outcome e.g - 3D letter, Digital portrait collage, Turret sculpture.

10	<p>In depth analysis of artists work written and visual. Develop own ideas – drafting and critique. Annotations to describe own thoughts about ideas and how they have been inspired by the artist’s work.</p>	<p>Material experiments. (Begin to select own materials). Annotations explaining own thoughts about different materials - reflection and evaluation. Refinement of ideas. Annotations explaining reasons for refinements and reflection on successes and failures.</p>	<p>Observational drawing from primary and secondary sources relevant to theme/idea. Own photos taken relevant to theme/idea. Mind maps exploring theme/idea. Collection of relevant secondary source visuals. Annotations describing thoughts about theme/idea and links to personal experiences.</p>	<p>Final Outcome – Surrealist painting, illustration, sculpture, mixed media piece.</p>
11	<p>In depth analysis of artists work written and visual. Develop own ideas – drafting and critique. Annotations to describe own thoughts about ideas and how they have been inspired by the artist’s work.</p>	<p>Material experiments. (Select own materials). Annotations explaining own thoughts about different materials - reflection and evaluation. Refinement of ideas. Annotations explaining reasons for refinements and reflection on successes and failures.</p>	<p>Observational drawing from primary and secondary sources relevant to theme/idea. Own photos taken relevant to them/idea. Mind maps exploring theme/idea. Collection of relevant secondary source visuals. Annotations describing thoughts about theme/idea and links to personal experiences.</p>	<p>Final outcome/response to personal project.</p>

Futura Computing Curriculum Framework

Computing Curriculum Framework

Intent:

The Futura Learning Partnership intent for Computing is that an exciting and rigorous Computing education will ensure children are immersed in engaging, technology-rich learning experiences which allow them to learn deeply and embed core computing skills, think independently and problem solve in an ever evolving digital world. Regardless of changes within technology and the world we live in, our children will possess the core skills and behaviours required to safely and confidently access new technology to enhance their wider learning, access the curriculum throughout their school journey and inspire a future where technology is used to innovate and make positive change.

We believe that learning about Computing provides an important context for the development of pupils' key learning skills, particularly problem-solving, creative and critical thinking and resourcefulness.

Futura recognise that social context plays a vital role in children's education and as such we aim to provide opportunities for children to experience Computing in ways that are unique to their local and wider community.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims:

Underpinning the intent are key **concepts** and the National Curriculum Computing statements for Key stages 1 and 2 (see [blue bullet points](#) in the coverage sections, below). These are further refined with **key substantive and disciplinary concepts**:

Substantive Concept	Definition.
Computer Science	The technical design. The design of new software, the solution to computing problems and the development of different ways to use technology.
Information Technology	The technical knowledge. The design, use and understanding of hardware and software; computers and electronic systems for storing and using information.
Digital Literacy	The technical skills. The ability to use information and communication technologies to find, create, evaluate, and communicate information.

Disciplinary Concept	Definition.
Code	Using and writing codes to produce instructions and algorithms; to solve problems; to test and use logic and sequences against inputs and outputs.
Connect	Being able to safely, efficiently and confidently digitally connect with others.
Communicate	Being able to safely, efficiently and confidently use apps and information technology to communicate ideas.
Collect	Being able to safely, efficiently and confidently find, evaluate, store, sort and use appropriate data.

Implementation:

To meet the aim of delivering this comprehensive set of substantive and disciplinary concepts, the National Centre for Computing Education (NCCE) “Teach Computing” [curriculum](#) is followed. These resources and foci may be adapted to suit the school and cohort as well as to match the available software and

hardware. Termly planning as well as Lesson plans and resources can be downloaded from the NCCE [site](#) (note: teachers need to create a free account to do so) and web-links to relevant topic pages are included in the coverage sections (below).

Primary Computing Curriculum (Secondary Computing Curriculum starts on p38)

Coloured text (“Computer Science, Information Technology, Digital Literacy, Code, Connect, Communicate, Collect”) refer to the key computing substantive and disciplinary concepts. Primary curriculum source is the [NCCE](#) scheme of work but these topics can be adapted to suite cohort, available resources, etc.

EYFS

From September 2021 the early learning goal (ELG) in technology will be removed from the EYFS statutory framework. Previously the ELG stated “Children recognise that a range of technology is used in places such as homes and schools. They select and use technology for particular purposes.”

Despite its exclusion from the renewed framework, technology undoubtedly has a role to play in early years classrooms, both in preparation for the National Curriculum and within the context of a technologically advanced society.

Below are a range of *suggestions* for how technology can both support and enhance children’s learning towards the ELGs in the Reception classroom.

Substantive Knowledge

Computer Science	Information Technology	Digital Literacy
<p>I can explore programmable toys such as Botley, Beebot or Cod-e-pillar.</p> <p>I can use some words like forwards and backwards to describe how I want to make a programmable toy move.</p> <p>I can give a simple set of instructions e.g. how to brush your teeth.</p>	<p>I can name some sources of IT from home and school.</p> <p>I know that typing using a keyboard is another way of writing information.</p> <p>I know that digital devices can be used to create pictures.</p> <p>I know that things can be similar or different in lots of ways and can talk about some of these similarities and differences.</p>	<p>I know what to do if I see something that worries me when I am using a digital device.</p>
<p>Links to ELGs (Sept 2021)</p>		
<p>1. Listening, Attention and Understanding Listen attentively and respond to what they hear with relevant questions, comments and actions when being read to and during whole class discussions and small group interactions.</p> <p>2. Speaking ELG Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary; Offer explanations for why things might happen, making use of recently introduced vocabulary from stories, non-fiction, rhymes and poems when appropriate.</p> <p>7. Fine Motor Skills Use a range of small tools, including scissors, paint brushes and cutlery.</p>	<p>7. Fine Motor Skills Use a range of small tools, including scissors, paint brushes and cutlery. Begin to show accuracy and care when drawing.</p> <p>10. Writing Spell words by identifying sounds in them and representing the sounds with a letter or letters; Write simple phrases and sentences that can be read by others.</p> <p>15. The Natural World Explore the natural world around them, making observations and drawing pictures of animals and plants.</p> <p>16. Creating with Materials</p>	<p>3. Self-Regulation Show an understanding of their own feelings and those of others, and begin to regulate their behaviour accordingly.</p> <p>4. Managing Self Explain the reasons for rules, know right from wrong and try to behave accordingly.</p>

	Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.	
--	---	--

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>I can push a button to make a programmable toy move.</p> <p>I can find a power button on a programmable toy and that I need to switch it on to make it work.</p>	<p>I can find and start a favourite app on a digital device.</p> <p>I can search for things I like with support on a child-safe search engine.</p>	<p>I can select letters on a keyboard to write simple words and sentences.</p> <p>I am learning where the spacebar and enter button are and what they can do.</p> <p>I can use a mousepad to move a click a cursor, or my finger on a touchscreen to move and select.</p>	<p>I can sort a group of objects using two given criteria e.g. feathers and fur or curved and straight edges.</p>

Year 1

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>I can predict the outcome of a command on a device I can match a command to an outcome I can recall words that can be acted out I can compare forwards and backwards movements I can start a sequence from the same place I can predict the outcome of a sequence involving forwards and backwards commands I can compare left and right turns I can experiment with turn and move commands to move a robot I can predict the outcome of a sequence involving up to four commands I can explain what my program should do I can choose the order of commands in a sequence I can debug my program I can compare different programming tools To show that a series of commands can be joined together To identify the effect of changing a value To explain that each sprite has its own instructions To design the parts of a project To use my algorithm to create a program</p> <p>(NC) Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions.</p> <p>(NC) Create and debug simple programs</p> <p>(NC) Use logical reasoning to predict the behaviour of simple programs.</p>	<p>Identify IT in the home and beyond school. Explain how IT benefits us. Recognise how IT can change the way we work. Understand that some digital software can create art. Explain reasoning behind text choices e.g. colour, size and font I can explain what the keys that I have learnt about already do I can say what tool I used to change the text I can compare using a computer with using a pencil and paper I can describe objects using labels I can describe an object I can describe a property of an object I can find objects with similar properties I can choose how to group objects I can describe groups of objects I can record how many objects are in a group I can decide how to group objects to answer a question I can compare groups of objects</p> <p>(NC) Use technology purposefully to create, organise, store, manipulate and retrieve digital content</p>	<p>I can identify rules that help keep us safe and healthy in and beyond the home when using technology I can give some simple examples. I know that the work I create belongs to me. I can name my work so that others know it belongs to me.</p> <p>(NC) Recognise common uses of information technology beyond school</p> <p>(NC) Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.</p>

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>I can run a command on a device I can follow an instruction I can give directions I can find the commands to move a sprite I can use commands to move a sprite</p>	<p>Use a mouse in different ways. Use a keyboard to type and edit text. Use a computer to paint a picture. Selecting and opening a programme or application. Saving and closing a programme or application.</p>	<p>I can open a word processor I can recognise keys on a keyboard I can enter text into a computer I can use letter, number, and space keys I can use backspace to remove text I can type capital letters I can identify the toolbar and use bold, italic, and underline I can select a word by double-clicking I can select all of the text by clicking and dragging I can change the font I can use 'undo' to remove change I can write a message on a computer and on paper</p>	<p>I can match objects to groups I can count objects I can group objects I can count a group of objects I can group similar objects I can group objects in more than one way I can count how many objects share a property</p>

Suggested Key topics:

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing systems and networks – Technology around us.	Creating media – Creating media digital painting	Creating media – Digital writing	Data and information – Grouping data	Programming A – Moving a robot	Programming B – Introduction to animation
Connect Digital Literacy Information Technology	Communicate Connect Digital Literacy	Communicate Connect	Collect Information Technology	Computer Science Code	Computer Science Code

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing Vocabulary					
technology, computer, laptop, desktop, keyboard, screen, click, drag, mouse, program, type, save, edit, file, cursor, delete, text, Log in, username, password, log out, notification, save	tools, line, shape, fill, undo, erase, brush	keys	Sort, criteria, data, collate, object	Instruction, algorithm, program, debug, direction, arrow, undo, forward, backwards, right turn, left turn	Animation, sound effect
Online Safety					
Health, well-being and lifestyle. Copyright and ownership.	Children begin to understand what personal information is and who you can share it with, including the need to keep passwords private. They begin to recognise the need to know who they are sharing their learning with online and recognise the difference between real and imaginary online experiences. Digiduck's Big Decision http://kidsmart.org.uk/teachers/ks1/digiduck.aspx	Children know who to tell when they see something that makes them uncomfortable and make sure an adult knows what they are doing.	Children recognise the Internet as an exciting place to be but understand the need for a balance in how they spend their time and make good choices about age appropriate activities. I know that work I create belongs to me I can name my work so that others know it belongs to me	Managing Online Information I understand that when I am working on an online platform, I may have access to the rest of the internet. I know who to tell when I see something that makes me uncomfortable.	Managing Online Information I understand that when I am working on an online platform, I may have access to the rest of the internet. I know who to tell when I see something that makes me uncomfortable. I know that work I create belongs to me I can name my work so that others know it belongs to me

Year 2

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>I can show the difference in outcomes between two sequences that consist of the same commands</p> <p>I can follow a sequence</p> <p>I can predict the outcome of a sequence</p> <p>I can compare my prediction to the program outcome</p> <p>I can explain the choices I made for my mat design</p> <p>I can identify different routes around my mat</p> <p>I can test my mat to make sure that it is usable</p> <p>I can explain what my algorithm should achieve</p> <p>I can create an algorithm to meet my goal</p> <p>I can use my algorithm to create a program</p> <p>(NC) Understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions.</p> <p>(NC) Create and debug simple programs</p> <p>(NC) Use logical reasoning to predict the behaviour of simple programs.</p>	<p>I can identify examples of computers</p> <p>I can describe some uses of computers</p> <p>I can identify that a computer is a part of information technology</p> <p>I can explain the purpose of information technology in the home</p> <p>I can talk about uses of information technology</p> <p>I can compare types of information technology</p> <p>I can list different uses of information technology</p> <p>I can recognise how to use information technology responsibly</p> <p>I can say how those rules/guides can help me</p> <p>I can identify the choices that I make when using information technology</p> <p>I can explain simple guidance for using information technology in different environments and settings</p> <p>I can enjoy a variety of activities</p> <p>Digital Photography</p> <p>I can sort devices into old and new</p> <p>I can talk about how to take a photograph</p> <p>I can explain the process of taking a good photograph</p> <p>I can identify what is wrong with a photograph</p> <p>I can discuss how to take a good photograph</p> <p>I can improve a photograph by retaking it</p> <p>I can explore the effect that light has on a photo</p> <p>I can experiment with different light sources</p> <p>I can recognise that images can be changed</p> <p>I can use a tool to achieve a desired effect</p> <p>I can explain my choices</p> <p>Making Music</p> <p>I can connect images with sounds</p> <p>I can relate an idea to a piece of music</p> <p>I can identify that music is a sequence of notes</p>	<p>I can recognise that images can be changed.</p> <p>(NC) Recognise common uses of information technology beyond school</p> <p>(NC) Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies</p>

	<p>I can use a computer to create a musical pattern using three notes I can refine my musical pattern on a computer</p> <p>(NC) Use technology purposefully to create, organise, store, manipulate and retrieve digital content</p>	
--	---	--

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>I can follow instructions given by someone else</p> <p>I can choose a series of words that can be enacted as a sequence</p> <p>I can give clear and unambiguous instructions</p> <p>I can create different algorithms for a range of sequences (using the same commands)</p> <p>I can use an algorithm to program a sequence on a floor robot</p> <p>I can plan algorithms for different parts of a task</p> <p>I can test and debug each part of the program</p> <p>I can put together the different parts of my program</p>	<p>I can find examples of information technology</p> <p>To recognise that images can be changed</p>	<p>Computing Systems</p> <p>I can open a file</p> <p>I can move and resize images</p> <p>I can demonstrate how information technology is used in a shop</p> <p>I can recognise that information technology can be connected</p> <p>I can explain how information technology helps people</p> <p>Digital Photography</p> <p>I can capture digital photos and talk about my experience</p> <p>I can take photos in both landscape and portrait format</p> <p>I can focus on an object</p> <p>Making Music</p> <p>I can use a computer to experiment with pitch and duration</p>	<p>Pictograms</p> <p>I can record data in a tally chart</p> <p>I can represent a tally count as a total</p> <p>I can compare totals in a tally chart</p> <p>I can enter data onto a computer</p> <p>I can use a computer to view data in a different format</p> <p>I can use pictograms to answer simple questions about objects</p> <p>I can organise data in a tally chart</p> <p>I can use a tally chart to create a pictogram</p> <p>I can explain what the pictogram shows</p> <p>I can tally objects using a common attribute</p> <p>I can create a pictogram to arrange objects by an attribute</p> <p>I can answer 'more than'/'less than' and 'most/least' questions about an attribute</p> <p>I can choose a suitable attribute to compare people</p> <p>I can collect the data I need</p> <p>I can create a pictogram and draw conclusions from it</p> <p>I can use a computer program to present information in different ways</p> <p>I can share what I have found out using a computer</p> <p>I can give simple examples of why information should not be shared</p>

Year 3

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>Understand how event blocks can be used to start a project in a variety of different ways.</p> <p>Learn how to create sequence of commands</p> <p>Understand how to programme movement</p> <p>(NC)Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>(NC)Use sequence, selection and repetition in programs; work with variables and various forms of input and output.</p> <p>(NC)Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p> <p>(NC) Understand computer networks, including the Internet; how they can provide multiple services, such as the World Wide Web; and the opportunities they offer for communication and collaboration.</p>	<p>To understand how a digital device works and what parts make up a digital device.</p> <p>Understanding how digital devices help us and how computers are connected.</p> <p>Understand what a branching database is</p> <p>(NC) Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>(NC) Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.</p>	<p>Copyright and ownership</p> <p>Explain why copying someone else’s work from the internet without permission can cause problems and give examples.</p> <p>When searching on the internet for content to use, explain why you need to consider who owns it.</p> <p>Give examples of content that is permitted to be reused.</p> <p>(NC) Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</p>

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
Use code to make a musical instrument. Learn how to debug a programme.	Managing online information Use key phrases in search engines Use search technologies effectively. Copyright and ownership Use of search tools to find and access online content which can be reused by others.	Learn how to make a stop-frame animation or other type of presentation. Use text and images to communicate clearly Use return, backspace and shift keys Learn how to create a magazine.	Create a branching database Use a branching database to answer questions.

Suggested Key topics:

<p>Interdisciplinary link: Maths – number and place value Art</p> <p>Linked prior learning: Year 2, term 1</p> <p>Linked future learning: Learners will explore the internet as a network of networks. Year 4, term 1</p>	<p>Interdisciplinary link: Art Writing</p> <p>Linked prior learning: Year 1, term 6</p> <p>Linked future learning: Learners will further develop their video editing skills in Year 5. Year 5, term 3</p>	<p>Interdisciplinary link: Art, English</p> <p>Linked prior learning: It builds on their knowledge of data and information from key stage 1 Year 1 and 2, term 2</p> <p>Linked future learning: Year 4, term 3</p>	<p>Interdisciplinary link: Science, Maths</p> <p>Linked prior learning: Year 1 and 2, term 4</p> <p>Linked future learning: Year 4, term 4</p>	<p>Interdisciplinary link: Maths and Music</p> <p>Linked prior learning: Year 2, term 3 and Year 2, term 5</p> <p>Linked future learning: Year 4, term 5</p>	<p>Interdisciplinary link: Maths and Design and Technology</p> <p>Linked prior learning: Year 3, term 5</p> <p>Linked future learning: Year 4, term 6</p>

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6	
Computing Vocabulary						
password, internet, blog, username, website, webpage, spoof website, PEGI rating	animation, audio, design templates, entrance animation, font, media, presentation, presentation programme, slide, slideshow, stock image, text box, text formatting, transition		questioning, database, construct, contribute, recording, data, data logger, present data data	Action, algorithm, bug, code block, code design, command, debug/ debugging, design mode, event, If, input, output, repeat, object, properties, timer, computer simulation, selection, variable		
Online Safety						
Children recognise the need to keep personal information and passwords private. They recognise the need for a secure password.	Copyright and ownership Managing online information	Children understand that an adult needs to know what they are doing online and understand how to report concerns, including cyberbullying.	Children understand that any personal information they put online can be seen and used by others.	Copyright and ownership Managing online information	Safety features of different apps and games	

Year 4

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>To identify that accuracy in programming is important To explain what 'repeat' means To decompose a program into parts To develop the use of count-controlled loops in a different programming environment To explain that in programming there are infinite loops and count-controlled loops To develop a design that includes two or more loops which run at the same time To modify an infinite loop in a given program To design a project that includes repetition</p> <p>(NC) Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts</p> <p>(NC) Use sequence, selection and repetition in programs; work with variables and various forms of input and output.</p> <p>(NC) Use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and program</p> <p>(NC) Understand computer networks, including the Internet; how they can provide multiple services, such as the World Wide Web; and the opportunities they offer for communication and collaboration.</p>	<p>To identify that sound can be digitally recorded To explain that a digital recording is stored as a file To explain that audio can be changed through editing To show that different types of audio can be combined and played together To evaluate editing choices made To describe how images can be changed for different uses To make good choices when selecting different tools To evaluate how changes can improve an image To explain that data gathered over time can be used to answer questions To explain that a data logger collects 'data points' from sensors over time To identify the data needed to answer questions</p> <p>(NC) Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>(NC) Select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information.</p>	<p>To describe how networks physically connect to other networks To recognise how networked devices make up the internet To outline how websites can be shared via the World Wide Web To describe how content can be added and accessed on the World Wide Web To recognise how the content of the WWW is created by people To evaluate the consequences of unreliable content To explain that digital images can be changed To recognise that not all images are real</p> <p>(NC) Use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</p>

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>To create a program in a text-based language</p> <p>To modify a count-controlled loop to produce a given outcome</p> <p>To create a program that uses count-controlled loops to produce a given outcome</p> <p>To create a project that includes repetition</p>	<p>To understand that any personal information they put online can be seen and used by others.</p> <p>To recognise the effect their writing or images might have on others.</p>	<p>To use a digital device to record sound</p> <p>To change the composition of an image</p>	<p>To use a digital device to collect data automatically</p> <p>To use data collected over a long duration to find information</p> <p>To use collected data to answer questions</p>

Suggested Key topics:

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing systems and networks – The Internet	Creating media – Audio editing	Creating media – Photo editing	Data and information – Data logging	Programming A – Repetition in shapes	Programming B – Repetition in games
Connect Digital Literacy Information Technology	Communicate Connect Digital Literacy	Communicate Connect	Collect Information Technology	Computer Science Code	Computer Science Code
Suggested resources	Suggested resources	Suggested resources	Suggested resources	Suggested resources	Suggested resources
The Internet Purple Mash – online safety	Audacity Purple Mash 2sequence	Paint Purple Mash 2paint Sketchbook (touch screen app)	App – Google science journal Purple Mash 2calculate	Logo (turtle) Purple Mash 2Logo	Scratch Purple Mash 2Code Kodu
Content links to previous learning

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing Vocabulary					
computer virus, cookies, copyright, digital footprint, email, identity theft, malware, phishing, plagiarism, spam, motherboard, CPU, RAM, Graphics Card, Network, Card, monitor, speakers keyboard and mouse	Pitch, rhythm, pulse, tempo, dynamics, melody, rippler, texture	Animation, background, frame, flipbook, onion skinning, stop motion, play, sound, video clip	Average, copy and paste, columns, cells, charts, equals tool, formula, formula wizard, move cell tool, random tool, rows, spin tool, spreadsheet, timer	Logo, BK, FD, RT, LT, REPEAT, SETPC, SETPS, PU, PD	Action, alert, algorithm, code design, control, command, debug/ debugging, design mode, event, flowchart bug, get input, If, If/Else, input, object, repeat, selection, computer simulation, simulation, timer, variable
Online Safety					
<p>Children understand the need for rules to keep them safe when exchanging ideas online. They understand that an adult needs to know what they are doing online and understand how to report concerns, including cyberbullying.</p> <p>Children recognise the need to choose age appropriate games to play on their devices, and when to limit use. They recognise the need to protect their devices from viruses.</p>	Copyright and ownership	<p>Self-image and identity</p> <p>Children understand that any personal information they put online can be seen and used by others. They recognise that they can use online tools to collaborate and communicate with others and the importance of doing this responsibly, choosing age-appropriate websites.</p> <p>Children recognise the effect their writing or images might have on others.</p>	<p>Keeping data safe</p> <p>Confidentiality</p>	<p>Copyright and ownership</p> <p>Managing online information</p>	Staying safe when gaming online

Year 5

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>To explain that computers can be connected together to form systems</p> <p>To recognise the role of computer systems in our lives</p> <p>To recognise how information is transferred over the internet</p> <p>To explain how sharing information online lets people in different places work together</p> <p>To contribute to a shared project online</p> <p>(NC) understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration.</p> <p>(NC) select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>	<p>To identify that drawing tools can be used to produce different outcomes</p> <p>To recognise that vector drawings consist of layers</p> <p>To recognise video as moving pictures, which can include audio</p> <p>To identify digital devices that can record video</p> <p>To recognise the features of an effective video</p> <p>To identify that video can be improved through reshooting and editing</p> <p>To explain that a loop can stop when a condition is met, eg number of times</p> <p>To conclude that a loop can be used to repeatedly check whether a condition has been met</p> <p>To explain how selection is used in computer programs</p> <p>(NC) select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>	<p>To evaluate my vector drawing</p> <p>To use tools to achieve a desired effect</p> <p>To create a vector drawing by combining shapes</p> <p>To group objects to make them easier to work with</p> <p>To design a physical project that includes selection</p> <p>To create a controllable system that includes selection</p> <p>To relate that a conditional statement connects a condition to an outcome</p> <p>To design a program which uses selection</p> <p>To create a program which uses selection</p> <p>To evaluate my program</p> <p>(NC) select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>To write a program that includes count-controlled loops To explain how selection directs the flow of a program</p> <p>(NC) design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts.</p> <p>(NC) use sequence, selection, and repetition in programs; work with variables and various forms of input and output.</p> <p>(NC) use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p>	<p>To consider the impact of the choices made when making and sharing a video</p>	<p>To evaluate different ways of working together online</p>	<p>To capture video using a digital device</p> <p>(NC) use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</p>

Suggested Key topics:

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing systems and networks – Sharing Information	Creating media – Vector Drawing	Creating Media – Video editing	Data and information – flat file databases	Programming A – Selection in Physical Computing	Programming B – Selection in quizzes
Computer Science Information Technology Digital Literacy	Computer Science Information Technology Digital Literacy	Collect Computer Science Connect Information Technology Digital Literacy	Collect Computer Science Information Technology Digital Literacy	Information Technology Digital Literacy Code	Information Technology Digital Literacy Code Collect
Suggested resources: Powerpoint (teaching and for students to create work) Online videos of Systems NCCE Lesson resources	Suggested resources: Google Drawings (docs.google.com/drawings/) Microsoft Publisher, or Microsoft PowerPoint Sketchbook (tablet/touchscreen app) Other paint tools	Suggested resources: IPad camera (files may need converting) Digital camera Movie Maker	Suggested resources: Excel Google sheets NCCE Lesson resources	Suggested resources: Crumble controller (hardware) Kodu or Scratch.mit (not physical – virtual alternative) NCCE Lesson resources	Suggested resources: Scratch.mit NCCE Lesson resources

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing Vocabulary					
system, hub, information, device, component, collaboration	Vector, shape, drawing, image, rotate, resize, colour, layer, effect, pixel	Video, moving images, sound / audio, camera, lens, record, zoom, angle / movement / pan, effects, transitions, edit	Spreadsheet, graph, chart, record, data, order, sort, field	Logic, command, input, output, variable, control, algorithm, program	Condition, outcome, flow, control, If..., else...
Online Safety					
Copyright and ownership	Using social media apps safely	Managing online information Online relationships Online reputation Self-image and identity	Trusted sources of data	Copyright and ownership	Staying safe when on different apps

Year 6

Substantive Knowledge:

Computer Science	Information Technology	Digital Literacy
<p>To construct a digital 3D model of a physical object design a digital model by combining 3D objects To develop and improve a digital 3D model To plan the features of a web page To define a 'variable' as something that is changeable To create a program to run on a controllable device</p> <p>(NC) use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs</p>	<p>To explain how search results are ranked To compare working digitally with 2D and 3D graphics To identify that physical objects can be broken down into a collection of 3D shapes To review an existing website and consider its structure To explain that objects can be described using data To explain why a variable is used in a program To explain that selection can control the flow of a program</p> <p>(NC) select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>	<p>To recognise why the order of results is important, and to whom To use a computer to create and manipulate three-dimensional (3D) digital objects To identify questions which can be answered using data To create a spreadsheet to plan an event To choose how to improve a game by using variables To design a project that uses inputs and outputs on a controllable device</p> <p>(NC) select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information</p>

Disciplinary Knowledge:

Code	Connect	Communicate	Collect
<p>To design a [variable game] project that builds on a given example To use my design to create a project To evaluate my project To update a variable with a user input To use an conditional statement to compare a variable to a value To develop a program to use inputs and outputs on a controllable device</p> <p>(NC) use sequence, selection, and repetition in programs; work with variables and various forms of input and output.</p> <p>(NC) use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs.</p>	<p>To identify how to use a search engine To consider the ownership and use of images (copyright)</p> <p>(NC) use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content.</p> <p>(NC) use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.</p>	<p>To recognise how we communicate using technology To recognise the need to preview pages To outline the need for a navigation path To recognise the implications of linking to content owned by other people To choose suitable ways to present data</p> <p>(NC) understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration.</p> <p>(NC) use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact</p>	<p>To describe how search engines select results To explain that formula can be used to produce calculated data To apply formulas to data, including duplicating</p>

Suggested Key topics:

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing systems and networks – Communication	Creating media – 3D modelling	Creating media – Web page creation	Data and information – spreadsheets	Programming A – Variables in game	Programming B – Sensing
Communicate Connect Information Technology Digital Literacy	Computer Science Information Technology Digital Literacy	Communicate Computer Science Code Information Technology Digital Literacy	Collect Information Technology Digital Literacy	Computer Science Information Technology Digital Literacy Code	Code Information Technology Digital Literacy Computer Science

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Computing Vocabulary					
Search, search engine, address bar, ranking, privacy, security	Physical, virtual, 2D / 3D, view / angle, manipulate, model	Website, web pages, page, address, link, HTML, fair use / copyright, home page	Spreadsheet, data set, row, column, format, calculation, formula, cell, chart / graph	Game, variable, control, input, score, algorithm	Input, process, sense, variable, data flow, device
Online Safety					
Managing online information	Privacy and security	Privacy	Trusted source of data	Time spent online / gaming	Staying safe when making friends online (thinking about transition to secondary)
Online reputation		Copyright			
Trusting content		Inappropriate content			

Impact:

Assessment

Primary assessment of Computing is expected to be mostly teacher assessment through observation in lessons and review of created content. More formal methods (such as tests) could be used where these suit the topic. Teachers may wish to use these attainment descriptors to inform their assessment and reporting (note: the skills cited below may be taught across various year-groups depending on topic, cohort, available resources, etc):

EYFS

There is no specific ELG for Technology following the September 2021 reforms. Practitioners *may* wish to consider children's readiness for the Year 1 Computing Curriculum by assessing the following:

- Children are beginning to be able to give and follow a precise set of instructions.
- Children can name some forms of technology used at home and in school.
- Children have had the opportunity to play with and explore codable toys.
- Children know what to do and who to tell if they see or hear something that worries them online.
- Children are able to interact with age-appropriate programs for painting and word processing.

KS1

Year Group	Key NC statement.	Working towards	Meeting	Exceeding
Year 1	Understand that programs execute by following precise and unambiguous instructions.	Working towards: Beginning to understand that programs execute by following precise and unambiguous instructions.	Meeting: Can understand that programs execute by following precise and unambiguous instructions.	Exceeding: Demonstrates a secure understanding that programs execute by following precise and unambiguous instructions.
	Create simple programs.	Working towards: Has started to create simple programs.	Meeting: Can create simple programs.	Exceeding: Can confidently create simple programs.
	Use technology safely and respectfully.	Working towards: Has started to use technology safely and respectfully.	Meeting: Can use technology safely and respectfully.	Exceeding: Can consistently use technology safely and respectfully.
	Keep personal information private when using technology.	Working towards: Is usually able to keep personal information private when using technology.	Meeting: Keeps personal information private when using technology.	Exceeding: Consistently keeps personal information private when using technology.
	Know to ask for help if they feel unsure about any online content.	Working towards: Beginning to know they should ask for help if they feel unsure about any online content or contact and who to ask.	Meeting: Knows they should ask for help if they feel unsure about any online content or contact and who to ask.	Exceeding: Asks for help if they feel unsure about any online content or contact.
Year 2	Understand what algorithms are and how they are implemented as programs on digital devices.	Working towards: Beginning to understand what algorithms are and how they are implemented as programs on digital devices.	Meeting: Can understand what algorithms are and how they are implemented as programs on digital devices.	Exceeding: Possesses a secure understanding of what algorithms are and how they are implemented as programs on digital devices.
	Debug simple programs.	Working towards: Has started to debug simple programs.	Meeting: Can debug simple programs.	Exceeding: Can debug simple programs with assurance.
	Use logical reasoning to predict the behaviour of simple programs.	Working towards: Has started to use logical reasoning to predict the behaviour of simple programs.	Meeting: Can use logical reasoning to predict the behaviour of simple programs.	Exceeding: Can readily use logical reasoning to predict the behaviour of simple programs.
	Describe common uses of information technology beyond school.	Working towards: Is usually able to describe common uses of information technology beyond school.	Meeting: Can describe common uses of information technology beyond school.	Exceeding: Can readily describe common uses of information technology beyond school.
	Use technology purposefully.	Working towards: Has started to use technology purposefully to create, organise, store, retrieve and manipulate digital content.	Meeting: Can use technology purposefully to create, organise, store, retrieve and manipulate digital content.	Exceeding: Can use technology purposefully to create, organise, store, retrieve and manipulate digital content.

LKS2

Year Group	Key NC statement.	Working towards	Meeting	Exceeding
Year 3	Design and create programs that use a sequence.	Working towards: Is sometimes able to design and create programs that use a sequence.	Meeting: Can design and create programs that use a sequence.	Exceeding: Can design and create programs that use a sequence with confidence.
	Control physical systems.	Working towards: Can often control physical systems.	Meeting: Can control physical systems.	Exceeding: Can confidently control physical systems.
	Use technology responsibly.	Working towards: Has started to use technology responsibly.	Meeting: Can use technology responsibly.	Exceeding: Can consistently use technology responsibly.
	Recognise acceptable / unacceptable behaviour and content.	Working towards: Can often recognise acceptable / unacceptable behaviour and content.	Meeting: Can recognise acceptable / unacceptable behaviour and content.	Exceeding: Can consistently recognise acceptable / unacceptable behaviour and content.
	Understand the opportunities computer networks offer for communication.	Working towards: Beginning to understand the opportunities computer networks offer for communication.	Meeting: Understands the opportunities computer networks offer for communication.	Exceeding: Possesses a secure understanding of the opportunities computer networks offer for communication.
	Collect and combine information and data.	Working towards: Beginning to collect and combine information and data.	Meeting: Can collect and combine information and data.	Exceeding: Can confidently collect and combine information and data.
Year 4	Design and debug programs that accomplish specific goals.	Working towards: Is usually able to design and debug programs that accomplish specific goals.	Meeting: Can design and debug programs that accomplish specific goals.	Exceeding: Can design and debug programs that accomplish specific goals with assurance.
	Use logical reasoning to detect and correct errors in programs.	Working towards: Has started to use logical reasoning to detect and correct errors in programs.	Meeting: Can use logical reasoning to detect and correct errors in programs.	Exceeding: Can use logical reasoning accurately to detect and correct errors in programs.
	Appreciate how search results are selected.	Working towards: Can often appreciate how search results are selected.	Meeting: Can appreciate how search results are selected.	Exceeding: Fully appreciates how search results are selected.
	Is selective when using digital content.	Working towards: Has started to be selective when using digital content.	Meeting: Is selective when using digital content.	Exceeding: Is consistently selective when using digital content.
	Understand how computer networks can provide multiple services.	Working towards: Beginning to understand how computer networks can provide multiple services, such as the world wide web.	Meeting: Understands how computer networks can provide multiple services, such as the world wide web.	Exceeding: Demonstrates a secure understanding of how computer networks can provide multiple services, such as the world wide web.
	Choose from a variety of software and internet services to accomplish given goals.	Working towards: Can often choose from a variety of software and internet services to accomplish given goals.	Meeting: Can choose from a variety of software and internet services to accomplish given goals.	Exceeding: Can readily choose from a variety of software and internet services to accomplish given goals.
	Design and create content to accomplish a given goal.	Working towards: Can often design and create content to accomplish a given goal.	Meeting: Can design and create content to accomplish a given goal.	Exceeding: Can readily design and create content to accomplish a given goal.

UKS2

Year Group	Key NC statement.	Working towards	Meeting	Exceeding
Year 5	Solve problems in writing programs by decomposing them into smaller parts.	Working towards: Is usually able to solve problems in writing programs by decomposing them into smaller parts.	Meeting: Can solve problems in writing programs by decomposing them into smaller parts.	Exceeding: Can confidently solve problems in writing programs by decomposing them into smaller parts.
	Understand the importance of using technology safely, respectfully and responsibly.	Working towards: Beginning to understand the importance of using technology safely, respectfully and responsibly.	Meeting: Can understand the importance of using technology safely, respectfully and responsibly.	Exceeding: Demonstrates a secure understanding of the importance of using technology safely, respectfully and responsibly.
	Explain how some simple algorithms work and detect and correct errors in them.	Working towards: Can sometimes use logical reasoning to explain how some simple algorithms work and detect and correct errors in them.	Meeting: Can use logical reasoning to explain how some simple algorithms work and detect and correct errors in them.	Exceeding: Can consistently use logical reasoning to explain how some simple algorithms work and detect and correct errors in them.
	Appreciate how search results are ranked.	Working towards: Can often appreciate how search results are ranked.	Meeting: Can appreciate how search results are ranked.	Exceeding: Fully appreciates how search results are ranked.
	Understand the basic workings of computer networks including the internet.	Working towards: Has started to understand the basic workings of computer networks including the internet.	Meeting: Understands the basic workings of computer networks including the internet.	Exceeding: Possesses a secure understanding of the basic workings of computer networks including the internet.
	Combine a variety of software to accomplish given goals on a range of digital devices.	Working towards: Is usually able to combine a variety of software to accomplish given goals on a range of digital devices.	Meeting: Can combine a variety of software to accomplish given goals on a range of digital devices.	Exceeding: Can confidently combine a variety of software to accomplish given goals on a range of digital devices.
Year 6	Work with variables.	Working towards: Can often work with variables.	Meeting: Can work with variables.	Exceeding: Can confidently work with variables.
	Use selection and repetition in programs.	Working towards: Can sometimes use selection and repetition in programs.	Meeting: Can use selection and repetition in programs.	Exceeding: Can use selection and repetition in programs with assurance.
	Simulate physical systems.	Working towards: Is sometimes able to simulate physical systems.	Meeting: Can simulate physical systems.	Exceeding: Can confidently simulate physical systems.
	Identify a range of ways to report concerns about content and contact.	Working towards: Can often identify a range of ways to report concerns about content and contact.	Meeting: Can identify a range of ways to report concerns about content and contact.	Exceeding: Can readily identify a range of ways to report concerns about content and contact.
	Evaluate digital content discerningly.	Working towards: Can sometimes be discerning in evaluating digital content.	Meeting: Is discerning in evaluating digital content.	Exceeding: Is consistently discerning in evaluating digital content.
	Understand the opportunities computer networks offer for collaboration.	Working towards: Has started to understand the opportunities computer networks offer for collaboration.	Meeting: Understands the opportunities computer networks offer for collaboration.	Exceeding: Demonstrates a secure understanding of the opportunities computer networks offer for collaboration.
	Analyse and evaluate information and data.	Working towards: Has started to analyse and evaluate information and data.	Meeting: Can analyse and evaluate information and data.	Exceeding: Can accurately analyse and evaluate information and data.
	Design and create systems that accomplish given goals.	Working towards: Can often design and create systems that accomplish given goals.	Meeting: Can design and create systems that accomplish given goals.	Exceeding: Can confidently design and create systems that accomplish given goals.

Key Stage 3

KEY

Substantive Concepts: **CS** Computer Science | **IT** Information Technology | **DL** Digital Literacy

Disciplinary Concepts:

Code	Using codes to produce instructions, logic and sequences.
Connect	Able to safely connect with others.
Communicate	Using apps and information technology to communicate one's ideas.
Collect	Creating and using data

Links: **&** Interdisciplinary << Previous >> Future

Note: [Education for a connected world](#) is published by the UK Council for Internet Safety. It appears here as it is delivered through PSHE by referenced by the NCEE in their learning resources.

Overview – Suggested Topics by Year / Term

Year Term	1	2	3	4	5	6
7	Working with Computers	Formatting & Sources of Information	Algorithms & Flowcharts	Scratch Game 1	Microbit	Networks
8	Ciphers & Codes	Cybersecurity	Scratch Game 2	Python Programming 1	Modelling & Data	Components of a PC
9	Data Representation 2	Data Science	Web Production	App Creation	Python Programming 2	Artificial Intelligence & Robots

Assessment

Time	Type	Purpose
Bi- Annual End of Terms 3, 6	<ul style="list-style-type: none"> Assignment marked by teacher, written feedback 	<ul style="list-style-type: none"> Checking student learning Provide individual feedback
Termly	<ul style="list-style-type: none"> Online Test Self-Reviewed Personal Learning Checklist 	<ul style="list-style-type: none"> Checking student learning Identify gaps of learning
Lesson by Lesson	<ul style="list-style-type: none"> Practice questions 	<ul style="list-style-type: none"> Class discussion and teacher targeted questioning.

Where we teach the National Curriculum at KS3

#	SC	National Curriculum Criteria <i>(*SC Substantive Concepts. NC items are numbered for reference)</i>	7-1	7-2	7-3	7-4	7-5	7-6	8-1	8-2	8-3	8-4	8-5	8-6	9-1	9-2	9-3	9-4	9-5	9-6
			Working with Computers	Formatting & Sources of Information	Algorithms & Flowcharts	Scratch Game 1	Microbit	Networks	Ciphers & Codes	Cybersecurity	Scratch Game 2	Python Programming 1	Modelling & Data	Components of a Computer System	Data Representation 2	Data Science	Web Production	App Creation	Python Programming 2	Artificial Intelligence & Robots
1	CS IT	Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems			Y		Y		Y			Y	Y			Y		Y	Y	Y
2	CS	Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem			Y	Y	Y		Y		Y	Y						Y	Y	
3	CS	Use 2 or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions				Y	Y				Y	Y					Y	Y	Y	
4	CS	Understand simple boolean logic [for example, and, or and not] and some of its uses in circuits and programming; understand how numbers can be represented in binary, and be able to carry out simple operations on binary numbers [for example, binary addition, and conversion between binary and decimal				Y					Y			Y	Y					
5	CS	Understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems	Y					Y						Y						Y
6	CS	Understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits					Y		Y			Y		Y					Y	
7	CS IT DL	Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users		Y									Y			Y	Y			Y
8	IT DL	Create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability	Y	Y		Y					Y						Y	Y		

9	IT DL	Understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct, and know how to report concerns	Y							Y

Year 7 Term 1: Working with Computers

NATIONAL CURRICULUM

- Create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
 - Understand a range of ways to use technology safely, respectfully, responsibly, and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct and know how to report concerns
-

SUBSTANTIVE CONCEPTS

INFORMATION
TECHNOLOGY

- Understand the rules of the computing lab
-

DIGITAL LITERACY

- Plan effective presentations for a given audience
 - Recognise a respectful email
 - Describe how to communicate with peers online
 - Explain the effects of cyberbullying
 - Construct an effective email and send it to the correct recipients
-

DISCIPLINARY CONCEPTS

CONNECT

- I can create an effective email
-

COMMUNICATE

- I can make positive contributions to the online community.
 - I can create a memorable and secure password for an account on the school network
 - I can find personal documents and common applications
 - I can recognise cyberbullying
 - I can check who I am talking to online
-

SUGGESTED RESOURCES

WMAT Computer Systems: Insight, Outlook, OneDrive, Folder. File Explorer | NCCE Lesson Plan, Activities, Worksheets at [Impact of technology – Collaborating online respectfully](#)

LINKS

& Education for a Connected World

<< Year 6, Term 1

>> Year 8, Term 1

VOCABULARY

Digital footprint, Email, Emoji, Login, Logout, Hazards, Cyber Bullying, Online identity, Presenting Information, Social Media

SAFETY

Cyberbullying, Tone, Online etiquette

Year 7 Term 2: Formatting & Sources of Information

NATIONAL CURRICULUM

- Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
 - Create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
-

SUBSTANTIVE CONCEPTS

	INFORMATION TECHNOLOGY	<ul style="list-style-type: none">• Select the most appropriate software to use to complete a task• Identify the key features of a word processor• Evaluate formatting techniques to understand why we format documents• Apply appropriate formatting techniques
	DIGITAL LITERACY	<ul style="list-style-type: none">• Critique digital content for credibility• Apply referencing techniques and understand the concept of plagiarism• Evaluate online sources for use in own work• Design the layout of the content to make it suitable for the audience

DISCIPLINARY CONCEPTS

	COMMUNICATE	<ul style="list-style-type: none">• I can apply techniques in order to identify whether or not a source is credible• I can question the accuracy and veracity of sources of information
	COLLECT	<ul style="list-style-type: none">• I can apply the key features of a word processor to format a document• I can select appropriate images for a given context• I can demonstrate an understanding of licensing issues involving online content by applying appropriate Creative Commons licences• I can demonstrate the ability to credit the original source of an image

SUGGESTED RESOURCES	NCCE Lesson Plan, Activities, Worksheets at Using media – Gaining support for a cause
LINKS	& Education for a Connected World << Year 5, Term 4 >> Year 9, Term 2
VOCABULARY	Fake News
SAFETY	Spotting Phishing scams

Year 7 Term 3: Algorithms & Flowcharts

NATIONAL CURRICULUM

- Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
 - Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
-

SUBSTANTIVE CONCEPTS

-  COMPUTER SCIENCE
 - Describe the inputs and outputs into the problem?
 - Articulate what order do instructions need to be carried out?
 - Define the difference between serial search and binary search, bubble sort and bucket sort
 - Recognise how algorithms are important in programming, saving time and improving accuracy
 - Recognise Pseudocode and its link between programming and English written instruction
-

DISCIPLINARY CONCEPTS

-  CODE
 - Construct algorithms based on simple day to day actions
 - Perform the drawing of a shape using an algorithm
 -  COMMUNICATE
 - Produce step-by-step instructions for a login system using a flowchart
 - Evaluate basic algorithm on feedback from peers
-

SUGGESTED RESOURCES

[BBC Bitesize](#) |

LINKS

<< Year 9, Term 4 >> GCSE P2

VOCABULARY

logical thinking, decomposition, algorithm, step-by-step, pseudocode, flowchart, Searching, Sorting, Sequencing, Selection, Iteration, Logical reasoning

SAFETY

Year 7 Term 4: Introduction to Secondary Scratch

NATIONAL CURRICULUM

- Use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures (e.g. lists, tables, or arrays); design and develop modular programs that use procedures or functions
- Understand several key algorithms that reflect computational thinking; use logical reasoning to compare the utility of alternative algorithms for the same problem
- Understand simple Boolean logic (e.g. and, or, and not)
- Create, reuse, revise, and repurpose digital artefacts for a given audience, with attention to trustworthiness, design, and usability

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none">• Compare how humans and computers understand instructions (understand and carry out)• Define a sequence as instructions performed in order, with each executed in turn• Define a condition as an expression that will be evaluated as either true or false• Recognise that computers follow the control flow of input/process/output• Create conditions that use comparison operators (>,<=) and logic operators (and/or/not)• Describe the need for iteration and define it as a group of instructions that are repeatedly executed
	DIGITAL LITERACY	<ul style="list-style-type: none">• Making a basic game using programming concepts

DISCIPLINARY CONCEPTS

	CODE	<ul style="list-style-type: none">• I can modify a sequence and a program to include selection• I can define a variable as a name that refers to data being stored by the computer• I can predict the outcome of a simple sequence that includes variables• I can trace the values of variables within a sequence• I can make a sequence that includes a variable• I can identify where count-controlled iteration can be used in a program• I can detect and correct errors in a program (debugging)
	COMMUNICATE	<ul style="list-style-type: none">• I can create a game for others to play

SUGGESTED RESOURCES

Scratch | NCCE Lesson Plan, Activities, Worksheets at [Programming essentials in Scratch – part 1](#)

LINKS

[& Maths](#) << Year 5, Term 6 >> Year 8, Term 2

VOCABULARY

flow, subroutine, selection, count-controlled iteration, operators, and variables, modify, sequence, selection, count-controlled iteration, debugging, conditions, comparison operators (>,<=), logic operators (and/or/not)

SAFETY

Opening files from the Internet, Danger of macros and exes, Malware

Year 7 Term 5: Microbit

NATIONAL CURRICULUM

- Use two or more programming languages, at least one of which is textual, to solve a variety of computational problems
- Understand several key algorithms that reflect computational thinking; use logical reasoning to compare the utility of alternative algorithms for the same problem
- Understand how instructions are stored and executed within a computer system
- Design, use, and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems

Design and technology programmes of study: key stage 3

- Apply computing and use electronics to embed intelligence in products that respond to inputs [for example, sensors], and control outputs [for example, actuators], using programmable components [for example, microcontrollers].

SUBSTANTIVE CONCEPTS

- | | | |
|--|-------------------------|--|
| | COMPUTER SCIENCE | <ul style="list-style-type: none">• List the micro:bit's input and output devices• Write programs that use the micro:bit's built-in input and output devices• Write programs that use GPIO pins to generate output and receive input• Write programs that communicate with other devices by sending and receiving messages wirelessly• Decompose the functionality of a physical computing system into simpler features• Implement a physical computing project, while following, revising, and refining the project plan |
|--|-------------------------|--|

DISCIPLINARY CONCEPTS

- | | | |
|--|----------------|---|
| | CODE | <ul style="list-style-type: none">• I can set up a development environment to write, execute, and debug a Python program for the micro:bit• I can write as simple program to run on the microbit |
| | CONNECT | <ul style="list-style-type: none">• I can design a physical computing artifact purposefully, keeping in mind the problem at hand, the needs of the audience involved, and the available resources |

SUGGESTED RESOURCES Microbit and/or python.microbit.org | NCCE Lesson Plan, Activities, Worksheets at [Physical computing](#)

LINKS & Design and technology << Year 5, Term 5 >> Year 8, Term 1

VOCABULARY Sensors, GPIO, Input, Output

SAFETY Physical Hazards

Year 7 Term 6: Networks

NATIONAL CURRICULUM

- Understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems
- Understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct, and know how to report concerns

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none"> • Define what a computer network is and explain how data is transmitted between computers across networks
	INFORMATION TECHNOLOGY	<ul style="list-style-type: none"> • Define what the internet is • Describe key words such as 'bandwidth', 'protocols', 'packets', and 'addressing' • Describe how internet-connected devices can affect me • Describe how services are provided over the internet
	DIGITAL LITERACY	<ul style="list-style-type: none"> • Be able to protect your online identity • Recognise inappropriate content • How to report concerns

DISCIPLINARY CONCEPTS

	CONNECT	<ul style="list-style-type: none"> • I can compare wired to wireless connections • I can identify network hardware components • I can describe components (servers, browsers, pages, HTTP and HTTPS protocols, etc.) • I can measure the rate at which data is transmitted and discuss familiar examples where bandwidth is important
	COMMUNICATE	<ul style="list-style-type: none"> • I can explain the term 'connectivity' to collect and share information about me with or without my knowledge

SUGGESTED RESOURCES

NCCE Lesson Plan, Activities, Worksheets at [Networks from semaphores to the Internet](#)

LINKS

& Education for a Connected World, Maths << Year 5, Term 1 >> Year 8, Term 1

VOCABULARY

Network, protocol, mainframe, personal computer, stand-alone, HTTP, Network cable, hub, server, router, ISP, Wired, wireless, 3G, 4G, 5G, WiFi, bandwidth, bit, megabit, gigabit, broadband, buffering, Internet, World Wide Web, WWW, internet services, email, Voice over Internet Protocol (VoIP), Internet of Things (IoT), spam, privacy, security, web browser, web server, web page, search engine, HTTPS, URL, domain name, domain name system

SAFETY

Shoulder Surfing, Virus Threats, Safe WIFI connections, Browser Vulnerabilities, HTTP

Year 8 Term 1: Ciphers & Codes

NATIONAL CURRICULUM

- Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
- Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
- Understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none">• Apply the principles of encryption and decryption in the classroom• Understand the way computers interpret characters through Unicode, ASCII, hexadecimal and binary
	INFORMATION TECHNOLOGY	<ul style="list-style-type: none">• Realise the need for individuals to use encryption• Be able to discuss the benefits and drawbacks of governments and other organisations having access to individuals data• Give examples of how encryption and decryption has benefited society• Determine the type of encryption used for different types of scenarios
	DIGITAL LITERACY	<ul style="list-style-type: none">• Recognise how encryption impacts your day-to-day life

DISCIPLINARY CONCEPTS

	CODE	<ul style="list-style-type: none">• I can perform conversion between hexadecimal and binary to integers• I can encrypt basic codes• I can encrypt substitution codes• I can explain how Vernam ciphers work• I can demonstrate the means of using public and private keys• I can use different codes to encrypt and decrypt code
---	------	---

SUGGESTED RESOURCES

[BBC Bitesize](#) [Bletchley Park](#)

LINKS

& Maths >> Year 9, Term 5

VOCABULARY

Binary, Hexadecimal, Cipher, Substitute, Encrypt, Decrypt, Morse Code, Vernam, Public Key, Private Key, End-to-end

SAFETY

HTTPS, using unsecure channels of communication

Year 8 Term 2: Cybersecurity

NATIONAL CURRICULUM

- Understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct, and know how to report concerns
-

SUBSTANTIVE CONCEPTS

INFORMATION TECHNOLOGY	<ul style="list-style-type: none">• Critique online services in relation to data privacy• Question how malicious bots can have an impact on societal issues
	DIGITAL LITERACY

DISCIPLINARY CONCEPTS

CONNECT	<ul style="list-style-type: none">• I can explain the difference between data and information• I can explain the need for the Computer Misuse Act and Data Protection Act• I can identify the most effective methods to prevent cyberattacks• I can identify strategies to reduce the chance of a brute force attack being successful• I can describe how different types of malware causes problems for computer systems• I can explain how networks can be protected from common security threats
---------	--

SUGGESTED RESOURCES <https://threatmap.checkpoint.com/> | NCE Lesson Plan, Activities, Worksheets at [Cybersecurity](#)

VOCABULARY Anti-virus, Blagging, CAPTCHA, Ethical hackers, Firewall, Hacking, Installing a firewall, Penetration testers, Phishing, Ransomware, Shouldering, Social engineering, Spam, System administrators, The Computer Misuse Act, The Copyright, Designs, and Patents Act ,The Data Protection Act, The Freedom of Information Act, Trojans, Two-factor authentication, User permissions, Viruses, Worms

SAFETY Implicit throughout

Year 8 Term 3: Scratch Game 2

NATIONAL CURRICULUM

- To use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; to make appropriate use of data structures (for example, lists, tables, or arrays); to design and develop modular programs that use procedures or functions
 - To understand several key algorithms that reflect computational thinking; use logical reasoning to compare the utility of alternative algorithms for the same problem
 - To understand simple Boolean logic (for example, AND, OR, and NOT)
 - To create, reuse, revise, and repurpose digital artefacts for a given audience, with attention to trustworthiness, design, and usability
-

SUBSTANTIVE CONCEPTS

- | | | |
|--|-------------------------|--|
| | COMPUTER SCIENCE | <ul style="list-style-type: none">• Define decomposition as breaking a problem down into smaller, more manageable subproblems• Identify how subroutines can be used for decomposition• Define a subroutine as a group of instructions that will run when called by the main program or other subroutines• Evaluate which type of iteration is required in a program• Define a list as a collection of related elements that are referred to by a single name |
|--|-------------------------|--|
-

DISCIPLINARY CONCEPTS

- | | | |
|--|-------------|--|
| | CODE | <ul style="list-style-type: none">• I can identify when lists can be used in a program and use them• I can decompose a larger problem into smaller subproblems• I can apply appropriate constructs to solve a problem• I can identify where condition-controlled iteration can be used in a program and implement its use |
|--|-------------|--|
-

SUGGESTED RESOURCES

Scratch | NCE Lesson Plan, Activities, Worksheets at [Programming essentials in Scratch – part II](#)

LINKS

& Maths << Year 7, Term 4 >> Year 9, Term 4

VOCABULARY

Decomposition, Subroutines, Condition-controlled iteration, Lists, Tables, Arrays, Problem solving, Boolean logic - AND, OR, and NOT

SAFETY

Opening files from the Internet, Danger of macros and exes, Malware

Year 8 Term 4: Python Programming 1

NATIONAL CURRICULUM

- Use 2 or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions
 - Understand how instructions are stored and executed within a computer system;
 - Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
 - Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
-

SUBSTANTIVE CONCEPTS

COMPUTER SCIENCE

- Describe what algorithms and programs are and how they differ
 - Recall that a program written in a programming language needs to be translated in order to be executed by a machine
 - Describe the semantics of assignment statements
 - Use simple arithmetic expressions in assignment statements to calculate values
 - Generate and use random integers
 - Use multi-branch selection (if, elif, else statements) to control the flow of program execution
 - Describe how iteration (while statements) controls the flow of program execution
 - Combine iteration and selection to control the flow of program execution
 - Use Boolean variables as flags
-

DISCIPLINARY CONCEPTS

CODE

- I can write simple Python programs that display messages, assign values to variables, and receive keyboard input
 - I can locate and correct common syntax errors
 - I can use iteration (while loops) to control the flow of program execution
 - I can use variables as counters in iterative programs
 - I can use relational operators to form logical expressions
 - I can use binary selection (if, else statements) to control the flow of program execution
 - I can receive input from the keyboard and convert it to a numerical value
-

SUGGESTED RESOURCES

Repl.it or similar IDE | NCCE Lesson Plan, Activities, Worksheets at [Introduction to Python programming](#)

LINKS

<< Year 6, Term 6 Year 7, Term 4

>> Year 9, Term 4

VOCABULARY

SAFETY

Year 8 Term 5: Modelling & Data

NATIONAL CURRICULUM

- Design, use, and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
 - Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
-

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none">• Use formulas and functions to perform calculations
	INFORMATION TECHNOLOGY	<ul style="list-style-type: none">• Explain the difference between data and information• Explain the difference between primary and secondary sources of data• Analyse data• Collect data• Create appropriate charts in a spreadsheet

DISCIPLINARY CONCEPTS

	CODE	<ul style="list-style-type: none">• I can use cell references, format data, autofill• I can implement conditional formatting• I can create formulas for add, subtract, divide, and multiply• I can create functions for SUM, COUNTA, AVERAGE, MIN, MAX, COUNTIF
	COMMUNICATE	<ul style="list-style-type: none">• I can create graphs and charts
	COLLECT	<ul style="list-style-type: none">• I can collect, sort and filter data

SUGGESTED RESOURCES Microsoft Excel, Google Sheets | NCCE Lesson Plan, Activities, Worksheets at [Modelling data – Spreadsheets](#)

LINKS & Maths << Year 6, Term 4 >> Year 9, Term 2

VOCABULARY +, -, *, /, columns, rows, cells, formatting, formulas, autofill, graphs, SUM, COUNTA, AVERAGE, MIN, MAX, COUNTIF

SAFETY Misinformation through graphs

Year 8 Term 6: Components of a Computer System

NATIONAL CURRICULUM

- Understand simple Boolean logic [for example, AND, OR and NOT] and some of its uses in circuits and programming
 - Understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems
 - Understand how instructions are stored and executed within a computer system
-

SUBSTANTIVE CONCEPTS

- 
- COMPUTER SCIENCE
- Analyse how the hardware components used in computing systems work together in order to execute programs
 - Recall that a general-purpose computing system is a device for executing programs
 - Recall that a program is a sequence of instructions that specify operations that are to be performed on data
 - Explain the difference between a general-purpose computing system and a purpose-built device
 - Recall that all computing systems, regardless of form, have a similar structure ('architecture')
 - Describe how hardware is built out of increasingly complex logic circuits
 - Describe the steps involved in training machines to perform tasks (gathering data, training, testing)
-

DISCIPLINARY CONCEPTS

- 
- CODE
- I can describe the function of the hardware components used in computing systems
 - I can describe how the hardware components used in computing systems work together in order to execute programs
 - I can define what an operating system is, and recall its role in controlling program execution
 - I can describe the NOT, AND, and OR logical operators, and how they are used to form logical expressions
 - I can use logic gates to construct logic circuits, and associate these with logical operators and expressions
 - I can recall that, since hardware is built out of logic circuits, data and instructions alike need to be represented using binary digits
 - I can explain the implications of sharing program code
-

SUGGESTED RESOURCES NCCE Lesson Plan, Activities, Worksheets at [Computing systems](#)

LINKS << Year 7, Term 1 >> GCSE P1

VOCABULARY hardware, software, programs, executing, sequence, general-purpose, embedded system, architecture, logic circuits, training machines, testing, NOT, AND, OR, expressions, operators, binary, digits

SAFETY

Year 9 Term 1: Data Representation 2

NATIONAL CURRICULUM

- Understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits
-

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none">• Recall that the colour of each picture element is represented using a sequence of binary digits• Define key terms such as 'pixels', 'resolution', and 'colour depth'• Explain the function of microphones and speakers as components that capture and generate sound• Recall that sound is a wave• Explain how the manipulation of digital images amounts to arithmetic operations on their digital representation• Explain how attributes such as sampling frequency and sample size affect characteristics such as representation size and perceived quality, and the trade-offs involved• Recall that bitmap images and pulse code sound are not the only binary representations of images and sound available (Vectors, MIDI)• Describe how digital images are composed of individual elements and can be represented as a sequence of bits
--	------------------	--

DISCIPLINARY CONCEPTS

	CODE	<ul style="list-style-type: none">• I can perform basic image and sound editing tasks using appropriate software and combine them in order to solve more complex problems requiring image and sound manipulation• I can define key terms such as 'sample', 'sampling frequency/rate', 'sample size'• I can compute the representation size of a digital image, by multiplying resolution (number of pixels) with colour depth (number of bits used to represent the colour of individual pixels)• I can calculate representation size for a given digital sound, given its attributes• I can describe the trade-off between representation size and perceived quality for digital images• I can define 'compression', and describe why it is necessary
	COMMUNICATE	<ul style="list-style-type: none">• I can describe and assess the creative benefits and ethical drawbacks of digital manipulation

SUGGESTED RESOURCES GIMP, Audacity, Fireworks | NCCE Lesson Plan, Activities, Worksheets at [Representations – going audiovisual](#)

LINKS & Maths << Year 4, Term 2 & 3 >> GCSE P1

VOCABULARY Bit Depth, Bitmap, Binary, Capture, Colour Depth, Compression, Conversion, Digitised, File Size, GIF, JPG, Manipulation, MIDI, Mosaic, Pixel, Pulse, Resolution, Sampling Rate, Sample Size, Vector

SAFETY Image, sound, video manipulation, fake news

Year 9 Term 2: Data Science

NATIONAL CURRICULUM

- Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
 - Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
-

SUBSTANTIVE CONCEPTS

	INFORMATION TECHNOLOGY	<ul style="list-style-type: none">• Explain how visualising data can help identify patterns and trends in order to help us gain insights• Use an appropriate software tool to visualise data sets and look for patterns or trends
	 DIGITAL LITERACY	<ul style="list-style-type: none">• Recognise examples of where large data sets are used in daily life• Select criteria and use data set to investigate predictions• Define the terms 'correlation' and 'outliers' in relation to data trends• Identify the steps of the investigative cycle• Describe the need for data cleansing• Analyse visualisations to identify patterns, trends, and outliers

DISCIPLINARY CONCEPTS

	CONNECT	<ul style="list-style-type: none">• I can define data science• I can identify the steps of the investigative cycle and can solve a problem by implementing steps of the investigative cycle on a data set• I can identify the data needed to answer a question defined by the learner• I can use findings to support a recommendation, draw conclusions and report findings• I can evaluate findings to support arguments for or against a prediction• I can visualise a data set
	 COLLECT	<ul style="list-style-type: none">• I can apply data cleansing techniques to a data set• I can create a data capture form

SUGGESTED RESOURCES NCCE Lesson Plan, Activities, Worksheets at [Data science](#)

LINKS & Maths << Year 7, Term 3

VOCABULARY Accessible, Analysis, Axis, Cleanse, Conclusion, Correlation, Data, Data science, Graph, Infographic, Outlier, Plan, Problem, Trend, Visualisation

Year 9 Term 3: Web Production

NATIONAL CURRICULUM

- Undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
 - Create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
 - Use 2 or more programming languages, to solve a variety of computational problems
-

SUBSTANTIVE CONCEPTS

	COMPUTER SCIENCE	<ul style="list-style-type: none">• Modify HTML tags using inline styling to improve the appearance of web pages• Assess the benefits of using CSS to style pages instead of in-line formatting• Recognise how JavaScript can add functionality to a webpage
	DIGITAL LITERACY	<ul style="list-style-type: none">• Discuss the impact of search technologies and the issues that arise by the way they function and the way they are used• Use search technologies effectively• Describe what a search engine is• Explain how search engines 'crawl' through the World Wide Web and how they select and rank results

DISCIPLINARY CONCEPTS

	CODE	<ul style="list-style-type: none">• I can code a webpage using HTML
	CONNECT	<ul style="list-style-type: none">• I can create hyperlinks to allow users to navigate between multiple web pages
	COMMUNICATE	<ul style="list-style-type: none">• I can recognise different types of navigation on websites• I can use CSS to style a webpage• I can use JavaScript to add functionality to a webpage• I can make a functioning website using HTML, CSS & JavaScript to communicate a topic
	COLLECT	<ul style="list-style-type: none">• I can perform different types of search based on operators• I can describe how webpages are searched and ranked

SUGGESTED RESOURCES Notepad, Notepad ++, Dreamweaver | NCE Lesson Plan, Activities, Worksheets at [Developing for the web](#)

LINKS & Education for a Connected World << Year 6, Term 3

VOCABULARY Tags, Navigation, Links, HTML, CSS, Javascript, Forms

SAFETY Security Threats, Giving information online, trust, HTTPS

Year 9 Term 4: App Creation

NATIONAL CURRICULUM

- Design, use, and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
 - Use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables, or arrays]; design and develop modular programs that use procedures or functions
 - Understand several key algorithms that reflect computational thinking; use logical reasoning to compare the utility of alternative algorithms for the same problem
 - Create, reuse, revise, and repurpose digital artefacts for a given audience, with attention to trustworthiness, design, and usability
-

SUBSTANTIVE CONCEPTS

- | | | |
|--|-------------------------|--|
| | COMPUTER SCIENCE | <ul style="list-style-type: none">• Identify when a problem needs to be broken down• Implement and customise GUI elements to meet the needs of the user• Recognise that events can control the flow of a program• Use user input in an event-driven programming environment and in a block-based programming language• Use variables in an event-driven programming environment and in a block-based programming language• Develop a partially complete application to include additional functionality |
|--|-------------------------|--|
-

DISCIPLINARY CONCEPTS

- | | | |
|--|----------------|---|
| | CODE | <ul style="list-style-type: none">• Use a block-based programming language to create a sequence and to include sequencing and selection• Identify and fix common coding errors• Pass the value of a variable into an object |
| | COLLECT | <ul style="list-style-type: none">• Establish user needs when completing a creative project• Reflect and react to user feedback• Evaluate the success of the programming project• Apply decomposition to break down a large problem into more manageable steps |
-

LINKS & Education for a Connected World

VOCABULARY Design, Usability, Interface, Syntax, Logic, Debugging, Modify, Sequence, Selection, Iteration, Input, Controls

SAFETY Sharing information, data harvesting, in-app purchases

Year 9 Term 5: Python Programming 2

NATIONAL CURRICULUM

- Use 2 or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions
 - Understand how instructions are stored and executed within a computer system;
 - Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
 - Design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
-

SUBSTANTIVE CONCEPTS

COMPUTER SCIENCE

- Recall if-elif-else statement, while statements, for statements, loops
 - Combine key programming language features to develop solutions to meaningful problems
 - Selection (if-elif-else statements) to control the flow of program execution
 - Iteration (while statements) to control the flow of program execution, (for statements) to iterate over list items, (for loops) to iterate over lists and strings
 - Use variables to keep track of counts and sums
-

DISCIPLINARY CONCEPTS

CODE

- I can write programs that display messages, receive keyboard input, and use simple arithmetic expressions in assignment statements
 - I can locate and correct common syntax errors
 - I can create lists and access individual list items
 - I can perform common operations on lists or individual items
 - I can perform common operations on strings or individual characters
-

Privacy, Ethics of automation

Key Stage 4 – GCSE Computer Science

Intent

KS4 offers GCSE Computer Science (OCR J277). Substantive content and focus is almost entirely computer science and the disciplinary work has an emphasis centred largely on code and programming. The GCSE builds on principles and skills from Key Stage 3 in greater depth.

National Curriculum Key stage 4

All pupils must have the opportunity to study aspects of information technology and computer science at sufficient depth to allow them to progress to higher levels of study or to a professional career.

All pupils should be taught to:

- develop their capability, creativity and knowledge in computer science, digital media and information technology
- develop and apply their analytic, problem-solving, design, and computational thinking skills
- understand how changes in technology affect safety, including new ways to protect their online privacy and identity, and how to report a range of concerns

The National Centre for Computing Education maps the previous specification (valid only for Year 12 during 2020-21) to the National Curriculum.

KS4 Intent

From OCR:

The qualification will build on the knowledge, understanding and skills established through the Computer Science elements of the Key Stage 3 programme of study. The content has been designed not only to allow for a solid basis of understanding but to engage learners and get them thinking about real world application.

OCR's GCSE (9–1) in Computer Science will encourage learners to:

- understand and apply the fundamental principles and concepts of Computer Science, including abstraction, decomposition, logic, algorithms, and data representation
- analyse problems in computational terms through practical experience of solving such problems, including designing, writing and debugging programs
- think creatively, innovatively, analytically, logically and critically
- understand the components that make up digital systems, and how they communicate with one another and with other systems
- understand the impacts of digital technology to the individual and to wider society
- apply mathematical skills relevant to Computer Science.

Content & Assessment

Formal Assessment

The course has 2 examined paper both worth 50% and a compulsory non-examined assessment worth 0%

<p>Paper 1 'Computer Systems' focuses on</p> <ul style="list-style-type: none"> • Systems Architecture • Memory • Storage • Wired and wireless networks • Network topologies, protocols and layers • System security • System software • Ethical, legal, cultural and environmental concerns 	<p>Paper 2 – 'Computational thinking, algorithms and programming' focuses on:</p> <ul style="list-style-type: none"> • Algorithms • Programming techniques • Producing robust programs • Computational logic • Translators and facilities of languages • Data representation
--	--

Ongoing Assessment

Time	Type	Purpose
Bi- Annual	Year 10 – Mock – June Year 11 Paper 1 – November Year 11 Paper 2 - March	Testing knowledge, understanding and skills under exam conditions. Provides a measure of progress to date. Student answers are fed into a personal learning checklist which then is given to students. Students can view the learning objectives that they need to focus on and refer to a learning links document with links to online sources of information.
Termly/ Twice a term	Online Test Assignment marked by teacher, written feedback	Checking student learning. Assignments provide individual feedback.
Lesson by Lesson	Practice questions	Class discussion and teacher targeted questioning.
Late Year 10	Programming Project	Compulsory – centre assigned, not an NEA

Overview - Topics by Year / Term

Term	Year 10	Year 11

Key Stage 5

Intent

From the examination board:

The OCR A Level in Computer Science will encourage learners to be inspired, motivated and challenged by following a broad, coherent, practical, satisfying and worthwhile course of study. It will provide insight into, and experience of how computer science works, stimulating learners' curiosity and encouraging them to engage with computer science in their everyday lives.

KS5 offers A Level Computer Science (OCR H446). Substantive content and focus is almost entirely computer science and the disciplinary work has an emphasis centred largely on code and programming. The A Level builds on principles and skills from the GCSE in greater depth so knowledge links frequently refer back to key stage 4

Content & Assessment

<p>Paper 1 Examination 40%</p> <ul style="list-style-type: none"> • Characteristics of processors, input, output and storage devices • Software and software development • Exchanging data • Data types, data structures and algorithms • Legal, moral, cultural and ethical issues 	<p>Paper 2 Examination 40%</p> <ul style="list-style-type: none"> • Elements of computational thinking • Problem solving and programming • Algorithms to solve problems and standard algorithms 	<p>NEA Internally marked, Externally moderated 20%</p> <ul style="list-style-type: none"> • Programming Project

Futura Design Technology

Curriculum Framework

Design Technology Curriculum Framework

Intent:

Our DT Curriculum aims to equip students with the knowledge, skills and attitudes they need to become successful, innovative young designers and makers.

By building on prior experience, students progressively develop technical skills and practical expertise. They are encouraged to think creatively, imaginatively and be ambitious in their design ideas. They are given opportunities to solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants and values. They learn to recognise the importance of design and technology in the real world and its relevance in everyday life. They are given opportunities to learn about and be inspired by designs and designers past and present who have impacted on life across the world.

Through the design, make, evaluate process, students are guided to develop skills of team work, communication, resilience and reflectiveness through problem solving. They learn to use knowledge and understanding from other curriculum areas including mathematical, scientific, computing and art skills, applying them in relevant and practical contexts. In this way, we aspire for our students to become articulate, dynamic thinkers able to approaching new challenges with confidence and enthusiasm

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive and disciplinary concepts**

In order to recognise the different areas with DT, the document covers:

P3 Primary Product Design

P24 Primary Textiles

P27 Primary Food

P33 Secondary Design Technology (Product Design and Textiles)

P45 Secondary Art Textiles

P49 Secondary Food

P54 KS4 Hospitality & Catering

P60 KS5 Product Design

Primary Product Design

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are **playing and exploring** - children investigate and experience things, and 'have a go'; **active learning** - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; **creating and thinking critically** - children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (**PSE, CL, PD**) underpin and are an integral part of children's learning in all areas.

Range 6: Physical Development: Uses simple tools to effect changes to materials; Handles tools, objects, construction and malleable materials safely and with increasing control and intention

Range 6: Expressive Arts and Design: Uses their increasing knowledge and understanding of tools and materials to explore their interests and enquiries and develop their thinking; Develops their own ideas through experimentation with diverse materials, e.g. light, projected image, loose parts, watercolours, powder paint, to express and communicate their discoveries and understanding

ELG: Physical Development: Fine Motor Skills: Use a range of small tools, including scissors, paintbrushes and cutlery.

ELG: Expressive Arts and Design: Creating with Materials: Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function; Share their creations, explaining the process they have used.

EYFS DT Skills

Design	Make	Evaluate	Technical Knowledge
Opportunities for children to design things as part of provision or adult-led task.	Many opportunities in the EYFS classroom for making. Questioning by adults about the process.	Achieved through questioning by adults.	Quality interactions with adults in the classroom when making and the use of questioning and modelling.

First-hand experiences and pupil offer:

DT at Foundation Stage is introduced through some adult-led and some child-led activities. There are always opportunities for children to design and make through the continuous provision in the classroom. Some food-making activities are introduced through adult-led tasks.

The first-hand experiences children should be offered are:

- Opportunities for making within the provision – could be construction, junk-modelling, artwork, etc.
- Some adult set tasks centred around making and/or designing.
- Opportunities to make food for a purpose with an adult.
- Questioning by adults is focussed on the process children used to make, what they would do differently next time.

Year Group	Substantive Knowledge	Disciplinary Knowledge
EYFS	<p><u>Designing</u> Explore the sensory qualities of materials Begin to use the language of designing and making, e.g. join, build and shape.</p> <p><u>Making:</u> To learn to construct with a purpose in mind. To learn how to use a range of tools, e.g. scissors, hole punch, stapler, woodworking tools, rolling pins, pastry cutters. Children have basic hygiene awareness.</p> <p><u>Analysing and Evaluating</u> Learning about planning and adapting initial ideas to make them better. Begin to talk about changes made during the making process, e.g. making a decision to use a different joining method. Understanding the World</p>	<p><u>Designing</u> Expressive arts and design – Being imaginative Children use what they have learnt about media and materials in original ways, thinking about uses and purposes. They represent their own ideas, thoughts and feelings through design and technology.</p> <p><u>Making</u> Expressive arts and design – Exploring media and materials Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form, and function; - Share their creations, explaining the process they have used</p> <p><u>Analysing and Evaluating</u> Understanding the World</p> <p>https://content.twinkl.co.uk/resource/8b/d2/t-tp-2548814-learning-in-eyfs-what-dt-subject-leaders-need-to-know_ver_4.pdf?_token=exp=1611657971~acl=%2Fresource%2F8b%2Fd2%2Ft-tp-2548814-learning-in-eyfs-what-dt-subject-leaders-need-to-know_ver_4.pdf%2A~hmac=8e440df37445db352b9ef95cfd9c5357520d0a3824209a521f62b03a71af69ce</p>
	Substantive Knowledge	Disciplinary Knowledge
<u>DESIGNING</u>		
KS1	<p>Technical Knowledge in Year 1: Learn about what healthy foods are and where some come from. Think of interesting ways to decorate food that I have made.</p> <p>Technical Knowledge in Year 2: Learn about what healthy foods are and where they come from.</p>	<p><u>Year 1:</u> Pupils can be given an idea and know what to do. Describe my design using pictures. Follow a design criteria.</p> <p><u>Year 2:</u> Children can think of their own ideas and explain what they want to do. Describe their design using pictures, model mock-ups and words. Make their own simple design criteria, using a simple design brief.</p>

	<p>Think of interesting ways to decorate food that I have made thinking of what would be best for the person eating it.</p> <p><u>Understanding contexts, users and purposes</u> State what products they are designing and making</p> <p>Begin to understand the needs of users other than themselves.</p> <p>Generate and talk about ideas by handling materials and components – handling, investigating and disassembling.</p> <p>Learn to use and respond to simple design criteria to help develop their ideas.</p> <p><u>Generating, developing, modelling and communicating ideas</u> Generate ideas by drawing on their own experiences Use knowledge of existing products to help come up with ideas Model ideas by exploring materials, components and construction kits and by making templates and mock-ups Use information and communication technology, where appropriate, to develop and communicate their ideas.</p>	<p><u>Understanding contexts, users and purposes</u> Work confidently within a range of contexts, such as imaginary, story-based, home, school and gardens. Be able to say whether their products are for themselves or other users. Describe what their products are for. Be able to say how their products will work. Be able to say how they will make their products suitable for their intended users.</p> <p><u>Generating, developing, modelling and communicating ideas</u> Develop and communicate ideas verbally and through labelled drawings.</p>
<u>MAKING</u>		
	<p>Technical Knowledge in Year 1:</p>	<p><u>Year 1:</u> Select appropriate tools and materials to use and why.</p>

<p>Use and explore different levers and slides in my work. Demonstrate a range of cutting and shaping techniques; tearing/cutting/folding and curling. Understand the importance of food safety and hygiene; washing hands.</p> <p>Technical Knowledge in Year 2: Use and explore different mechanisms; levers and slides in my work. Demonstrate a range of cutting and shaping techniques; tearing/cutting/folding and curling. Understand the importance of food safety and hygiene; washing hands</p> <p><u>Planning</u> Learn simple characteristics and properties of materials they will use in order to make informed choices.</p> <p><u>Practical Skills and techniques</u> Learn how to keep themselves and other safe when using tools and materials such as holding scissors away from self and clothes, etc.</p> <p>Use a range of materials and components, including construction materials and kits and mechanical components.</p> <p>Measure, mark out, cut and shape soft materials.</p> <p>Shape paper and card by cutting with scissors.</p> <p>Assemble, join and combine materials and components with adhesives and tapes.</p>	<p>Use tools safely. <u>Year 2:</u> Select appropriate tools and materials to use and why. Use tools safely.</p> <p><u>Planning</u> Plan by suggesting what to do next and how to progress as their ideas develop.</p> <p>Select from a range of tools and equipment, explaining their choices.</p> <p>Select from a limited range of tools and materials with help, e.g. hole punches, hand drills, sandpaper.</p> <p><u>Practical Skills and techniques</u> Follow procedures for safety and hygiene.</p> <p>Choose materials and techniques to suit purpose and be able to explain reasons for their choices.</p> <p>Make an object with simple moving parts.</p> <p>Choose appropriately from simple finishing techniques, including those from art and design in order to enhance their products.</p>
--	---

	<p>Saw wood with a gents saw/backsaw. Use wood glue. Use a and drill or hole punch.</p> <p>Learn simple finishing techniques, including those from art and design.</p> <p><u>Technical Knowledge</u> <u>Mechanisms and control</u> Use wheels and axles (pushed through) Use construction kits Identify how toys can be made to move (push, pull) Make moving joints using paper fasteners, wood, etc Use programmable toys (e.g. Roamer) Create pop-ups and sliders</p> <p><u>Structures</u> Build structures, exploring how they can be made stronger, stiffer and more stable. Make box models, card and wood constructions Make joints which allow movement, e.g. axles Use construction kits</p>	
<u>ANALYSING AND EVALUATING</u>		
	<p>Technical Knowledge in Year 1: Make more than one prototype and learn which works best.</p> <p>Technical Knowledge in Year 2: Think of interesting ways to decorate food that I have made thinking of what would be best for the person eating it.</p>	<p><u>Year 1:</u> Talk about their own work identifying likes and dislikes of the design. Identify ways to improve my design.</p> <p><u>Year 2:</u> Talk about their own work identifying likes and dislikes of the design. Identify ways to improve their design by reflecting on the design brief.</p> <p><u>Own ideas and products</u></p>

	<p><u>Own ideas and products</u> Develop a technical vocabulary related to the products they are making. Use of design criteria to guide production process.</p> <p><u>Existing products</u> Pupils should learn to explore and ask questions of products such as: What products are. Who products are for. What products are for. How products work. How products are used. Where products might be used. What materials products are made from. What they like and dislike about products.</p>	<p>Be able to talk about their ideas, saying what they like and dislike.</p> <p>Identify what they could have done differently to improve their work in the future.</p> <p><u>Existing products</u> Pupils use their investigative skills to describe and analyse existing products relating their findings to their own ideas for products.</p>
--	---	---

Possible Contexts	
EYFS	<p><i>Woodwork/construction:</i> Learn to use woodwork tools safely Learn to make a den Develop woodwork skills Making houses for 3 Little Pigs Junk modelling and construction</p> <p><i>Cooking and nutrition:</i> Learn to make toast and discuss hygiene Make a healthy sandwich and discuss hygiene Make pancakes and discuss hygiene Cooking at forest school and discussing hygiene</p> <p>An enabling environment should provide:</p> <ul style="list-style-type: none"> • Provide a range of materials and objects to play with that work in different ways for different purposes, for example, egg whisk, torch, other household implements, pulleys, construction kits and tape recorder. • Provide a range of programmable toys, as well as equipment involving ICT, such as computers.

	<ul style="list-style-type: none"> • Provide resources for joining things together and combining materials, demonstrating where appropriate. • Provide children with opportunities to use their skills and explore concepts and ideas through their representations. • Have a 'holding bay' where models and works can be retained for a period for children to enjoy, develop, or refer to. • Make materials accessible so that children are able to imagine and develop their projects and ideas while they are still fresh in their minds and important to them. Provide children with opportunities to use their skills and explore concepts and ideas through their representations.
KS1	<p>Year 1:</p> <p><u>Cooking and nutrition:</u> Design, make and evaluate a healthy super food vegetable smoothie (link to English book 'Super Tato') Design, make and evaluate ice lollies and ice cream. (link to Year 1 topic: Seaside Safari)</p> <p><u>Construction/Structures/Woodwork:</u> Make a photo frame from natural materials – forest school. (link to Year 1 topic: Seasons Come, Seasons Go) Design, make and evaluate a bridge/boat inspired by Brunel. (link to Year 1 topic: Clever Construction)</p> <p><u>Mechanisms:</u> Design a moving animal picture for the art auction. (link to Year 1 topic: Poles Apart)</p> <p><u>Textiles:</u> Design, make and evaluate a tile for a Keynsham patchwork blanket. (link to Year 1 topic: Time Travellers)</p> <p>Year 2:</p> <p><u>Cooking and nutrition:</u> Design, make and evaluate bread made for a 'Wild Thing' picnic feast. (link to Year 2 topic: Once Upon A Time ...) Exploring and tasting world cuisine (link to Year 2 topic: Oh The Places You'll Go!)</p> <p><u>Construction/Structures/Woodwork:</u> Design, make and evaluate houses 1666 – recreate the Great Fire of London. (link to Year 2 topic: Panic on Pudding Lane) Design, make and evaluate a mini-beast hotel. (link to Year 2 topic: No Place Like Home) Making a Den when role playing being stranded on an imaginary island. (link to Year 2 topic: Adventure is out there!)</p> <p><u>Mechanisms:</u> Design, make and evaluate a moon buggy using wheels and axels. (link to Year 2 topic: Reach for the Stars)</p> <p><u>Textiles:</u> Dream catchers/cultural art project as part of Year 2 leavers celebration preparations. (link to Year 2 topic: Oh The Places You'll Go!)</p> <p>Structures – Box models</p> <p>Mechanisms – Jumping Jack puppets, Pop up cards, wheeled vehicles with axles</p>

<u>LKS2</u>	Substantive Knowledge	Disciplinary Knowledge
<u>DESIGNING</u>		
	<p><u>Understanding contexts, users and purposes</u> Know how to gather information about the needs and wants of particular individuals and groups using surveys, questionnaires, etc</p> <p>Generate ideas by collecting and using information from a number of sources, including ICT based sources to generate design ideas.</p> <p>Disassemble and investigate everyday products to see how they fit their purpose.</p> <p>Work from a given design specification to guide their thinking.</p> <p><u>Generating, developing, modelling and communicating ideas</u> Learn what a prototype is and use pre-made examples of prototypes and patterns</p> <p>Learn to create labelled and annotated sketches of their ideas.</p> <p>Learn an increasing range of correct technical vocabulary to use to enable them to explaining</p>	<p><u>Understanding contexts, users and purposes</u></p> <p>Work confidently within a range of contexts, such as the home, school and leisure.</p> <p>Indicate the design features of their products that will appeal to intended users</p> <p>Describe the purpose of their products and explain how particular parts of their products work</p> <p><u>Generating, developing, modelling and communicating ideas</u> Use pre-given prototypes to discuss design ideas.</p> <p>Use annotated sketches, cross-sectional drawings and exploded diagrams to develop and communicate their ideas</p> <p>Generate realistic ideas, focusing on the needs of the user</p> <p>Make design decisions that take account of the availability of resources</p>
<u>MAKING</u>		
	<p><u>Planning</u> Know:</p> <ul style="list-style-type: none"> • how to use learning from science to help design and make products that work • how to use learning from mathematics to help design and make products that work • that materials have both functional properties and aesthetic qualities 	<p><u>Planning</u> Select tools and equipment suitable for the task Explain their choice of tools and equipment in relation to the skills and techniques they will be using.</p> <p>explain their choice of materials and components according to functional properties and aesthetic qualities</p>

<ul style="list-style-type: none"> • the correct technical vocabulary for the projects they are undertaking <p>Know:</p> <ul style="list-style-type: none"> • how mechanical systems such as levers and linkages or pneumatic systems create movement • how simple electrical circuits and components can be used to create functional products • how to program a computer to control products • how to make strong, stiff shell structures <p><u>Practical skills and techniques</u></p> <p>Learn essential procedures for safety and hygiene when handling materials and tools safely.</p> <p>Learn skills needed to measure, mark, cut out and shape a range of materials. e.g. using saws and sand paper using cms to measure.</p> <p>Use a wider range of materials and components than KS1, including construction materials and kits, mechanical components and electrical components.</p> <p>Use tools independently with increasing accuracy, control and awareness of conservation e.g. bench hooks and mitre blocks, electric components (such as bulbs and buzzers), wire strippers, staplers, cardboard triangles etc.</p> <p>Learn to use a range of tools with accuracy including scissors, ... what tools should we include for lks2 and uks2?</p> <p>Learn how finishing techniques can improve the appearance of their product</p> <p><u>Technical knowledge</u> <u>Mechanisms and control</u></p> <ul style="list-style-type: none"> • Use simple mechanisms, e.g. syringes for pneumatics, levers. 	<p>Order the main stages of making</p> <p><u>Practical skills and techniques</u></p> <p>Apply knowledge in order to follow procedures for safety and hygiene.</p> <p>Apply measuring, marking and cutting skills with some accuracy.</p> <p>Assemble, join and combine materials and components with some accuracy.</p> <p>Select the correct tools to use with different materials.</p> <p>Apply a range of finishing techniques, including those from art and design, with some accuracy.</p>

This progression draws on the progression framework produced by DATA (Design and Technology Association) in line with the 2014 DT curriculum. Additional resources to support the teaching of DT can be found on their website by following the links below.

[We support and champion design and technology education in schools - D&T Association \(data.org.uk\)](http://data.org.uk)

[D&T Primary Clickable Progression Framework KS1 & 2 - D&T Association \(data.org.uk\)](http://data.org.uk)

PRODUCT DESIGN Curriculum Map

Designing

LKS2

UKS2

SUBSTANTIVE KNOWLEDGE

Understanding contexts, users and purposes

Know how to gather information about the needs and wants of particular individuals and groups using surveys, questionnaires, etc

Generate ideas by collecting and using information from a number of sources, including ICT based sources to generate design ideas.

Disassemble and investigate everyday products to see how they fit their purpose.

Work from a given design specification to guide their thinking.

Generating, developing, modelling and communicating ideas

Learn what a prototype is and use pre-made examples of prototypes and patterns

Learn to create labelled and annotated sketches of their ideas.

Understanding contexts, users and purposes

Generate ideas by collecting and using information, from a number of sources, including ICT based sources.

Look at mechanical products to see how they function and meet user's needs.

Know how to carry out research, using surveys, interviews, questionnaires and web-based resources

Learn how to develop their own simple design specification to guide their thinking.

Generating, developing, modelling and communicating ideas

Learn how to create a prototype/pattern to scale

Learn to create cross-sectional drawings and exploded diagrams.

Learn about the properties and qualities of materials they might use such as cardboard, wood, plastic.

Learn an increasing range of correct technical vocabulary to use to enable them to explaining	
DISCIPLINARY KNOWLEDGE	
<p><u>Understanding contexts, users and purposes</u> Work confidently within a range of contexts, such as the home, school and leisure.</p> <p>Indicate the design features of their products that will appeal to intended users</p> <p>Describe the purpose of their products and explain how particular parts of their products work</p> <p><u>Generating, developing, modelling and communicating ideas</u> Use pre-given prototypes to discuss design ideas.</p> <p>Use annotated sketches, cross-sectional drawings and exploded diagrams to develop and communicate their ideas</p> <p>Generate realistic ideas, focusing on the needs of the user</p> <p>Make design decisions that take account of the availability of resources</p>	<p><u>Understanding contexts, users and purposes</u> Work confidently within an increasing range of contexts, such as the home, school, leisure, culture, enterprise, industry and the wider environment</p> <p>Be able to identify the needs, wants, preferences and values of particular individuals and groups. Take user’s views into account when designing.</p> <p>Indicate the design features of their products that will appeal to intended users. Considering safety and reliability.</p> <p>Describe the purpose of their products explain how particular parts of their products work.</p> <p><u>Generating, developing, modelling and communicating ideas</u> Test their ideas using prototypes and pattern pieces in order to develop and improve their ideas.</p> <p>Communicate design ideas in a variety of ways including verbally, written, using annotated sketches, cross-sectional drawings and exploded diagrams to develop and communicate their ideas.</p> <p>Use computer-aided design to develop and communicate their ideas</p> <p>Make design decisions, taking account of constraints such as time, resources and cost.</p>
<u>Making</u>	
LKS2	UKS2
SUBSTANTIVE KNOWLEDGE	
<u>Planning</u>	<u>Planning</u>

Know:

- how to use learning from science to help design and make products that work
- how to use learning from mathematics to help design and make products that work
- that materials have both functional properties and aesthetic qualities
- the correct technical vocabulary for the projects they are undertaking

Know:

- how mechanical systems such as levers and linkages or pneumatic systems create movement
- how simple electrical circuits and components can be used to create functional products
- how to program a computer to control products
- how to make strong, stiff shell structures

Practical skills and techniques

Learn essential procedures for safety and hygiene when handling materials and tools safely.

Learn skills needed to measure, mark, cut out and shape a range of materials. e.g. using saws and sand paper using cms to measure.

Use a wider range of materials and components than KS1, including construction materials and kits, mechanical components and electrical components.

Use tools independently with increasing accuracy, control and awareness of conservation e.g. bench hooks and mitre

Learn to use a range of tools in order to be able to choose appropriately from them.

Know:

- how to use learning from science to help design and make products that work
- how to use learning from mathematics to help design and make products that work
- that materials have both functional properties and aesthetic qualities
- *that materials can be combined and mixed to create more useful characteristics*
- that mechanical and electrical systems have an input, process and output
- *the correct technical vocabulary for the projects they are undertaking*

Know:

- how mechanical systems such as cams or pulleys or gears create movement
- how more complex electrical circuits and components can be used to create functional products
- how to program a computer to monitor changes in the environment and control their products
- how to reinforce and strengthen a 3D framework

Practical skills and techniques

Learn essential procedures for safety and hygiene when handling materials and tools safely.

Learn to measure, mark, cut out and shape a range of materials. e.g. using saws and sand paper using cm & mm to measure.

Use modelling wire, pliers, wire cutters etc.

Be taught how to use techniques that involve a number of steps.

<p>blocks, electric components (such as bulbs and buzzers), wire strippers, staplers, cardboard triangles etc.</p> <p>Learn to use a range of tools with accuracy including scissors</p> <p>Learn how finishing techniques can improve the appearance of their product</p> <p><u>Technical knowledge</u> <u>Mechanisms and control</u></p> <ul style="list-style-type: none"> • Use simple mechanisms, e.g. syringes for pneumatics, levers. • Give a series of commands (Roamer). <ul style="list-style-type: none"> • Use levers and pulleys to create moving parts using split pins, card and string. <p><u>Structures</u></p> <ul style="list-style-type: none"> • Use construction kits to test for strength. • Investigate how structures can fail when loaded, and stabilise structures to withstand greater loads. • Understand different structures types, shell/frame <p><u>Electrical Circuits</u></p> <ul style="list-style-type: none"> • Explore batteries and bulbs. • Use simple switches to achieve a functional result 	<p>Learn how finishing techniques can strengthen and improve the appearance of their product.</p> <p><u>Technical knowledge</u> <u>Mechanisms and control</u></p> <ul style="list-style-type: none"> • Use simple mechanisms, e.g. pulleys, cams, cogs. Attach to motors for electrical control • Begin to use hydraulics. • Design ICT controlled mechanisms- use computer to control programs and equipment. FLOWOL. <p><u>Structures</u></p> <ul style="list-style-type: none"> • Construct regular free standing 3D frames - bridges • Use techniques for reinforcing and strengthening structures. • Use construction kits and building instructions to identify how structures are stabilised and strengthened. <p><u>Electrical Circuits</u></p> <ul style="list-style-type: none"> • Switch motors on/off • Control electrical circuits with ICT (e.g. use computer to operate switch – see above)
DISCIPLINARY KNOWLEDGE	
<p><u>Planning</u></p> <p>Select tools and equipment suitable for the task</p> <p>Explain their choice of tools and equipment in relation to the skills and techniques they will be using.</p> <p>explain their choice of materials and components according to functional properties and aesthetic qualities</p>	<p><u>Planning</u></p> <p>Produce appropriate lists of tools, equipment and materials that they need.</p> <p>Formulate step-by-step plans as a guide to making.</p> <p>Work from a detailed plan.</p> <p><u>Practical skills and techniques</u></p>

<p>Know about inventors, designers, engineers, chefs and manufacturers who have developed ground-breaking products</p> <p><u>Own ideas and products</u> Be able to refer to their design criteria as they design and make.</p> <p>Modifying plans as they work and use their design criteria to evaluate their completed products.</p>	<p>Know about inventors, designers, engineers, chefs and manufacturers who have developed ground-breaking products</p> <p><u>Own ideas and products</u> Be able to refer to their design criteria as they design and make.</p> <p>Modifying plans as they work and use their design criteria to evaluate their completed products.</p> <p><u>Existing products</u></p>
---	--

<p><u>Existing products</u> Learn to investigate and analyse:</p> <ul style="list-style-type: none"> • how well products have been designed • how well products have been made • why materials have been chosen • what methods of construction have been used • how well products work • how well products achieve their purposes • how well products meet user needs and wants 	<p>Learn to investigate and analyse:</p> <ul style="list-style-type: none"> • how well products have been designed • how well products have been made • why materials have been chosen • what methods of construction have been used • how well products work • how well products achieve their purposes • how well products meet user needs and wants
<p>DISCIPLINARY KNOWLEDGE</p>	
<p>Use what the work of famous inventors and engineers to influence and inspire their own design process.</p> <p><u>Own ideas and products</u> Be able to identify the strengths and areas for development in their ideas and products Be able to consider the views of others, including intended users, to improve their work With support, suggest alternative ways to make their products or how their products could be improved.</p> <p><u>Existing products</u> Investigate and analyse asking questions such as:</p> <ul style="list-style-type: none"> • who designed and made the products? • where products were designed and made? • when were these products designed and made? • can this product can be recycled or reused? <ul style="list-style-type: none"> • What is the intended purpose of the product? 	<p>Use what the work of famous inventors and engineers to influence and inspire their own design process.</p> <p><u>Own ideas and products</u> Be able to identify the strengths and areas for development in their ideas and products Be able to consider the views of others, including intended users, to improve their work</p> <p>Be able to critically evaluate the quality of the design, manufacture and fitness for purpose of their products as they design and make Be able to evaluate their ideas and products against their original design specification suggesting things they would do differently next time.</p> <p><u>Existing products</u> Investigate and analyse products by asking questions such as:</p> <ul style="list-style-type: none"> • how much products cost to make? • how innovative products are? • how sustainable the materials in products are ? • what impact products have beyond their intended purpose?

Primary Textiles

Year Group	Substantive Knowledge	Disciplinary Knowledge	Possible contexts
EYFS	Learn to thread using pre-punctured fabric and card		Sewing cards
KS1	<p>Introduce learning to thread a needle (large binca type). Learn to tie simple reef knots.</p> <p>Learn to use running stitch to join two pieces of fabric.</p>	<p>Understand the difference between running stitch and basting stitch and apply.</p> <p>Understand that a 3-D textiles product can be assembled from two identical fabric shapes</p>	<p>Threading garlands or Lei</p> <p>Create simple stuffed toy</p>
LKS2	<p>Learn to weave with a variety of materials. Learn to sew using a range of basic stitches e.g: running stitch, back stitch and over stitch.</p> <p>Learn to thread a needle (large binca type). Learn to tie simple knots.</p> <p>Use patterns and templates. Pinning and cutting with increasing accuracy.</p> <p>Learn about the properties of a small range of fabrics.</p>	<p>Make informed choices from the sewing stitches they have learned in order to join fabrics and/or add embellishment and decoration (applique).</p> <p>Apply decoration to their work using buttons, beads, sequins.</p> <p>Choose from a small range of fabrics according to properties, purpose, ease of working, aesthetics.</p>	<p>Binca bookmarks</p> <p>Link weaving to History (Bronze, Iron age)</p> <p>Felt Christmas decorations/ winter hangings</p>

<p>UKS2</p>	<p>Learn to use different ways to join materials, e.g. glue, pins, press studs, Velcro, various stitches, buttons.</p> <p>Learn to make own simple pattern pieces.</p> <p>Children are able to join fabrics using a range of stitches with increasing independence including blanket stitch.</p>	<p>Use patterns and prototypes to try out ideas.</p>	<p>Victorian embroidery</p> <p>Make a bag, purse</p>
-------------	--	--	--

TEXTILES Progression Map

LKS2	UKS2
<p>Learn to weave with a variety of materials.</p> <p>Learn to sew using a range of basic stitches e.g: running stitch, back stitch and over stitch.</p> <p>Make informed choices from the sewing stiches they have learned in order to join fabrics and/or add embellishment and decoration (applique).</p> <p>Learn to thread a needle (large binca type).</p> <p>Learn to tie simple knots.</p> <p>Use patterns and templates. Pinning and cutting with increasing accuracy.</p> <p>Learn about the properties of a small range of fabrics. Choose from a small range of fabrics according to properties, purpose, ease of working, aesthetics.</p> <p><u>Suggested Products</u> Binca bookmarks Link weaving to History (Bronze, Iron age) Felt Christmas decorations/ winter hangings</p>	<p>Learn to use different ways to join materials, e.g. glue, pins, press studs, Velcro, various stitches, buttons. They choose and apply decoration to their work using buttons, beads, sequins.</p> <p>Learn to make own simple pattern pieces.</p> <p>Use patterns and prototypes to try out ideas.</p> <p>Children are able to join fabrics using a range of stitches with increasing independence including blanket stitch. They make informed choices from the sewing stiches they have learned in order to join fabrics and/or add embellishment and decoration (applique).</p> <p><u>Suggested Products</u> Victorian embroidery Make a bag, purse or wallet.</p>

Primary Food

Year Group	Substantive Knowledge	Disciplinary Knowledge	Possible contexts
KS1	<p>Know how to name and sort foods into the five groups in The eatwell plate.</p> <p>Know that everyone should eat at least five portions of fruit and vegetables every day.</p> <p>Know that all food comes from plants or animals.</p> <p>Know that food has to be farmed, grown elsewhere (e.g. home) or caught.</p> <p>Know how to prepare simple dishes safely and hygienically, without using a heat source.</p> <p><u>Techniques to be taught should include</u></p> <p>Learn to use a bridge technique to cut soft food safely.</p> <p>Know how to use a peel and grate safely and accurately.</p> <p>Spread butter with a knife.</p>	<p>Apply knowledge of healthy eating to plan a balanced meal for themselves.</p> <p>Follow procedures for safety and hygiene for the skills learned.</p> <p>Follow a simple recipe applying skills learned.</p>	<p><u>Notes:</u> Grow vegetables</p> <p>Farm visits</p> <p>Soup making</p> <p>Sandwich making</p>

<p>LKS2</p>	<p>To understand the importance of a varied diet and know the 5 areas of the 'eatwell' plate.</p> <p>To develop an awareness of seasonality and food miles.</p> <p>To develop an understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u></p> <p>Use both a bridge and a claw technique to cut soft food.</p> <p>Use measuring cups, spoons, and digital scales to measure out ingredients in grams. Using a jug to measure liquids in ml.</p> <p>Cracking an egg & beating an egg</p> <p>Mixing to form a bread dough Kneading & shaping dough</p> <p>Use both a bridge and a claw technique to cut hard food.</p> <p>Peeling & grating soft foods e.g. courgette, cheese</p> <p>Using measuring cups, spoons, and balance scales. Using a jug to measure liquids.</p> <p>Cutting fat into flour and rubbing fat into flour.</p>	<p>Apply knowledge of healthy eating to plan a balanced diet.</p> <p>Use their knowledge of seasonality and food miles to influence their choice of ingredients when designing.</p> <p>Follow procedures for safety and hygiene</p> <p>Know when to use a bridge or a claw technique when cutting food.</p>	<p>Bread making – possibly leading to sandwich making</p> <p>Pizza making – pair with a healthy salad</p> <p>Pancake making</p> <p>Smoothies</p> <p>Cheese scones</p> <p>Fruit crumble</p> <p>Shortcrust pastry – cheese straws</p> <p>x</p>
-------------	---	---	--

<p>UKS2</p>	<p>To develop an understanding of the dietary needs of individuals and how they differ (athlete, older person, child).</p> <p>Know how a variety of ingredients are grown, reared, caught and processed.</p> <p>To develop a deeper understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u> Introduce simple combination of 'Bridge' and 'Claw' e.g. onion</p> <p>Grating harder foods e.g. apple, carrot, parmesan</p> <p>Using the hob with adult supervision e.g. to sweat a soup</p> <p>Rolling pastry</p> <p>Cracking an egg & separating</p> <p>Using a hand mixer or blender</p>	<p>Use their understanding of dietary needs to design a meal for an individual.</p> <p>Choose ingredients with a growing awareness of conservation, sustainability and animal welfare.</p> <p>Independently select equipment appropriate to the task. Be able to explain their choices.</p> <p>Begin to use their time efficiently e.g: wash up or cut toppings whilst waiting for a pie to cook.</p>	<p>Making soup</p> <p>WW2 link: humble pie</p> <p>Muffins</p> <p>Cupcakes</p> <p>Tarts</p>
-------------	--	---	--

This skills progression is based on the **Focus on Food** checklist for Primary schools.

Additional information along with video clips to help teach techniques and useful recipe ideas linked to teaching specific skills can be found at:

<http://focusonfood.fudgetechnical.co.uk/index>

FOOD Progression Map

Year 3	Year 4	Year 5	Year 6
<p>To understand the importance of a varied diet and know the 5 areas of the 'eatwell' plate and apply knowledge of healthy eating to plan a balanced meal.</p> <p>To develop and apply understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u> Use both a bridge and a claw technique to cut soft food.</p> <p>Use measuring cups, spoons, and digital scales to measure out ingredients in grams. Using a jug to measure liquids in ml.</p> <p>Mixing to form a bread dough Kneading & shaping dough</p> <p>Peeling & grating soft foods e.g. courgette, cheese</p> <p><u>Suggested products</u></p>	<p>To develop an awareness of seasonality and food miles. Use their knowledge of seasonality and food miles to influence their choice of ingredients when designing.</p> <p>To continue to develop and apply understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u> Use both a bridge and a claw technique to cut hard food. Be able to select techniques appropriately.</p> <p>Use measuring cups, spoons, and digital scales to measure out ingredients in grams. Using a jug to measure liquids in ml.</p> <p>Cracking an egg & beating an egg</p>	<p>To develop an understanding of the dietary needs of individuals and how they differ (athlete, older person, child).</p> <p>Know how a variety of ingredients are grown, reared, caught and processed.</p> <p>To develop a deeper understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u> Introduce simple combination of 'Bridge' and 'Claw' e.g. onion</p> <p>Grating harder foods e.g. apple, carrot, parmesan</p> <p>Using the hob with adult supervision e.g. to sweat a soup</p> <p><u>Suggested products</u> Making soup or stew</p>	<p>Be able to apply their understanding of individual dietary needs to design a meal for an individual such as an athlete, soldier.</p> <p>Know how a variety of ingredients are grown, reared, caught and processed.</p> <p>To develop a deeper understanding of basic hygiene and how bacteria develops.</p> <p><u>Techniques to be taught should include</u> Rolling pastry Cracking an egg & separating Using a hand mixer or blender</p> <p><u>Suggested products</u> WW2 link: humble pie</p> <p>Muffins</p>

<p>Bread making – possibly leading to sandwich making</p> <p>Pizza making – pair with a healthy salad</p> <p>Pancake making</p> <p>Smoothies</p> <p>Cheese scones</p> <p>Fruit crumble</p> <p>Shortcrust pastry – cheese straws</p>	<p>Peeling & grating soft foods e.g. courgette, cheese</p> <p>Cutting fat into flour and rubbing fat into flour.</p> <p><u>Suggested products</u></p> <p>Cheese scones</p> <p>Fruit crumble</p> <p>Shortcrust pastry – cheese straws</p>	<p>Muffins</p>	<p>Choose ingredients with a growing awareness of conservation, sustainability and animal welfare.</p> <p>Independently select equipment appropriate to the task. Be able to explain their choices.</p> <p>Begin to use their time efficiently e.g: wash up or cut toppings whilst waiting for a pie to cook.</p>
---	---	----------------	---

Suggested contexts and extra-curricular links

Year 3	Textiles Science link - Plants and their uses	Mechanisms Shadow puppets Science link: Light	Food Geography link: Wet & Dry places Science link: Animals including humans (nutrition and food)
Year 4	Electrical circuits Night lights Science link: Electricity – light circuit with a switch.	Structures Skyscrapers Geography link: North America	Food Science links - States of matter, Food chains & digestive system Geography link: Sustainability
Year 5	Structures Bridges History link: Local history - Isambard Kingdom Brunel Geography link: Rivers	Textiles Cross stitch History link – Victorians	Food States of matter, reproduction in plants (fruit & seeds) Geography link: Climate change
Year 6	Electrical circuits Make a game or fairground ride using buzzers, alarms, motors Science link – Electricity & light	Mechanisms Levers and pulleys Science link: Forces (Y5 revision) Geography link: Mountains	Food Science link - States of matter, diet & exercise, classifying plants

Secondary Product Design, DT Textiles and Engineering

Curriculum Intent Statement:

For students to:

- Be able to apply scientific, mathematical and material knowledge in order to problem solve, design and build quality prototypes.
- Develop a consideration of users' needs wants and values in an ever evolving technological world.
- Be encouraged to take risks and be able to test and refine practical solutions in order to develop innovative outcomes.
- Develop practical skills to solve problems in a variety of contexts.
- To be aware of social, moral and environmental issues in order to inspire a more sustainable future.

The key schema (areas of knowledge and skills) in Product Design and Engineering are:

- Understanding user needs – Identification of different market sectors, demographics, cultural, social and economic design considerations. The different research techniques used to refine design contexts.
- Drawing skills – Orthographic, Isometric and One and Two point perspective, freehand design sketches.
- Mathematics – Area, units of measurement, conversion and engineering calculations.
- Mechanical Systems, Motion and Forces – Hydraulics, Gears and Pulleys. How to use these systems to solve a proposed problem. Types of motion, Forces.
- Materials and Properties – Metals, Polymers, Wood, fabrics, textiles materials, Ceramics, Composites. Classification of materials, working properties and how to test materials.
- Health and Safety – To be able to work safely in the workshop/textiles rooms environment and understand the importance of health and safety and the associated legislation in an industrial environment.
- Tools and Equipment – To be able to work independently in the workshop/textiles rooms in order to manufacture products using a range of materials. To be able to identify feasible manufacturing solutions.
- CAD/CAM – To be able to appropriately apply CAD/CAM within the design and make process in order to manufacture high quality products.
- Engineering Disciplines – To develop and awareness and understanding of the different sectors of engineering.
- Electronics – Simple electronics, circuits with an input and output, programmable components.
- Sustainable Design – To develop an awareness and understanding of the need to sustain resources and create a conscious and analytical design methodology.
- Evaluating – To be able to reflect, refine and identify future development opportunities.

'Subject' disciplinary knowledge is:

In designing:

The ability to use primary and secondary research methods in order to develop an understanding of user needs; to develop specifications to inform the design of innovative, functional, appealing products that respond to needs in a variety of situations; to apply knowledge of materials and how they behave to designs; to design feasible products and outline how they will be manufactured; to be able to communicate their designs using a range of methods including hand drawings and CAD. To consider sustainability when developing design solutions.

In making:

The ability to work safely and independently in order to manufacture high quality working solutions; to accurately produce and follow a project plan; to be able to adapt their approach in response to challenges during manufacture.

In knowledge:

The ability to apply their knowledge of Materials, Mathematics, Mechanical Systems and their effect on forces and motion to their designing in order to create innovative and feasible solutions; to be able to incorporate electronic systems in to their designing; to be able to embed intelligence in products that respond to inputs and control outputs using programmable components.

In Evaluating:

The ability to analyse the work of other designers and engineers, past and present to develop and broaden their understanding; to investigate new and emerging technologies and understand its' impact on individuals, society and the environment, to be able to test, evaluate and refine their own ideas against a specification, taking into account the views and needs of others.

Our curriculum is planned and sequenced as a cumulative curriculum where knowledge builds upon, reinforces and expands previous learning. This enables students to know more and remember more. Our schemes of learning are built around our key schema and substantive knowledge is built upon from KS2 across Key Stage 3 and 4. Our curriculum connects prior learning and ensures that essential skills are covered early that they can be applied in numerous contexts later.

Whilst we are aware of the vast differences in the experience students will have had of DT at primary school our KS3 curriculum is ambitious and students are encouraged to apply their designing, making, evaluative skills alongside substantive technical knowledge to design situations, using their skills to solve problems and producing high quality outcomes.

Our KS4 curriculum builds on from the strong foundations we lay at Key Stage 3 ...

Our curriculum model plans for students to remember more through

- Low stakes testing throughout each module in KS3 – Key terms and concepts, the content that is included on the knowledge organiser.
- End of module tests in KS3 focusing on key concepts from the schema that have been covered in that module.
- Use of retrieval starters in KS4 focusing on substantive knowledge that we would want to be automatic and fluent for students.
- Formal end of unit tests in KS4.

The cultural capital needed to succeed in Engineering is woven through our curriculum:

- We have CEIAG activities written in to our schemes of learning from Year 7-11. These focus on developing students' awareness of the different roles that are available in the engineering and product design sectors and the qualification paths to those roles. We aim to expose students through these activities to careers that they might not have considered and show them that it is possible for anybody to pursue these qualifications and roles. Our aim is to raise our students' aspirations beyond that of the manual trades that they automatically link to the word 'engineering'.
- Throughout our schemes of work we introduce students to important Engineers and designers past and present in order that they develop an appreciation of iconic designs and technologies.
- In lessons we highlight current affairs relating to the subject or work topic as they appear. We aim to give current and relevant real world context to all of our design situations.

The key Schema

Understanding User Needs

Success in **'curriculum schema'** is students knowing, remembering, understanding and being able to Identify different market sectors, demographics, cultural, social and economic groups. To use a range of research techniques in order to understand the needs of identified users and be able to adapt and refine designs in order to meet user needs.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Needs of users of different age, gender, interests and abilities. Designing for a client with imposed design constraints.	Students can recognise the different needs of different user groups and can apply their knowledge of user and client needs to build design specifications and inform design solutions.
KS4	As above plus: Requirements of different cultures, social and economic groups.	Students can use primary and secondary research techniques in order to gather information about a specific user group and understand the advantages and disadvantages of the research techniques used. Students are able to adapt existing designs to meet the needs of new users and situations.

Drawing Skills

Success in **Drawing Skills** is students knowing, remembering, understanding and being able to communicate their ideas fluently with others through 2D and 3D freehand sketches, 2D and 3D working drawings applying the conventions of engineering drawings from BS8888 and using rendering, dimensions, different types of line and scale appropriately.

	Substantive Knowledge	Disciplinary Knowledge
KS3	How to draw simple shapes using 1 and 2 point perspective. Using isometric for 3D drawings. Use of 3 rd angle orthographic drawing. Confidently sketching to communicate. Visible, construction and dimension lines.	Students are able to identify the different types of drawing and can communicate their own design ideas using these methods.
KS4	As above looking at more complex shapes and assemblies. Use of 1st angle orthographic. Conversion from imperial to metric measurement and vice versa. Appropriate choice	Students are able to independently select appropriate drawing methods for their requirements and can confidently produce 2D and 3D working drawings in order to communicate their ideas that fully comply with BS8888. They are

	of scale. Use of Tolerance. Hidden detail and centre lines. BSI, BS8888, ISO.	able to explain the benefits of working to BS8888 and how it fits with the corresponding ISO standards.
--	--	---

Mathematics

Success in **Mathematics** is students knowing how to apply the concepts and formulae in engineering contexts and to use these processes to support the development of their own concepts and ideas. Students will remember the appropriate units for the calculations that they do and will be able to use a scientific calculator correctly in order to perform calculations. Students will understand how Maths and Science can be used to solve engineering problems.

	Substantive Knowledge	Disciplinary Knowledge
Ks3	Area, Volume. Power, Resistance, Current and Voltage.	To be able to apply the formulae in order to solve problems related to their project work during design, development and manufacture. Students will be able to remember and apply the correct units for the calculations that they undertake.
KS4	SI Units. Power, Force, etc from spec	Students will be able to select the appropriate formulae to use in a given situation. They will be able to draw out the important quantities from engineering scenarios in order to help them to determine which calculation is most appropriate in each situation.

Mechanical Systems, motion and forces

Success in **Mechanical systems, motion and forces** is students knowing and understanding the different types of forces and motion and how mechanical systems can be used in products to enable changes in movement and force.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Movement: Linear, Reciprocating, Oscillating, Rotating.	To be able to apply their knowledge of movement and forces to a design situation, producing feasible design solutions that can resist the forces acting on

	Forces: Tension, Compression, Torsion, Bending, Shear. Mechanical Systems - Gears	them. To be able to explain how gear systems can be used to our advantage in products and to be able to devise simple gear systems for use in their own designs.
KS4	As above plus Mechanical Systems: Hydraulics, Pulleys.	Students can identify a range of mechanical systems in existing products and explain the purpose of using them in that scenario. Students can develop their own mechanical system designs to solve a specific problem.

Materials and their properties

Success in **Materials** is students knowing the different types of materials, where they originate from and being able to classify them. Students will know how to use technical vocabulary to describe properties of each material. They will understand how to test and select suitable materials for a specific purpose based on their working properties and will be able to justify their choices.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Woods: Classifications of timber, hardwoods, softwoods, composition of manufactured boards. Plastics: Classification, thermoplastics, thermosetting plastics. Metals: Classification, ferrous and non-ferrous metals, alloys. Material Properties: Mechanical, Textiles: smart and modern materials, fibres and fabrics, natural and synthetic fabrics, primary source to stock form. Material characteristics: Aesthetics, Cost, Environmental Impact.	Students will be able to identify specific materials used in existing products and explain why they were used, suggesting alternatives where appropriate. They will be able to carry out material tests for a range of mechanical properties and select materials based on the outcomes using their data to justify material choice. They will be able to suggest materials for their design ideas. They will understand where materials come from and the implications of this source for cost, environmental impact.
KS4	As above, plus: composite materials, ceramics, elastomers. Material Properties: Chemical, Optical, Textiles: smart and modern materials, fibres and fabrics, natural and synthetic fabrics, how fabrics behave for different purposes, primary source to	Students will be able to justify their material choices based on a wider range of material properties. They will select from a broader range of materials. They will understand how materials can be combined to create new materials with improved properties, be able to identify where

	stock form, stock form and types, weaving, knitting and bonding.	these have been used in existing products and make suggestions for where these could be used in their own designs.
--	--	--

Health and Safety

Success in **Health and Safety** is students knowing health and safety rules pertaining to the workshop and being able to explain why they are in place. They will be able to demonstrate independent and confident use of the guidelines in order to work safely in the workshop environment. They will know and understand the range of control measures that are in place in the school workshop environment and the PPE requirements of each machine. They will go on to learn about the various items of legislation that relate to the manufacturing environment and be able to relate the legislation to specific engineering scenarios across a range of sectors.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Workshop/textiles rooms Health and Safety rules. Control Measures used in the workshop. PPE used in the workshop.	Students will follow the health and safety rules relating to the school workshop environment. They will be able to explain why the rules in place and how they reduce the risk to individuals. They will be able to identify PPE used in the workshop and apply the correct PPE in a given situation. They will be able to identify and explain the control measures used in the workshop. They will be able to identify unsafe situations and make suggestions of how to reduce the risk
KS4	Health and Safety Legislation: COSHH, RIDDOR, HASAWA, MHOR, PPE in industry.	Students will be able to identify what aspect of H&S each piece of legislation covers and how this reduces risk in specific engineering environments. They will be able to identify and explain the consequences that may results from not following the relevant health and safety legislation. They will be able to suggest suitable PPE for a range of industrial scenarios.

Tools and Equipment

Success in **Tools and Equipment** is students being able to identify and range of hand tools, portable power tools and fixed machines and what they are used for. Students will be able to independently select and use a range of tools and machinery skilfully and safely in order to produce high quality, functional products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	<p>Hand Tools: Coping saw, tenon saw, hack saw, chisel, file, tin snips, abrasive paper, screw driver, Marking out: Try square, steel rule, bradawl, scribe, centre punch.</p> <p>Portable Power Tools: Biscuit Cutter, Cordless Drill, line bender,</p> <p>Fixed Machines: Pillar Drill, Buffing Machine, Belt Sander, Scroll Saw, vacuum former</p> <p>Sewing machines, hand sewing, cutting, soldering</p>	Students will be able to identify and competently use the tools and machinery outlined in order to produce high quality outcomes.
KS4	<p>As above, plus:</p> <p>Portable Power tools: use of hand held sander, hand held router,</p> <p>Knowledge of: angle grinder,</p> <p>Sewing machines, hand sewing, Tyvek, tie dye, batik, heat press.</p>	Students can select and competently use the tools and equipment in order to produce high quality outcomes. Where students are unable to use equipment (due to H&S guidance) they will have an awareness and understanding of the machinery, its appropriate use and the health and safety implications associated with each.

CAD/CAM

Success in **CAD/CAM** is students being able to apply CAD/CAM skills appropriately within the Design and Make process in order to manufacture high quality products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	<p>CAD: 2D Design</p> <p>Tinker CAD</p> <p>Google Sketch Up</p> <p>CAM: Laser Cutter</p>	Students will be able to use the CAD packages in order to produce 2D and 3D digital drawings and know how to prepare a file for laser cutting. They will understand how a laser cutter works and the health and safety considerations for the machine.

		They will know which materials are able to be laser cut.
KS4	CAD: As above plus Autodesk Inventor. CAM: As above plus knowledge (not use) of CNC router and CNC lathe. CAD/CAM sewing machine	Students will be able to use the CAD software to produce 2D and 3D digital drawings. They will understand when and how the CNC router and lathe are used in industry and be able to identify and give examples of products that have been manufactured in this way.

Engineering Disciplines, Iconic and Important work of others.

Success in **Engineering disciplines** is students knowing and understanding a range of different engineering sectors. Being able to give examples of products developed and manufactured by each sector and being able to explain the benefit and impact that these products have had on society. This knowledge will encompass a range of important and iconic designs and designers/engineers.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Mechanical, Civil, Aerospace, Electronic,	Students will be able to explain what type of products each of the sectors are concerned with and give specific examples, explaining the benefits that each product has brought to society and individuals. They will be able explain the qualifications/subjects needed to enter each sector.
KS4	As above plus: Biomedical, Automotive Biomedical, Chemical, Communications, Software	Students will be able to explain what type of products each of the sectors are concerned with and give specific examples, explaining the benefits that each product has brought to society and individuals. They will be able explain the qualifications/subjects needed to enter each sector.

Electronics

Success in **electronics** is students understanding the basic principles of electronics: current, voltage, resistance and power. They will be able to use appropriate formulae to calculate these values for a given scenario. They will be able to design and construct simple electronic circuits, with an input and an output. They will experiment with programmable components and understand how they can be programmed to achieve different outcomes.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Basic electronic principles. How to calculate voltage, power, current and resistance. How to decode a resistor's value. How to build simple circuits. How to use programmable controllers in circuits.	Students will use their electronics knowledge in order to design and build electronic products to satisfy a given design scenario.
KS4	Students will revisit the above information looking at more complex applications of their electronics knowledge.	Students will use their electronics knowledge in order to design and build electronic products to satisfy a given design scenario.

Sustainable Design

Success in **sustainable design** is students understanding the 6 Rs of sustainability and being able to explain why it is important for us to sustain the resources that we have for future generations. They will be able to identify where the materials that they use originate from in their raw form and the implications of this for the environment. They will consider the end of a products life when designing and be able to analyse and evaluate the environmental credentials of existing products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Where materials come from. The environmental implications of materials. The 6 Rs. End of life considerations.	Students will be able to apply their knowledge of sustainability in order to design environmentally conscious products. They will select materials with sustainability in mind and be able to justify their selections on this basis.
KS4	As above plus how materials are recycled, how many times they can be recycled and whether the material loses quality upon recycling.	Students will select materials based on a wide range of environmental credentials, fully justifying their selection.

Evaluating

Success in **evaluating** is students being able to analyse the work of others identifying good features and areas for development. They will then be able to incorporate these findings in to their work. They will be able to reflect on their own work throughout the design and manufacture process and refine their products based on findings. At the end of a project they will be able to identify successes and areas for future development.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Evaluative language: Structure of a final evaluation: Positives, Negatives, Improvements. Product Analysis using ACCESS FM.	Students will be able to reflect on their own work and that of others to identify positives, negatives and improvements that could be made. Students will be able to evaluate their own skills alongside practical outcomes.
KS4	As above plus: Iterative Design.	Students will be able to reflect on their own work and that of others to identify strengths and areas for development. Students will be able to evaluate their own skills alongside practical outcomes. Students will evaluate throughout the design and make process refining their ideas in response to their findings,

Summative Assessment plan

In all Key Stage 3 units of work we assess against the 4 areas of:

- Develop
- Make
- Knowledge
- Evaluate

Students receive a Red, Amber or Green against each skill assessed for that unit and these are communicated to the student via the assessment sheet that is stuck in the front of their DT book. Students have the opportunity to improve the skill and the RAG will then be updated on the sheet, this may take place as part of live marking.

These RAG ratings are then transferred in to Doddle

In Key stage 4 students are formally tested at the end of every unit of work in preparation for the exam. These test marks are communicated on students tracking sheets and recorded on teacher tracking sheets.

Secondary Art Textiles

Curriculum Intent Statement:

For students to;

- Have an in depth knowledge of the formal elements within Art Textiles
- Be able to identify and analyse the formal elements in the work of Textiles Artists and Designers to inform and enhance their own creative practice.
- Understand how to effectively communicate their ideas using a range of textile and drawing techniques, developing confidence with a wide range of textiles tools and equipment.
- Apply an understanding of the elements in Textiles to their exploration and experimentation of a range of different media and techniques.
- Reflect on their creative output to enable the refinement and development of work through purposeful risk taking.
- Connect their experiences within Textiles to the wider context of the Creative Industries, Art History and Cultural identity.

The key schema (areas of knowledge and skills) in 'subject' are:

- Designing and developing – Use a range of appropriate techniques to communicate ideas.
- Making – The ability to produce practical outcomes using a range of textiles techniques, tools and equipment.
- Knowledge – Colour Theory, formal element, textiles media and components.
- Evaluating/ Artist Research – The ability to analyse and evaluate artists work to inform their own design and development.

'Subject' disciplinary knowledge is:

In designing and developing: The ability to communicate unique and creative ideas using drawn and textile techniques and to develop ideas through experimentation.

In making: The ability to apply knowledge of textile techniques and processes in order to produce practical textile outcomes.

In knowledge: The ability to apply colour theory, knowledge of the formal elements, textiles media and components to analysis, designing, experimentation and production of final personal outcomes.

In evaluating: The ability to critically analyse the work of artists, identifying how they have used the formal elements and using a wide range of sophisticated vocabulary.

Our curriculum is planned and sequenced as a cumulative curriculum where knowledge builds upon, reinforces and expands previous learning. Our schemes of learning are built around our key schema and substantive knowledge is built upon across Key Stage 3 and 4. Disciplinary knowledge will become progressively more advanced and students will incorporate more complex skills and techniques into their designing and making.

Outcomes from students will increasingly be self-led with each student working independently from a chosen theme.

Our curriculum allows our students to apply the iterative process to their chosen body of work by allowing students to explore their own strengths and interests.

Our curriculum model plans for students to remember more through:

- Low stakes testing throughout each module in KS3 – Key terms and concepts, the content that is included on the knowledge organiser.
- Low stakes retrieval starters in KS4 based on knowledge from the previous weeks learning.

The cultural capital needed to succeed in Textiles' is woven through our curriculum, for example:

- CEIAG activities written in to the schemes of work.
- Links with Ken Stradling gallery giving students exposure to working artists and opportunities to exhibit their work in a public gallery.
- Teachers reference industry experience to inspire students.

The key Schema

Designing and developing

Success in **Designing and developing** is students understanding how to use inspiration from a range of sources including other artists work and their own experimentation to inspire their own work. They will be able to communicate their ideas confidently and fluently, presenting their ideas to a high standard. They will clearly show development in their creative practice, articulately explaining their design and development decisions.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Drawing skills, use of texture, line, tone, pattern and shape. Colour theory.	Students will be able communicate their own design ideas using different methods.
KS4	As above plus be able to continue developing ideas over a prolonged period of time.	Students will be able communicate their own ideas through combining technique and apply the iterative process to their development of techniques and designs.

Making

Success in **Making** is students being able to use a wide range of textiles art techniques in order to create a high quality, refined practical outcome.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Tacking, hand stitching, decorative stitching. Set-up and use of sewing machine. Seam allowance, zips, buttons, sequins. Applique, Reverse Applique, Stencilling, batik and different printing methods (mono and block)	Students will be able to transform communicated ideas into 3D outcomes using textiles techniques.
KS4	As above plus couching, quilting, stitch and cut, transfer printing and patchwork.	As above but independently.

Knowledge

Success in **Knowledge** is students understanding the creative process, being able to use a number of creative strategies in order to generate ideas. Students will know about a range of textiles materials and understand how to best work with them in order to create their desired outcomes. Students will know and understand how to work with a range of components and embellishments and be able to use them in order to enhance their practical work. They will have an understanding of colour theory and the formal elements and be able to comment on artist's use of it in their work as well as applying it in their own.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Colour Theory. The formal elements; Texture, Line, Pattern, Shape.	Students will be able to apply knowledge to their communicated ideas and final outcomes.
KS4	As above plus awareness of a broad range of artists/designers.	As above.

Evaluation

Success in **Evaluation** is students knowing and understanding how to analyse and evaluate work of others, identifying key features, materials, themes, the use of colour and the formal elements. They will be able to evaluate their own work at completion and throughout the creative process in order to drive the development of their project. They will be able to form and express their own opinions in response to the work of others.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Evaluative language and creative analysis of artist and own work.	Students will be able to reflect on their own work and that of others to identify how successful they have been and how others can inspire students own work. Students will be able to evaluate their own skills alongside practical outcomes.
KS4	As above plus compare and contrast.	Students will be able to reflect on their own work and that of others to identify how successful they have been and how others can inspire students own work. Students will be able to evaluate their own skills alongside practical outcomes. Students will be able to compare works of others and suggest where work contrasts.

Secondary Food

Curriculum Intent Statement:

For students to:

- Develop knowledge of and become competent in a wide range of food skills and techniques.
- Be able to select and use a range of equipment safely and efficiently.
- Understand the functional properties of ingredients to build scientific understanding that underpins key food preparation and cooking processes.
- Apply an understanding of functional properties of ingredients when choosing and planning recipes.
- Reflect on theoretical and practical outcomes to enable them to make judgments about food choices
- Develop knowledge and understanding of Food preparation and Nutrition (SBL / WW) the hospitality and catering industry (BDS)
- Connect their experiences to develop life skills for the future.

The key schema (areas of knowledge and skills) in Food are:

- Tools and Equipment – Selecting and using the appropriate equipment in order to prepare dishes.
- Skills and Techniques – Skilfully use a range of techniques and processes in order to prepare, cook and present food.
- Functional properties of ingredients – Understand the role that each ingredient plays in a recipe and how to adapt recipes to meet particular customer needs.
- Health and Safety – How to work safely in the kitchen environment. How to prevent food causing ill health. Legislation relating to the hospitality and catering industry.
- Nutrition – What constitutes a balanced diet? Which food groups do different nutrients come from? Understanding the function of nutrients for individuals' particular needs and the effects of excess and deficiency of nutrients. The effect of cooking on nutritional value.
- Where food comes from – Provenance, Sustainability, Food Miles., environmental impact of food choice.
- Evaluation – Identifying successes and areas for development in dishes. Suggesting Improvements and checking for quality throughout preparation to the finished product. The

BDS

- Hospitality and Catering environment – Understanding the hospitality and catering environment and how the industry operates

SBL / WW

- Food Preparation and Nutrition

'Subject' disciplinary knowledge is:

In developing: the ability to adapt and develop recipes to meet healthy dietary guidelines and meet a range of dietary requirements. To be able to make decisions about the suitability of menu choices addressing a range of factors, showing an awareness of customer needs, environmental factors and the impact of food provenance and organoleptic properties of food choices made. To be able to plan menus for given situations considering equipment, techniques, production plans and identifying risks and recommend personal safety and control measures.

To be able to describe the structure and analyse job requirements within the hospitality and catering industry to develop an understanding of factors that affect the successes and recommend suitable provisions for particular target groups.

In making: the ability to work safely and hygienically in order to use a variety of food commodities, skills, techniques and equipment during food preparation and cooking. To be able to follow recipes independently and use time effectively to make food products with increased accuracy using a range of presentational techniques.

In knowledge: the ability to apply their knowledge of safety, equipment, techniques, functions of ingredients, food provenance when planning menus and making food choices in order to create quality successful outcomes. To incorporate knowledge of how the hospitality and catering provision operates and the environment in which providers operate to meet customer requirements and to be successful.

In evaluating: the ability to identify areas of success in practical outcomes and to be able to suggest strengths and weaknesses. To show an understanding of where improvements can be made whilst identifying quality checks throughout choice of food commodities, preparation techniques, cooking methods and presentation of food.

To be able to make adjustments to skills, techniques and organoleptic properties of food products being made.

The key Schema

Tools and equipment

Success in Tools and Equipment is students knowing the names of the tools and equipment that they use in the food room and remembering what they look like. They should understand how to safely and independently use each piece of equipment in order to prepare food and be able to identify the correct tool to complete a desired result when preparing, cooking and presenting food.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Use a range of small hand tools and electrical equipment. Oven, hob, grill , microwave, food processor , electrical hand whisk, blender, weighing scales, measuring jugs ,sharp knives, mashers, peelers, garlic press, colander , sieves, bun tins , baking trays, rolling pins, colour coded chopping boards , grater , juice extractors, zesters Prepare a variety of food items using a range of equipment ; cakes, bolognaise, cheese and potato pie, fruit crumble, pizza , banana cake, scotch eggs, quiche, soup, sauces sweet and savoury	Students are able to independently select and use an appropriate range of small hand and electrical equipment safely and efficiently to prepare a range of dishes.

Skills and techniques

Success in **Skills and Techniques** is students being able to use a wide range of skills and techniques confidently and safely in the kitchen. They will be able to select appropriate skills and justify their choice. They will be able to present food in a professional manner which is appealing to the consumer.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Skills and techniques: Food preparation – weighing , measuring, mixing , beating , sieving , portioning, slicing , dicing, crushing, peeling, cutting, mashing, grating, rubbing in, coring, kneading, proving ,rolling, blending, enrobing, whisking, squeezing, zesting, melting Cooking methods – baking, simmering, browning, sweating, boiling, grilling, shallow frying, sauce reduction. Dextrinisation, co-agulation, gelatinisation	Students are able to successfully use a range of techniques, independently following a recipe in order to prepare and cook dishes.

Functional properties of ingredients

Success in **Functional properties of ingredients** is students understanding the role that each ingredient plays in a recipe from a scientific perspective. This will enable students to design, develop and adapt dishes successfully. They will be able to identify specific areas for development where outcomes are not successful.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Testing for readiness, enzymic browning, dextrinisation, co agulation, gelatinisation	Be able to explain how and why food is cooked and the functional properties of ingredients to

		build up scientific understanding that underpins key food preparation and cooking processes.
--	--	--

Health and Safety

Success in **Health and Safety** is students knowing how to work safely in the food room. They will be able to explain why the health and safety rules are in place and why it is important to follow them. They will understand how to work safely with food in order to avoid food causing ill health. They will be able to describe and explain the various pieces of legislation pertaining to the hospitality and catering industry.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Personal hygiene rules and general safety rules within the kitchen. Bacteria, cross contamination, food storage	To be able to understand the importance of good food safety and hygiene including knowing how to get ready to cook. Be able to apply principles of cleaning, preventing cross contamination, safe storage of food including chilling, cooking food thoroughly and reheating food until it is steaming hot.

Nutrition

Success in **Nutrition** is students knowing how to eat a balanced diet in line with the Eat Well Guide and the 8 tips to healthy eating. They will be able to explain which foods contain which nutrients and why those nutrients are important. They will be able to explain how to develop dishes for those with special diets and adapt recipes to meet these needs.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Eat well guide, 8 tips/ government guidelines to healthy eating, 5 a day campaign Nutrients to include water and fibre Special dietary needs	Students can apply healthy eating advice and understand people's needs to develop diets for different individuals when planning recipes and choosing ingredients. To be able to identify nutrients within foods and be aware of the importance of achieving a balanced diet.

Where food comes from

Success in **Where food comes from** is students being able to make informed decisions about what food and ingredients to buy and where and when to buy it based on its seasonality, provenance and environmental impact. They will understand the processing that the food has undergone before the point of purchase. Students will become informed consumers and be aware of the impact of food choice within the hospitality and catering on menu planning and meeting customer needs.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Provenance, country of origin, seasonality, food miles, carbon foot print, sustainability, organic farming	How to apply knowledge of where food comes from, in order to make good choices when selecting and purchasing ingredients. Understand how this affects menu choice and the environment

Evaluation

Success in **Evaluation** is students being able to identify strengths and areas for development of the dishes that they prepare. Students will be able to analyse issues with practical outcomes and identify the cause of them, applying their knowledge of food science to solve problems and suggest improvements.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Write evaluations to describe the taste, texture and appearance of food made. Skills and techniques covered How food meets a particular need	To be able to reflect upon outcomes and show an understanding of outcomes relating to skills, techniques, processes use and to discuss how to make changes or improvements to products. Students will be able to describe the organoleptic qualities of food products.

KS4 Hospitality & Catering

Subject: Hospitality and Catering Level 1/2 Award WJEC	Topic: A04 Term 1 <u>Know how food can cause ill health</u>	Duration: <u>Term 1 (8 weeks – 1 double / 3 single lessons a fortnight)</u> <i>Term 2 (7 weeks AO3 should be started within term 2)</i>	Year: 10 (& 11 Production plan practical assessment)
	Topic: A03 Understand how hospitality and catering provision meets health and safety requirements	Duration: <u>Term 2 (7 weeks – 1 double / 3 single lessons a fortnight)</u> <i>Term 3 (6 weeks AO1/2 should be started within term 3)</i>	Year: 10

Substantive, Disciplinary knowledge and Skills expectation

Health and Safety

Success in **Health and Safety** is students knowing how to work safely in the food room. They will be able to explain why the health and safety rules are in place and why it is important to follow them. They will understand how to work safely with food in order to avoid food causing ill health. They will be able to describe and explain the various pieces of legislation pertaining to the hospitality and catering industry.

	Substantive Knowledge	Disciplinary Knowledge
KS4	<p>How the hospitality and catering provision meets health and safety requirements :</p> <p>Personal responsibility within the workplace, risks to personal safety and control measures to avoid risks in hospitality and catering provision. Know how food can cause ill health – food related causes of ill health, role and responsibility of the environmental health officer, food safety legislation, types of food poisoning, symptoms of food induced ill health.</p>	<p>As key stage3 and to also have a deeper understanding of the food related causes of ill health including food allergies and intolerances. To understand the importance of food safety legislation within the hospitality and catering industry and describing the roles and responsibilities of the environmental health officer. To also be able to identify risks and control measures for personal safety within a catering situation and be aware of their own responsibilities to ensure good safety and hygienic practices.</p>

MAKING / PRACTICAL SKILLS

Tools and equipment

Success in Tools and Equipment is students knowing the names of the tools and equipment that they use in the food room and remembering what they look like. They should understand how to safely and independently use each piece of equipment in order to prepare food and be able to identify the correct tool to complete a desired result when preparing, cooking and presenting food.

	Substantive Knowledge	Disciplinary Knowledge
KS4	<p>Tools and equipment as Key Stage 3 but also to include</p> <p>Electrical –food mixers, ice cream makers, deep fat fryers, variety of attachments for the food processor – grating, slicing</p> <p>Specialist equipment: piping bags, waffle maker, pancake tray, blow torch, pasta machines, ravioli tray, cannoli tubes, burger press, lattice pastry cutter</p>	<p>Students are able to independently select and use an appropriate range of small hand and electrical equipment safely and efficiently to prepare a range of dishes. Students are also be able to use a wider range of specialised equipment for particular food product and make choices when menu planning.</p>

Skills and techniques

Success in Skills and Techniques is students being able to use a wide range of skills and techniques confidently and safely in the kitchen. They will be able to select appropriate skills and justify their choice. They will be able to present food in a professional manner which is appealing to the consumer.

	Substantive Knowledge	Disciplinary Knowledge
KS4	Skills and techniques: as KS3 and also food preparation – shaping, hydrating, presentation techniques, piping , filleting, setting, marinate, manipulate sensory properties. cooking methods , steaming, poaching, braising, stewing, roasting, sautéing, au gratin, baking blind , blanching quality assurance of commodities to be used in food preparation	Students are able to select with reasoning the appropriate techniques required in order to prepare dishes and demonstrate a high level of competence in a wider range of food skills.

Subject: Hospitality and Catering Level 1/2 Award WJEC	Topic: A01 Understand the environment in which hospitality and catering provisions operate. A02 Understand how hospitality and catering provisions operate.	Duration: <u>Term 3 (6 weeks – 1 double / 3 single lessons a fortnight)</u> <u>Term 4 (6 weeks – 1 double / 3 singles a fortnight)</u>	Year: 10
Subject: Hospitality and Catering Level 1/2 Award WJEC	Topic: revision / exam question practice. Unit 2 introduction – food groups / balanced diet	Duration: <u>Term 5 (6 weeks – 1 double / 3 single lessons a fortnight)</u> <u>Term 6 (6 ½ weeks)</u>	Year: 10

Substantive, Disciplinary knowledge and Skills expectation

Terms 3& 4 will focus on LO1&2 knowledge

Terms 5 & 6 will complete Unit 1 and re visit all LO 1 – 4 during revision activities. After the Unit 1 exam in June pupils will start to research knowledge required for Unit 2

Term 1 Year 11 – Nutrition knowledge

The Hospitality and Catering Environment

Success in **The Hospitality and Catering Environment** is students being able to understand the environment in which hospitality and catering providers operate and how hospitality and catering provision operates. Students will be able to develop an awareness of the structure, job requirements and working conditions within the industry and students will have a wider understanding of how the industry operates. This understanding will allow students to understand factors that make the hospitality and catering industry successful and review and recommend provisions and their suitability for given situations.

	Substantive Knowledge	Disciplinary Knowledge
KS4	Structure of the hospitality and catering industry Job requirements within the industry Working conditions of different job roles within the industry Factors affecting success of hospitality and catering providers Operation of the kitchen Operation of front of house	To be able to propose a hospitality and catering provision to meet specific requirements and discuss the disadvantages and advantages of proposals.

	How the hospitality and catering provision meets customer requirements	
--	--	--

Nutrition

Success in **Nutrition** is students knowing how to eat a balanced diet in line with the Eat Well Guide and the 8 tips to healthy eating. They will be able to explain which foods contain which nutrients and why those nutrients are important. They will be able to explain how to develop dishes for those with special diets and adapt recipes to meet these needs.

	Substantive Knowledge	Disciplinary Knowledge
KS4	Functions of nutrients in the human body Nutritional needs of specific groups Characteristics of unsatisfactory nutritional intake. The impact of cooking methods on the nutritional value of foods	To be able to understand the importance of nutrition when planning menus and to understand the importance of creating balanced meals / menus that will meet particular dietary needs

Subject: Hospitality and Catering Level 1/2 Award WJEC	Topic: Unit 2	Year: 11
---	----------------------	-----------------

Substantive, Disciplinary knowledge and Skills expectation

Term 1 - Nutrition substantive and disciplinary knowledge applies

Where food comes from

Success in **Where food comes from** is students being able to make informed decisions about what food and ingredients to buy and where and when to buy it based on its seasonality, provenance and environmental impact. They will understand the processing that the food has undergone before the point of purchase. Students will become informed consumers and be aware of the impact of food choice within the hospitality and catering on menu planning and meeting customer needs.

	Substantive Knowledge	Disciplinary Knowledge
KS4	Factors to consider when proposing dishes when planning a menu to explain how dishes on a menu address environmental issues whilst meeting customer needs and trends. Fossil fuels, non-renewable energy, packaging	To be able to discuss how the hospitality and catering industry has an impact on the environment and to be able to discuss ways in which the industry can reduce its impact when planning menus, storing and preparing foods, cooking foods,

Functional properties of ingredients

Success in **Functional properties of ingredients** is students understanding the role that each ingredient plays in a recipe from a scientific perspective. This will enable students to design, develop and adapt dishes successfully. They will be able to identify specific areas for development where outcomes are not successful.

	Substantive Knowledge	Disciplinary Knowledge
KS4	As above plus setting agents, raising agents, denaturing, Water soluble, fat soluble vitamins, starches, proteins, calcium, sodium	And also to be able to understand the impact that different cooking methods have on the nutritional value of food.

KS5 Product Design

Curriculum Intent Statement:

For students to:

- To work creatively when designing and making and apply technical and practical expertise.
- Be open to taking design risks, showing innovation and enterprise whilst considering their role as responsible designers and citizens
- Develop intellectual curiosity about the design and manufacture of products and systems, and their impact on daily life and the wider world
- Work collaboratively to develop and refine their ideas, responding to feedback from users, peers and expert practitioners
- Gain an insight into the creative, engineering and/or manufacturing industries
- Develop the capacity to think creatively, innovatively and critically through focused research and the exploration of design opportunities arising from the needs, wants and values of users and clients
- Develop knowledge and experience of real world contexts for design and technological activity
- Develop an in-depth knowledge and understanding of materials, components and processes associated with the creation of products that can be tested and evaluated in use
- Be able to make informed design decisions through an in-depth understanding of the management and development of taking a design through to a prototype/product
- Be able to create and analyse a design concept and use a range of skills and knowledge from other subject areas, including mathematics and science, to inform decisions in design and the application or development of technology
- Be able to work safely and skilfully to produce high-quality prototypes/products
- Have a critical understanding of the wider influences on design and technology, including cultural, economic, environmental, historical and social factors
- Develop the ability to draw on and apply a range of skills and knowledge from other subject areas, including the use of mathematics and science for analysis and informing decisions in design
- To be aware of social, moral and environmental issues in order to inspire a more sustainable future.

The key schema (areas of knowledge and skills) in Product Design are:

- Understanding user needs – Human responsibility, Identification of different market sectors, demographics, cultural, social and economic design considerations.
- The different research techniques used to refine design contexts.
- Understanding the industrial and commercial practices – Stages of production, manufacturing methods, manufacturing and management systems, Risk assessment and safe working practices.
- Drawing skills – Orthographic, Isometric and One- and Two-point perspective, freehand design sketches, Computer aided design.
- Mathematics – Area, units of measurement, conversion and engineering calculations.
- Mechanical Systems, Motion and Forces – Hydraulics, Gears and Pulleys. How to use these systems to solve a proposed problem. Types of motion, Forces.
- Materials and components – Materials working characteristics, application properties, finishes, components and their application.

- Health and Safety – To be able to work safely in the workshop environment and understand the importance of health and safety and the associated legislation in an industrial environment including risk assessment.
- Tools and Equipment – To be able to work independently in the workshop in order to manufacture products using a range of materials and processes.
- To be able to identify feasible manufacturing solutions.
- CAD/CAM – To be able to appropriately apply CAD/CAM within the design and make process in order to manufacture high quality products.
- Sustainable Design – To develop an awareness and understanding of the need to sustain resources and create a conscious and analytical design methodology.
- Evaluating – To be able to reflect, refine and identify future development opportunities.

'Subject' disciplinary knowledge is:

In designing:

The ability to use primary and secondary research methods in order to develop an understanding of user needs and product marketability ; to develop a design brief and specifications to inform the design of innovative, functional, appealing products that respond to needs of the client; to apply knowledge of materials and how they behave to designs; to design feasible products and outline how they will be manufactured and marketed; to be able to communicate their designs using a range of methods including hand drawings and CAD. To consider sustainability when developing design solutions.

In making:

The ability to work safely and independently in order to model and manufacture high quality working solutions; to accurately produce and follow a project plan; to be able to adapt their approach in response to challenges during manufacture.

In knowledge:

The ability to apply their knowledge of Materials, Mathematics, and science to their designing in order to create innovative and feasible solutions; to be able to incorporate components, composites and electronic systems into their designing; to be able to embed intelligence in products that respond to inputs and control outputs using programmable components.

In Evaluating:

The ability to analyse the work of other designers and engineers, past and present to develop and broaden their understanding; to investigate new and emerging technologies and understand its' impact on individuals, society and the environment, to be able to test, evaluate and refine their own ideas against a specification, considering the views and needs of others.

Our curriculum is planned and sequenced as a cumulative curriculum where knowledge builds upon, reinforces and expands previous learning. This enables students to know more and remember more. Our schemes of learning are built around our key schema and substantive knowledge is built upon from KS2 across Key Stage 3 and 4 into key stage 5. Our curriculum connects prior learning and ensures that essential skills are covered early that they can be applied in numerous contexts later.

Whilst we are aware of the vast differences in the experience students will have had of DT at primary school and secondary, our KS5 curriculum is ambitious and students are encouraged to apply their designing, making, evaluative skills alongside substantive technical knowledge to design situations, using their skills to solve problems and producing high quality outcomes.

Our KS5 curriculum builds on from the strong foundations we lay at Key Stage 3 and 4 ...

Our curriculum model plans for students to remember more through

- Low stakes testing throughout each module in KS3 – Key terms and concepts, the content that is included on the knowledge organiser.
- End of module tests in KS3 focusing on key concepts from the schema that have been covered in that module.
- Use of retrieval starters in KS4 and KS5 focusing on substantive knowledge that we would want to be automatic and fluent for students.
- Formal end of unit tests in KS5

The cultural capital needed to succeed in product design is woven through our curriculum:

- We have CEIAG activities written in to our schemes of learning from Year 7-11. These focus on developing students' awareness of the different roles that are available in the engineering and product design sectors and the qualification paths to those roles. We aim to expose students through these activities to careers that they might not have considered and show them that it is possible for anybody to pursue these qualifications and roles. Our aim is to raise our students' aspirations beyond that of the manual trades that they automatically link to the word 'engineering'.
- Throughout our schemes of work we introduce students to important Engineers and designers past and present in order that they develop an appreciation of iconic designs and technologies.
- In lessons we highlight current affairs relating to the subject or work topic as they appear. We aim to give current and relevant real-world context to all of our design situations.

The key Schema

Understanding User Needs

Success in 'curriculum schema' is students knowing, remembering, understanding and being able to Identify different market sectors, demographics, cultural, social and economic groups. To use a range of research techniques in order to understand the needs of identified users and be able to adapt and refine designs in order to meet user needs.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Needs of users of different age, gender, interests and abilities. Designing for a client with imposed design constraints.	Students can recognise the different needs of different user groups and can apply their knowledge of user and client needs to build design specifications and inform design solutions.
KS4	As above plus: Requirements of different cultures, social and economic groups.	Students can use primary and secondary research techniques in order to gather information about a specific user group and understand the advantages and disadvantages of the research techniques used. Students can adapt existing designs to meet the needs of new users and situations.
KS5	As above plus: User centred design, needs wants and values. Sowing an appreciation of the needs of specific consumers, such as young children, the elderly or those with special physical needs.	Students can use investigative research into the needs, wants and values of users to define a design opportunity or problem that could lead to the production of a design brief and specification. Using above and below the line analysis an in-depth approach of research. Students can understand the effect of legislation/regulations related to product design and consumer protection

Drawing Skills

Success in **Drawing Skills** is students knowing, remembering, understanding and being able to communicate their ideas fluently with others through 2D and 3D freehand sketches, 2D and 3D working drawings applying the conventions of engineering drawings from BS8888 and using rendering, dimensions, different types of line and scale appropriately.

	Substantive Knowledge	Disciplinary Knowledge
--	-----------------------	------------------------

KS3	How to draw simple shapes using 1 and 2 point perspective. Using isometric for 3D drawings. Use of 3 rd angle orthographic drawing. Confidently sketching to communicate. Visible, construction and dimension lines.	Students are able to identify the different types of drawing and can communicate their own design ideas using these methods.
KS4	As above looking at more complex shapes and assemblies. Use of 1st angle orthographic. Conversion from imperial to metric measurement and vice versa. Appropriate choice of scale. Use of Tolerance. Hidden detail and centre lines. BSI, BS8888, ISO.	Students are able to independently select appropriate drawing methods for their requirements and can confidently produce 2D and 3D working drawings in order to communicate their ideas that fully comply with BS8888. They are able to explain the benefits of working to BS8888 and how it fits with the corresponding ISO standards.
KS5	As above looking at more complex shapes and assemblies. Use of modelling and testing to evolve ideas and to support decision making, demonstrating effective independent use of skills/techniques to clearly communicate ideas and proposals to a third party. Appropriate choice of 2D, 3D drawing, section drawings or partial sectioned drawings, system and schematic diagrams, mathematical drawings and CAD	Students are able to apply an iterative design process to generate and communicate excellent initial ideas with sophisticated detailing, selecting the appropriate drawing method for their requirements and can confidently produce 2D and 3D working drawings, which has identified and perceptively considered environmental, sustainability, costs, social, moral and ethical factors, which are clearly relevant to the design and potential user(s). Students are able to develop a detailed proposal, including comprehensive and relevant details of materials, dimensions, finishes and production techniques, which clearly addresses all requirements of the design brief and specification. Students will know how to find relevant information related their product's design and use, from documents such as Health and Safety legislation, BS and COSHH.

Mathematics

Success in **Mathematics** is students knowing how to apply the concepts and formulae in engineering contexts and to use these processes to support the development of their own concepts and ideas. Students will remember the appropriate units for the calculations that they do and will be able to use a scientific calculator correctly in order to perform calculations. Students will understand how Maths and Science can be used to solve engineering problems.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Area, Volume. Power, Resistance, Current and Voltage.	To be able to apply the formulae in order to solve problems related to their project work during design, development and manufacture. Students will be able to remember and apply the correct units for the calculations that they undertake.
KS4	SI Units. Power, Force, etc from spec	Students will be able to select the appropriate formulae to use in a given situation. They will be able to draw out the important quantities from engineering scenarios in order to help them to determine which calculation is most appropriate in each situation.
KS5	Percentages, surface area, volume, trigonometry, graphs and charts, coordinates and geometry, statistics and probability, Ratio	Students will be able to select the appropriate formulae to use in each design situation. They will be able to apply the important quantities from engineering scenarios in order to help them to determine which calculation is most appropriate in each design situation. They will be able to demonstrate an understanding of the Mathematical requirements appropriate to both technical principles and design and make skills.

Mechanical Systems, motion and forces

Success in **Mechanical systems, motion and forces** is students knowing and understanding the different types of forces and motion and how mechanical systems can be used in products to enable changes in movement and force.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Movement: Linear, Reciprocating, Oscillating, Rotating. Forces: Tension, Compression, Torsion, Bending, Shear. Mechanical Systems - Gears	To be able to apply their knowledge of movement and forces to a design situation, producing feasible design solutions that can resist the forces acting on them. To be able to explain how gear systems can be used to our advantage in products and to be

		able to devise simple gear systems for use in their own designs.
KS4	As above plus Mechanical Systems: Hydraulics, Pulleys.	Students can identify a range of mechanical systems in existing products and explain the purpose of using them in that scenario. Students can develop their own mechanical system designs to solve a specific problem.
KS5	N/A	N/A

Materials and their properties

Success in **Materials** is students knowing the different types of materials, where they originate from and being able to classify them. Students will know how to use technical vocabulary to describe properties of each material. They will understand how to test and select suitable materials for a specific purpose based on their working properties and will be able to justify their choices.

	Substantive Knowledge	Disciplinary Knowledge
KS3	<p>Woods: Classifications of timber, hardwoods, softwoods, composition of manufactured boards.</p> <p>Plastics: Classification, thermoplastics, thermosetting plastics. Metals: Classification, ferrous and non-ferrous metals, alloys. Material Properties: Mechanical,</p> <p>Textiles: smart and modern materials, fibres and fabrics, natural and synthetic fabrics, primary source to stock form.</p> <p>Material characteristics: Aesthetics, Cost, Environmental Impact.</p>	<p>Students will be able to identify specific materials used in existing products and explain why they were used, suggesting alternatives where appropriate. They will be able to carry out material tests for a range of mechanical properties and select materials based on the outcomes using their data to justify material choice. They will be able to suggest materials for their design ideas. They will understand where materials come from and the implications of this source for cost, environmental impact.</p>
KS4	<p>As above, plus: composite materials, ceramics, elastomers. Material Properties: Chemical, Optical,</p> <p>Textiles: smart and modern materials, fibres and fabrics, natural and synthetic fabrics, how fabrics behave for different purposes, primary source to stock form, stock form and types, weaving, knitting and bonding.</p>	<p>Students will be able to justify their material choices based on a wider range of material properties. They will select from a broader range of materials. They will understand how materials can be combined to create new materials with improved properties, be able to identify where these have been used in existing products and make suggestions for where these could be used in their own designs.</p>

KS5	As above, plus: natural materials and elements synthetic materials, regenerated materials, composites. Stock forms of the above materials to include, bonded, laminated, profiled, sheet and woven forms, availability and comparative costs	Students will be able to develop a general appreciation of the wide range of materials and components available to them, designers and manufacturers. The students will be able to show a more detailed knowledge of a range of materials, partly developed through use in their specialist NEA work. Students will show an understanding of the complex interrelationships between material, form and manufacturing process and show consideration of how the material affects the structure of the product, which will allow students to make an informed decision of material selection.

Health and Safety

Success in **Health and Safety** is students knowing health and safety rules pertaining to the workshop and being able to explain why they are in place. They will be able to demonstrate independent and confident use of the guidelines in order to work safely in the workshop environment. They will know and understand the range of control measures that are in place in the school workshop environment and the PPE requirements of each machine. They will go on to learn about the various items of legislation that relate to the manufacturing environment and be able to relate the legislation to specific engineering scenarios across a range of sectors.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Workshop/textiles rooms Health and Safety rules. Control Measures used in the workshop. PPE used in the workshop.	Students will follow the health and safety rules relating to the school workshop environment. They will be able to explain why the rules in place and how they reduce the risk to individuals. They will be able to identify PPE used in the workshop and apply the correct PPE in a given situation. They will be able to identify and explain the control measures used in the workshop. They will be able

		to identify unsafe situations and make suggestions of how to reduce the risk
KS4	Health and Safety Legislation: COSHH, RIDDOR, HASAWA, MHOR, PPE in industry.	Students will be able to identify what aspect of H&S each piece of legislation covers and how this reduces risk in specific engineering environments. They will be able to identify and explain the consequences that may result from not following the relevant health and safety legislation. They will be able to suggest suitable PPE for a range of industrial scenarios.
KS5	Workshop/textiles rooms Health and Safety rules. Control Measures used in the workshop. PPE used in the workshop. Health and Safety Legislation: COSHH, RIDDOR, HASAWA, MHOR, PPE in industry.	Students will be able to select and safely use a range of specialist tools, techniques, processes, equipment and machinery appropriate to the design and manufacture of domestic, commercial and industrial products and systems they will be able to select and safely work with appropriate machinery, tools, materials and components to realise their chosen prototype. Students will show a good understanding of all Health and Safety regulations needed within the environment they will work in.

Tools and Equipment

Success in **Tools and Equipment** is students being able to identify and range of hand tools, portable power tools and fixed machines and what they are used for. Students will be able to independently select and use a range of tools and machinery skilfully and safely in order to produce high quality, functional products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Hand Tools: Coping saw, tenon saw, hack saw, chisel, file, tin snips, abrasive paper, screwdriver, Marking out: Try square, steel rule, bradawl, scribe, centre punch. Portable Power Tools: Biscuit Cutter, Cordless Drill, line bender,	Students will be able to identify and competently use the tools and machinery outlined in order to produce high quality outcomes.

	Fixed Machines: Pillar Drill, Buffing Machine, Belt Sander, Scroll Saw, vacuum former Sewing machines, hand sewing, cutting, soldering	
KS4	As above, plus: Portable Power tools: use of handheld sander, hand held router, Knowledge of: angle grinder, Sewing machines, hand sewing, Tyvek, tie dye, batik, heat press.	Students can select and competently use the tools and equipment in order to produce high quality outcomes. Where students are unable to use equipment (due to H&S guidance) they will have an awareness and understanding of the machinery, its appropriate use and the health and safety implications associated with each.
KS5	As above, plus: Hot glue gun,	Students can select and competently use the tools and equipment in order to produce high quality outcomes. Where students are unable to use equipment (due to H&S guidance) they will have an awareness and understanding of the machinery, its appropriate use and the health and safety implications as well as the risk assessment associated with each.

CAD/CAM

Success in **CAD/CAM** is students being able to apply CAD/CAM skills appropriately within the Design and Make process in order to manufacture high quality products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	CAD: 2D Design Tinker CAD Google Sketch Up CAM: Laser Cutter	Students will be able to use the CAD packages in order to produce 2D and 3D digital drawings and know how to prepare a file for laser cutting. They will understand how a laser cutter works and the health and safety considerations for the machine. They will know which materials are able to be laser cut.
KS4	CAD: As above plus Autodesk Inventor. CAM: As above plus knowledge (not use) of CNC router and CNC lathe. CAD/CAM sewing machine	Students will be able to use the CAD software to produce 2D and 3D digital drawings. They will understand when and how the CNC router and lathe are used in industry and be able to identify and give

		examples of products that have been manufactured in this way.
KS5	CAD: Autodesk inventor, 2D design, CURA CAM: Laser cutter (independently used) 3D Printer	Students will be able to independently use CAD and CAM software and processes to develop their design idea's. Showing an understanding of the software and how this can influence the products processes and speed. Students will be able to use appropriate software at both formative and summative stages of their designing. Modelling their prototypes to 1/6th scale suitable to their outcome. Using CAD to communicate their ideas clearly.

Engineering Disciplines, Iconic and Important work of others.

Success in **Engineering disciplines** is students knowing and understanding a range of different engineering sectors. Being able to give examples of products developed and manufactured by each sector and being able to explain the benefit and impact that these products have had on society. This knowledge will encompass a range of important and iconic designs and designers/engineers.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Mechanical, Civil, Aerospace, Electronic,	Students will be able to explain what type of products each of the sectors are concerned with and give specific examples, explaining the benefits that each product has brought to society and individuals. They will be able explain the qualifications/subjects needed to enter each sector.
KS4	As above plus: Biomedical, Automotive Biomedical, Chemical, Communications, Software	Students will be able to explain what type of products each of the sectors are concerned with and give specific examples, explaining the benefits that each product has brought to society and individuals. They will be able explain the qualifications/subjects needed to enter each sector.
KS5	As above:	Students will be able to explain what type of products each of the sectors are concerned with and give specific examples, explaining the benefits that each product has brought to society and individuals. They will be able explain the qualifications/subjects needed to enter each sector.

--	--	--

Electronics

Success in **electronics** is students understanding the basic principles of electronics: current, voltage, resistance and power. They will be able to use appropriate formulae to calculate these values for a given scenario. They will be able to design and construct simple electronic circuits, with an input and an output. **They will experiment with programmable components and understand how they can be programmed to achieve different outcomes.**

	Substantive Knowledge	Disciplinary Knowledge
KS3	Basic electronic principles. How to calculate voltage, power, current and resistance. How to decode a resistor's value. How to build simple circuits. How to use programmable controllers in circuits.	Students will use their electronics knowledge in order to design and build electronic products to satisfy a given design scenario.
KS4	Students will revisit the above information looking at more complex applications of their electronics knowledge.	Students will use their electronics knowledge in order to design and build electronic products to satisfy a given design scenario.
KS5	As above:	Students will use their prior electronics knowledge in order to design and make products suitable for the current market / client needs to enhance their own design ideas where needed.

Sustainable Design

Success in **sustainable design** is students understanding the 6 Rs of sustainability and being able to explain why it is important for us to sustain the resources that we have for future generations. They will be able to identify where the materials that they use originate from in their raw form and the implications of this for the environment. They will consider the end of a products life when designing and be able to analyse and evaluate the environmental credentials of existing products.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Where materials come from. The environmental implications of materials. The 6 Rs. End of life considerations.	Students will be able to apply their knowledge of sustainability in order to design environmentally conscious products. They will select materials with

		sustainability in mind and be able to justify their selections on this basis.
KS4	As above plus how materials are recycled, how many times they can be recycled and whether the material loses quality upon recycling.	Students will select materials based on a wide range of environmental credentials, fully justifying their selection.
KS5	As above plus understanding what values (technical, Economic, social, environmental and moral) are implicit in product design solutions. The conservation of raw materials. how manufacturing products effect the environment. What the Sustainability issues are that impacts the environment.	Students will be able to apply their knowledge of environmental factors showing an understanding how the disposal, surplus materials, components and by-products can affect the environment and re-design accordingly for a greener future. Justifying their selection of materials for the design and make outcome.

Evaluating

Success in **evaluating** is students being able to analyse the work of others identifying good features and areas for development. They will then be able to incorporate these findings into their work. They will be able to reflect on their own work throughout the design and manufacture process and refine their products based on findings. At the end of a project, they will be able to identify successes and areas for future development.

	Substantive Knowledge	Disciplinary Knowledge
KS3	Evaluative language: Structure of a final evaluation: Positives, Negatives, Improvements. Product Analysis using ACCESS FM.	Students will be able to reflect on their own work and that of others to identify positives, negatives and improvements that could be made. Students will be able to evaluate their own skills alongside practical outcomes.
KS4	As above plus: Iterative Design.	Students will be able to reflect on their own work and that of others to identify strengths and areas for development. Students will be able to evaluate their own skills alongside practical outcomes. Students will evaluate throughout the design and make process refining their ideas in response to their findings,
KS5	As above plus: qualitative and/or quantitative criteria	Students will be able to reflect on their own work and that of others to identify strengths and areas for

		development. Students will be able to evaluate their ideas and decisions whilst applying iterative design processes. Students will evaluate throughout the design and make process refining their ideas in response to their findings.
--	--	--

Summative Assessment plan

In all Key Stage 3 units of work we assess against the 4 areas of:

- Develop
- Make
- Knowledge
- Evaluate

Students receive a Red, Amber or Green against each skill assessed for that unit and these are communicated to the student via the assessment sheet that is stuck in the front of their DT book. Students have the opportunity to improve the skill and the RAG will then be updated on the sheet, this may take place as part of live marking.

These RAG ratings are then transferred in to Doddle

In Key stage 4 students are formally tested at the end of every unit of work in preparation for the exam. These test marks are communicated on students tracking sheets and recorded on teacher tracking sheets.

In Key Stage 5 students are formally tested at the end of every unit of work in preparation for the exam. These test marks are communicated on students tracking sheets and recorded on teacher tracking sheets.

Futura Drama

Curriculum Framework

Drama Curriculum Framework

Intent:

At the Futura Learning Partnership we believe that students should experience outstanding drama lessons that expose them to a range of theatre styles and performances. Through our engaging curriculum we aim to focus on developing students' creativity and performance skills through a diverse selection of practical lessons. In KS3 students will explore a range of styles and genres to ensure students have a vast experience of theatre and learn key skills and techniques to prepare them for further study at KS4 and KS5. Each unit will help students develop their performance and creative skills using both script work and more independent devised piece. We pride ourselves in the range of important social, emotional, and political topics which students are exposed to within our curriculum. We aim to encourage discussion,

engagement, and reflection around these crucial topics to experiment with ideas and to allow students to express themselves through imaginative performances. The drama experience in KS3 will encourage a life-long interest in drama and the theatre industry and will help students to develop essential transferable skills such as teamwork, independence, creativity, resilience and communication to prepare students for their future studies and employment opportunities.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive and disciplinary concepts:**

Year 7

Year Group	Substantive Knowledge	Disciplinary Knowledge	Possible Context
7	<p>1. Performance Skills:</p> <ul style="list-style-type: none"> - Characterisation - Movement (facial expressions, gestures, body language, posture, proxemics) - Voice (pitch, pace, volume, emphasis, pause, accent) - Communication with audience - Using stage space <p>2. Explorative techniques:</p> <ul style="list-style-type: none"> - Still image - Narration - Thought tracking - Slow Motion - Soundscapes - Flashback/flashforward - Improvisation - Hot seating <p>3. Theatre Styles and Practitioners</p>	<p>1. Ability to transfer skills to a range of performances including scripted and devised. Students can maintain a clear character throughout a performance. They will be able to maintain their role on stage. Students can use vocal and physical skills to present both character and emotion. Students understand how to use the performance space. Students have a good understanding of how performance skills communicate meaning to an audience.</p> <p>2. Students can use and apply explorative techniques accurately to a range of performances (both scripted and devised).</p> <p>3. Students can describe the conventions of the theatre style/practitioner. Students can use the practical techniques of a theatre style in performance. Students have a basic understanding of how the practitioners influenced the theatre style. Students can transfer skills to other performances.</p> <p>4. Students show a reasonable interpretation of the script. Students can explain what the script is</p>	<ul style="list-style-type: none"> - Mime and movement, voice - Darkwood Manor - Lloyds Leisure Facility - Charlie and the chocolate factory - Introduction to script work - Live Theatre review

- Mime (exaggerated movement, comedic techniques)

4. Initial Script Work

- Read an age-appropriate script
- Understand characters
- Understand plot
- Follow stage directions
- Learn dialogue
- Mood and atmosphere

5. Devising

- Respond to a stimulus (textual, visual, aural)
- Develop ideas from a stimulus
- Experiment with ideas using improvisation
- Explorative techniques (still image, narration, thought tracking, slow motion, flashback)
- Create a character
- Build a story
- Refine and rehearse performance

6. Some analysis/Evaluation of performances

- Using set criteria to assess own and others performance
- Providing feedback (WWW and EBI)
- Use examples

about. Students can stage the script maintaining a character throughout and applying the correct stage directions. Students can show the relationships between characters considering the mood and atmosphere of the piece. Students are able to show that they understand the style through incorporation of skills and techniques.

5. Students can create a clear story and character in performance. Students can work with others in responding to the stimulus. Students can suggest ideas and use improvisation to develop characters and narrative. Students can create ideas for performance, considering appropriate starting points, key moments and endings. Students can experiment with dramatic techniques when creating drama.

6. Students can describe what happened in a performance. Students can discuss what they enjoyed about a performance. Students can discuss improvements that are needed for a performance. Students can use keywords within their verbal feedback

7. Students can explain what the play is about

Students show a reasonable understanding of the production and the design elements used. Students have some understanding of what the

- Terminology expected
- Respond to feedback

7. Live Theatre

- Watch clips from a live theatre production
- Understand the plot
- Understand the characters
- Know the main design areas for live theatre (costume hair and make-up, set and props, lighting, sound, staging)
- Know basic terminology relating to each design area.

Costume – colour, fabric, condition, accessories, practicalities

Lighting – colour, fade, spotlight, gobo, wash, gels

Sound – pitch, tempo, volume, live, recorded

Set/Props – colour, condition, position, material, practicality

Staging – Upstage, Down stage, Stage left, stage right, centre stage

- Understand that design elements communicate meaning
- Know careers relating to theatre (costume designer, lighting designer, sound designer, director, choreographer, stage manager)

key themes and issues in the production. Students can describe the impact design elements have on an audience and how they help communicate meaning. Students can take on the role of designers to produce their own ideas on how to stage a production. Students have some understanding of the careers that are involved in putting on a production.

Suggested Topics

	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Year 7	Mime, movement and voice	Charlie and the Chocolate Factory	Darkwood Manor	Lloyds Leisure Facilities	Introduction to script work	Live Theatre (Production may vary depending on what is available)
	<p>Intent Understand how you use physical and vocal control and manipulation to create characters in a variety of styles.</p> <p>Implementation Practical exploration of a variety of vocab, movement/body exercises, mime and still image in rehearsal and performance.</p>	<p>Intent Understand how to devise from a story and create characters through Charlie and the Chocolate Factory.</p> <p>Implementation Exploration of scenes, characters, themes and issues through the original book, and film adaptations.</p>	<p>Intent Understand how to use a stimulus to create characters and build a story.</p> <p>Implementation Solve a mystery by responding to photographs, stories, hot seating, thought tracking and modern cultural references.</p>	<p>Intent Further develop the use of movement, physicality, voice and devising skills.</p> <p>Implementation Practical exploration of physical theatre, persuasive language, advertising and interview techniques and a variety of stimuli.</p>	<p>Intent Understand how to use basic scripts in rehearsal and performance. Understand how to devise from a script.</p> <p>Implementation Exploration of rehearsal technique, developing character and memorising lines with script extracts as well as creation of their own.</p>	<p>Intent To explore a live theatre production and understand the key performance and design elements.</p> <p>Implementation Exploration of characters, themes and issues in the production through script work and devising. Analyse and evaluate the design elements and how they are used in the performance.</p>

	<p>Impact Students will be able to use their voices and physicality in a variety of ways to develop characters effectively, be able to create pieces of mime.</p>	<p>Impact Students will be able to manipulate their body and voice to create characters</p>	<p>Impact Students will be able to create clear characters and link stimuli to develop a story along a central theme.</p>	<p>Impact Students will be able to more skilfully manipulate their body and voice to manipulate a story, and have a basic understanding of the work place.</p>	<p>Impact Students will be able to perform scripts, memorise lines and have a basic understanding of staging/rehearsal techniques.</p>	<p>Impact Students to have a clear understanding of plot, characters, performance skills and design skills.</p>
--	--	--	--	---	---	--

Year 7 Assessment Grid

Skill	Developing	Secure	Extending
Characterisation	On stage you are unable to stay in role and perform without losing focus. Your character does not fit the explored theme/style of Drama. When on stage, you are not considering other people or your audience and it is difficult to see who you are performing as	Characterisation showcases an adequate understanding of your character within performance. You may be able to sustain your role; however you come out of character easily and are unable to sustain your role on stage. You can showcase some characterisation skills, however these are not always consistent and lack rapport with your performances and live audience.	Pupils will be able showcase a clear character on stage. They will be able to capture different personas and portray their characters with a sense of confidence. They will be able to sustain their role on stage and be able to acknowledge the use of their audience.
Voice and Movement	Vocal skills are sound, with an adequate understanding of how they can be used to communicate meaning to an audience. Vocal delivery is appropriate but inconsistent at times. There is an awareness of tone, volume, pitch and pause.	Vocal skills are secure. There is an understanding of how choices show meaning. Vocal delivery shows an understanding of character and the skills are appropriate. There is a secure use of vocal tone, pace, pitch and volume. There is an awareness of how physical skills communicate meaning to an audience. There is a secure use of gesture, expressions and use of space	Vocal skills are excellent. Students show understanding of how creative vocal choices show meaning to an audience. Vocals are used to present both character and emotion. Students are able to demonstrate an assured use of pace, pitch, projection and tone. Physical skills are confident, with a good understanding of how choices made communicate meaning to an audience. Movement is engaging, dynamic and skilful throughout. Physical skills show a confident use of gesture, expressions and use of space
Understanding of Performance Style	You can sustain your role on stage. There are some moments where the style isn't always clear within your performance. You have energy and drive within your performance which showcases good intent and with some confidence.	Your involvement is clear and apparent within your performance. You can control your character on stage with focus and commitment and there is an awareness of the style explored	On stage your performance is engaging and energetic You are able to showcase that you understand the style, through incorporation of skills and technique You have made a clear contribution to the development and performance at all times
Analysis and evaluation	You have a sound ability to reflect on your own performance and that of others. You can identify some strengths and weaknesses using some key terms. You show some understanding of theatrical aims and intentions.	You have a secure ability to reflect on your own performance and that of others. You can give detailed feedback on strengths and weaknesses using examples from the performance using appropriate drama terminology. You show an insightful understanding of theatrical aims and intentions.	You have an excellent ability to reflect on your own performance and that of others. You can confidently analyse and evaluate the strengths and weaknesses using appropriate examples from the performance. You confidently use a wide range of specialist drama terminology. You show an intrinsic understanding of theatrical aims and intentions.

Year 8

Year Group	Substantive Knowledge	Disciplinary Knowledge	Possible Context
8	<p>1. Consistent application of performance Skills:</p> <ul style="list-style-type: none"> - Movement (facial expressions, gestures, body language, posture, proxemics) - Voice (pitch, pace, volume, emphasis, pause, accent) - Communication with audience - Staging types (proscenium arch, traverse, thrust, in the round) <p>2. Confident application of explorative strategies:</p> <ul style="list-style-type: none"> - Still image - Narration - Thought tracking - Slow Motion - Cross-cutting - Flashback/flashforward - Marking the moment - Improvisation - Multi-role - Direct address - Placards 	<p>1. Ability to transfer skills to a range of performances including scripted and devised. Students can sustain a clear character on stage with confidence. Students will be able to use their audience and other performers on stage with an effective rapport. Students show excellent use and control of physical and vocal skills. Students show an assured understanding of how performance skills communicate meaning to an audience. Students can perform in using a variety of staging types.</p> <p>2. Students can confidently apply a range of explorative strategies to their own performances (both scripted and devised).</p> <p>3. Students can explain the conventions of the theatre style/practitioner. Students can confidently use the practical techniques of a theatre style in performance. Students have a good understanding of how the practitioners influenced the theatre style. Students are able to apply the techniques and theories to a range of performances.</p>	<ul style="list-style-type: none"> - Blood Brothers - Matilda - Devising from a range of stimulus - Stanislavski - Hairspray - Brecht - Live Theatre

- Monologue
- Hot seating

3. Theatre Styles and practitioners

- Explore at least 2 different theatre styles and practitioners
- Practically explore the conventions of the theatre style/practitioner
- Learn and apply the techniques of the practitioner

Students should explore at least one of the following practitioners:

- Stanislavski (Naturalism, Stanislavski system, given circumstances, magic if, aims and objectives, subtext, super-objective)
- Musical Theatre (chorus, ensemble, choreography, motif, canon, unison)
- Brecht (The 'V' Effect, Epic Theatre, multi-role, narration, Gestus, direct address, placards, communicating a message)

4. Script Work

- Read an age-appropriate script
- Understand character/plot
- Follow stage directions
- Learn dialogue

4. Students show a good interpretation of the script. Students have a clear understanding of what the script is about. Students can confidently stage the script communicating a clear character throughout and applying the stage directions. Students can clearly show the relationships between characters using performance skills. Students are able to sustain the mood and atmosphere of the piece. Students are able to showcase the correct attribute for the chosen style using skills and techniques.

5. Student can create an engaging performance from a range of stimulus. Students can discuss a range of ideas as a group in response to a stimulus. Students can develop each other's ideas through improvisation and drama conventions/techniques. Students can creatively experiment with dramatic techniques when creating drama.

6. Students can discuss what was successful in a performance. Students can confidently suggest improvements for developments. Students can use clear examples to support their feedback using key terminology in their feedback.

7. Live Theatre

- Mood and atmosphere
- Themes/issues of the play
- Genre

5. Devising

- Respond to a stimulus (textual, visual, aural)
- Develop creative ideas from a stimulus
- Experiment with ideas using a range of explorative strategies (improvisation, hot seating, dramatic techniques (still image, narration, thought tracking, slow motion, cross-cutting marking the moment, multi-role, monologue, direct address)
- Theme/message
- Refine and rehearse performance
- Create an original performance

6. Confident analysis/Evaluation of performances

- Using set criteria to assess own and others performance, providing/acting on feedback.
- Providing useful and detailed feedback (WWW and EBI)
- Use clear examples
- Apply key terminology confidently
- Respond to feedback

7. Live Theatre

Students show a good understanding of the production and the design elements used. Students have a clear understanding of what the key themes and issues in the production. Students can confidently analyse the impact design elements have on an audience and how they help communicate meaning. Students can effectively take on the role of designers to produce their own ideas on how to stage a production. Students have a good understanding of the careers that are involved in putting on a production.

- Watch clips from a live theatre production
- Understand the plot
- Understand the characters
- Understand the importance of the design areas for live theatre (costume hair and make-up, set and props, lighting, sound, staging)
- Confidently use terminology relating to each design area.
Costume – colour, fabric, condition, accessories, practicalities
Lighting – colour, fade, spotlight, gobo, wash, gels
Sound – pitch, tempo, volume, live, recorded
Set/Props – colour, condition, position, material, practicality
Staging – Upstage, Down stage, Stage left, stage right, centre stage
- Understand that design elements communicate meaning
- Know careers relating to theatre (costume designer, lighting designer, sound designer, director, choreographer, stage manager)

	play and the moral dilemmas facing the characters	of character, theme and genre	of skills to create devised work	order to improve their acting skills	required to be a musical theatre performer	plot, characters, performance skills and design skills.
--	---	-------------------------------	----------------------------------	--------------------------------------	--	---

Year 8 Assessment Grid

Skill	Developing	Secure	Extending
Characterisation	Your character is underdeveloped and you cannot showcase a clear character on stage without losing focus. There are times within the performance where you drop character and this impedes the fluency of the work. There is limited rapport OR communication with other performers and your live audience.	Characterisation showcases a good understanding of the performed role, within the genre you are exploring. There are moments of consistency within your role, however these are not always clear. You may come out of character at times during the performance. You have a general consistency, however confidence is not always apparent and this effect your rapport with the audience and other characters on stage.	Pupils will be able to sustain a character on stage and perform with confidence in front of a live audience. They will be able to use their audience and other performers on stage with an effective rapport. There will be a sense of continued focus and character development at this stage
Voice and Movement	Vocal skills are sound with an adequate understanding of how they can be used to communicate meaning to an audience. Vocal delivery is appropriate. There is a sound control over the vocal skills however with moment so inconsistencies. There is sound understanding of physical skills to communicate meaning demonstrating an adequate control. Demonstration of gesture, expression, stillness, and contact.	Vocal skills are secure; there is an effective understanding of how creative choices communicate meaning to an audience. Vocal delivery is consistent. Physical skills are secure, with an effective understanding of how choices communicate meaning to an audience. Physical delivery is consistent. There is a secure use of physical techniques, gesture, expression, stillness, use of space and contact. There is a good range of physical movement.	Vocal skills are excellent. Students show an assured understanding of how creative choices communicate meaning to an audience. Vocals are creatively used to present both character and emotion presenting a developed understanding. There is a clear technical control over vocal clarity, tone, pace, pause and projection. Physical skills are assured, showing an understanding of how creative choices communicate meaning to the audience. There is an excellent use and control of physical techniques; gesture, expressions, stillness, use of space and stance. Physical performance shows a variation and range.
Understanding of Performance Style	There is an emerging energy on stage which shows some excellent areas of confidence on stage. You are able to control and sustain your role on stage and be aware of the stylistic demands of the genre. You are able to creatively transform the text/devised performance to suit the style.	You have contributed to the performance and process of the work There is some control over the style and you can use moments of dramatic conventions in your work There is a sustained energy and drive in your performance piece. You have a developed character at this stage.	You have made a clear contribution to the groups outcomes and development On stage you are able to showcase the correct attributes for your chosen style You can use your skills of the style to present a text/devised performance on stage. You are confidence on stage and can drive the performance forward with your use of skill & confidence.

Analysis and evaluation	<p>You have a sound ability to reflect on your own performance and that of others. You can identify some strengths and weaknesses using some key terms. You show some understanding of theatrical aims and intentions.</p>	<p>You have a secure ability to reflect on your own performance and that of others. You can give detailed feedback on strengths and weaknesses using examples from the performance using appropriate drama terminology. You show an insightful understanding of theatrical aims and intentions.</p>	<p>You have an excellent ability to reflect on your own performance and that of others. You can confidently analyse and evaluate the strengths and weaknesses using appropriate examples from the performance. You confidently use a wide range of specialist drama terminology. You show an intrinsic understanding of theatrical aims and intentions.</p>

Students have a comprehensive understanding of the careers that are involved in putting on a production.</p>	
--	---	--

- Understand the characters
- Understand the impact of the design areas for live theatre (costume hair and make-up, set and props, lighting, sound, staging)
- Effectively use terminology to analyse to each design area.
Costume – colour, fabric, condition, accessories, practicalities
Lighting – colour, fade, spotlight, gobo, wash, gels
Sound – pitch, tempo, volume, live, recorded
Set/Props – colour, condition, position, material, practicality
Staging – Upstage, Down stage, Stage left, stage right, centre stage
- Effectively analyse and evaluate how design elements communicate meaning
- Creatively design their own production
- Know careers relating to theatre (costume designer, lighting designer, sound designer, director, choreographer, stage manager)

Suggested Topics

	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
	Devising based on real life events	Theatre in Education	The Curious Incident of the Dog in the Night-time	Devising responding to a stimulus	Dear Evan Hansen	Live Theatre
Year 9	Intent For students to be able to devise a variety of work based on real life disasters that have happened.	Intent The unit will introduce students to the style and genre of Theatre in Education, exploring how theatre can be used to highlight an issue aimed at a particular target audience.	Intent The unit will introduce students to physical theatre and how to create more movement based pieces	Intent For students to be able to devise a variety of work using a plethora of stimulus materials	Intent For students to have a full understanding of the play Dear Evan Hansen including characters, storyline, theme and moral issues	Intent To explore a live theatre production and understand the key performance and design elements.
	Implementation Students to use clips, articles, eye witness accounts, poems etc to create meaningful work and use various techniques to create the work	Implementation Students will consider the different age groups that might be appropriate audience for developing pieces of TIE.	Implementation Following the activities below students will be explore different scenes from The Curious Incident of the Dog in the Night Time	Implementation Students to use articles, songs, poems etc to create meaningful work and use various techniques to create the word	Implementation Practical study of the text looking at various scenes as well as off text improvisation.	Implementation Exploration of characters, themes and issues in the production through script work and devising. Analyse and evaluate the design elements and how they are used in the performance.
	Impact	Impact	Impact	Impact	Impact	Impact

	Students to have acquired a variety of skills to create devised work	The unit will result in students creating and performing their own short Theatre in Education piece.	The unit will enable students to create physical theatre influenced pieces which explore the key issues in the play with a particular focus on understanding the main character, Christopher and how autism affects him.	Students to have acquired a variety of skills to create devised work	Students to have full understanding of the play and the moral dilemmas facing the characters	Students to have a clear understanding of plot, characters, performance skills and design skills.
--	--	--	--	--	--	---

Year 9 Assessment Grid

Skill	Developing	Secure	Extending
Characterisation	Characterisation demonstrates a sound understanding of the role and its context within the performance. Characterisation is generally consistent and clear, showing adequate focus and confidence. Sound rapport and communication with other performers.	Characterisation demonstrates a secure understanding of the role and its context within the performance. Characterisation is secure, showing sustained focus and confidence. Effective rapport and communication with audience/other performers.	Characterisation is outstanding, showcasing a clear awareness of the role in context of the performance. You are able to effectively communicate on stage with other actors, have a sense of fluency in your rapport and be fully aware of your audience.
Voice and Movement	Vocal skills are sound, with an adequate understanding of how creative choices communicate meaning to the audience. Vocal delivery is generally appropriate and consistent. Sound technical control in the use of vocal techniques (clarity, pace, inflection, pitch, projection). Vocal performance shows general variation and range. Physical skills are sound, with an adequate understanding of how creative choices communicate meaning to the audience. Physical delivery is generally appropriate and consistent. Sound technical control in the use of physical techniques (gesture, facial expression, stillness, stance, contact, use of space and spatial relationships). Physical performance shows general variation and range.	Vocal skills are secure, with an effective understanding of how creative choices communicate meaning to the audience. Vocal delivery is appropriate, consistent and purposeful. Secure technical control in the use of vocal techniques (clarity, pace, inflection, pitch, projection). Vocal performance shows competent variation and range. Physical skills are secure, with effective understanding of how creative choices communicate meaning to the audience. Physical delivery is appropriate, consistent and purposeful. Secure technical control in the use of physical techniques (gesture, facial expression, stillness, stance, contact, use of space and spatial relationships). Physical performance shows competent variation and range.	Vocal skills are assured, with a comprehensive understanding of how creative choices communicate meaning to the audience. Vocal delivery is engaging, dynamic and skilful throughout. Accomplished technical control in the use of vocal techniques (clarity, pace, inflection, pitch, projection). Vocal performance shows comprehensive variation and range. Physical skills are assured, with comprehensive understanding of how creative choices communicate meaning to the audience. Physical delivery is engaging, dynamic and skilful throughout. Comprehensive technical control in the use of physical techniques (gesture, facial expression, stillness, stance, contact, use of space and spatial relationships). Physical performance shows comprehensive variation and range.
Understanding of Performance Style	Clear contribution to the realisation of the group's artistic intention in performance. Performance demonstrates clear control and understanding in relation to style, genre and theatrical conventions. Demonstrates a coherent interpretation of the text in performance. Individual performance is generally developed and has clear impact, showing emerging energy and ease.	Effective contribution to the realisation of the group's artistic intention in performance. Performance demonstrates secure control and understanding in relation to style, genre and theatrical conventions. Demonstrates a convincing and sustained interpretation of the text in performance. Individual performance is developed, thoughtful and sympathetic, creating effective impact and showing sustained energy and ease.	Assured contribution to the realisation of the group's artistic intention in performance. Performance demonstrates assured control and understanding in relation to style, genre and theatrical conventions. Demonstrates an accomplished and comprehensive interpretation of the text in performance. Individual performance is refined, articulate and dynamic, creating significant impact with ability to drive the piece, showing accomplished energy and ease.

<p>Analysis and evaluation</p>	<p>You have a sound ability to reflect on your own performance and that of others. You can identify some strengths and weaknesses using some key terms. You show some understanding of theatrical aims and intentions.</p>	<p>You have a secure ability to reflect on your own performance and that of others. You can give detailed feedback on strengths and weaknesses using examples from the performance using appropriate drama terminology. You show an insightful understanding of theatrical aims and intentions.</p>	<p>You have an excellent ability to reflect on your own performance and that of others. You can confidently analyse and evaluate the strengths and weaknesses using appropriate examples from the performance. You confidently use a wide range of specialist drama terminology. You show an intrinsic understanding of theatrical aims and intentions.</p>
---------------------------------------	--	---	---

KS3 Levels

	Rehearsal Group work How you put a piece of work together through developing ideas and working with others	Performing How you develop your practical skills through the	Evaluating How you reflect on your own work and the work of others, explore why decisions were made, target where you can develop and how you might do it.
8/9	I make a major contribution to discussions making clear connections between different stimuli, genre and text. I am a sensitive group member and I listen to others and make informed decisions that improve the work.	My performance uses an outstanding range of drama skills to excite and engage the audience.	My evaluation is accurate and stimulates change. I use precise examples to evaluate and justify reasons why linking to the intended impact on the audience and evaluate success. I can set challenging targets for myself and others and be clear about how they will be achieved.
7	I make a full contribution to discussions making connections between topics, genres and ideas. I lead without dominating and can take on ideas of other group members to improve the work.	I am a highly accomplished performer with a clear and thorough understanding of how to communicate with an audience using drama skills imaginatively.	My evaluation is informed and I use analytical drama vocabulary. I use appropriate examples to evaluate and confidently justify. I can set appropriate targets for myself and others to improve further work.
6	I listen actively to discussions contributing thoughtful comments and rounded ideas. I am supportive group member, I listen to others ideas and confidently take on the role of director.	I perform skilfully communicating to the audience using drama skills in an interesting and creative way.	I can evaluate effectively giving ideas for how to make work better. I use clear examples to evidence what went well and where to improve in my own and the work of others. I can justify why decisions were made. I can show an awareness of

			how the audience responded and why. I set achievable targets for myself and others.
5	I listen actively to discussions and always contribute own thoughts and ideas. I lead in a group shaping and structuring the work.	I can communicate effectively to the audience in performance using a range of drama skills	I can use drama vocabulary when talking about performance and can explain my opinions. I can use some examples to evidence what went well and where to develop in my own work and that of others. I can show an awareness of how the audience responded and why. I set realistic targets for myself and others.
4	I listen actively to discussions contributing ideas and thoughts. I make contributions during group work and sometimes lead.	I perform with confidence and good audience awareness. I use some drama skills effectively.	I can evaluate work giving ideas for how to make work better when prompted. I can recognise what went well and where to develop in my own work and the work of others with reference to some moments. I show an understanding of what the audience might think or feel about your work. I can set myself realistic targets for the next piece of work.
3	I listen to discussions and share some thoughts and ideas. I share my own ideas and opinions to help develop the piece.	I perform with some confidence and some audience awareness. I use some drama skills in performance.	I can use drama vocabulary when talking about performance. I can identify what went well in a piece and moments that could be improved.

2	I listen to discussions and can answer questions when asked. I can share my ideas when asked.	I keep in role for the performance	I can say what I like or dislike about a piece of work.
1	I follow instructions. I listen to discussions	I can take part in a performance	I can show an opinion when asked.

Futura English

Curriculum Framework

English Curriculum Framework

Intent

The Futura Learning Partnership intent for English is that a high-quality education will inspire children to become creative and critical thinkers. We believe that it is the right of every child to become a competent and confident user of the English language; able to live, work and succeed in the literate world. Children will be able to communicate fluently and confidently, using a wide vocabulary accurately and effectively. They will be able to critique a range of fiction and non-fiction texts, appreciating a rich and varied literary heritage. Children will be inspired to become imaginative writers who can write coherently with a high level of accuracy in spelling, punctuation and grammar; children will be able to adapt their language and style in and for a range of contexts, purposes and audiences. English provides the fundamental building blocks for

students to succeed in all subjects; a high level of literacy provides the vehicle needed to unpick key concepts across the curriculum. This, alongside carefully selected texts appropriate to our contexts, develops the cultural capital needed to succeed in life. Crucially, we aim to foster a love of literature through widespread reading for enjoyment.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are the following key **substantive and disciplinary concepts**:

1. The mechanics of writing
2. Reading fluently, accurately and for meaning
3. Using evidence
4. Critical analysis of texts
5. Making links and connections between and across texts
6. Adapting for audience and purpose

1. The mechanics of writing

Success is students being able to write accurately with no errors in spelling, punctuation and grammar. They should know, remember and understand ‘rules’ of spelling, punctuation and grammar so that they can apply them to their own writing. They should be able to accurately use sophisticated vocabulary, ambitious punctuation and varied grammatical structures, making deliberate choices to create an impact on the reader.

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	Knows how to hold a pencil between thumb and two fingers, no longer using whole hand grasp.	Understands the meaning of print-ascribes meaning to marks made.	Birth to Five Matters and Prime (physical/ CLLD)/ Specific (Literacy) Areas Handwriting scheme e.g. Teach, Collins, Nelson, Penpals

	<p>Knowledge of up to RWI Set 2/ Phase 4 GPCs</p> <p>Knows early Common Irregular words.</p> <p>Statement Sentences start with capital letter and end with full stops.</p>	<p>Hears and applies known sounds to transcription of words. Writes simple sentences.</p> <p>Application in writing</p>	<p>Phonic scheme: RWI as preferred scheme</p> <p>Supplementary: Phonics Bug, phonetically decodeable texts e.g. ORT, PM</p>
Year 1	<p><u>Handwriting</u></p> <p>Begin to form lowercase letters in the correct direction, starting and finishing in the right place Form capital letters Form digits 0-9</p> <p><u>Reading and Spelling</u></p> <p>Knowledge of 40+ phonemes already taught (Set 3 RWI)</p> <p>Read and spell common exception words for year 1</p> <p>Can name the letters of the alphabet</p>	<p>Application across all independent writing.</p> <p>Identification in texts.</p> <p>Hears and applies known sounds to transcription of words.</p> <p>Identification in texts.</p>	<p>Handwriting scheme e.g. RWI, Teach Handwriting, Collins, Nelson, Penpals</p> <p>Phonic scheme: RWI as preferred scheme</p> <p>Supplementary: Phonics Bug, phonetically decodeable texts e.g. ORT, PM</p>

	<p>Can spell suffixes for plurals –s -es</p> <p>Adding suffixes to verbs where there is no change needed –ing, -er, -ed and the prefix un.</p> <p><u>Punctuation</u></p> <p>Use capital letters and full stops to punctuate many sentences with accuracy.</p> <p>Use capital letters for personal pronouns</p> <p>Use a question mark for a question.</p> <p>Use an exclamation mark when appropriate.</p> <p><u>Grammar</u></p>	<p>Modification to fit different purposes.</p> <p>Application in independent work.</p> <p>Oral work to distinguish the understanding the structure of a sentence including subject, verb object.</p> <p>Application in independent work.</p>	<p>Jane Considine as preferred scheme</p> <p>Supplementary: Babcock resources/ CGP/ Letts / Spelling Shed / Doodle Spell/ MC Grammar</p> <p>Other Suggested Texts:</p> <p>Literacy Shed</p> <p><u>Nouns</u></p> <p>Book of butterflies Read Write Perform:</p> <p>Crazy Creatures. Non Fiction</p> <p><u>Adjectives</u></p> <p>The Ugly Sharkling</p> <p>Handa’s Surprise</p> <p>Fatou Fetch the Water</p>

Year 7	<p>Word-level: Verbs, adverbs, nouns (common, proper, abstract, pronouns), articles, adjectives, prepositions, determiners, subject-verb agreement, tense (past, present, future), person (first, third), conjunctions.</p> <p>Sentence-level: Simple, compound and complex sentences.</p> <p>Punctuation: full-stop, comma, question mark, brackets, speech marks (dialogue and direct speech), quotation marks, apostrophes.</p>	Students can identify in the work of others, and can use accurately in their own writing.	Grammar for Writing Debra Myhill resources

Year 8	<p>Word-level: Adverbial, adjectival and noun phrases, plural nouns, imperative verbs, modal verbs, tense (future).</p> <p>Sentence-level: fronted adverbial phrase, compound-complex sentences, noun appositive phrases, conjunctive adverbs.</p> <p>Punctuation: semi-colons, dashes, ellipsis.</p>	<p>Students can identify in the work of others, and can use accurately in their own writing. They are starting to recognise how writers have used devices with intent, and are starting to make choices to craft their own writing for impact.</p>	<p>Grammar for Writing Debra Myhill resources</p>
Year 9	<p>Word-level: subject, direct object, indirect object, passive voice, auxiliary verbs, participles, word endings.</p> <p>Sentence-level: restrictive and non-restrictive clauses,</p> <p>Punctuation: colons, hyphens, punctuating speech.</p>	<p>Students can confidently identify a range of grammatical devices in the work of others, and can use accurately in their own writing. They can explain how writers have used devices with intent, and can craft their own writing to suit audience, purpose and form.</p>	<p>Bristol University Grammar resources https://www.bristol.ac.uk/arts/exercises/grammar/grammar_tutorial/page_41.htm</p>

<p>Years 10 and 11</p>	<p>Revision of key skills/terminology learnt in KS3, with an additional focus on varying/shaping sentence types for impact and using punctuation for effect.</p> <p>Explore how rules can be bent/broken in creative writing for particular effect – e.g. through single-sentence or single-word paragraphs, minor sentences, etc.</p>	<p>Students can analyse the choices made by a writer confidently and articulately, with clear reference to writer’s intent and impact.</p> <p>They write with a high level of accuracy, using a range of punctuation and sentence types. They can confidently shape their writing to suit audience, purpose and form, using grammar and punctuation consciously for impact and to influence their reader.</p>	<p>All GCSE texts listed in Section 4. Critical analysis of texts for Years 10 and 11, plus GCSE writing tasks:</p> <p>Range of tasks – descriptive/ narrative and point-of-view (could be taken from AQA past/sample papers)</p>
<p>Years 12 and 13</p>	<p>Application and further development of literary and linguistic skills from KS3/4. This includes confident identification and exploration of techniques and use of terminology within academic writing.</p> <p>Use of linguistic frameworks to understand a writer’s style and mode.</p> <p>Use of a wider and more challenging critical vocabulary in academic writing.</p>	<p>Students at this level can write confidently and craft their use of punctuation and language to suit differing purposes and audiences. They are conscious of formality and register and understand how to use academic language to convey their ideas appropriately.</p> <p>They can analyse and evaluate how other writers and speakers use language for effect. They use linguistic frameworks and methods to deconstruct grammatical discourse.</p>	<p>All exam texts listed in section 4.</p> <p>Extracts and exam questions.</p> <p>Exploration of style models.</p> <p>NEA texts and assignments.</p> <p>Wider critical reading.</p>

	Understanding of various written forms and structures and how writers use these for effect.		
--	---	--	--

2. Reading fluently, accurately and for meaning

Success is being able to read age-appropriate texts fluently and independently. Students are able to understand most of the words that they encounter, and those that they do not understand can be decoded through strategies that they have been taught, such as using etymology and morphology to work out word families.

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	<p>Phonics Phase 1 Distinguishing sounds</p> <p>Phonics RWI Set 1 and 2/ All GPCS for the letters and the alphabet and 10 digraphs/ Phases 2-4 GPCS</p> <p>Recognise full stops in texts.</p> <p>Key Vocabulary</p> <p>Phoneme, digraph, trigraph, blend, segment</p>	<p>Segment and blend words with these GPCS.</p> <p>Read texts matched to their phonic level.</p> <p>Understanding of vocabulary in an age appropriate text.</p> <p>Basic retrieval in an age appropriate text.</p>	<p>Phonic scheme: RWI as preferred scheme</p> <p>Supplementary reading schemes as per school. E.g. Phonics Bug/ OUP/ PM</p>
Year 1	Phonic RWI set 3/ Phase 5 GPCS (alternative phonemes)	Read other words of more than one syllable that contain taught GPCs	Phonic scheme: RWI as preferred scheme

	<p>Know suffixes er,est,ing,ed,s,es</p> <p>Y1 Common Exception Words</p> <p>Know to pause at full stops in texts.</p> <p>Identify question marks and exclamation marks in texts</p>	<p>Read words with contractions [for example, I'm, I'll, we'll], and understand that the apostrophe represents the omitted letter(s)</p> <p>Read texts matched to their phonic level.</p> <p>Understanding of vocabulary in an age appropriate text.</p> <p>Basic retrieval in an age appropriate text.</p>	<p>Supplementary reading schemes as per school. E.g. Phonics Bug/ OUP/ PM</p>
Year 2	<p>Year 2 Spelling patterns/ Phonic phase 6 GPCS</p> <p>Suffixes that create superlative and comparative words.</p> <p>Y2 Common Exception words.</p> <p>Identify commas and speech punctuation in texts</p>	<p>Decoding of polysyllabic words.</p> <p>Read age appropriate texts fluently without over reliance on sounding out.</p> <p>Understanding of vocabulary in an age appropriate text.</p> <p>Basic retrieval in an age appropriate text.</p> <p>Use intonation and expression when reading questions and exclamations</p>	<p>Phonic scheme: RWI as preferred scheme</p> <p>Supplementary reading schemes as per school. E.g. Phonics Bug/ OUP/ PM</p>

<p>Year 3</p>	<p>Know prefixes- Dis, and mis In, il, im and ir. re sub inter super anti auto Suffixes- ation, ly Read most Y3/4 Common Exception words Etymology- word families</p>	<p>Reading with fluency, identifying and explaining how word families, prefixes and suffixes contribute to word meaning. Understanding of vocabulary in an age appropriate text. Basic retrieval in an age appropriate text. Use intonation and expression when reading speech. Pause at commas</p>	<p>Progressive reading schemes as per school. E.g. OUP/ PM/ RWI/ Rapid Readers</p>
<p>Year 4</p>	<p>Possessive apostrophes Read all Y3/4 Common Exception words Etymology- word families</p>	<p>Reading with fluency, identifying and explaining how word families, prefixes and suffixes contribute to word meaning. Understanding of vocabulary in an age appropriate text.</p>	<p>Progressive reading schemes as per school. E.g. OUP/ PM/ RWI / Rapid Readers</p>

	Identify devices for parenthesis in texts e.g. dashes, brackets, ellipsis	Basic retrieval in an age appropriate text.	
Year 5	Using prefixes and suffixes to convert nouns or adjectives into verbs. Read most Y5/6 Common Exception words Etymology- word families	Reading with fluency, identifying and explaining how word families, prefixes and suffixes contribute to word meaning. Understanding of vocabulary in an age appropriate text. Basic retrieval in an age appropriate text. Use intonation and expression when reading parenthesis.	Progressive reading schemes as per school. E.g. OUP/ PM/ RWI / Rapid Readers
Year 6	How words are related by meaning. Synonyms and Antonyms Read all Y5/6 Common Exception words Etymology- word families Identify colons, semi colons and hyphens in texts.	Reading with fluency, identifying and explaining how word families, prefixes and suffixes contribute to word meaning. Understanding of vocabulary in an age appropriate text. Basic retrieval in an age appropriate text.	Progressive reading schemes as per school. E.g. OUP/ PM/ RWI / Rapid Readers

Years 7-11	<p>Extension of word-finding strategies: etymology and morphology to break down unfamiliar words.</p> <p>Extension of interpretative skills: implicit and explicit meanings; inference and analysis (including finding multiple possible meanings within words/phrases).</p> <p>Students are able to use these strategies across a range of age-appropriate and challenging texts which get progressively more difficult as they progress through KS3 and into KS4.</p>	<p>Students are able to read an age-appropriate text fluently and independently. They are able to decode unfamiliar words using etymology and morphology to make links with other word families. They can identify both explicit and implicit information from texts, making multiple connections to words/phrases used in order to explore different layers of meaning.</p>	<p>All texts listed in Section 4. Critical analysis of texts for Years 7-9, plus GCSE texts listed for Years 10 and 11.</p>
Years 12 and 13	<p>Developing their application of academic and critical reading strategies from KS4.</p> <p>Using inference to interpret and make connections between texts and forms.</p>	<p>Students read with confidence and independence. They read widely around the topic areas to enhance their knowledge of context and can make links between texts and contexts. They draw on their skills of decoding and inference for any unfamiliar words.</p>	<p>All exam texts as listed in section 4.</p> <p>Independent wider and critical reading.</p>

	<p>Reading widely and being able to apply the critical views of others to texts they are studying.</p> <p>Using knowledge of context and form to inform their own critical judgement of a writer's choices and intent.</p>	<p>In English Language they use linguistic frameworks to break words down and investigate their meaning.</p>	
--	--	--	--

3. Using evidence

Success is students being able to identify within a text which evidence is most relevant and worthy of analysis, and to fluently recall a judicious range of evidence which reinforces their critical viewpoint. They should also embed this evidence to be a seamless part of their response.

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	<p><u>Vocabulary</u></p> <p>Introduce new subject specific vocabulary from books to use in speaking.</p> <p>Discuss ambiguous meanings of Tier Two vocabulary as they arise.</p> <p><u>Inference</u></p> <p>Act out known books through role play and talk about the feelings of different characters.</p>	<p>Retell a basic story using beginning middle end and key vocabulary.</p> <p>Identify characters and settings</p> <p>Form opinions of characters and stories identifying preferences and judgements on characters</p>	<p>Fairy stories</p> <p>Reading spines e.g. Peter's</p>

	<p><u>Prediction</u></p> <p>Make basic predictions in books that follow a repetitive pattern.</p> <p>Predict what might happen next in a story based on what has happened before.</p> <p><u>Explain</u></p> <p>Give an opinion about a character and explain why.</p> <p><u>Retrieve</u></p> <p>Talk about where a book is set and the characters in it.</p> <p>Answer simple questions about the story.</p> <p><u>Sequence</u></p> <p>Identify what happens at the beginning, middle, end</p>		
Year 1	<u>Vocabulary</u>	Explain what is read to them	<p>Age appropriate texts</p> <p>Pie Corbett's Reading Spine</p>

<p>Speculate about the possible meanings of unfamiliar words met in reading.</p> <p>Check whether the suggested meanings make sense in the context of the text.</p> <p><u>Inference</u></p> <p>Speculate about characters from what they say and do, e.g. when role playing parts or reading aloud.</p> <p>Discuss what is suggested about a character from the way or how he/ she speaks</p> <p>Explore the effect of patterned language or repeated words and phrases in familiar stories.</p> <p><u>Predict</u></p> <p>Make predictions based on clues such as pictures, illustrations, titles.</p> <p><u>Explain</u></p>	<p>Explain and discuss their understanding of books, poems and other material, both those that they listen to and those that they read for themselves.</p> <p>Give/explain the meaning of words in context.</p> <p>Make inference from the text.</p> <p>Predict what might happen from the details stated and implied</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p> <p>To be able to discuss the sequence of events in books and how items of information are related.</p>	<p>Five Plagues reading spine</p> <p>Links to geography/RE/ JIGSAW</p> <p>Literacy Shed</p>
--	--	---

	<p>Answer simple questions where they recall information from a text.</p> <p><u>Retrieve</u></p> <p>Find information in a text about an event, character or topic.</p> <p>Discuss characters' appearance, behaviour and the events that happen to them, using details from the text Find specific information in simple texts they've read or that has been read to them. Find information in a text about an event, character or topic.</p> <p><u>Sequence</u></p> <p>Retell stories and parts of stories, using some of the features of story language.</p> <p>Learn and recite simple poems and rhymes, with actions, and re-read them from the text.</p>		
Year 2	<p><u>Vocabulary</u></p> <p>Learn how to find the meaning of an unfamiliar word where this is explained in</p>	<p>Explain what is read to them</p> <p>Give/explain the meaning of words in context.</p>	<p>Age appropriate texts</p> <p>Pie Corbett's Reading Spine</p> <p>Five Plagues reading spine</p>

<p>preceding or subsequent sentences or in a glossary.</p> <p>Check whether a suggested meaning of an unfamiliar word makes sense in the context of the passage.</p> <p><u>Inference</u></p> <p>Make inferences about characters from what they say and do, focusing on important moments in a text.</p> <p>Investigate traditional story language, e.g. story openers and endings, scene openers, language which signals a time shift or magical event.</p> <p><u>Predict</u></p> <p>Use immediate clues and what they have read already to make predictions about what is going to happen or what they will find out.</p> <p><u>Explain</u></p>	<p>Make simple inference from the text.</p> <p>Predict what might happen from the details stated and implied</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases. Make comparisons within the text.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p> <p>To be able to discuss the sequence of events in books and how items of information are related.</p>	<p>Discussion.</p> <p>Links to geography/RE/ JIGSAW</p> <p>Literacy Shed</p>
---	---	--

<p>Answer simple retrieval and inference questions by making a point and supporting it with 'evidence' from a text</p> <p><u>Retrieve</u></p> <p>Locate information using title, contents, index, page numbers, illustrations, headings, sub headings etc.</p> <p>Express and record their understanding of information orally, using simple graphics, or in writing.</p> <p>Identify what is known for certain from the text about characters, places and events in narrative and about different topics in non-fiction. Give reasons why things happen where this is directly explained in the text.</p> <p><u>Sequence</u></p> <p>Retell a story giving the main events in sequence.</p> <p>Draw together information from across a number of sentences to sum up what is known about a character, event or idea.</p>		
--	--	--

<p>Year 3</p>	<p><u>Vocabulary</u></p> <p>Practise re-reading a sentence and reading on in order to locate or infer the meaning of unfamiliar words.</p> <p>Discuss unfamiliar words and their possible meaning to clarify their understanding of a sentence or passage.</p> <p><u>Inference</u></p> <p>Understand how what a character says or does impacts on other characters, or on the events described in the narrative. Infer characters' feelings in fiction.</p> <p>Discuss the language used to create significant aspects of a text, e.g. opening, build up, atmosphere, and how a writer implies as well as tells.</p> <p>Link what they read to their knowledge and experience of a topic and to their knowledge of similar texts</p> <p><u>Prediction</u></p>	<p>Give/explain the meaning of words in age appropriate text.</p> <p>Beginning to make inference from an age appropriate text/ explain and justify using evidence from the text.</p> <p>Predict what might happen from the details stated and implied.</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases. Make comparisons within and between texts.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p> <p>Summarise main ideas from more than one paragraph.</p>	<p>Age appropriate texts</p> <p>VIPERS</p> <p>Pie Corbett's Reading Spine</p> <p>Five Plagues reading spine</p> <p>Discussion.</p> <p>Links to geography/RE/ JIGSAW</p> <p>Literacy Shed</p>
-------------------	---	---	--

<p>Make and modify predictions about the events, characters or ideas in a text on a regular basis throughout their reading.</p> <p><u>Explain</u></p> <p>Re-read sections of texts carefully to find 'evidence' to support their ideas about a text. Answer simple retrieval and inference questions by making a point and supporting it with 'evidence' from a text</p> <p><u>Retrieval</u></p> <p>Locate, retrieve and collect information from texts about significant or important elements or aspects (e.g. characters, events, topics).</p> <p>Take information from diagrams, flow charts and forms where it is presented graphically.</p> <p>Express and record their understanding of information orally, using simple graphics, or in writing.</p> <p><u>Summarise</u></p>		
--	--	--

	Retell main points of a story in sequence. Identify a few key points from across a non-fiction passage.		
Year 4	<p><u>Vocabulary</u></p> <p>Identify unfamiliar vocabulary in a text and adopt appropriate strategies to locate or infer the meaning. (E.g.re-reading surrounding sentences and/ or paragraphs to identify an explanation or develop a sensible inference, by identifying root words and derivatives, using the context and syntax, or using aids such as glossaries or dictionaries.)</p> <p><u>Inference</u></p> <p>Deduce the reasons for the way that characters behave from scenes across a short story.</p> <p>Understand how writers use figurative and expressive language to hint at and suggest ideas and information in order to capture interest, e.g. how they use language to set scenes, or create moods, arouse expectations, build tension, describe attitudes or emotions.</p>	<p>Give/explain the meaning of words in age appropriate text.</p> <p>Make inference from an age appropriate text/ explain and justify using evidence from the text.</p> <p>Predict what might happen from the details stated and implied</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases. Make comparisons within and between texts.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p> <p>Summarise main ideas from more than one paragraph.</p>	<p>Age appropriate texts</p> <p>Pie Corbett's Reading Spine</p> <p>Five Plagues reading spine</p> <p>Discussion.</p> <p>Links to geography/RE/ JIGSAW</p> <p>Literacy Shed</p>

<p>Discuss the meaning of similes and other comparisons that they read.</p> <p>Link what they are reading to prior knowledge and experience and to their knowledge of similar texts</p> <p><u>Prediction</u></p> <p>Make predictions about a text based on prior knowledge of the topic, event or type of text.</p> <p>Modify predictions as they read on.</p> <p><u>Explain</u></p> <p>Support their ideas about a text by quoting or by paraphrasing from it.</p> <p>Answer retrieval and inferential questions both orally and in writing, by making a point, and explaining it.</p> <p><u>Retrieval</u></p> <p>Identify and discuss key sentences and words in texts which convey important</p>		
---	--	--

	<p>information about characters, places, events, objects or ideas.</p> <p>Pick out key sentences and phrases that convey important information.</p> <p>Take information from diagrams, flow charts and forms where it is presented graphically. Collect information from different sources and present it in a simple format, e.g. chart, poster, diagram</p> <p><u>Summarise</u></p> <p>Summarise a sentence or paragraphs by identifying the most important elements.</p> <p>Make brief summaries at regular intervals when reading, picking up clues and hints as well as what is directly stated.</p>		
Year 5	<p><u>Vocabulary</u></p> <p>Identify when they do not understand the vocabulary used in a text and need to clarify the meaning.</p>	<p>Give/explain the meaning of words in age appropriate text.</p> <p>Make inference from an age appropriate text/ explain and justify using evidence from the text.</p>	<p>Age appropriate texts</p> <p>Pie Corbett's Reading Spine</p> <p>Five Plagues reading spine</p> <p>Debates and discussions</p>

	<p>Give increasingly precise explanations of word meanings that fit with the context of the text they are reading.</p> <p>Check the plausibility and accuracy of their explanation or inference of the word meaning.</p> <p><u>Inference</u></p> <p>Understand what is implied about characters and make judgements about their motivations and attitudes from the dialogue and descriptions.</p> <p>Identify and discuss idiomatic phrases, expressions and comparisons (metaphors, similes and embedded metaphors) met in texts, considering why authors might have used them.</p> <p>Link what they read to what they know (prior knowledge and experience), their knowledge of texts, and to what they have read in previous sections, to make inferences and deductions</p>	<p>Predict what might happen from the details stated and implied</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases. Make comparisons within and between texts.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p> <p>Summarise main ideas from more than one paragraph.</p>	<p>Links to geography/RE/ JIGSAW</p> <p>Literacy Shed</p>
--	--	---	---

	<p><u>Prediction</u></p> <p>Make regular and increasingly plausible predictions as they read, modifying their ideas as they read the next part of the text.</p> <p><u>Explain</u></p> <p>Evaluate a book or section of it, referring to details and examples in a text to back up their judgement and support their reasoning.</p> <p>Identify and justify evidence from a text to support a hypothesis.</p> <p><u>Retrieval</u></p> <p>Locate information confidently and efficiently, using the full range of features of the information text being read, including information presented graphically.</p> <p>Know how to gain a rapid overview of a text, e.g. by skimming and scanning, and how and when to read slowly and carefully</p>		
--	--	--	--

	<p>Use different formats to capture, record and explain information about what they have read, e.g. flow charts, for and against columns, matrices and charts of significant information.</p> <p>Establish what is known about characters, events and ideas in narrative and non-fiction texts, retrieving details and examples from the text to back up their understanding or argument.</p> <p><u>Summarise</u></p> <p>Make regular, brief summaries of what they've read, identifying the key points.</p> <p>Summarise a complete short text or substantial section of a text.</p> <p>Summarise what is known about a character, event or topic, explain any inferences and opinions by reference to the text.</p>		
--	---	--	--

<p>Year 6</p>	<p><u>Vocabulary</u></p> <p>Check the plausibility and accuracy of their explanation of or inference about a word meaning.</p> <p>Identify when they do not understand the vocabulary used in a text and apply appropriate strategies (re – reading, reading on, using the context, knowledge of syntax or word roots) to clarify the meaning</p> <p><u>Inference</u></p> <p>Understand what is implied about characters through the way they are presented, including through the use of a narrator or narrative voice, explaining how this influences the readers’ view of characters.</p> <p>Identify the hints and suggestions that writers make through their choices of words and phrases and the associations these evoke, e.g. about characters, events or ideas.</p> <p>Link what they have just read to what they know (prior knowledge and experience),</p>	<p>Discuss and justify how authors use language. Select and use appropriate evidence from a text to justify inferences and summaries.</p> <p>Explain and discuss understanding of a text.</p> <p>Provide reasoned justification for views.</p> <p>Give/explain the meaning of words in age appropriate text.</p> <p>Make inference from an age appropriate text/ explain and justify using evidence from the text.</p> <p>Predict what might happen from the details stated and implied</p> <p>Identify/explain how information/narrative content is related and contributes to the meaning as a whole.</p> <p>Identify/explain how meaning is enhanced through choice of words and phrases. Make comparisons within and between texts.</p> <p>Retrieve and record key information/key details from fiction and non-fiction.</p>	<p>Age appropriate texts</p> <p>Debates and discussions</p> <p>Links to Geography/RE/ JIGSAW</p> <p>Pie Corbett’s Reading Spine</p> <p>Five Plagues reading spine</p> <p>Literacy Shed</p>
-------------------	--	--	--

	<p>their knowledge of texts, and what they have read in previous sections, to make inferences and deductions.</p> <p><u>Prediction</u></p> <p>Make plausible predictions and explain what they are basing them on. Discuss how and why they need to modify their predictions as they read.</p> <p><u>Explain</u></p> <p>Identify material from texts to support an argument, know when it is useful to quote directly, paraphrase or adapt.</p> <p>Identify and justify evidence from a text to support a hypothesis.</p> <p><u>Retrieval</u></p> <p>Retrieve information from texts and evaluate its reliability and usefulness.</p> <p>Know how to gain a rapid overview of a text, e.g. by skimming and scanning and how and when to read slowly and carefully.</p>	<p>Summarise main ideas from more than one paragraph.</p>	
--	--	---	--

	<p>Record important details retrieved from a text using an appropriate format, e.g. by making a comparisons table</p> <p>Use evidence from across a text to explain events or ideas. Identify similarities and differences between characters, places, events, objects and ideas in texts.</p> <p><u>Summarise</u></p> <p>Make regular, brief summaries of what they've read, linking their summary to previous predictions about the text. Update their ideas about the text in the light of what they've just read.</p> <p>Summarise 'evidence' from across a text to explain events or ideas.</p> <p>Summarise their current understanding about a text at regular intervals.</p> <p>Justify</p> <p>Analyse</p> <p>Evaluate</p> <p>Embed evidence within answer</p>		
--	--	--	--

Year 7	<p>Quotation marks</p> <p>Why we use quotations (to support opinions / ideas)</p> <p>How to structure an analytical paragraph</p> <p>References</p> <p>Informs</p> <p>Tells</p> <p>Shows</p> <p>Explains</p> <p>Highlights</p> <p>Illustrates</p> <p>Indicates</p> <p>Suggests</p>	<p>Students make references to details of texts, using appropriate punctuation. They can use these references to support their ideas, although they may not be succinctly chosen. They can use analytical verbs when exploring simple ideas.</p>	<p>All texts listed in Section 4. Critical analysis of texts for Year 7.</p>
Year 8	<p>How to embed quotations</p> <p>How to select succinct quotations (words and phrases)</p> <p>Conveys</p> <p>Narrates</p> <p>Reveals</p> <p>Displays</p> <p>Emphasises</p> <p>Hints</p> <p>Portrays</p>	<p>Students can embed textual references to support responses. They can begin to use a range of analytical verbs when exploring clear ideas.</p>	<p>All texts listed in Section 4. Critical analysis of texts for Year 8.</p>
Year 9	<p>How to link quotations from within the same text</p> <p>Reinforces</p> <p>Establishes</p> <p>Denotes</p> <p>Determines</p> <p>Exemplifies</p> <p>Signifies</p> <p>Evokes</p> <p>Confirms</p> <p>Persuades</p>	<p>Students can embed apt textual references, including one-word analysis, to support responses. Then can use analytical verbs when exploring detailed ideas. They can reinforce original points with further quotations.</p>	<p>All texts listed in Section 4. Critical analysis of texts for Year 9.</p>

Years 10 and 11	Judicious Perceptive Symbolises Juxtaposes Criticises Represents Encapsulates Elaborates	Students can embed judicious and well-integrated textual references, including single-word analysis, to develop personal responses. They can use analytical adverbs and verbs when exploring critical ideas. They can reinforce original points with perceptive quotations.	All GCSE texts listed in Section 4. Critical analysis of texts for Years 10 and 11.
Years 12 and 13	<u>Evaluate</u> and make sophisticated judgements about a writer's choices. <u>Analyse</u> language, form and concepts. Make <u>critical</u> comments and interpretations. Explore the <u>significance</u> of GAP, context, language and form. Explore the possible <u>influences</u> on a writer or speaker including concepts and theory. Make confident <u>interpretations</u> . Explore <u>representation</u> through language.	Students continue to embed judicious quotations and references into their responses. Their knowledge of critical concepts is sophisticated, and they use these appropriately to enhance and develop their own evaluation of meanings. They understand the importance of differing interpretations and utilise critical ideas to build their own independent argument. In English Language they can use linguistic concepts and methods to evaluate a writer or speaker's language choices in differing modes and contexts.	Exam texts as listed in section 4. Examples of text types or spoken language data.

4. Critical analysis of texts

Success is students being able to analyse how a text has been shaped by a writer (through language and structural choices) to influence the reader, using appropriate subject terminology. It is the ability to understand why a writer has made choices, and how their work has been influenced by genre, context and their purpose. It is the analysis of themes presented by the writer, and understanding the impact that the writer has through presenting these themes.

The main themes that students need to be aware of in literature are:

- Love
- Conflict
- Power
- Identity

- Relationships
- Death
- Nature
- Religion

The key areas of social, cultural and historical context that students need to be aware of in literature are:

- Elizabethan – Patriarchal society, family honour, Elizabethan theatre and audience, tragedy, religion, colonialism
- Romanticism – revolution, rebellion, imagination, nature, religion
- Victorian – social class, bourgeoisie, poverty, Gothic genre, industrialisation, role of women, fallen women, fin de siècle
- WW1 and WW2
- Modern Britain – social class, poverty, political ideas, industrialisation, suffragettes, feminism, Marxism, southern Gothic
- Traditional/ folk tales taken from a range of cultures including nursery rhymes

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	<p>Can pronounce all 44 phonemes.</p> <p>Question words</p> <p>Rhyme</p> <p>Alliteration</p> <p>Rhythm</p> <p>Humour</p> <p>Age/ context appropriate Tier 2 and 3 Vocabulary/ Vocabulary picked up from texts.</p>	<p>Widens vocabulary rapidly</p> <p>Uses language to share feelings, experiences and thoughts and connect ideas. Uses talk and narrative in play.</p> <p>Asks questions</p> <p>Continue a rhyming string.</p> <p>Identify alliteration in a text read to them.</p> <p>Laugh at humorous texts</p> <p>To use in context/ suggest synonyms for</p>	<p>Pie Corbett's Reading Spine</p> <p>Literacy Shed</p>

---	--	---

5. Making links and connections between and across texts

Success is students being able to make perceptive comparisons between texts, recognising how two writers have used methods to convey different viewpoints and perspectives. They can clearly explain how different texts might have been influenced by a writer's context, genre or perspective. They can also make perceptive connections within a text, considering how an idea is presented within an extract and in the text as a whole. Their ideas are supported by a range of judicious quotations.

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	<p>Why and how questions</p> <p>Identify simple settings.</p> <p>Identify main characters</p> <p>Key Phrases for traditional narratives Once Upon a Time First, Then, Next Happily Ever After</p> <p>Knows that, in English, print is read from left to right and top to bottom</p> <p>Reads a range of familiar and common words and simple sentences independently</p> <p>Retells narratives in the correct sequence, drawing on language patterns of stories using visual clues and story scaffolds</p> <p>Shows an understanding of how information can be found in non-fiction texts to</p>	<p>Different texts- poems/ non-fiction/ fiction</p> <p>Note when the same characters appears in different texts</p>	<p>Traditional Tales e.g. The Three Little Pigs</p> <p>Repetitive Patterns e.g. Peace at Last</p> <p>Rhyming Books e.g. Julia Donaldson</p>
Year 1	<p>Introduce orientation questions when introducing texts which make links to the children’s own experiences</p> <p>Make links between texts explicitly and model language of similarities. e.g Yesterday our character had the same problem</p>	<p>Learning to appreciate rhymes and poems and recite them by heart.</p> <p>Participate in discussions Explain what is read to them. 		perceptive links between the ways that ideas, themes, characters and settings are presented at different points.	
Years 12 and 13	<p>English Literature:</p> <ul style="list-style-type: none"> -The study of a drama text and poetry collection Pre 1900. Linking context, views and authorial intentions. -A comparative and contextual study of the Gothic genre and literary movement. -Independent comparative study of drama and prose in the 20th century. -Focus on context, language and form and critical viewpoints. <p>English Language:</p> <ul style="list-style-type: none"> -Exploring text variations and representations with a focus on how language is used in similar or different ways to create meanings. -Responding to theories of Child Language Acquisition by connecting and making links in a collection of data. -Analysing a range of texts that differ in genre, mode and context. Considering how language is used to convey viewpoint. 	<p>English Literature:</p> <p>Students can:</p> <ul style="list-style-type: none"> -Explore a range of connections across specific literary texts and movements. -Make detailed links and connections between context, viewpoints, theme, genre, language, form and audience. -Use critical ideas and viewpoints to further develop links and challenge interpretations. -Produce critical essays which evaluate texts and their connections <p>English Language:</p> <p>Students can:</p> <ul style="list-style-type: none"> -Explore connections across texts, informed by linguistic concepts and methods. -Explore the similarities and differences in the way. language is used in various text modes and genres -Make connections in how language is used in specific sets of data. 	<p>Poetry of Christina Rossetti/ A Doll's House (H Ibsen)</p> <p>Range of Gothic literary extracts</p> <p>The Bloody Chamber/ (A Carter)</p> <p>Dracula (B Stoker)</p> <p>Critical reading</p> <p>A Streetcar Named Desire (T Williams)/ independent text choice</p> <p>Range of extracts that differ in genre, mode and context</p> <p>Child language data – spoken and written</p>

	-Using linguistic methodology and frameworks to evaluate how language is used to create meaning in different written and spoken texts.	-Compare how language is used to create viewpoint and communicate attitudes and values.	Range of texts that present viewpoints on language diversity and change
--	--	---	---

6. Adapting for audience, purpose and form

Success is being able to recognise and apply the conventions of different genres and forms. Students need to confidently and accurately adjust their tone, language and structure to suit the needs of their audience, purpose and form. This includes in spoken and written forms.

End point expectations:

	Substantive knowledge	Disciplinary knowledge	Possible context
EYFS	<p>Oracy Skills</p> <p>Physical</p> <p>To pronounce all the sounds for the letters of the alphabet and ten digraphs correctly.</p> <p>To face the person they are speaking to.</p> <p>Linguistic</p> <p>Introduction of age appropriate tier 2 and 3 vocabulary that reflects experience and concrete objects/ people</p>	<p>Extends vocabulary, especially by grouping and naming</p>	<p>Show and tell</p> <p>NELI/ Talk Boost</p> <p>Storytime</p> <p>Talks with a range of other children, adults and groups</p> <p>Loose parts play</p>

	<p>Correct tense of common words. (e.g. <i>play, playing, will play, played</i>).</p> <p>Use conjunctions- and, because.</p> <p>Cognitive</p> <p>Uses talk for communication</p> <p>To use and combine words to make sentences</p> <p>Rhythm- language patterns</p> <p>Explain why something might happen</p> <p>Social and Emotional</p> <p>To use some intonation when speaking</p> <p>Respond in conversation.</p>	<p>exploring the meaning and sounds of new words.</p> <p>Uses a range of tenses</p> <p>Links statements and sticks to a main theme or intention.</p> <p>Uses talk to organise, sequence and clarify thinking, ideas, feelings and events.</p> <p>Speak in full sentences</p> <p>Uses intonation, rhythm and phrasing to make the meaning clear to others.</p> <p>Questions why things happen and gives explanations.</p>	<p>Helicopter stories</p>
--	---	--	---------------------------

	<p>To respond to a story being read e.g. laughing, joining in with repetitive refrains, comment on one aspect</p>	<p>Uses language to imagine and recreate roles and experiences in play situations.</p> <p>Introduces a storyline or narrative into their play.</p> <p>Uses talk to connect ideas, explain what is happening and anticipate what might happen next, recall and relive past experiences</p>	
Year 1	<p>Oracy Skills</p> <p>Physical Demonstrate good phonic knowledge by clearly pronouncing the sounds within words.</p> <p>Linguistic Introduction of age appropriate tier 2 and 3 vocabulary that reflects subjects/ experiences being taught</p> <p>Cognitive Sift information and focus on the important points</p> <p>To read/share and discuss the language in a range of texts that include: Rhyme</p>	<p>Speak in a way that is clear and easy to understand. Read aloud their writing clearly enough to be heard by their peers and the teacher.</p> <p>Use subject specific vocabulary to explain and describe.</p> <p>Recount experiences with interesting detail.</p> <p>Take part in role play of a familiar story.</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p>

	<p>Alliteration Adjectives Repetitive structures</p> <p>Social and Emotional To stop, look and listen to others.</p>	<p>Take turns to talk Understand instructions with more than one point.</p>	
Year 2	<p>Oracy Skills</p> <p>Physical Reading with intonation.</p> <p>Speak confidently to a group of peers so that they understand the message of what is being said.</p> <p>Linguistic Introduction of age appropriate tier 2 and 3 vocabulary that reflects subjects/ experiences being taught.</p> <p>Investigate examples of formal/ non formal language in texts.</p> <p>Cognitive Seek clarification when a message is not clear</p>	<p>Read aloud what they have written with appropriate intonation to make the meaning clear.</p> <p>Reflect on the clarity of the message given.</p> <p>Suggest words or phrases appropriate to the topic being discussed.</p> <p>Know that different language is appropriate in different situations (formal/ informal)</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p>

	<p>Ensure stories have a setting, plot and sequence of events.</p> <p>Social and Emotional Make contributions that are relevant to those that have come before. Know that different people hold opinions that are different from our own.</p> <p>Written Skills Use of the suffixes –er, –est as superlatives and comparatives for impact.</p> <p>Formation of nouns using suffixes such as –ness, –er for impact</p> <p>Formation of adjectives using suffixes such as –ful, –less for impact</p>	<p>Explain and discuss their understanding of books, poems and other material, both those that they listen to and those that they read for themselves.</p> <p>Participate in discussion about books, poems and other works that are read to them and those that they can read for themselves, taking turns and listening to what others say</p> <p>Use of suffixes to make choices about impact for reader in written work.</p>	
--	---	---	--

			<p><u>-er/-est</u></p> <p>How to Hide a Lion</p> <p>The Tear Thief</p> <p>Persuasive party invitations</p> <p>Topic linked work/recounts</p>
--	--	--	--

Year 3	<p>Oracy Skills</p> <p>Physical Bring stories to life with expression and intonation</p> <p>Linguistic Use interesting adjectives, adverbial phrases and expanded noun phrases in discussion Vary language between formal and informal according to the situation.</p> <p>Cognitive Engage in discussions making relevant points</p> <p>Social and Emotional Ask for specific additional information to clarify. Explain a project or concept across the curriculum Respond appropriately when in role including basic improvisation. Make relevant comments or ask questions in a discussion or a debate.</p> <p>Written Skills Subject verb agreement Standard English Consider use of verbs for impact</p>	<p>Retrieve and record information from nonfiction</p> <p>Composing and rehearsing sentences orally (including dialogue), progressively building a varied and rich vocabulary and an increasing range of sentence structures (Appendix 2 for split)</p> <p>Read aloud their own writing, to a group or the whole class, using appropriate intonation and controlling the tone and volume so that the meaning is clear.</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p>
Year 4	Oracy Skills		

<p>Physical Use intonation to emphasise punctuation and grammar when reading aloud.</p> <p>Linguistic Use vocabulary that is appropriate to the topic being discussed or the audience that is listening.</p> <p>Cognitive Understand an increasing range of sentence types</p> <p>Social and Emotional Respectfully challenge opinions or points, offering an alternative. Seek clarification by actively seeking to understand others' points of view.</p> <p>Written Skills Use a range of sentence types including: Simple sentences and compound sentences. complex sentences with a range of subordinating conjunctions. Begin sentences with similes</p>	<p>Composing and rehearsing sentences orally (including dialogue)</p> <p>Progressively building a varied and rich vocabulary.</p> <p>Use a mixture of sentence lengths to add interest to discussions and explanations.</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p>
--	---	---

	<p>Make choices about sentence types to use:</p> <p>Long and short sentences: Long sentences to enhance description or information.</p> <p>Short sentences to move events on quickly</p>		
Year 5	<p>Oracy Skills</p> <p>Physical Narrate detailed and exciting stories</p> <p>Linguistic Understand the meaning of some phrases beyond the literal interpretation</p> <p>Use adventurous vocabulary</p> <p>Explain the meaning of words, offering alternatives</p> <p>Participate in a discussion or a debate</p> <p>Select appropriate language in a range of situations (formal or informal)</p> <p>Cognitive Understand how to answer questions that require more than a yes/no or single sentence answer</p>	<p>listen and respond appropriately to adults and their peers</p> <p>ask relevant questions to extend their understanding and knowledge</p> <p>use relevant strategies to build their vocabulary</p> <p>articulate and justify answers, arguments and opinions</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p> <p>Cross curricular opportunities for debate and discussion</p>

	<p>Vary the length and structure of sentences</p> <p>Ask questions and make suggestions to take an active part in discussions</p> <p>Expand and justify ideas across the curriculum</p> <p>Reflect on the effectiveness of the explanation</p> <p>Use the conventions and structure appropriate to the type of story or presentation (fiction/non-fiction)</p> <p>Social and Emotional</p> <p>Demonstrate active listening by justifying ideas</p> <p>Present an idea or topic to a group of peers</p> <p>Written Skills</p>	<p>give well-structured descriptions, explanations and narratives for different purposes, including for expressing feelings</p> <p>maintain attention and participate actively in collaborative conversations, staying on topic and initiating and responding to comments</p> <p>use spoken language to develop understanding through speculating, hypothesising, imagining and exploring ideas</p> <p>speak audibly and fluently with an increasing command of Standard English</p> <p>participate in discussions, presentations, performances, role play/improvisations and debates</p>	
--	--	---	--

	<p>Spelling and Punctuation</p> <p>Use rhetorical questions to draw reader in</p> <p>Grammar</p> <p>Word</p> <p>Introduce the use emotive language</p> <p>Metaphor</p> <p>Personification</p> <p>-Onomatopoeia</p> <p>Sentence</p> <p>Sequence and Cohesion</p> <p>Use a variety of ways to open texts and draw reader in and make the purpose clear</p> <p>Link ideas within and across paragraphs using a full range of conjunctions, pronouns, determiners and adverbials</p>	<p>gain, maintain and monitor the interest of the listener(s)</p> <p>consider and evaluate different viewpoints, attending to and building on the contributions of others</p> <p>select and use appropriate registers for effective communication</p>	
--	---	---	--

	<p>Viewpoint</p> <p>Make conscious choices about emotive vocabulary</p> <p>Consistently maintain viewpoint</p> <p>Express own opinions clearly</p> <p>Summarise clearly at the end to appeal directly to the reader</p>		
Year 6	<p>Oracy Skills</p> <p>Physical Interweave action, character descriptions, settings and dialogue in a performance.</p> <p>Perform improvised role play, group or class performances considering the effectiveness of delivery</p> <p>Linguistic Recognise and explain some idioms</p>	<p>Students can identify the audience for and purpose of the writing, selecting the appropriate form and using other similar writing as models for their own</p> <p>Select appropriate grammar and vocabulary, understanding how such choices can change and enhance meaning</p>	<p>See text examples in mechanics of writing.</p> <p>Whoosh/ Talk 4 Writing</p>

	<p>Understand the meaning of some phrases beyond the literal interpretation</p> <p>Use sophisticated vocabulary</p> <p>Explain the meaning of words, offering alternatives</p> <p>Add humour to a discussion or a debate where appropriate</p> <p>Select appropriate language in a range of situations (formal or informal)</p> <p>Cognitive</p> <p>Use a wide range of phrases that includes determiners, modifiers and other techniques to add extra interest and clarity</p> <p>Ask questions and make suggestions to take an active part in discussions</p> <p>Expand and justify ideas across the curriculum</p> <p>Reflect on the effectiveness of the explanation, expansion and justification</p> <p>Comment on grammatical structure of a range of spoken and written accounts</p>	<p>Students manage shifts between levels of formality through selecting vocabulary precisely and by manipulating grammatical structures.</p> <p>listen and respond appropriately to adults and their peers</p> <p>ask relevant questions to extend their understanding and knowledge</p> <p>use relevant strategies to build their vocabulary</p> <p>articulate and justify answers, arguments and opinions</p>	<p>Cross curricular opportunities for discussion and debate</p>
--	--	---	---

	<p>Use the conventions and structure appropriate to the type of story or presentation (fiction/non-fiction)</p> <p>Social and Emotional</p> <p>Demonstrate active listening by justifying ideas</p> <p>Demonstrate active listening by expanding on the ideas of others</p> <p>Present an explanation to a group of peers</p> <p>Written Skills</p> <p>Spelling and Punctuation</p> <p>Uses punctuation to enhance meaning and avoid ambiguity</p> <p>Grammar</p> <p>Word</p>	<p>give well-structured descriptions, explanations and narratives for different purposes, including for expressing feelings</p> <p>maintain attention and participate actively in collaborative conversations, staying on topic and initiating and responding to comments</p> <p>use spoken language to develop understanding through speculating, hypothesising, imagining and exploring ideas</p> <p>Speak audibly and fluently with an increasing command of Standard English</p> <p>participate in discussions, presentations, performances, role play/improvisations and debates</p>	
--	--	---	--

	<p>Build in literary feature to create effects e.g. alliteration, onomatopoeia, similes, metaphors</p> <p>Sentence</p> <p>Character descriptions</p> <p>'Show not Tell'</p> <p>Secure use of simple sentences for impact</p> <p>Building Suspense and creating atmosphere</p> <p>To use active and passive voice to create effect and to affect presentation of information in a sentence</p> <p>Sequence and Cohesion</p> <p>Make conscious choices when selecting adverbials and pronouns for cohesion</p> <p>Viewpoint</p> <p>Express balanced coverage of a topic</p>	<p>gain, maintain and monitor the interest of the listener(s)</p> <p>consider and evaluate different viewpoints, attending to and building on the contributions of others</p> <p>select and use appropriate registers for effective communication</p>	
--	--	---	--

	<p>Use different techniques to conclude texts</p> <p>Style and Presentation</p> <p>Use appropriate formal and informal styles of writing</p> <p>Choose or create publishing format to enhance text type and engage the reader</p>		
Year 7	<p>Essay writing – third person, Standard English, formal, paragraphs, points supported by evidence.</p> <p>Articles – heading, sub-headings, third person, past tense, formal, paragraphs, reported speech, differences between articles and reports.</p> <p>Letters – format (including how to write address and layout on the page), differences between ‘yours faithfully’ and ‘yours sincerely, paragraphs, first person, present tense, Standard English.</p>	<p>Students can write accurately across a range of forms and genres. They can identify and apply the features of the form correctly. They can adjust their tone, language and structure to a range of familiar audiences and recognise the need for formality or informality.</p>	<p>Analytical essay about a character in a novel, e.g. How does present the character of....?</p> <p>Travel writing</p> <p>Letter to Year 6 student as part of transition.</p>

	<p>Speeches – first person, Standard English. Delivery of speeches – tone of voice, projection, body language.</p> <p>Review – headline, subheadings, paragraphs, present tense, personal pronouns, adjectives.</p> <p>Narrative writing – third person, past tense, paragraphs.</p> <p>Descriptive writing – third person, past tense, paragraphs, adjectives, adverbs, sensory description, similes, metaphors, personification.</p>		<p>Persuasive speech about a topical issue.</p> <p>Film/book/travel review.</p> <p>Story writing linked to text, e.g. rewriting of a fairytale.</p> <p>Descriptive writing linked to text, e.g. description of a place in the novel.</p>
Year 8	<p>Essay writing – introduction and conclusion, counter-arguments, discourse markers.</p> <p>Articles – structure (beginning, middle, end), articles with different purposes (to persuade – associated methods such as HADAFORST).</p>	<p>Students can write cohesively across a range of forms. Their writing has a clear structure with appropriate development of ideas. They can recognise that the same text type will use different language devices depending on the audience and purpose, and can accurately adapt their language choices to suit a range of audiences, purposes and forms.</p>	<p>Analytical essay about a theme in a novel, e.g. How does present the theme of....?</p>

	<p>Letters – letters to argue, plus associated methods (introduction, conclusion, counter-argument, HADAFORST).</p> <p>Speeches – introduction and conclusion, discourse markers, speeches for different audiences and the impact this has on tone.</p> <p>Review – adapting tone for different audiences (e.g. two reviews of the same film/book aimed at both adults and children).</p> <p>Narrative writing – how to layout and punctuate speech, linking opening and ending.</p> <p>Descriptive writing – linking opening and ending.</p>		
Year 9	<p>Essay writing – discourse markers to build argument.</p> <p>Articles - different types of articles (blogs, magazine articles) and how this will affect tone. Articles to advise (associated</p>	<p>Students can produce engaging and imaginative writing across a full range of purposes, audiences and forms. They can employ a clear ‘voice’ in their work, giving it originality. They can confidently adapt tone to suit a range of audiences and purposes, utilising a range of carefully selected language devices and</p>	

	<p>methods such as modal verbs, personal pronouns)</p> <p>Letters – experimenting with tone through letters to different audiences.</p> <p>Speeches – persuasive speeches (and associated methods) in response to a topical issue.</p> <p>Review – use of specific subject terminology e.g. film terminology for a film review.</p> <p>Narrative writing – first person narratives, cyclical structure, flashbacks.</p> <p>Descriptive writing – cyclical structure, semantic fields, subverting the image/typical expectation.</p>	<p>experimenting with structure. They show an understanding of the world around them and can engage with topical issues in their writing.</p>	
<p>Years 10 and 11</p>	<p>Extension of all the different forms covered in KS3, with a particular focus on:</p>	<p>Students can perceptively distinguish between the relevant forms of writing/speaking, applying all the varying conventions in an assured and creative manner.</p>	<p>Range of GCSE writing tasks – descriptive/ narrative and point-of-view (could be taken from AQA past/sample papers)</p> <p>Spoken Language Study (persuasive speech and follow-up questions)</p>

	<p>Essay writing – developing a critical argument, especially through introduction of a ‘thesis’-style statement that develops throughout essay.</p> <p>Point-of-view Letters/ Articles – establishing a clear critical viewpoint. Development of persuasive devices/vocabulary to include more sophistication. Use of subtler methods such as irony, sarcasm and satire.</p> <p>Speeches – formal, persuasive speeches (and associated methods) in response to a topical issue for GCSE Speaking and Listening assessment.</p> <p>Descriptive/Narrative writing – further developing use of scene-setting/characterisation devices to establish mood and create engagement – e.g. pathetic fallacy, foreshadowing, imagery. Deliberately structuring whole piece for interest and suspense – e.g. through openings and endings, narrative voice (including dual narrative), withholding information, creating contrasts, time shifts, zooming in/ zooming out.</p>	<p>Written responses to exam questions demonstrate a compelling grasp of appropriate tone, techniques and levels of formality suitable for purpose and audience. They make sophisticated choices in terms of structure and language in order to craft their writing for understanding and engagement.</p> <p>Speaking and Listening presentations show a strong insight into the conventions of formal Standard English, alongside deliberate use of non-verbal features to connect with the audience.</p> <p>In both written and spoken language, students can draw on topical, real-life examples to support their opinions and ideas in a convincing way.</p>	
--	---	--	--

<p>Years 12 and 13</p>	<p>Academic writing - producing creative and informed academic essays using appropriate terminology and concepts.</p> <p>English Language investigation – collecting data on a language topic of choice. Commenting on methodology, analysis of data and concluding findings.</p> <p>Original writing – choice of writing in a wide range of fiction and non-fiction forms including journalism and story writing.</p> <p>Commentary writing – evaluating and analysing methods used in own original writing.</p>	<p>Students have a clear and critical understanding of genre, audience and purpose both as writers and critical readers. They can write coherent, well planned essays with well formulated critical arguments. Their written expression is standard, formal and accurate. They know how to integrate well-chosen, relevant quotations and critical viewpoints into their responses. They use key subject terminology and apply this accurately. Students understand how to write in differing forms and styles. They can analyse how other writers use different forms and apply this to their own repertoire. They understand how to produce an investigative written report.</p>	<p>Exam essays</p> <p>NEA extended essays</p> <p>NEA Language investigation</p> <p>NEA original writing – choice of persuasive, storytelling, informative</p> <p>Writing about language issues in a variety of forms (exam)</p>
------------------------------------	---	--	---

Futura Geography

Curriculum Framework

Geography Curriculum Framework

Intent:

The purpose of the Futura Learning Partnership geography intent is to provide a framework for high quality geography education across phases to inspire in pupils a curiosity and fascination about the world and its people that will remain with them for the rest of their lives. The aim is to ensure that pupils are equipped with knowledge about a diverse range of places, people, resources and natural and human environments, together with a deep understanding of the earth's key physical and human processes. Pupils should make sense of the complex world around them, understand and be confident to investigate some of the major issues, challenges and opportunities that the world faces today. The aim is to ensure that pupils will develop greater competence in using geographical knowledge, approaches, concepts and skills in analysing and interpreting a wide range of different geographical information. In that way pupils will enrich their locational knowledge and spatial and environmental understanding as well as acquire the geographical cultural capital needed to be confident and successful global citizens.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims:

Underpinning the intent are **key substantive and disciplinary concepts**

The **substantive knowledge** concepts:

Location (L)	Knowing where places are and having spatial awareness of different countries using maps of the world and other sources leading to a detailed understanding of their environmental regions, physical and human characteristics, countries and cities.
Place and space (PS)	Understanding the geographical similarities, differences and links between places and regions
Physical world (PW)	Understanding the processes that give rise to key physical features of the world, how they are interdependent and how they bring about spatial variation and change over time.
Human environment (HE)	Understanding the processes that give rise to key human features of the world, how they are interdependent and how they bring about spatial variation and change over time.
Interdependence and sustainability (IS)	The significant links between places, features, events and people. It examines the importance and impact of maintaining, modifying or breaking connections and the impact this has upon the long-term health of our planet, its people and environments.
Cultural understanding (CU)	Understanding the differences between themselves and people from other countries or other backgrounds, especially differences in attitudes and values.

The 5 **disciplinary knowledge** concepts:

Globes, maps and atlases (GMA)	Developing the ability to utilise a range of geographical information sources to help to develop an extensive knowledge of a wide range of places, environments and features at a range of scales.
---------------------------------------	--

OS map skills (OSM)	To develop a range of OS map skills and to be able to use these with confidence to infer information about a place and apply this in context in the classroom and in the field.
Geographical information systems (GIS)	To confidently generate, interpret, and infer spatial patterns and trends from a range of sources of G.I.S
Geographical fieldwork (F)	To be able to plan and undertake independent enquiry in which skills, knowledge and understanding are applied to investigate geographical questions.
Geographical literacy (lit)	Show competence in a range of intellectual and communication skills (oral and written) written, including the formulation of arguments which include elements of synthesis and evaluation of material. The ability to read for geographical meaning in text of an increasingly complex nature (vocabulary, vocabulary and context).
Geographical numeracy (num)	Numeracy (number and measurement)-solving numerical problems, the ways in which numerical information is gathered by counting and measuring, and how it is presented in graphs, charts and tables. There are many opportunities within geography for students to develop their numeracy skills.

Assessment statements on p33 and appendix of geographical vocabulary on p45

Geography and British Values Statement

The Department for Education has said: "We want to create and enforce a clear and rigorous expectation on all schools to promote the fundamental British values of democracy, the rule of law, individual liberty and mutual respect, and tolerance of those with different faiths and beliefs." Geography: learning to make a world of difference (February 2011):

‘Geography education encourages pupils to explore how places have been changed by the contexts and processes that have shaped them. It helps them to understand the complex ways in which communities and societies are linked and to appreciate the diversity of people’s backgrounds. Geography also helps pupils to understand society better. Appreciating diversity encourages positive relationships and shared values. It promotes tolerance and partnership, within local and wider communities.’ (111, p. 45) The 2013 Ofsted Geography subject-specific guidance states that outstanding achievement in geography is demonstrated by:

‘Pupils are able to express well-balanced opinions, rooted in very good knowledge and understanding about current and contemporary issues in society and the environment.’

Pupils and students learn about British Values through Geography lessons in the Futura Learning Partnership by exploring how places have been changed through human and physical processes. Geography helps pupils to understand the ways in which communities and societies are linked. It encourages children

to gain an appreciation of the diversity of people's backgrounds and to understand society better. This helps to encourage positive relationships and shared values including tolerance and harmony, and a respect for the rule of law whilst developing a sense of self-worth. Geography promotes understanding, tolerance and harmony within local and wider communities. These values are also encouraged and rewarded in our day-to-day teaching, showing that qualities such as tolerance, mutual respect, teamwork and resilience are valued as we aim to build students' self-esteem. This includes respecting each other and following the rules, as well as adhering to the spirit of fair play when taking part in all our lesson and enrichment activities.

Early Years Foundation Stage.

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are **playing and exploring** - children investigate and experience things, and ‘have a go’; **active learning** - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; **creating and thinking critically** - children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (**PSE, CL, PD**) underpin and are an integral part of children’s learning in all areas.

Birth 2 Five Range 6 statements –

- Looks closely at similarities, differences, patterns and change in nature
- Knows about similarities and differences in relation to places, objects, materials and living things
- Talks about the features of their own immediate environment and how environments might vary from one another
- Makes observations of animals and plants and explains why some things occur, and talks about changes

ELG: **People, Culture and Communities**

Children at the expected level of development will: - Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps; - Know some similarities and differences between different religious and cultural communities in this country, drawing on their experiences and what has been read in class; - Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.

Geography skills.

Locational Knowledge	Geographical Skills and Fieldwork			Place Knowledge	Manmade and Natural Geography
Describe my own immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps Name the village and city the school is located in	Begin to use geographical skills, including first-hand observation, to enhance their locational awareness			Identify similarities and differences between places, drawing on my experiences and what has been read in class Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.	Model the vocabulary needed to name specific features of the natural world, both natural and manmade Understand the effect of changing seasons on the natural world around me.
	Collect, analyse, and communicate a range of data gathered through experiences of fieldwork.	Interpret a range of sources of geographical information, including maps, diagrams, globes, photographs, and geographical information systems, such as, Google Earth.	Communicate geographical information in a variety of ways e.g. maps and drawings.		
	Use and draw information from a simple map Look at aerial views and comment on buildings, open space, roads, and other simple features				

First-hand experiences and pupil knowledge offer:

Geography at Foundation Stage is introduced indirectly through activities that encourage children to explore, observe, think, make decisions, and discuss. This is scaffolded through skilful adult interaction. Children will have opportunities to explore a range of geographical skills such as having an awareness of maps and globes and be exposed to images and information about the people and places around them. They will experience first-hand fieldwork and materials which they use to inspire learning.

The first-hand experiences and knowledge the children should be offered are:

- Forest school experience.
- First-hand discussions with children about their local area.

- 'Welly Walks' in and around the local area.
- Sharing experiences and visits from their own lives and of those around them.
- Sharing stories, pictures, music, maps and globes, fact books and art from and about the world.
- Exploring the school environment.

Vocabulary. - Town, village, road, house, farm, world, globe, earth, map, hot, sunny, seasons, cold, snow, weather, manmade, natural

Key Stage 1 substantive and disciplinary knowledge

Substantive knowledge						
Place & Space	Location	Physical world	Human environments	Interdependence and sustainability	Cultural understanding	Scale
Understanding geographical similarities and differences through studying the human and physical geography of a small area of the UK and a small area of a non-EU country.	Name and locate the world's seven continents and five oceans Name, locate and identify characteristics of the four countries and capital cities of the UK and surrounding seas.	Identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles	Key human features, including city, town, village, factory, farm, house, office, port, harbour and shop	Begin to establish an understanding of the interaction between physical and human processes.	Begin to understand that people and places are culturally diverse.	Describe localities at a small scale, comparing other similar sized locations to their own local area.

Disciplinary knowledge					
Globes, maps and atlases	Maps (OS maps)	GIS	Geographical fieldwork	Geographical literacy	Geographical numeracy
<p>Be able to describe local and/or small-scale geographical features. Use world maps, atlases and globes to investigate the world's continents and oceans.</p> <p>Countries and capitals of the UK</p> <p>Compare and contrast a small area of the UK with that of a non-European country</p> <p>Explore weather and climate in the UK and around the world</p>	<p>Devise a simple map and use and construct basic symbols in a key.</p> <p>Use simple grid references (B1 and A1)</p> <p>Use 4-point compass directions</p> <p>Use of aerial photos and plans</p>	<p>Use digital mapping to locate and describe the local area</p>	<p>Ask and answer geographical questions.</p> <p>Identify key features of a location (rural/urban)</p> <p>Use simple fieldwork and observational skills to study the geography of the school</p>	<p>Use basic vocabulary to refer to key physical and key human features.</p> <p>Use locational language of features and routes on a map.</p> <p>Be able to describe local and/or small-scale geographical features</p>	<p>Use simple grid references.</p> <p>Measure and record simple geographical information in tables, graphs and charts.</p> <p>Sort/categorise geographical features – e.g. land uses</p>

Key Stage 3 substantive and disciplinary knowledge

Key stage 3 substantive knowledge

	Place & Space	Location	Physical world	Human environments	Interdependence and sustainability	Cultural understanding	Scale
Key Stage 3	Place-Similarities and differences between the human and physical geography of a region within Africa and within a region of Asia.	Africa, Russia, Asia (must include China and India), and the Middle East. Hot and Cold desert and one other environmental region (such as Savanna grasslands, tropical rainforests). Must include human and physical characteristics including major cities and the countries within the continent.	Geological timescales, plate tectonics, rocks, weathering and soils; weather and climate (change from the ice age to the present); glaciation, hydrology and coasts.	Population, urbanisation, globalisation and international development, economic activity (including primary, secondary, tertiary and quaternary sectors); use of natural resources (including, energy, water and food)	Understand how human and physical processes interact to influence and change landscapes, environments and the climate; and how human activity relies on the effective functioning of natural systems.	People and places are culturally diverse and the ways they interact with each are affected by their perceptions of the human and physical environments.	Studying places at all scales including a world-wide perspective

Disciplinary knowledge						
Year Group	Globes, maps and atlases	Maps (OS maps)	GIS	Geographical fieldwork	Geographical literacy	Geographical numeracy
7	Pupils use simple globes, maps and atlases to conduct geographical investigations both in the classroom and in the field. Use of atlases and globe becomes increasingly global in scale.	Use and interpret OS maps. Use 4 figure grid references confidently and are increasing in confidence in the use of 6 figure grid references. Pupils use maps to interpret places and describe a locations landscape in the classroom and the field.	Pupils can use simple GIS to interpret geographical patterns and recognise its importance as a means of presenting data.	independently plan and collect primary and secondary data; accurately present results and findings using variety of techniques	Explain how human and physical processes and patterns interact/change over time; make connections to previous learning and wider knowledge/ subjects; consistently use geographical terminology and evidence.	Pupils can draw a range of more sophisticated graphical techniques and be able to interpret these graphs. Pupils' understanding of data will be demonstrated using simplistic statistical and numerical skills but with an increasing attempt to understand trends reflected in the data set.
8	Pupils use a wider range of resources in atlases to investigate geographical questions about a range of places at a global scale. They develop a more detailed and extensive framework of knowledge including globally significant physical and human features and geographical processes.	Pupils increase in confidence in interpreting map skills and are adept at using compass directions, 4 and six figure grid references, relief and scale. Students start to	Pupils can clearly demonstrate that they can interpret different types of GIS and utilises this information in their learning. Pupils understand the increasingly important role they play in	High levels of independent investigation; reach valid conclusions drawing on multiple information sources; evaluate data collection methods and consistently	Students will be able to comment on their geographical findings and will be able to construct an argument which is supported with evidence. Pupils will be able to use a good range of geographical	Pupils can construct and interpret more sophisticated data presentation techniques. Pupils can use statistical and numerical skills with increasing ease and attempt to include more sophisticated

		use OS maps with other geographical resources such as aerial and satellite photographs.	presenting geographical information across different sectors of employment.	reflect on best way to organise work	vocabulary appropriately and spelt correctly.	analysis techniques such as percentage increase or decrease when analysing data.
9	Students have a detailed understanding of how to use globes, atlases and maps to develop an extensive knowledge and understanding of a wide range of places and environments and features at a range of scales from local to global.	<p>Pupils continue to develop their use of maps in the classroom and in the field becoming more independent.</p> <p>Students become increasingly confident in using OS maps in conjunctions with other geographical resources such as aerial and satellite photographs.</p>	Pupils increase in confidence and can use a wide various GIS's with growing confidence in their geographical investigations and a variety of contexts.	Consistently high levels of independent investigation and critical evaluation beyond set tasks; draw upon wide range of information to reach wide-ranging conclusions	Students can frame and discuss geographical ideas within their locational context using a wide ranging and detailed global knowledge. They are confident with using a range of specialist terms appropriately. Pupils can structure their geographical debates effectively and can use a wide range of geographical evidence to support their decisions	Pupils can recognise geographical patterns and interpret the trends using a range of statistical skills to help such as mean, mode and median. Pupils can describe the data using measures of central tendency and clearly identify anomalous values within the data set. From this, pupils are beginning to suggest reasons why these anomalies exist.

KS3 Suggested key topics

Years 7 suggested topic areas	Intent	Link to key concepts	Links to other topic areas.
<p>Earth's resources E.g. What are the main environmental issues facing our planet? Is the earth running out of natural resources?</p>	<p>To locate and explore significant issues facing our planet around natural resources. This unit acts as a general introduction to geography including the different spheres of Earth and how they are linked. Issues could include deforestation, plastics in the ocean, air pollution and Sustainability.</p>	<p>L, PS, IS, S GMA, GIS</p>	<p>Previous learning-KS1/2</p> <ul style="list-style-type: none"> • Climate change • Sustainability • National parks • Wet and dry places <p>Future learning KS3</p> <ul style="list-style-type: none"> • Future of our planet • Africa, Asia, Middle east, Russia <p>Future learning-KS4</p> <ul style="list-style-type: none"> • The challenge of natural hazards • The living world • The challenge of resource management
<p>Climate change E.g. Climate change who is to blame.</p>	<p>The aim of this unit is to explore the concept of climate change. Many students will be aware of this subject from the news and their studies at KS2. The aim of the unit is to build on this knowledge and help pupils to explore the context of climate change from the Quaternary period to the present day. Are humans to blame?</p>	<p>PS, PW, HE, IS GMA, GIS</p>	<p>Previous learning-KS1/2</p> <ul style="list-style-type: none"> • Climate change • Sustainability <p>Future learning KS3</p> <ul style="list-style-type: none"> • Weather and climate, Ice, rivers, coasts • Africa, Asia, Middle east, Russia • Future of our planet <p>Future learning-KS4</p> <ul style="list-style-type: none"> • The challenge of natural hazards
<p>The UK's economy and globalisation E.g. How important is the UK in the wider world?</p>	<p>Learning about economic activities and what they look like at different scales. Understanding the way that jobs can be arranged in groups and how these have changed over time. Understanding global trade and the UK's links/importance to wider world economy. Concept of globalisation. Key Stage 4

AQA Statement

Studying geography gives students the opportunity to travel the world via the classroom, learning about both natural and social sciences along the way. They will understand how geography impacts everyday life and discover the key opportunities and challenges facing the world. Students will also develop academic and life skills from writing, teamwork and communication to analytical skills.

Futura statement

The KS4 curriculum is based on the AQA Geography GCSE specification. This exciting and relevant course studies geography in a balanced framework of physical and human themes and investigates the link between them. Students will travel the world from their classroom, exploring case studies in the United Kingdom (UK), higher income countries (HICs), newly emerging economies (NEEs) and lower income countries (LICs). Topics of study include climate change,

poverty, deprivation, global shifts in economic power and the challenge of sustainable resource use. Students are also encouraged to understand their role in society, by considering different viewpoints, values and attitudes. The curriculum is sequenced so that students build on and deepen their knowledge and understanding of the physical world around them, followed by learning that focusses on the human world. The links between the physical and human worlds feature throughout and skills are integrated across the curriculum. Upon completion of this two-year course, students will have the skills and experience to progress onto A-level and beyond.

Physical geography Living with the physical environment.	The challenge of natural hazards	The living world	Physical landscapes in the UK
	Tectonic hazards -Weather hazards -Climate change	Ecosystems and biomes -Tropical rainforests -Hot deserts	Coastal landscapes -River landscapes
KS3 link	Global issues/resources Y7/9 Climate Change Y7 Weather and climate Y8 Tectonics Y9	Global issues Y7/9 Russia Y8 Africa and Middle east Y9	Physical landscapes Y7 Rivers/ice Y8 Coasts Y9
KS5 link	3.1.1.1 Water and carbon cycles as natural systems 3.1.5 Hazards	3.1.1.1 Water and carbon cycles as natural systems 3.2.4 Population and the environment	3.1.1.1 Water and carbon cycles as natural systems 3.1.3 Coastal systems and landscapes
Human Geography	Urban issues and challenges	The changing economic world	The challenge of resource management
	The Urban world/Rio -Urban change in the UK/Bristol -Sustainable urban development	The development Gap -NEE – Nigeria -Changing UK economy	Global resources and food, water and energy in the UK -Global water/food/energy management
KS3 link	Population Y7/8 Urban world Y7/8	Unequal world Y8/9 Africa Y9	Global issues Y7 Middle east Y9
KS5 link	3.2.2 Changing places	3.2.1 Global systems and global governance	3.2.4 Population and the environment

Key Stage 5 – Statement

The KS5 curriculum is based on the AQA A Level specification. The curriculum is designed to excite students’ minds, challenge perceptions and stimulate investigative and analytical skills. Topics of study balance both physical and human geography where students are encouraged to identify and analyse links between concepts and ideas. Through studying a wide range of places, processes and concepts students develop high level thinking skills such as synopticity and critical thinking. Over the course of two years students study topics in depth and through independent learning extend their knowledge and understanding beyond the classroom. Students build on their geographical investigation skills becoming independent through the planning and writing up of a geographical investigation. The A Level course content acts as a springboard into studying geography at degree level, whilst transferable skills such as teamwork, independence, creativity and communication provide a foundation for employment, apprenticeships and other level 3 courses.

	Water and carbon cycles	Hazards	Coastal systems and landscapes
Physical geography	<ul style="list-style-type: none"> -Systems -Global water cycle, balance and hydrographs -Carbon cycle stores, transfers, budget and changes -Water, carbon and climate change -Tropical rainforest case study -River catchment case study and field data 	<ul style="list-style-type: none"> -Tectonics and volcanic and seismic activity -Impacts, response and management -Volcano case study and multi-hazard environment case study -Storm hazard nature, impacts and case study -Fires in nature and case study 	<ul style="list-style-type: none"> -Systems -Energy -Sediment sources, cells and budgets -Mass movement -Processes and landforms -Sea level change -Coastal management -UK and India case studies

KS4 link	Urban issues and challenges	The economic world The challenge of resource management The living world	The economic world

Geographical fieldwork investigation based on an issue or question defined, developed and relating to a specification component.

Students are required to undertake an independent investigation. This must incorporate a significant element of fieldwork. The fieldwork undertaken as part of the individual investigation may be based on either human or physical aspects of geography, or a combination of both. They may incorporate field data and/or evidence from field investigations collected individually or in groups. What is important is that students work on their own on contextualising, analysing and reporting of their work to produce an independent investigation with an individual title that demonstrates required fieldwork knowledge, skills and understanding.

Assessment

Futura Geography aims of assessment

The assessment of geography in the Futura Learning Partnership closely aligns with the following statement:

'If the purpose for learning is to score well on a test, we've lost sight of the real reason for learning' Jeannie Fulbright.

Assessment in geography departments across Futura is cumulative and aims to build on the knowledge, understanding and skills that have come before. The emphasis is mainly on regular day to day formative assessment which provides teachers with an accurate assessment of student's strengths and gaps in their knowledge and understanding. This information is then used to respond to pupil's individual need from lesson to lesson and guide pedagogy so that it both supports and challenges students as well as supporting staff in understanding how to improve their own classroom instruction. Students will be supported in self-assessing their own progress as well as developing their skills of self-reflection, independence and resilience. Formative assessment supports Futura geographers to become adept at thinking, speaking and writing geographically.

Periodically students will be expected to complete an assessed task which may take the form of:

- A geographical enquiry
- extended or shorter focused pieces of writing in a variety of different forms for a range of purposes
- analysis and interpretation of a variety of maps at different scales as well as other geographical data
- text annotation such as thought mapping, storyboards, concept mapping or timelines
- drawing of sketch maps, diagrams, field sketches

Periodic assessment provides students with the opportunity to demonstrate their synoptic thinking and demonstrate their skills as a geographer. It will allow pupils to make links between previous and current learning. The data gathered from these assessments will be used to inform teachers of a student's progress and planning their next steps in learning.

Students will complete a summative geography assessment twice per academic year. This information will help to inform teachers of student's achievement in relation to curriculum benchmarks and provide an opportunity to report on student progress to parents and carers as well as inform next steps to be taken in a student's geographical education.

Early Years Foundation Stage Assessment statement

Geography is principally incorporated into The Early Learning Goal for 'Understanding the World: The World' and 'People and Communities', but also comes through learning in other areas, such as 'Communication and Language' and 'Expressive Art and Design', as well as 'Characteristics of Effective Learning'. Assessment and feedback are on-going through regular observations, captured and recorded in the chosen system for each school (for example, an online platform like 'Tapestry'). At the end of the year, in the Foundation Stage Profile, teachers will report whether children have met the expectations for those areas.

KS1 and 2 Assessment statement

<u>Timescale</u>	<u>What</u>	<u>Purpose</u>
Annual	Subject leader to gather information relating to teacher assessment	Overview of children not meeting/meeting/working at greater depth against age-related expectations

End of unit/teaching block	Progress quizzes/end of unit reflection against knowledge organiser	End of unit discussions and reflection to gain information about understanding and address misconceptions. Students reflect on learning/progress. Quizzes are peer/self-marked. Feedback takes place in the lesson through questioning and teacher correcting common misconceptions
Lesson by lesson	Assessment for learning through practice questions (differentiated essential/challenge/extend)	Class discussion and teacher targeted questioning. Formative feedback

KS1 and 2 Assessment Aims

	Locational Knowledge	Place Knowledge	Human and Physical Geography	Skills and Fieldwork
KS1 pupils:	<p>Know the names of the four countries that make up the UK and name the three main seas that surround the UK</p> <p>Know the name of and locate the four capital cities of England, Wales, Scotland and Northern Ireland</p>	<p>Know features of hot and cold places in the world</p> <p>Know where the equator, North Pole and South Pole are on a globe</p> <p>Know the main differences between a place in England and that of a small place in a non-European country</p>	<p>Know which is the hottest and coldest season in the UK</p> <p>Know and recognise main weather symbols</p> <p>Know the main differences between city, town and village</p>	<p>Know which is N, E, S and W on a compass</p> <p>Know their address, including postcode</p> <p>Know and use the terminologies: left and right; below, next to</p>

	<p>Know the names of and locate the seven continents of the world</p> <p>Know the names of and locate the five oceans of the world</p>		<p>Identify the following physical features: mountain, lake, island, valley, river, cliff, forest and beach</p> <p>Explain some of the advantages and disadvantages of living in a city or village.</p>	
LKS2 pupils:	<p>Know the names of and locate at least eight European countries</p> <p>Know the names of and locate at least eight major capital cities across the world</p> <p>Know the names of and locate at least eight counties and at least six cities in England</p> <p>Know the names of four countries from the southern and four from the northern hemisphere</p> <p>Know where the equator, Tropic of Cancer, Tropic of Capricorn and the Greenwich Meridian are on a world map</p>	<p>Know key differences between living in the UK and in a country in either North or South America</p>	<p>Know what causes an earthquake</p> <p>Explain the features of a water cycle</p> <p>Know what is meant by biomes and what are the features of a specific biome</p> <p>Label layers of a rainforest and know what deforestation is</p> <p>Know the names of and locate some of the world's deserts</p> <p>Know why industrial areas and ports are important</p> <p>Know main human and physical differences between developed and developing countries</p>	<p>Use maps to locate European countries and capitals</p> <p>Use maps and globes to locate the equator, the Tropics of Cancer and Capricorn and the Greenwich Meridian</p> <p>Know and name the eight points of a compass</p> <p>Know how to plan a journey within the UK, using a road map</p> <p>Know how to use graphs to record features such as temperature or rainfall across the world</p>

	<p>Know what is meant by the term 'tropics'</p> <p>Know about time zones and work out differences</p>			
UKS2 pupils:	<p>Know where the main mountain regions are in the UK</p> <p>Know, name and locate the main rivers in the UK</p> <p>Know the names of a number of European capitals</p>	<p>Know at least five differences between living in the UK and another country</p>	<p>Label the different parts of a volcano</p> <p>Know and label the main features of a river</p> <p>Know the name of and locate a number of the world's longest rivers</p> <p>Know the names of a number of the world's highest mountains</p> <p>Know why most cities are located by a river</p>	<p>Use Google Earth to locate a country or place of interest and to follow the journey of rivers, etc.</p> <p>Know what most of the ordnance survey symbols stand for</p> <p>Know how to use six-figure grid references</p>

KS3 Assessment statement

<u>Timescale</u>	<u>What</u>	<u>Purpose</u>
Annual	<p>Year 7 exam-50 mins</p> <p>Year 8 exam-1 hour</p> <p>Year 9 exam-1 hour 15 mins</p>	<p>Testing knowledge, understanding and skills under exam conditions.</p> <p>Provides a measure of progress to date.</p>

End of unit/teaching block	Summative assessment These are end of 'unit' assessments. They comprise a set of knowledge questions e.g. define key terms, multiple choice followed by a GCSE style exam question (4, 6 and/or 9 mark question)	Students complete the assessment under 'test' conditions. At the end students are given the opportunity to 'Go Green' and ABC (Add, build, change) before submitting Following teacher marking and individual written feedback, students are given the opportunity for further ABC with the addition of 'extend' questions to complete. Teacher input in the form of correcting common misconceptions arising from the assessment. Students reflect on learning/progress
Weekly/fortnightly	Progress quizzes (approx 2 per unit) Linked to homework/pre-learning	Progress quizzes are peer/self-marked. Feedback takes place in the lesson through questioning and teacher correcting common misconceptions
Lesson by lesson	Assessment for learning through practice questions (differentiated essential/challenge/extend)	Class discussion and teacher targeted questioning. Formative feedback

Assessment aims

	Working towards grades 7-9	Working towards grades 5-6	Working towards grades 1-4
Year 7	Students evaluate and justify where applicable. Student explanations for key geographical concepts are concise and accurate	Students might try to evaluate where applicable. Students' explanations for key concepts are clear. Students place knowledge is accurate.	Students attempt to describe and explain where applicable. Students understanding of key concepts is shown.

	<p>Students place knowledge is accurate, and they understand a range of scales (temporal/spatial awareness).</p> <p>Students use geographical skills confidently to analyse and interpret maps/graphs/photographs</p> <p>Students accurately use geographical terminology throughout.</p>	<p>Students' geographical skills are used to attempt to analyse and interpret maps/ graphs/photographs.</p> <p>Geographical terminology used throughout</p>	<p>Students place knowledge is shown.</p> <p>Students geographical skills are attempted to interpret maps/graphs/photograph</p> <p>Students' geographical terminology is attempted in places.</p>
Year 8	<p>Students evaluate and justify where applicable and with increasing effectiveness and confidence</p> <p>Student explanations for key geographical concepts are concise, accurate and detailed</p> <p>Students place knowledge is accurate, and they show detailed understanding of a range of scales (temporal/spatial awareness).</p> <p>Students use a wide range of geographical skills confidently to analyse and interpret maps/graphs/photographs</p> <p>Students accurately use a range of geographical terminology throughout.</p>	<p>Students evaluate where applicable and begin to justify</p> <p>Students explanations for key geographical concepts are clear and mostly accurate</p> <p>Students place knowledge is accurate, and they show clear understanding of scale.</p> <p>Students' geographical skills are used well to analyse and interpret maps/ graphs/photographs.</p> <p>Geographical terminology used throughout with minor inaccuracies</p>	<p>Students describe and explain where applicable.</p> <p>Students understanding of key geographical concepts is basic</p> <p>Students place knowledge is basic.</p> <p>Students geographical skills are basic, and interpretation of maps/graphs/photographs is attempted</p> <p>Students' geographical terminology is basic.</p>
Year 9	<p>Students show thorough geographical understanding of human and physical processes</p> <p>Students demonstrate thorough application of knowledge and understanding through detailed and accurate analysis</p> <p>Students show thorough and detailed understanding of a wide range of geographical concepts and processes</p> <p>Students demonstrate application of knowledge and understanding in a coherent and reasoned way through effective evaluation</p> <p>Student written and oral responses will be detailed and developed with relevant and appropriate support</p>	<p>Students show clear geographical understanding of human and physical processes</p> <p>Students demonstrate clear application of knowledge and understanding through detailed and accurate analysis</p> <p>Students show detailed understanding of a wide range of geographical concepts and processes</p> <p>Students demonstrate application of knowledge and understanding in a coherent and reasoned way through evaluation</p> <p>Student written and oral responses will be detailed with relevant and appropriate support</p> <p>A range terminology will be used</p>	<p>Students show basic geographical understanding of human and physical processes</p> <p>Students demonstrate basic application of knowledge and understanding through detailed and accurate analysis</p> <p>Students show some understanding of a wide range of geographical concepts and processes</p> <p>Students demonstrate application of knowledge and understanding in a limited way through evaluation</p> <p>Student written and oral responses will be basic and may lack support</p>

	A wide range terminology will be used, often higher-level terms.		Some terminology will be used

KS4 aims and learning outcomes

Courses based on this specification should encourage students to:

Develop and extend their knowledge of locations, places, environments and processes, and of different scales including global; and of social, political and cultural contexts (know geographical material)

Gain understanding of the interactions between people and environments, change in places and processes over space and time, and the inter-relationship between geographical phenomena at different scales and in different contexts (think like a geographer)

Develop and extend their competence in a range of skills including those used in fieldwork, in using maps and GIS and in researching secondary evidence, including digital sources; and develop their competence in applying sound enquiry and investigative approaches to questions and hypotheses (study like a geographer)

Apply geographical knowledge, understanding, skills and approaches appropriately and creatively to real world contexts, including fieldwork, and to contemporary situations and issues; and develop well-evidenced arguments drawing on their geographical knowledge and understanding (applying geography).

KS4 Assessment objectives

The exams will measure how students have achieved the following assessment objectives.

AO1: Demonstrate knowledge of locations, places, processes, environments and different scales (15%).

AO2: Demonstrate geographical understanding of: concepts and how they are used in relation to places, environments and processes; the interrelationships between places, environments and processes (25%).

AO3: Apply knowledge and understanding to interpret, analyse and evaluate geographical information and issues to make judgements (35%, including 10% applied to fieldwork context(s)).

AO4: Select, adapt and use a variety of skills and techniques to investigate questions and issues and communicate findings (25%, including 5% used to respond to fieldwork data and context(s)).

KS5 Assessment statement

<u>Timescale</u>	<u>What</u>	<u>Purpose</u>
Annual	Year 12 exam-Paper 1 (Coasts and Hazards), Paper 2 (Changing Places and Population and the Environment)-From previous years exam series Year 13 January mock exam-previous years exam series (Paper 1 and 2 all sections)	Testing knowledge, understanding and skills under exam conditions. Provides a measure of progress to date. WTM ahead of external exams
Termly/half termly End of unit/teaching block	Summative assessment Mid unit and end of tests using PPs For example, Hazards Assessment 1-Tectonics, volcanic and seismic hazards Assessment 2-Tropical Storms and fires in nature Assessment 3-End of unit assessment	Students complete the assessment under 'test' conditions. At the end students are given the opportunity to 'Go Green' and ABC (Add, build, change) before submitting Following teacher marking and individual written feedback, students are given the opportunity for further ABC with the addition of 'extend' questions to complete. Teacher input in the form of correcting common misconceptions arising from the assessment. Students reflect on learning/progress
Weekly/fortnightly	Progress quizzes (one following every homework) Linked to homework/independent learning	Progress quizzes are peer/self-marked. Feedback takes place in the lesson through questioning and teacher correcting common misconceptions
Lesson by lesson	Assessment for learning through practice questions (differentiated essential/challenge/extend)	Class discussion and teacher targeted questioning. Formative feedback

KS5 aims and learning outcomes

Develop their knowledge of locations, places, processes and environments, at all geographical scales from local to global across the specification as a whole

Develop an in-depth understanding of the selected core and non-core processes in physical and human geography at a range of temporal and spatial scales, and of the concepts which illuminate their significance in a range of locational contexts

Recognise and be able to analyse the complexity of people–environment interactions at all geographical scales, and appreciate how these underpin understanding of some of the key issues facing the world today

Develop their understanding of, and ability to apply, the concepts of place, space, scale and environment, that underpin both the national curriculum and GCSE, including developing a more nuanced understanding of these concepts

Gain understanding of specialised concepts relevant to the core and non-core content. These must include the concepts of causality, systems, equilibrium, feedback, inequality, representation, identity, globalisation, interdependence, mitigation and adaptation, sustainability, risk, resilience and thresholds

Improve their understanding of the ways in which values, attitudes and circumstances have an impact on the relationships between people, place and environment, and develop the knowledge and ability to engage, as citizens, with the questions and issues arising

Become confident and competent in selecting, using and evaluating a range of quantitative and qualitative skills and approaches, (including observing, collecting and analysing geolocated data) and applying them as an integral part of their studies

Understand the fundamental role of fieldwork as a tool to understand and generate new knowledge about the real world, and become skilled at planning, undertaking and evaluating fieldwork in appropriate situations

Apply geographical knowledge, understanding, skills and approaches in a rigorous way to a range of geographical questions and issues, including those identified in fieldwork, recognising both the contributions and limitations of geography

Develop as critical and reflective learners, able to articulate opinions, suggest relevant new ideas and provide evidenced argument in a range of situations.

KS5 Assessment objectives

AO1: Demonstrate knowledge and understanding of places, environments, concepts, processes, interactions and change, at a variety of scales (30–40%).

AO2: Apply knowledge and understanding in different contexts to interpret, analyse and evaluate geographical information and issues (30–40%).

AO3: Use a variety of relevant quantitative, qualitative and fieldwork skills to investigate geographical questions and issues, interpret, analyse and evaluate data and evidence, construct arguments and draw conclusions (20–30%).

Futura History

Curriculum Framework

History Curriculum Framework

Intent:

The Futura Learning Partnership intent for history is that a high-quality history education will inspire children to have a curiosity and fascination about the local area and Britain's past and that of the wider world as well. Children will be able to think critically, weigh evidence, sift arguments, and develop perspective and judgement. The children's deep learning of history and its related information gathering skills will enable them to have an understanding of where we have come from and how this has been influenced by the wider world and different cultural heritages. This in turn will enable us to learn from the past, model the future and understand society and the child's place within it. Furthermore, it gives us a view of other cultures and their development through time. We believe that learning about historical events provides an important context for the development of pupils' key learning skills, particularly communication, working with others, problem solving and critical thinking skills and that this will be done not just through experiences in the classroom but also through the use of field work and educational visits.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive concepts**:

<p>Chronological Understanding</p>	<p>A secure knowledge of the order of events necessarily underpins any attempt to explain cause and consequence or to chart the process of change and continuity.</p>
<p>Historical Concepts</p>	<ol style="list-style-type: none"> 1. Some concepts and terms (such as Calvinism or Menshivism) are highly specific to a particular period or place – and it is easy to recognise that their meaning needs to be explicitly taught. 2. Other concepts (such as Puritanism or Bolshevism) that originated in specific contexts may come to be applied more widely, so that students’ more general awareness of their meaning can obscure a lack of precision in their historical knowledge. 3. Others (such as ‘the Church’ or ‘revolution’) have a much wider application and are applied in many contexts other than history. In dealing with this category, teachers need not only to ensure that students understand their meaning, rather than simply assuming that they do because they are works in common usage; they also need to plan for learning about how that meaning changes over time and in different contexts.
<p>Change/Continuity</p>	<p>Students to examine trends and turning points over time, looking at those dimensions which remain stable while others alter, and examining the varying pace, direction and nature of those alterations. Another aspect of change and continuity is the lived experience of change: how particular developments were experienced and understood by those who lived through them.</p>
<p>Cultural Diversity</p>	<p>Diversity is not just about race, however, although the colour of someone’s skin is an obvious aspect of diversity. Diversity also includes the immigration and emigration of white Europeans that has formed part of the story of Britain since prehistoric times. Linguistic, social, economic, technological and political differences are other aspects of diversity, as are local and regional history. Diversity is also closely linked to the concept of interpretations of history, because different ethnic and social groups may have contrasting interpretations of past events.</p>

Disciplinary concepts:

<p>Cause and Consequence</p>	<p>Developing an understanding of why things happen and of why people do the things that they do is indispensable in both our personal and our collective lives: it is a precondition for making sense of experience and for acting to shape it effectively. There are at least four cognitive activities here:</p> <ol style="list-style-type: none"> 1. Identifying different factors. 2. Making explanatory links between causes and effects.
-------------------------------------	--

	<p>3. Assessing the relative importance of different factors.</p> <p>4. Considering the relationships between causal arguments, evidence and interpretations.</p>
Significance	<p>Considering the significance of events, people and developments in their historical context and in the present day .This includes: considering why judgements about the significance of historical events, issues and people have changed over time; identifying the criteria and values used to attribute significance; and assessing how these have been used in past and present descriptions and explanations. Statements about significance are interpretations that may be based on contestable judgements about events, issues and people, and are often related to value systems of the period in which the interpretation was produced.</p>
Interpretation	<p>People represent and interpret the past in many different ways, including in pictures, plays, films, reconstructions, museum displays, and fictional and non-fiction accounts. Interpretations reflect the circumstances in which they are made, the available evidence, and the intentions of those who make them (for example writers, archaeologists, historians and film-makers).</p> <p>Students will develop skills to analyse the <i>nature and origin</i> of the interpretation created. This leads to questions such as:</p> <ul style="list-style-type: none"> ● when was it produced? ● what sources of information were used to produce it? ● who produced it? ● where was it produced? <p>The second stage is to consider the <i>purpose</i> of the interpretation. This leads to such questions as:</p> <ul style="list-style-type: none"> ● was it to entertain/inform/persuade/mislead? ● who was the intended audience? <p>The third stage is to consider the <i>perspective</i> of the interpretation. This considers such questions as:</p> <ul style="list-style-type: none"> ● what were the views and standpoints of the producers of the interpretation?
Historical literacy	<p>Show competence in a range of intellectual and communication skills (oral and written) written, including the formulation of arguments which include elements of synthesis and evaluation of material. The ability to interpret contemporary sources and historical interpretation of an increasingly complex nature (vocabulary, vocabulary and context).</p>

Historical numeracy	Numeracy (number and measurement)-solving numerical problems how it is presented in graphs, charts and tables. There are opportunities within history for students to develop their numeracy skills such as analysing population growth and economic expansion and decline. Students learn to analyse numerical data to make meaning of the past, for example to understand cause and effect, and continuity and change
----------------------------	---

The role of assessment within the curriculum - p40

Appendices - p47

Cultural calendar – p52

Early Years Foundation Stage.

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are **playing and exploring** - children investigate and experience things, and 'have a go'; **active learning** - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; **creating and thinking critically** - children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (**PSE, CL, PD**) underpin and are an integral part of children's learning in all areas.

Birth 2 Five Range 6 statements –

- Enjoys joining in with family customs and routines.
- Talks about past and present events in their own life and in the lives of family members.
- Knows that other children do not always enjoy the same things and is sensitive to this.
- Knows about similarities and differences between themselves and others, and among families, communities, cultures, and traditions.

ELG – Understanding the World –

- Past and Present - Children at the expected level of development will: - Talk about the lives of the people around them and their roles in society; - Know some similarities and differences between things in the past and now, drawing on their experiences and what has been read in class; - Understand the past through settings, characters, and events encountered in books read in class and storytelling.

EYFS History Skills

<u>Changes within living memory</u>	<u>Events beyond living memory</u>	<u>The lives of significant individuals in the past</u>	<u>Significant historical events, people and places in their own locality</u>
Begin to make sense of their own life-story and family's history. Understand the ways I have changed. Talk about the changes that have happened within my family lifetime e.g. talking to grandparents about holiday etc. Talk about the lives of the people around them and their roles in society.	Comment on images of familiar situations in the past.	Compare and contrast characters from stories, including figures from the past Understand the past through settings, characters and events encountered in books read in class and storytelling.	Identify some similarities and differences between things in the past and now, drawing on their experiences and what has been read in class.

First-hand experiences and pupil knowledge offer:

History at Foundation Stage is introduced indirectly through activities that encourage children to explore, observe, think, make decisions, and discuss. This is scaffolded through skilful adult interaction. Children will have opportunities to explore a range of historical skills such as discussion, chronology, historical vocabulary, analysis, perspectives and interpretations and empathy. They experience first-hand artefacts and materials which they use to inspire learning.

The first-hand experiences and knowledge the children should be offered are:

- Welly Walks in and around the local area.
- First-hand discussions with children about their own past and that of family members.
- Sharing experiences and visits from their own lives.
- Sharing stories, pictures, music, and art from the past and looking at significant world and local people from the past that have shaped the future.
- Exploring the school environment and local area.
- Actively using class timelines to gain an underpinning sense of time and chronology.

Key Vocabulary - Today, yesterday, tomorrow, present, past, future, when I was little, remember, ago, order, sequence, old, new, then, now

Key Stage 1

Substantive Knowledge:

Historical Concepts	Chronological Understanding	Change/Continuity	Cultural Diversity
To know where people, events and artefacts are placed on a chronological framework.	To develop an awareness of the past, for example: labelling a timeline with words or phrases such as: past, present, older and newer. Use dates where appropriate.	Change and development in peoples lives and how you grow up Past and present events in own life's and of family members Recognise that there are reasons why people in the past acted as they did. Recount changes that have occurred in their own lives.	Understand that families of different cultures may have different events and celebrations that shape their lives.

Disciplinary Knowledge:

Historical Interpretation	Cause and Consequence	Significance
Identify some of the different ways the past has been represented Describe different accounts of a historical event, explaining some of the reasons why the accounts may differ Identify similarities and differences between ways of life in different periods. Study changes within living memory.	Observe or handle evidence to ask questions and find answers to questions about the past- how did they get there? Why did they travel? Ask questions such as: What was it like for people? What happened? How long ago? Use artefacts, pictures, stories, online sources and databases to find out about the past.	To talk about who was important e.g. in a simple historical account

Key stage 3:
Substantive Knowledge:

Year	Historical Concepts	Chronological Understanding	Change/Continuity	Cultural Diversity
7	<p>Recognise chronological themes and overviews, demonstrating specific and detailed knowledge of key points.</p> <p>Attribute key words to dates and place dates in chronological order when describing events.</p> <p>Link events, artefacts and historical figures on a timeline using dates to key knowledge to explain a point.</p>	<p>Be curious about people and show interest in stories</p> <p>Answer 'how' and 'why' questions ... in response to stories or events.</p> <p>Explain own knowledge and understanding and asks appropriate questions.</p>	<p>Can describe changes and continuities across a period</p> <p>Can explain the reasons for different changes/continuities across a period.</p> <p>Beginning to evaluate the extent of change in a period.</p>	<p>Assess the impact of religion and influences over time, medieval churches, Henry VIII's break with Rome</p> <p>Analyse the difference in the lives of rich and poor in medieval times and compare to today</p> <p>Compare the changing nature of democracy- introduction of Norman control, feudal system, Magna Carta and Henry VIII's suppression of the Catholic Church</p>
8	<p>Depth and balance are used when explaining events. Chronological reference, evidence and dates are used to support a framework of argument and/or opinion.</p> <p>Key examples using key terms are selected from thematic understanding to support an argument.</p>	<p>Extend and deepen their chronologically secure knowledge of history and a well-informed context for further learning</p> <p>Identify significant events, make connections when assessing enquiry and interpretation.</p>	<p>Explains in detail, two or more reasons for an event happening and/or consequences of an event.</p> <p>Clearly understands the links between events and the consequences.</p> <p>Can describe in detail changes and continuities across a period.</p>	<p>Understand the threats and role of protests in democracy; Guy Fawkes, Oliver Cromwell, execution of Charles I</p> <p>Explain the importance of the effect of the Transatlantic Slave Trade on the heritage of African citizens, assessing the impact of Britain's role in trade and empire growth</p>

	Events, people, places are linked together to provide a context of argument.		<p>Can assess the extent of change across a period and can come to a conclusion about the overall extent of change.</p> <p>Can analyse the importance of different turning points and compare their importance</p>	Analysing the circumstances of the rich and poor in Victorian England with a focus on public health, crime and punishment
9	<p>Analyse and explain the important of an event and identify themes of change in a chronological framework.</p> <p>To be able to group events into factors and key arguments using specific evidence and key words.</p> <p>Prioritise events in order of impact using evidence.</p>	Draw contrasts and analyse trends within periods and over long arcs of time	<p>Uses understanding of change and continuity to assess the importance of a turning-point in a period and are also able to assess the extent of progress.</p> <p>Explains a range of reasons for an event happening/ consequences of an event and conclude about which is the most important.</p> <p>Confidently highlights and analyses the links between different causes or consequences.</p>	<p>Recognising the importance of the sacrifice and leadership of others to secure democracy and freedom through the study of World War One and World War Two</p> <p>Analysing the importance of protests and campaigns to instigate change and impact democracy today through the study of the Suffragettes</p> <p>Study the tragedy of the Russian Revolution and the impact this had on international relations today</p> <p>Evaluate the impact of the Holocaust on Jewish communities and how ensure genocide can be learnt from and not repeated</p> <p>Assess the impact the diversity of the decades has upon modern society</p>

Disciplinary Knowledge:

Year	Historical Interpretation	Cause/Consequence	Significance
7	<p>Contrasting arguments and interpretations of the past – explain why there might be two different interpretations of an event</p> <p>Pursue historically valid enquiries Understand how different types of sources are used rigorously to make historical claims Create relevant, structured and evidentially supported accounts</p>	<p>Identify short, medium and long term causes and identify a catalyst and turning point</p> <p>Identify short, medium and long term consequences and identify impact socially, politically, economic and religious</p>	<p>Can identify possible reasons for the importance of events/people in the past. Maybe generalised and unspecific.</p> <p>Can identify historically significant people, events or changes and can give a reason why, however it may be simple or descriptive and may begin to explain.</p>
8	<p>Discern how and why contrasting arguments and interpretations of the past have been constructed.</p> <p>Begin to compare different interpretations critically, identifying motives and purpose of interpretations.</p> <p>Pursue historically valid enquiries including some they have framed</p>	<p>Explain a series of short, medium and long term causes and identify a catalyst and turning point</p> <p>Explain short, medium and long term consequences and prioritise impact socially, politically, economic and religious evaluating the most important factor</p>	<p>Clearly explains why some people, events or changes are more historically significant than others.</p> <p>Begins to use criteria (e.g. Counsell's 5Rs) to assess how significant an event, person or change was</p> <p>Confident with using criteria to assess how significant an event, person or change was.</p>

	<p>Understand how different types of sources are used rigorously to make historical claims with a breakdown of content and provenance</p> <p>Create relevant, structured and evidentially supported accounts with a clear judgement</p>		
9	<p>Discern how and why contrasting arguments and interpretations of the past have been constructed and form a judgement which interpretation is more accurate against valid criteria. High ability answers are based on understanding of the historical context</p> <p>Comparisons are made of different interpretations and analysis of effectiveness draws upon historical knowledge.</p> <p>Create relevant, structured, balanced and evidentially supported accounts with a clear judgement</p> <p>Understand how different types of sources are used rigorously to make historical claims with a focus on 'how convincing' or 'utility'</p>	<p>Analyse a series of short, medium and long term causes and identify a catalyst and turning point interpreting the influencing factors such as individuals, democratic changes, political interests and welfare</p> <p>Explain short, medium and long term consequences and prioritise impact socially, politically, economic and religious evaluating the most important factor for the key country and individual, and also the wider impact on nations and democratic systems.</p>	<p>Compare criteria for judging how significant an event, person or change was to come to an overall conclusion</p> <p>Use knowledge and understanding to form a well-argued conclusion as to the significance of a person, event or change using a range of criteria and the work of other historians.</p>

Historical Vocabulary

Year 7:

Heir, Infantry, Cavalry, **Continuity, Invasion, Population**, Peasant, Revolt, Statute, Plague, **Epidemic, Significance**, Disease, **Provenance, Parliament, Interpretation**, Excommunicate, **Medieval**, Feudal, Cathedral

Year 8:

Homicide, **Metropolitan, Investigation, Interpretation**, Puritan, Cavalier, **Treason**, Censored, Protectorate, **Royalist**, Execution, Rural, **Domestic, Industry**, Locomotive, Patent, Transatlantic, Merchant, **Plantation, Rebellion, Abolition**, Monarch, **Economic**, Interregnum, **Regicide, Restoration, Republic**, Leveller, Political, **Protestant**

Year 9:

Constitution, Amendment, Prohibition, Democrat, Republican, Bootlegging, Speakeasy, Prevention, Entente, **Alliance**, Recruitment, **Conscription**, Censorship, Munitions, **Militant**, Trenches, **Artillery**, Mobilise, **Attrition**, Propaganda, **Armistice**, Pacifist, Conscience

Suggested key topics:

Year 7	Term 1 Did the Normans improve England?	Term 2 How did William keep control?	Term 3 Did the Black Death cause more good than harm?	Term 4 Has punishment kept up with crime over time?	Term 5 Who was the best Medieval monarch?	Term 6 Was Henry VIII a spot of blood and grease on the pages of British History?
	Source skill focus: How do you know (4)		Source skill focus: Useful (8)		Source skill focus: Useful- comparison (12)	
	Substantive Knowledge: Chronological Understanding Change/Continuity 1.What is history? Understand what chronological order means: example events to span Egyptians 2560BC-Man walks on the moon AD 1969	1.Why William built castles Describe the role of rich and French barons consolidating Norman control Understand what is meant by a 'motte and bailey' castle. Assess the advantages and disadvantages of a motte and bailey castle.	1.The importance of the Church Describe the role of God, heaven and hell Explain the importance of religion in medieval times. Evaluate the role of religion in everyday life- Doom paintings can be used as a case study here	1.Ancient C&P Describe the role of animals Explain the influence of Christianity Explain the role of slavery Evaluate the trials and reaction of government 2.Medieval C&P	1.Who killed Thomas Beckett? Describe Thomas Beckett's role within the Church Explain the events in the quarrel between Henry II and Becket in chronological order	1.How did the Tudors take control? Describe succession Explain the importance of monarchy Evaluate the importance of an heir for dynasty 2. Who was Henry VIII? Describe the reputation of

<p>Understand period of the 'Middle Ages'- concept of after ancient Greeks and Romans but before modern times</p> <p>Understand the significance of BAME in our heritage</p> <p>Categorise events into centuries – look at change/continuity</p> <p>2.How can I develop my history skills?</p> <p>Understand the difference between a contemporary and secondary source</p> <p>3.What was life like in Britain pre 1066?</p> <p>Describe the lives of rich and poor- why was there a different in wealth? How was this shown?</p> <p>Explain the impact of religion and role of Christian Church</p> <p>Evaluate the importance of goods produced in medieval Britain and where they came from.</p> <p>4.Who shall be King?</p> <p>Compare the 3 different men who wanted to be King of England in 1066:</p> <ul style="list-style-type: none"> ● Harold Godwinson ● William of Normandy ● Harald Hardrada 	<p>2. Methods of control: Domesday Book</p> <p>Describe the purpose of the Domesday survey.</p> <p>Explain how the Domesday book increased Williams control.</p> <p>Evaluate the legacy of the Domesday Book</p> <p>3. Methods of control: Feudal System</p> <p>Describe 4 layers of the Feudal system</p> <p>Explain how the Feudal System worked as a method of control- the return of loyalty.</p> <p>Examine the role of money from barons to keep power and control</p> <p>Evaluate how effective the feudal system was.</p> <p>4. Methods of control: Castle Development</p> <p>Describe key features of castle development: keep, moat, barbican, portcullis, battlement</p> <p>Assess how features in castles attribute to castle design over time: stone keep, concentric castles</p> <p>5. Castle Attack</p> <p>Seize of Rochester Castle could be used as a case study here.</p> <p>Recall the names of a least five weapons, methods or tactics used to get into a castle</p>	<p>2. The daily life of nuns and monks</p> <p>Describe the role of a nun and monk</p> <p>Explain why people became nuns and monks</p> <p>Evaluate how far monks and nuns helped medieval society</p> <p>3. What was life like in a medieval village?</p> <p>Describe living conditions of a villain</p> <p>Describe how a medieval villager spent his day</p> <p>Compare what life was like in a medieval town compared to a village</p> <p>Evaluate how standards of cleanliness and personal hygiene were different to today</p> <p>4. What was the Black Death?</p> <p>Describe the difference between Bubonic and Pneumonic plague</p> <p>Explain what people thought caused the Black Death</p> <p>Evaluate how deadly the Black Death was</p> <p>5.Who healed the sick in the Middle Ages</p> <p>Describe the role of religion</p>	<p>Describe the links to Feudal System</p> <p>Explain types of punishment</p> <p>Explain the long term effects of mutilation</p> <p>Evaluate the influence of fines</p> <p>3.Tudor C&P</p> <p>Describe the links to the feudal system</p> <p>Explain the different treatment of the rich and poor</p> <p>Evaluate whether it was a 'crime to be poor'</p> <p>4.Early modern C&P</p> <p>Describe who Highway men were and their role in society</p> <p>Explain the influence of Dick Turpin</p> <p>Evaluate the impact on literature</p> <p>5.Witches</p> <p>Describe the stereotypes and assess their reality</p> <p>Explain the types of punishment for witches</p> <p>Evaluate the influence of religion and superstition</p> <p>6. Victorian C&P</p> <p>Describe corporal punishment</p> <p>Explain the role of punishment in domestic, school and workplaces</p>	<p>Evaluate King Henry's motives in making Becket Archbishop of Canterbury</p> <p>Investigate the causes and consequences of Becket's murder</p> <p>2. Was Richard a Lionheart?</p> <p>Define the period in history known as 'the Crusades</p> <p>3. Was King John any good?</p> <p>Describe King Johns position in the royal family line</p> <p>Explain the importance of the Magna Carta</p> <p>Evaluate the consequences of King John's mistakes</p> <p>4.Why was Edward I called the 'Hammerer of the Scots'?</p> <p>Describe Edward's character.</p> <p>Explain his role in defeating the Scottish armies.</p> <p>Evaluate: 'Is it fair to call him the Hammerer of the Scots?'</p> <p>4. What happened to Henry V in Agincourt?</p> <p>Describe Henry V's character.</p> <p>Explain his role in the battle of Agincourt.</p> <p>Evaluate: Was Henry the main reason for the outcome at Agincourt?</p>	<p>Henry VIII</p> <p>Explain how Henry VIII spent his time and money</p> <p>Evaluate how far Henry VIII related to the Catholic Church as a young man</p> <p>3. How many wives is too many?</p> <p>Describe why Henry married so many women</p> <p>Explain what happened to each of his wives</p> <p>Evaluate the impact the legacy of his marriages had on his reign</p> <p>4. Why should we learn about Black Tudors?</p> <p>Describe the significance of 'Black Tudors' as a research and individuals Jacques Francis, Diego, Mary Fillis and Cattelena of Almondsbury</p> <p>John Blanke</p> <p>Explain how the perception of Black Tudors has changed over time.</p> <p>Evaluate the significance and impact of the research into 'Black Tudors'</p> <p>5. How can you create your own Church?</p> <p>Describe how and why Henry VIII fell out with the Pope</p> <p>Explain how Henry VIII broke with Rome</p> <p>Evaluate how the break with</p>
--	---	--	--	---	---

<p>Focus on family history, links to Edward, reputation, support for the claim to the throne.</p> <p>5. Who lost out at the Battle of Stamford Bridge? Identify the contenders for the English throne who fought at the Battle. Explain the events of the Battle. Evaluate the physical and mental condition of the winning side at the end of the battle.</p> <p>6. How was the Battle of Hastings won? Describe the key events of the Battle. Compare the weapons and tactics that were used by William's and Harold's men at the Battle of Hastings. Analyse the tactics used by Harold and William in the battle. Judge how each of the armies fought in the early stages of the battle. Investigate how King Harold died. Evaluate how William won the Battle of Hastings</p> <p>7. The Conquest of England Discover how William went about increasing his power after the battle.</p>	<p>Explain how each of these weapons, methods or tactics was designed to work. Evaluate how enemies were still able to enter castles i.e. how King John eventually got into Rochester Castle</p> <p>6. Who was in a Castle? Understand the names and jobs of the people who lived in a castle. Examine what day to day life was like in castle. Evaluate how the design and roles of those employed elevated power of barons and lords</p> <p>7. Where have castles all gone? Describe how the use of castles has changed since the Middle Ages. Explain why castle-building ended. Explain what we can do to protect castles today</p> <p>LOCAL STUDY: CASTLES</p>	<p>Explain the role of hospitals in terms of care versus treatment. Evaluate the progression of medical knowledge</p> <p>6. Did the Black Death cause the Peasant Revolt? Describe why the peasants were so angry in 1281. Explain and link the causes of the peasant's anger to how the revolt was sparked. Discover what happened to the angry peasants when they took their revolt to London: Wat Tyler. Evaluate the consequences of the peasant's revolt and breakdown of feudal system</p> <p>7. Why did Britain experience a wave of immigration between 1330 and 1550? Describe why Britain experienced immigration post hundred years war, War of Roses and Black Death. Explain how immigrants during this time were accepted into society. Evaluate how our interpretation and research is changing our perception of immigration.</p>	<p>Evaluate the impact on rich versus poor</p> <p>7. Modern day C&P Describe the interrelationship of drugs and crime. Explain cyber crime. Evaluate the role of prisons in society</p> <p>8. Death Penalty Describe the use of the 'legal' death penalty. Explain the arguments for and against the death penalty. Evaluate the impact of pressure groups</p>	<p>5. Top Trumps- who was the best king? Describe key features of the 5 kings. Explain their ranking of each king. Evaluate which King was the best with a balanced answer.</p>	<p>Rome affected Henry's relationship with English citizens</p> <p>6. What did the Protestants protest about? Describe the difference between the Protestant and Catholic Church. Explain why some Protestants criticized the catholic Church after the reformation. Evaluate the impact the 'split' of Protestant and Catholic beliefs had upon Tudor life</p> <p>7. Would you trust a 9 year old as your king? Describe the relationship between Henry VIII and Edward. Explain how and why Henry's son changed religion in England. Evaluate the impact Edward's reign had on religious change</p>

		1.Africa	1.What was the British Empire? Define the nature of an	1.What was Britain like 150 years ago?	1.Crime and punishment Identify whose role it was to catch criminals in 1800.	1. Trench Conditions

<p>1. Remember, remember the fifth of November Describe the accepted facts about the Gunpowder Plot Explain the role of individuals Evaluate why the plot was so significant</p> <p>2. Were the plotters framed? Describe at least two opposing theories Explain and compare the theories Evaluate how far the plotters could have been framed</p> <p>3. Why did the English start fighting each other? Define the term 'Civil War'. Explain why Charles I had become so unpopular. Compare the views of Roundheads and Cavaliers and evaluate extent of support from the public.</p> <p>2. Battles: Roundheads versus Cavaliers The Battle of Naseby could be used as a case study here. Describe key features of battle: cavalry, pike men, musketeers, infantry Explain what soldiers looked like. Evaluate the effective fighting methods and example of victories from either side.</p>	<p>Describe life in African village and cities before the slave trade. Explain trade deals and African economy. Evaluate why the Slave Trade was able to begin.</p> <p>2. Triangular Trade Describe the 3 countries involved in the triangle. Explain the role of Britain. Evaluate the extent of African tribe participation.</p> <p>3. Middle Passage Describe slave capture and journey to barracoons. Explain key experiences of the voyage of middle passage. Evaluate why slavery was allowed to continue in this way for so long.</p> <p>4. Slave Auction Describe an auction or scramble and 2 ways slaves were sold. Explain how traders prepared slaves to maximize their profits. Assess why some slaves were sold for higher prices than others.</p> <p>5. Plantation Life Describe the difference between a field and domestic slave.</p>	<p>Empire. To explain Niall Ferguson's interpretation of the British Empire. To analyse why historians have different interpretations.</p> <p>2. Colonization of the Americas To describe the colonisation of the Americas. To explain the different motivations for colonising America. Evaluate: can colonisation be justified?</p> <p>3. American Independence To describe the build up to the American war of independence. To explain the different reasons why America decided to become independent. Evaluate: why do people rebel? Causes of American War of Independence: tax, idea of liberty, and British oppression.</p> <p>4. Jamaica To describe the different peoples that have inhabited Jamaica.</p>	<p>Describe the 'domestic system'. Explain how products were manufactured in Britain before 1745. Evaluate how and why the introduction of machines changed the way goods were made in Britain forever.</p> <p>2. How did factories create towns? Describe how factories caused the population of towns to increase. Analyse the impact of the use of steam. Evaluate the positive and negative impact of factory development.</p> <p>3. What was factory life like? Describe what it was like to work in some of Britain's first factories. Explain why some factory owners were unwilling to improve working conditions. Evaluate the 3 key reforms that eventually improved life for Britain's workers.</p> <p>4. Transport ROADS: Outline the problems with Britain's transport system in 1745 Assess how Britain's roads were improved</p>	<p>Explain 'capital crime' and 'transportation'. Evaluate the impact of a new police force.</p> <p>2. Prisons Describe prison conditions in the 1800s. Explain how prison life changed. Evaluate the significance of Howard and Fry in these changes.</p> <p>3. Jack the Ripper Describe interpretations of Jack the Ripper's character, appearance and background using suspect examples. Explain the events surrounding the murders. Evaluate why Jack the Ripper was so difficult to catch.</p> <p>4. Why is the Titanic so famous? Describe the events of the Titanic Assess whether the Titanic was safe to travel Evaluate why the Titanic sunk</p> <p>5. Why did the Great War start? Describe the concept of a World War. Identify short and long-term causes of the Great War.</p>	<p>Describe the typical conditions of a soldier in the trenches. Explain the main areas of conflict and the main features of trench warfare. Evaluate the extent trench conditions were known by the British public.</p> <p>2. Weapons Describe 4 key weapons of war Explain why the weapons used in the Great War were so deadly. Evaluate which weapons were most effective.</p> <p>3. Battle of the Somme Describe key events of the battle. Explain the two differing opinions of General Haig. Evaluate to what extent Haig should be held accountable for the battle.</p> <p>4. Shell Shock Describe the symptoms and conditions of Shell Shock. Explain how the treatment of Harry Farr could be used as a case study. Evaluate how well victims of shell shock were cared for.</p> <p>5. Armistice and Poppy Day Outline the terms of the Armistice.</p>
--	--	--	--	---	--

<p>3. Why was Charles sentenced to death? Describe the key events of the trial. Explain how judges arrived at their verdict. Evaluate whether Charles I should have been executed.</p> <p>4. Who was Oliver Cromwell? Define the role of Cromwell in a 'republic' and how the country changed. Explain key views of Puritans i.e. banning of Christmas Evaluate public reaction to the republic.</p> <p>5. Cromwell- hero or villain? Ireland can be used as a case study here. Examine why people admired and respected Cromwell. Analyse Cromwell's actions to earn a poor reputation i.e. Ireland Evaluate whether he deserves to be remembered as a saint or sinner.</p> <p>6. What happened to Cromwell? Define 'regicide'. Describe how Cromwell died. Explain how the country became a monarchy once more.</p>	<p>Explain a slave's typical daily routine. Evaluate how and why slaves resisted and reacted to harsh treatment.</p> <p>6. Abolition Describe the different factors that contributed to the abolition of slavery. Explain when both slave trading and slave ownership ended in Britain and the Empire. Prioritise the different factors that led to the abolition of slavery.</p> <p>7. Breaking the chains- how far did abolition free slaves? Describe the impact abolition had on slave communities. Explain the misconceptions that slaves were 'freed' immediately. Evaluate the links of abolition and modern slavery.</p> <p>LOCAL STUDY: Assessment COLSTON STATUE and historical interpretations</p>	<p>To analyse the main reason why the British were in Jamaica. Why was Jamaica so significant to rise and fall of the British Empire?</p> <p>5. East India Company To describe the start of British rule in India. To explain how the British Empire began to take control of India. Start to evaluate Ferguson's interpretation of BE.</p> <p>6. Indian rebellion To describe the changes of British rule in India. To explain how the British Empire began to take control of India. To challenge Ferguson's interpretation on Empire.</p> <p>7. Raj To describe success and failures of British rule in India. To evaluate British rule in India. To form your own judgement on the BE.</p>	<p>CANALS: Define what a canal is and explain why the Duke of Bridgewater built one Explain 2 reasons why 'canal mania' ended</p> <p>TRAINS: Describe what is meant by a 'locomotive' Explain the development of the railway and importance: Manchester and Liverpool could be used as a case study Evaluate how the development of the railway impacted Britain's economy</p> <p>5. Invention and Design Identify some of the achievements of Britain's great inventors, designers and scientists. Evaluate who you think deserves the title 'Greatest inventor and/or Designer'</p> <p>6. What made Victorian Britain stink? Sheffield could be used as a case study here. Describe what life was in industrial cities. Explain how the conditions had an impact on public health. Evaluate how far life had changed pre 1750.</p> <p>7. Victorian sickness</p>	<p>Explain how the assassination of Franz Ferdinand led to the outbreak of war.</p> <p>6. Conscription and propaganda Define propaganda. Explain the reasons why men chose to fight- include case study of Walter Tull here. Evaluate how the government used propaganda to attract volunteers.</p>	<p>Explain how and why 11 November is remembered today. Evaluate how the legacy WWI influences modern society.</p> <p>LOCAL STUDY: WAR MEMORIAL</p>
---	--	---	--	--	--

	Evaluate why King Charles II sought revenge after 1660.			Describe the most common diseases in the 19 th century Smallpox Cholera Typhoid TB Explain why diseases was so common at the time Evaluate government intervention Local study: Brunel Bristol		
	Cause and Consequence The actions of Charles I were the key cause of the 1642 English Civil War	Historical Interpretation- GCSE Nazi G paper style 'To what extent do you think Colston's statue should have been thrown into harbour?'	Historical Interpretation- GCSE Nazi G paper style To evaluate Niall Ferguson's view of the British Empire.	Significance 'George Stephenson was the greatest inventor of the Industrial Revolution' Do you agree? Explain with reference to two other inventors	Cause and Consequence The inadequacy of the police force was the main reason why Jack the Ripper was not caught	Significance Haig- Lion's led by donkeys

	<p>1.Post war changes tensions Medicine Society Politics Women Democracy</p> <p>2.Why were women fighting for equality Describe stereotypes of women at the time. Explain significant women in history who challenged these stereotypes. Evaluate the changes needed to be made to support women achieving equality.</p>	<p>1.Why did the USA Boom? Describe the prosperity of the 1920s. Explain how music and culture changed- were the 20s roaring for all? Evaluate the impact the boom had on economic markets worldwide.</p> <p>2.Did the USA 'boom' for everyone? Describe the impact the 20s had on immigration. Explain the perceived threat of communism.</p>	<p>1.Why did another WW break out? Describe Hitler's aims Explain the breakdown of appeasement in 1939. Evaluate the initial public reaction to war.</p> <p>2.Homefront Describe impact of evacuation, rationing, home guard etc. Explain the impact the home front had upon changing civilian life.</p>	<p>1. Who were the Jewish people of Europe before the Second World War? Define the term the Holocaust. Identify where the Jewish communities lived prior to WWII. Describe Kristallnacht and explain how Hitler's aims impacted Jewish life 1933-38 Evaluate German reaction to persecution including those from minority communities using Hans-Jurgen as a case study.</p>	<p>1.Nuclear War Describe how and why the USA joined WWII; Pearl Harbour. Explain the impact USA involvement and tension with Japan impacted the War Evaluate the impact this had upon Allied relations.</p> <p>2. Hiroshima and Nagasaki Describe the nuclear attacks. Explain the impact on civilians and tension between USA and Japan.</p>	<p>Study of 'Decades'</p> <ul style="list-style-type: none"> 1940s <p>Case Study: Why are the Windrush generation so significant? Describe who the Windrush landing in 1948. Explain the significance of the Windrush generation in rebuilding WWII economy. Evaluate the importance of the 2018 Windrush scandal.</p> <ul style="list-style-type: none"> 1950s 1960s

<p>3. Who were the suffragettes? Describe women who identified as suffragettes and why. Compare suffragettes and suffragists. Evaluate the impact of women.</p> <p>4. Why is Emily Davidson significant? Describe the events surrounding Davidson's death. Explain why some evidence is unclear. Evaluate whether Emily Davison meant to kill herself.</p> <p>3. Democracy versus dictatorship Describe the difference between a democracy and dictatorship. Explain the effect of democracy and dictatorship models to society and persecution of minority groups. Evaluate and compare country case studies of democracy and dictatorships.</p> <p>4. Why was Communism seen as a threat? Russia case study</p>	<p>Evaluate whether Sacco and Vanzetti were guilty.</p> <p>3. Prohibition Describe prohibition legislation. Explain the increase in illegal activity. Evaluate why prohibition could not be sustained.</p> <p>4. Wall Street Crash Describe the Wall Street crash. Explain the effects the crash had on the economy. Evaluate the impact of the crash worldwide.</p> <p>5. Great Depression Describe what is meant by an economic Depression. Explain how the depression changed the living conditions of Americans and African Americans . Evaluate how far rich and poor societies were affected by the Depression.</p> <p>6. The New Deal Describe the New Deal. Explain the implementation of the New Deal. Evaluate the popularity of FDR.</p>	<p>Evaluate whether there was great support or not for the home front.</p> <p>3. Dunkirk Describe the events of Dunkirk. Explain why Dunkirk could be considered a success or failure. Evaluate how opinions on Dunkirk have changed over time.</p> <p>4. Blitz Identify locations Britain experienced the most bombing and civilian Home Front roles in supporting the country including El Ekpenyon. Explain the impact the bombings had on British civilians. Compare British and German bombing i.e. London vs. Dresden.</p> <p>5. D Day Describe the events of the landings. Explain the impact eth D Day landings had on ending WWII. Evaluate why the legacy is important today.</p> <p>6. How crucial were women in WW2? Land army</p>	<p>2. Where can we find resistance in the ghettos? Describe the steps taken to establish the Warsaw Ghetto and explain how the Jewish communities were treated. Analyse interpretations on resistance in the Warsaw Ghetto. Investigate defiance at Terezin.</p> <p>3. What was 'The Final Solution'? Define the Final Solution and judge the role of the Sonderkommando. Analyse the dilemmas, choices and responses to the Holocaust. Evaluate British responses to the Holocaust</p> <p>4. What does it mean to survive the Holocaust? Investigate the challenges and opportunities survivors faced after liberation with a focus on Zigi Shipper and Leon Greenman. Evaluate the long term impact of the Holocaust on Jewish communities.</p> <p>5. Opportunities for home learning Investigate the role of Oskar Schindler in saving Jewish citizens and evaluate how far</p>	<p>Evaluate the long term effects of the nuclear bombing.</p> <p>3. Cold War Describe the origins of the Cold War Explain why the Cold War was a threat to Britain Evaluate the impact the Cold War had upon global foreign policy</p> <p>4. Vietnam war – Kent State Shooting Describe the role of conscription and public opinion to the Vietnam War using Kent State as a case study. Explain the significance of public reaction the shootings and link to public opinion at the time. Evaluate the impact of government intervention and restoration.</p> <p>5. March on Washington Describe the role of Randolph and Rustin and the campaign for 'jobs and freedom'. Explain the significance of MLK I have a dream speech Evaluate the impact the march had upon the Civil Rights Movement.</p>	<ul style="list-style-type: none"> ● 1970s ● 1980s ● 1990s ● 2000s ● 2010 <p>Each decade will be assessed through 5 consistent criteria:</p> <ul style="list-style-type: none"> ● Transport ● Entertainment ● Technology ● Work and home ● Politics and conflict <p>Each criteria will be rated in terms of significance using the 5Rs</p> <ul style="list-style-type: none"> ● Remarkable ● Remembered ● Resonant ● Resulting in change ● Revealing
---	---	--	--	---	---

<p>Describe the ideology of Communism Explain the impact of the Russian Revolution on society post war Evaluate the impact of a lasting 'Red scare'</p> <p>5. How diverse was Britain in 1919? Investigation as to why there were no Black soldiers in the Victory parade of 1919. Evaluate the role of Black soldiers in the British army in WWI.</p> <p>6. Class divide and hierarchies Describe the legacy of Victorian classes post WWI. Explain the emergence and role of Trade Unions. Evaluate how far WWI impacted class hierarchy .</p>		<p>Decoding Domestic responsibility Attitude of the government and society.</p> <p>7. How badly was Bristol affected in WW2? Bristol Blitz Response to Churchill's visit Class divide Evacuation</p> <p>LOCAL STUDY: BRISTOL BOMBINGS</p>	<p>he should remember a hero of the resistance. Investigate Jewish responses to the Holocaust (IOE resistance stories) Investigate the international response to the Rwandan genocide Investigate current anti-Semitism</p> <p>SPEAKER OPPORTUNITY</p>	<p>6. Black Power Describe the aims of Black Power. Explain the role of individuals such as Carmichael, Hamilton and Malcolm X. Evaluate the impact Black Power had upon the Civil Rights Movement.</p> <p>7. MLK vs. Malcolm X Describe the role of violent and non-violent protest. Explain the significance of the methods, leadership, and public opinion of MLK & MX. Evaluate the interpretations of contrasting impact on the Civil Rights movement.</p>	
<p>Consequence: 1919- the forgotten year of British History</p>	<p>Cause and Consequence: Explain the impact of the Great Depression on economic prosperity and living conditions in the USA</p>	<p>Historical Interpretation: How far was there Blitz Spirit?</p> <p>How far do the interpretations support the feeling of Blitz spirit in London?</p>	<p>Significance: significant attack on Jewish people 33-39</p> <p>Explain the significance of Nazi attack on Jewish communities between the years 1933-39</p>	<p>Interpretation:</p> <p>Martin Luther King had the greatest impact on the Civil Rights movement. How far do you agree?</p>	<p>Cause/ Consequence: Which decade saw the most meaningful change?</p>

The role of assessment within the curriculum:

	Work likely in ... Early Years	work likely at KS1 to	work likely at KS2 to	work likely at KS3
Chronological knowledge / understanding	<ul style="list-style-type: none"> ● Use everyday language related to time ● Order and sequence familiar events ● Describe main story settings, events and principal characters. ● Talk about past and present events in their own lives and in lives of family members. 	<ul style="list-style-type: none"> ● Develop an awareness of the past ● Use common words and phrases relating to the passing of time ● Know where all people/events studied fit into a chronological framework ● Identify similarities / differences between periods 	<ul style="list-style-type: none"> ● Continue to develop chronologically secure knowledge of history ● Establish clear narratives within and across periods studied ● Note connections, contrasts and trends over time 	<ul style="list-style-type: none"> ● Extend and deepen their chronologically secure knowledge of history and a well-informed context for further learning ● Identify significant events, make connections, draw contrasts and analyse trends within periods and over long arcs of time
Change and Continuity <i>in and between periods</i>	<ul style="list-style-type: none"> ● Look closely at similarities, differences, patterns and change ● Develop understanding of growth, decay and changes over time ● Question why things happen and give explanations ● Know about similarities and differences between themselves and others, and among families, communities and traditions 	<ul style="list-style-type: none"> ● Identify similarities / differences between ways of life at different times ● Recognise why people did things, why events happened and what happened as a result ● Make simple observations about different types of people, events, beliefs within a society 	<ul style="list-style-type: none"> ● Describe / make links between main events, situations and changes within and across different periods/societies ● Identify and give reasons for, results of, historical events, situations, changes ● Describe social, cultural, religious and ethnic diversity in Britain & the wider world 	<ul style="list-style-type: none"> ● Identify and explain change and continuity within and across periods ● Analyse / explain reasons for, and results of, historical events, situations, changes ● Understand and explain / analyse diverse experiences and ideas, beliefs, attitudes of men, women, children in past societies
Historical Vocabulary <i>e.g. empire, peasant</i>	<ul style="list-style-type: none"> ● Extend vocabulary, especially by grouping and naming, exploring 	<ul style="list-style-type: none"> ● Use a wide vocabulary of everyday historical terms 	<ul style="list-style-type: none"> ● Develop the appropriate use of historical terms 	<ul style="list-style-type: none"> ● Use historical terms and concepts in increasingly sophisticated ways

	meaning and sounds of new words.			
Historical Interpretation		<ul style="list-style-type: none"> Identify different ways in which the past is represented 	<ul style="list-style-type: none"> Understand that different versions of the past may exist, giving some reasons for this 	<ul style="list-style-type: none"> Discern how and why contrasting arguments and interpretations of the past have been constructed
Historical enquiry	<ul style="list-style-type: none"> Be curious about people and show interest in stories Answer 'how' and 'why' questions ... in response to stories or events. Explain own knowledge and understanding and asks appropriate questions. Know that information can be retrieved from books and computers Record, using marks they can interpret and explain 	<ul style="list-style-type: none"> Ask and answer questions Understand some ways we find out about the past Choose and use parts of stories and other sources to show understanding (of concepts below) 	<ul style="list-style-type: none"> Regularly address and sometimes devise historically valid questions Understand how knowledge of the past is constructed from a range of sources Construct informed responses by selecting and organising relevant historical information 	<ul style="list-style-type: none"> Pursue historically valid enquiries including some they have framed Understand how different types of sources are used rigorously to make historical claims Create relevant, structured and evidentially supported accounts
Significance of events / people	<ul style="list-style-type: none"> Recognise and describe special times or events for family or friends 	<ul style="list-style-type: none"> Talk about who was important e.g. in a simple historical account 	<ul style="list-style-type: none"> Identify historically significant people and events in situations 	<ul style="list-style-type: none"> Consider/explain the significance of events, people and developments in their context and in the present.

KS3 assessment statement

<u>Timescale</u>	<u>What</u>	<u>Purpose</u>
Annual	Year 7 exam-50 mins Year 8 exam-1 hour Year 9 exam-1 hour 15 mins	Testing knowledge, understanding and skills under exam conditions. Provides a measure of progress to date.
End of unit/teaching block	Summative assessment These are end of 'unit' assessments. They comprise a set of knowledge questions e.g. define key terms, multiple choice followed by a GCSE style exam question equating to 16 marks	Students complete the assessment under 'test' conditions. At the end students are given the opportunity to 'Go Green' and ABC (Add, build, change) before submitting Following teacher marking and individual written feedback, students are given the opportunity for further ABC with the addition of 'extend' questions to complete. Teacher input in the form of correcting common misconceptions arising from the assessment. Students reflect on learning/progress
Weekly/fortnightly	Progress quizzes (approx. 2 per unit) Linked to homework/pre-learning	Progress quizzes are peer/self-marked. Feedback takes place in the lesson through questioning and teacher correcting common misconceptions
Lesson by lesson	Assessment for learning through practice questions (differentiated essential/challenge/extend)	Class discussion and teacher targeted questioning. Formative feedback

KS4 assessment:

AQA assessment structure:

Courses based on this specification should encourage students to:

- develop and extend their knowledge and understanding of specified key events, periods, and societies in local, British, and wider world history, and of the wide diversity of human experience
- engage in historical enquiry to develop as independent learners and as critical and reflective thinkers
- develop the ability to ask relevant questions about the past, to investigate issues critically and to make valid historical claims by using a range of sources in their historical context
- develop an awareness of why people, events and developments have been accorded historical significance and how and why different interpretations have been constructed about them
- organise and communicate their historical knowledge and understanding in different ways and reach substantiated conclusions.

Section A: Period studies

The assessment will enable students to demonstrate their knowledge and understanding. Students will also apply their knowledge and understanding to second order concepts such as causation, consequence, and change. Students will also evaluate interpretations.

Section B: Wider world depth studies

The assessment will enable students to demonstrate their knowledge and understanding in relation to second order historical concepts such as causation and consequence. There will be an opportunity to demonstrate their ability to create structured analytical narrative accounts of key events. They will also be able to demonstrate their ability to understand, analyse and evaluate a range of sources.

The exams will measure how students have achieved the following assessment objectives:

- AO1: demonstrate knowledge and understanding of the key features and characteristics of the period studied.
- AO2: explain and analyse historical events and periods studied using second-order historical concepts.
- AO3: analyse, evaluate, and use sources (contemporary to the period) to make substantiated judgements, in the context of historical events studied.

- AO4: analyse, evaluate, and make substantiated judgements about interpretations (including how and why interpretations may differ) in the context of historical events studied.

KS4 assessment statement

<u>Timescale</u>	<u>What</u>	<u>Purpose</u>
Annual	Year 10 exam-Paper 2 from 2 years previous (e.g. in 2020 students sit 2018 paper) Year 11 Nov mock exam-previous year exam paper (e.g. in 2020 students sit 2019 papers 1 and 2) Year 11 March mock exam-Paper 1 from previous year (e.g. in 2020 students sat 2019 paper) Year 11 May WTM-Paper 1 and 2 (current year)	Testing knowledge, understanding and skills under exam conditions. Provides a measure of progress to date. WTM ahead of external exams
Termly/half termly End of unit/teaching block	Summative assessment Mid unit and end of tests using PPs	Students complete the assessment under 'test' conditions. At the end students are given the opportunity to 'Go Green' and ABC (Add, build, change) before submitting Following teacher marking and individual written feedback, students are given the opportunity for further ABC with the addition of 'extend' questions to complete. Teacher input in the form of correcting common misconceptions arising from the assessment. Students reflect on learning/progress
Weekly/fortnightly	Progress quizzes (one following every homework) Linked to homework/pre-learning	Progress quizzes are peer/self-marked. Feedback takes place in the lesson through questioning and teacher correcting common misconceptions
Lesson by lesson	Assessment for learning through practice questions (differentiated essential/challenge/extend)	Class discussion and teacher targeted questioning. Formative feedback

KS5 assessment:

OCR assessment structure:

The nature of the examination will require learners to demonstrate an understanding of the key historical terms and concepts relevant to the period studied.

The questions relating to the Period Study element will require learners to recall, select and deploy appropriate knowledge and communicate this clearly and effectively. Learners will be expected to demonstrate abilities to explain, assess, analyse, and consider the relationships between key features of the period studied in order to reach substantiated judgements. All responses will require judgements, and at the top level will be more analytical with judgments more effectively substantiated.

In the enquiry element the focus will be on the critical use of evidence in investigating and assessing historical questions, problems, and issues. Each provides a range of perspectives affecting individuals, societies and groups and will enable learners to analyse and evaluate different interpretations and representations of the past through contemporary perspectives.

The critical evaluation of sources will be central to this element with all marks awarded against A02.

The sources selected for examination will be a range of types of written sources, contemporary to the period. Learners' knowledge of the historical content will only be credited insofar as it is used to analyse and evaluate the sources in relation to the question set.

KS5 Assessment statement

	<p>Maya</p>
	<p>Ancient Greece</p>
	<p>Stone Age</p>
	<p>Romans</p> <ul style="list-style-type: none"> ● Ivory Bangle Lady. Body discovered in York. Remains and artefacts show African descent. ● Vindolanda. The Vindolanda tablets and artefacts found at the site show several good examples of African, Arabian and Middle-Eastern soldiers having being based at the site. ● Septimus Severus, emperor of Rome. Born in modern day Libya, died in York. ● Caracalla. Son of Septimus Severus. Proclamation of accession, as co emperor, at York. Concluded a peace treaty with the Caledonians. ● Get a. Son of Septimus Severus. Co emperor with Caracalla. Murdered in 211. ● In 1953 a skeleton was discovered of as woman of African descent at Beachy Head. Isotope analysis shows it to be from 200-250

- Human remains in York discovered in the 1950s included several of African descent.
- 83 Roman Londoners remains discovered and 2 deemed to be of African descent. They lived in the 2nd century AD.
- Tombstone of Victor the Moor
- Tombstone of Barates of Palmyra, Syria
- Burgh on Sands Roman fort. Known that North African troops were stationed here. Earliest known African settlement in the British Isles or Ireland. See David Olusoga's Black and British episode 1.
- Rogatianus, centurion. Appears in War at the Edge of the World.
- Account in official histories of Septimus Severus being handed a garland whilst at Hadrian's Wall by an Ethiopian soldier. The garland was seen as a symbol of his impending death, that an Ethiopian handed him it was noted as matter of fact, not surprising.

Local History WW2 children

UKS2 Anglo Saxons

- Abbot Hadrian of St. Peter and St. Paul's monastery in Canterbury is described by Bede as being from Amazigh. That is in Libya. <https://blogs.bl.uk/digitisedmanuscripts/2016/10/an-african-abbot-in-anglo-saxon-england.html>
- St. John style crosses originate in Coptic Egypt, Nubia and Ethiopia. They can be found in Anglo-Saxon religious texts. <https://blog.history.ac.uk/2017/08/the-anglo-saxon-era-and-the-wider-world/>
- Anglo-Saxon artefacts excavated at Dar es Salaam and Kisiju, Coastal Tanzania.
- England and Merovingian Gaul had imports that originated from Africa and India. Examples: cowrie shell, elephant ivory, pepper, incense, garnet. <https://www.caitlingreen.org/2016/05/anglo-saxon-finds-france-africa.html?m=1>
- Cowrie Shell finds at Anglo-Saxon sites
- Bitumen found in the Sutton Hoo site originates from Syria.

<https://www.bbc.co.uk/news/uk-england-suffolk-38171657>

- Anglo-Saxon book The marvels of the East refers to animals from Africa, India and the Middle East. The book is held by the British Library. <https://www.bl.uk/collection-items/the-marvels-of-the-east>

Vikings-

- Map showing Viking trade, settlement and raids. Remember that much of the Iberian peninsular was held by Moors at the time.
- Raids often resulted in people being captured for sale as Slaves. These sales took place in established and emerging ports held by the Vikings or with whom they had a working relationship. This article notes that African slaves could have been sold in the Viking port at Dublin. <https://www.tandfonline.com/doi/full/10.1080/0144039X.2019.1592976>

- Ibn Hawqal, an Arab geographer, described a Viking slave trade in 977 A.D. that extended across the Mediterranean from Spain to Egypt
- "Slavery was a very significant motivator in raiding.
Neil Price, Archaeologist
- For example, at a Swedish site called Sanda, researchers in the 1990s found a great hall surrounded by small houses. Some Swedish archaeologists now believe this could have been a Viking plantation with slaves as the labor force
 - "What you likely have is a slave-driven production of textiles," said Price. "We can't really know who is making the cloth, but the implications are clear."
 - Note: these slaves came from anywhere the Vikings raided.
- Source:<https://www.nationalgeographic.com/news/2015/12/151228-vikings-slaves-thralls-norse-scandinavia-archaeology/>
- Ahmad Ibn Fadlan, an Arab lawyer and diplomat from Baghdad who encountered the men of Scandinavia in his travels, wrote that Vikings treated their female chattel as sex slaves. If a slave died, he added, "they leave him there as food for the dogs and the birds."
- Bones are yielding new clues about the massive, mysterious Viking forces that invaded England...
- One expert says symbols for "Ali" and "Allah" were unearthed in Scandinavia, though other experts remain skeptical.
- Both lines from same article. If early Islamic artefacts were in Scandinavia it is reasonable to assume some would also be in the British Isles.
- Viking Slave trader selling a girl to a Persian buyer on the banks of the River Volga. Source and caption: National Geographic
- Life of St. Anskar notes slaves as a tradable commodity.
- The Fragmentary Annals note "Blue Men" being sold as slaves. Widely believed these are black Africans captured on raids.
- Kristen Wolf in Daily Life of the Vikings writes that Dublin was the primary slaving port of north west Europe. Including black African slaves.
- The same Viking leaders who attacked England also attacked France, Spain, Portugal and North Africa:
 - "A more successful Viking excursion to the area came 15 years later. It was led by Hastein and Björn Ironside, sons of the legendary Viking Ragnar (some sources suggest Hastein was adopted). In AD 859, they left France's Loire to sail around the Iberian Peninsula with an expedition of 62 ships. Again, they struggled against the Asturians and, in Spain, were defeated by the Muslim army of the Umayyad Caliphate of Córdoba.

- Instead of fleeing back north, the Vikings slipped through the straits, past the Pillars of Hercules and into the Mediterranean, taking Algeciras (south Spain) by surprise, sacking the town and torching the mosque. More raids followed on the shores of North Africa, where they plundered Nekor (in modern Morocco), and attacked settlements at Orihuela (south-east Spain) and the Balearic Islands.
- After spending winter in Camargue on the mouth of the River Rhone, Hastein and Björn renewed their offensive in the Rhone Valley. They sacked Narbonne, Nîmes and Arles, pushing as far north up the river as Valence, before turning their attentions to Italy. At least part of the Viking fleet travelled along the Tuscan coast, went up the River Arno and attacked Pisa and Fiesole."

Tudors and Stuarts

For example, by studying black migrants in Tudor England it is possible to gain an insight into their experiences prior to the advent of the transatlantic slave trade. including the role of women when studying the Vikings and Tudors it is possible to appreciate their role in managing estates while their husbands were away from home.

Victorians – Sarah Forbes Bonetta

Futura Languages

Curriculum Framework

Languages Curriculum Framework

Intent:

Learning a foreign language is a liberation from insularity and provides an opening to other cultures. At the Futura Learning Partnership, we aim to foster pupils' curiosity and deepen their understanding of the world. We strongly believe that languages are a skill for life, and something that pupils should enjoy and find rewarding. Through learning foreign language, students also develop literacy and oracy in their own language as well as resilience and problem-solving skills.

Language learning should provide the foundation for learning further languages. We hope to expand students' cultural knowledge whilst developing their language skills.

Through language learning, pupils gain a sound understanding of the structure of their **own** language, leading to effective communication in the foreign language. Students of all abilities can benefit from learning a foreign language, supporting and enhancing their literacy learning across the curriculum.

The Languages curriculum caters for students with varied previous language learning. It enables students to build upon prior knowledge or language learning skills.

Students are well-prepared at the end of each key stage to tackle the next steps in language learning but equally, should they choose not to continue their formal language learning, they are equipped with the skills and knowledge to use in the workplace or for leisure or to further their learning.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive concepts**

<p>Listening (comprehension)</p>	<p>To be able to listen attentively and respond to familiar spoken words and phrases.</p> <p>To identify key points in a new context and understand simple facts and opinions, with increasing complexity, in spoken sources.</p>
<p>Speaking (production)</p>	<p>To build up communication skills year on year until students are able to use spoken language, with increasingly accurate pronunciation and intonation.</p> <p>To initiate and sustain conversations on familiar topics and to describe incidents based on their own experiences.</p> <p>To be able to read aloud from a given text with good expression.</p> <p>To understand and be able to use transactional language.</p> <p>To give a description e.g of a town, geographical features in a country.</p> <p>To seek clarification of meaning.</p>
<p>Reading (comprehension)</p>	<p>To read in groups, simple playscripts, poems etc.</p> <p>To read and understand the main points and key details from a short written passage.</p> <p>To read and understand increasingly detailed texts in terms of vocabulary and structure and length.</p>
<p>Writing (production) and Grammar</p>	<p>To write sentences and construct texts first by using a model and then from memory using knowledge of words, text and structure.</p> <p>To use adjectives to add interest and detail to a description.</p> <p>To understand the basic grammar appropriate to the language being studied; verbs – begin to use the past/future tense, adverbs.</p>

	To be able to identify and manipulate tenses from a selection of sentences written in the present, past and future tense.
Independence - Using reference materials	To be able to use reference materials (eg dictionaries) in order to check, edit, improve and manipulate vocabulary.
Cultural Awareness and Understanding	To promote mutual respect for and tolerance of different cultures and those speaking other languages. To have an appreciation of the historical context of linguistic spread.

Disciplinary concepts:

It becomes obvious that Languages is distinct from other subjects because it is not a discipline, there is nothing but 'substantive knowledge' to study and learn.

Key Stage 2 – p4

Key Stage 3 – p17

Key Stage 4 – p24

Key Stage 5 – p25

Key Stage 2

Year 3:

Substantive Knowledge:

Listening	Speaking	Reading	Writing/Grammar
<p>Listen and respond to familiar spoken words and phrases.</p> <p>Use a gesture, hold up a picture to identify specific words when listening to songs, poems, simple stories.</p> <p>Recognise numbers 1-20 and begin to understand numbers from 20 – 31.</p> <p>Understand and respond to simple classroom instructions e.g. Hands up, listen carefully, show me, close your eyes, do an action.</p> <p>To take part in class/group activities</p>	<p>Communicate with others using simple words, phrases and short sentences.</p> <p>Use simple greetings e.g. saying hello and goodbye, saying how you are and asking others how they are.</p> <p>Ask and answer simple questions about self, e.g. name and age, birthday.</p> <p>Express simple likes and dislikes e.g. food and drink.</p> <p>Demonstrating a developing vocabulary</p>	<p>Recognise and understand some familiar written words and phrases in short texts.</p> <p>Read short texts and understand familiar nouns e.g. parts of the body, animals, and simple adjectives e.g. size, colour and a few high frequency verbs e.g. I like, I play. Read aloud familiar words and phrases from stories, songs and rhymes with reasonable accuracy.</p>	<p>Writing: Write some familiar simple words using a model and some from memory.</p> <p>Write one or two simple sentences, using a model e.g. name and age to introduce themselves. Label an animal or object or something drawn/made – e.g. a black cat. • Complete a simple gapped text such as a party invitation or passport. Begin to write a few familiar words from memory and know that all attempts will be valued.</p> <p>Grammar: Understand some basic grammar appropriate to the language being studied.</p> <p>Begin to recognise the correct definite/indefinite to a series of familiar nouns (e.g. fruits and vegetables) with increasing accuracy.</p>

			Use visual scaffolds to build phrases to show position of a few adjectives of colour e.g. a red dog, a yellow cat. Begin to understand how the negative is formed in the new language e.g. I don't like chocolate.
--	--	--	--

Suggested key topics or suitable scheme to cover the skills outlined above. Language Angels scheme to support.

Core Vocabulary and Phonetics to be covered once in each year group. See Language Angels – Core Vocabulary – La phonétique (4 lessons covering 18 essential sounds)

Autumn 1	Autumn 2				
Je me presente (Language Angels lessons 1-3) La phonétique (lesson 1) Les Jours (Core Vocabulary)	Les Fruits (Language Angels) A story in french: La Chenille Qui Fait des Trous Christmas	Chez Moi (Language Angels)	Numbers (11-31) A story in french: Le roi tête en l'air	Le Petit Chaperon Rouge (Language Angels)	Les couleurs and les nombres (revision) (Language Angels) Va t'en Grande Monstre vert!
An introduction to adjectival agreement in the simplest form – adding an e to the end of the adjective when talking about the female form.	A focus on nouns, gender, article/determiners and plural form. Phonics focus: ch, ou, on and oi.	Indefinite articles, negative and high frequency words. Phonics focus: è, e, é, eau, oux.	Silent letters – the s is not pronounced in many words like dans, habites, mais, bains.	Definite, indefinite and partitive articles and determiners. Phonics focus: ch, ou, on and oi	Silent letters and the guttural “R” Phonics focus: ch, ou, on and oi

Phonic focus: i in, ique
and ille
Silent letters

Key Vocabulary

Use words and phrases such as:

Je m'appelle

J'ai ans.

J'habite à.....

Comment t'appelles tu?

Çava?

Quel âge as tu?

Les numéros 1 – 31

Les couleurs: rouge, bleu, jaune, vert, orange,
violet, rose, noir, gris, marron

Jours de semaine: lundi, mardi, mercredi, jeudi,
vendredi, samedi, dimanche

Joyeux Noël

Le Père Noël

Un cadeau

Un bonhomme de neige

Le sapin

Les fruits:

Une pomme

Une poire

Une banane

Une fraise

Une pêche

Des raisins

Les mois:

janvier, février, mars, avril, mai, juin, juillet, août,
septembre, octobre, novembre, décembre.

J'aime

Je n'aime pas

J'adore

Je déteste

Je préfère

Chez moi:

J'habite, j'habite dans, chez moi il y a, chez moi il
n'y a pas

Une maison l'escalier la bibliothèque

la cave la chambre la cuisine la salle à
manger

la salle de bains la salle de jeux la salle de
séjour

le garage le grenier le salon les toilettes

Year 4:

Substantive Knowledge:

Listening	Speaking	Reading	Writing/Grammar
<p>Listen for specific phonemes, words and phrases</p> <p>Pick out phonemes, words and phrases in songs, stories, rhymes and short texts.</p> <p>Understand higher numbers including multiples of 10 e.g. in prices, dates, numeracy activities, telling the time.</p> <p>Listen to up to three simple sentences using familiar vocabulary and answer questions and English e.g. How old is Nicole?</p> <p>Respond to a wider range of classroom instructions e.g. Open the window/door, I'd like 2 volunteers, put your hand up</p>	<p>Communicate by asking and answering a wider range of questions and presenting short pieces of information</p> <p>Use a wider range of familiar nouns and adjectives to talk about themselves, animals, story characters e.g. I have brown eyes. I have two sisters and I like dancing. Ask and answer questions using a wider range of question forms e.g. the time, the date, food, hobbies and to seek help in the classroom e.g. Can you say that again please, I don't understand. Express preference about what they like e.g. food, animals, colours</p>	<p>Read and understand familiar written words, phrases and short texts made of simple sentences and pick out key words or phrases.</p> <p>Read a wider range of words, phrases and sentences aloud.</p> <p>Follow text while listening and reading at the same time.</p> <p>Understand key points in simple texts using familiar language e.g. How many animals are in the story? What colour is the dog? What is the weather like in Paris? Follow a text such as a song or poem whilst listening to it at the same time.</p> <p>With support, begin to link phrases to make a sentence e.g. When it rains, you need an umbrella.</p> <p>Use strategies to work out meaning of new words.</p>	<p>Writing:</p> <p>Write a few simple sentences using either a word bank or model to describe for example a sports star e.g. lives in London. She is 22 years old. She likes dancing. Experiment with writing new words.</p> <p>Grammar: Understand some basic grammar appropriate to the language being studied: Begin to match correctly definite/indefinite article to singular and plural familiar nouns. Place familiar adjectives e.g. size and colour in correct order. Show an understanding of 1st, 2nd and 3rd person in present tense singular e.g. ask and answer questions, Do you like cheese? Yes I like...</p>

Suggested key topics or suitable scheme to cover the skills outlined above. Language Angels scheme to support.

Core Vocabulary and Phonetics to be repeated once in each year group. See Language Angels – Core Vocabulary – La phonétique (4 lessons covering 18 essential sounds)

In addition: Year 4 will repeat the same stories from Year 3 and will innovate with additions, substitutions, alterations, change of viewpoint, demonstrating progression of knowledge in their use of adjectives, conjunctions, plurals, gender etc.

<p>Je me présente (Language Angels lessons 4-6)</p> <p>La phonétique (lesson 2)</p> <p>Quelle est la date? (Language Angels)</p>	<p>Les Legumes (Language Angels)</p> <p>A story in French: La Chenille qui fait des trous (innovated to include day, month and vegetables)</p> <p>Christmas</p>	<p>En Classe (Language Angels)</p> <p>Numbers 31-69</p>	<p>A story in french: Le Roi tête en l’air</p> <p>(innovated to include a lost item from a pencil case - discussing things the king does or does not have in his pencil case?)</p>	<p>Les Vêtements (Language Angels)</p>	<p>Revision of colours, body parts</p> <p>A story in french: Le Petit Chaperon Rouge Or Va-t’en-grand monstre vert (innovated to include different items of coloured clothing and different seasons?)</p>
<p>The 12 nouns for the months. Ordinal and cardinal numbers. Phonics focus: è, e, é, eau, eux.</p>	<p>Nouns, articles and determiners in plural form Phonics focus: ch, ou, on and oi</p>	<p>Nouns, gender, articles and use of the negative Phonics focus: i, in, ique and ille</p>	<p>Revision of silent letters.</p>	<p>Verbs, possessive adjectives, gender, definite, indefinite, partitive articles & adjectival agreement Phonics focus: : è, e, é, eau, eux.</p>	<p>Recap masculine and feminine nouns un and une. Phonics focus: e in tête, ain in main</p>

Key Vocabulary

Use words and phrases such as:

<p>Les numéros 1-69</p> <p>Les mois: janvier, février, mars, avril, mai, juin, juillet, août, septembre, octobre, novembre, décembre.</p> <p>Les saisons: L'hiver = Winter Le printemps = Spring L'été = Summer L'automne = Autumn</p> <p>La météo: Quel temps fait-il? Il pleut Il fait chaud Il fait froid Il y a du vent Il fait beau Il y a du soleil</p> <p>Joyeux Noël Le Père Noël Un cadeau Le sapin Un bonhomme de neige</p>	<p>En Classe:</p> <p>Un taille crayon Un cahier Un crayon Un bâton de colle Un stylo Un cartable Un livre Une gomme Une règle Une calculatrice Des ciseaux Une trousse</p> <p>Qu'est ce qu'il y a dans ta trousse?</p> <p>Dans ma trousse j'ai... Dans ma trousse je n'ai pas de..</p> <p>Écoutez Écrivez Répétez Silence Ouvrez vos cahiers Fermez vos cahiers Pensez Levez la main Lisez Demandez</p>	<ul style="list-style-type: none"> • La tête. • La poitrine. • La jambe. • Le bras. • Le dos. • La main. • Le pied. • Le visage <p>Les couleurs: rouge, bleu, jaune, vert, orange, violet, rose, noir, gris, marron</p> <p>Les vêtements: Un pantalon Un maillot de bain Un pull Un tee-shirt Un manteau Un short Une robe Une cravate Une écharpe Une jupe Une veste</p>
---	---	---

Year 5:

Substantive Knowledge:

Listening	Speaking	Reading	Writing/Grammar
<p>Listen attentively and understand more complex phrases.</p> <p>Identify key points in a new context e.g. a story, which contains familiar language. Understand higher numbers from 70 –100 with support e.g. in prices, numeracy activities. Follow instructions and directions e.g. a recipe or simple directions. Recognise letters of the alphabet when they hear them</p>	<p>Take part in short conversations using familiar structures and vocabulary.</p> <p>Seek help and clarification e.g. I don't understand, can you repeat that, how is that written?</p> <p>Give simple instructions and directions e.g. a recipe, directions to a place, the route to school ensuring comprehension of listeners.</p> <p>Begin to understand and express future intentions e.g. I am going swimming on Wednesday.</p> <p>Take part in conversations expressing likes, dislikes and preferences e.g. I like water but I prefer milk.</p> <p>With support refer to experiences or interests.</p>	<p>Read a variety of short simple texts in different formats and in different contexts Focus on correct pronunciation and intonation, using tone of voice and gesture to convey meaning when reading aloud. Begin to pick out a range of facts and/or opinions from a short text.</p> <p>Begin to use a dictionary or glossary to work out the meaning of unfamiliar vocabulary.</p> <p>Practise reading aloud a poem to perform in assembly demonstrating increased confidence. Read a variety of short simple texts e.g. stories, poems, texts from the Internet, non-fiction texts, emails from a partner school that contain familiar and new vocabulary.</p>	<p>Writing: Write simple sentences and short texts using a model. Use a dictionary to check the spelling of words.</p> <p>Write three or four sentences using a word/phrase bank linked to a recent area of learning such as a meal, a scene, the weather, a planet. Use simple conjunctions such as and, but, because to form more complex sentences. • Change elements in a given text e.g. ingredients, colour and size of a planet.</p> <p>Grammar: Understand some basic grammar appropriate to the language being studied: gender – masculine, feminine, neuter.</p> <p>Begin to know how to form the near future tense e.g. I am going swimming on Wednesday; tomorrow it is going to rain. Begin to see how possessive articles e.g. my, his, her change according to gender e.g. Jane is my sister.</p> <p>Understand the word order of familiar adjectives and apply correct</p>

			endings, singular and plural, with increasing accuracy.

Year 6:

Substantive Knowledge:

Listening	Speaking	Reading	Writing/Grammar
<p>Understand the main points and simple opinions in spoken sources e.g. story, song or passage.</p> <p>Listen to longer texts. NB In Y6, children should be listening to texts read by people other than their teacher.</p> <p>Understand numbers in context e.g. the year, 24 hour clock, quantities.</p>	<p>Use spoken language to initiate and sustain simple conversations on familiar topics and to describe incidents or tell stories from own experience including some opinions.</p> <p>Understand and use numbers in context e.g. saying the year, 24- hour clock, quantities. Understand and use transactional language e.g. in a café.</p> <p>Give a description e.g. of a town, geographical features in a country</p> <p>Seek clarification of meaning How is that written in French/German/Spanish? I don't understand. Can you repeat that? Can you speak more loudly/slowly?</p> <p>Talk about the past in simple terms e.g. I ate / drank ... / drunk, the weather.</p> <p>Express and justify opinions e.g. I like netball because it's fun.</p> <p>Be understood with little or no difficulty.</p>	<p>Read aloud from a text with good expression and with confidence.</p> <p>Read in groups, simple play scripts, poems, their own written work such as geographical features in a country, description of a town. Read and understand the main points and some detail from a short written passage e.g. extract from a story, weather report, poem, instructional texts or simple newspaper article.</p> <p>Use the context of a sentence or translation dictionary to work out the meaning of new words.</p>	<p>Writing: Write sentences and construct short texts using a model. Write a few sentences from memory, using knowledge of words, text and structure. Use dictionaries to check spelling of words.</p> <p>Use adjectives to add interest and detail to a description. Use some simple adverbs to make sentences more interesting. Make statements about what they read e.g. about sections in a newspaper (weather, what's on TV) a story, an email.</p> <p>Use knowledge of grammar to enhance or change the meaning of phrases.</p> <p>Grammar: Understand some basic grammar appropriate to the language being studied: verbs –begin to use the past tense, reinforce understanding of future tense. Adverbs Begin to use past tense/future tense in spoken work e.g. when giving a</p>

			<p>weather report, when describing what they had to eat that day/what they are going to eat.</p> <p>Identify tenses from a selection of sentences written in the present, past and future tense</p>
--	--	--	---

Suggested key topics or suitable scheme to cover the skills outlined above e.g. Salut Sophie or Language Angels

Core Vocabulary and Phonetics to be repeated once in each year group. See Language Angels – Core Vocabulary – La phonétique (4 lessons covering 18 essential sounds)

In addition, Year 6 will repeat the same stories from Year 5 and will innovate with additions, substitutions, alterations, change of viewpoint, demonstrating progression of knowledge in their use of adjectives, conjunctions, plurals, gender etc.

<p>La phonétique (lesson 3)</p> <p>As tu un Animal? (Language Angels)</p>	<p>A story in French: Les Trois Cabris (innovated for pets)</p> <p>St. Nicholas & French Christmas traditions.</p>	<p>Revision of Likes and dislikes Giving opinions Sports and activities</p> <p>Manger et Bouger (Language Angels)</p>	<p>A story in French: Antoine le paresseux (innovated for healthy foods and activities)</p>	<p>Moi dans le monde (Language Angels)</p>	<p>French story: La pièce perdue (To be innovated to search countries and cities)</p>

<p>Indefinite articles, high frequency verbs & negative.</p> <p>Phonics focus: é, e, è, eau, eux</p>		<p>First person singular conjugation of high frequency verbs, use of the negative & imperative instructions</p> <p>Phonics focus: qu, ç, gne, en, an</p>		<p>Verbs and near future tense</p> <p>Phonics focus: qu, ç, gne, en, an</p>	<p>Revision of prepositions</p>
---	--	---	--	--	---------------------------------

Key Vocabulary

Use words and phrases such as: All of the vocabulary from previous years to revise in preparation for transition to KS3.
 Revisit La phonétique to ensure the 18 key sounds are secure before moving onto Y7

Key Stage 3

Year 7:

Substantive Knowledge:

Listening	Speaking	Reading	Writing
<p>Recognise familiar key words in familiar contexts in sentences. Understand familiar grammar.</p>	<p>Use familiar vocabulary Vary speaking frames or models. Respond with short phrases. Copy phrases. Reproduce pronunciation of letter strings and accents. Be aware of intonation and use it to distinguish between questions and responses. Use linking words to extend sentences. Apply familiar grammatical rules in guided tasks.</p>	<p>Understand familiar words in short passages. Identify which words need to be checked in a dictionary. Use dictionary to find meaning of individual words. Understand familiar grammar</p>	<p>Reproduce spelling. Vary writing frames or models. Use linking words to extend sentences. Use familiar vocabulary. Apply familiar grammatical rules in guided tasks. Use a dictionary to vary vocabulary (nouns)</p>

Suggested key topics or suitable scheme that covers skills outlined above:

Suggested key topics or suitable scheme that covers skills outlined above	Additional suggested topics
<ul style="list-style-type: none"> • French Phonics and French Alphabet • School subjects • Time • Likes and Dislikes with reasons • School Equipment 	<ul style="list-style-type: none"> • Countries and Nationalities • New Year’s Resolutions • Technology • Physical Descriptions of people • Characteristics and Personality

- Numbers
- Dates
- Colours
- Christmas
- Places in Town

- House
- Bedroom

Suggested grammar content by end of Yr 7

- subject pronouns
- indefinite article
- use of numbers for age and date
- definite article
- avoir
- adjectival agreement – m, f, pl
- possessives, mon, ma, mes
- plural nouns
- être
- present tense 'er' verbs
- il y a & c'est
- asking questions
- difference tu / vous
- opinions
- imperative via classroom commands
- intensifiers
- conjunctions
- faire
- finite verb + infinitive – combining verbs
- aller + infinitive for near future

- aimer + infinitive

Year 8:

Substantive Knowledge:

Listening	Speaking	Reading	Writing
Recognise familiar key words and structures in familiar contexts in short passages across a range of topics. Understand familiar grammar.	Reproduce pronunciation of letter strings, accents and other characters in unfamiliar, common vocabulary. Use intonation to express mood. Vary speaking frames or models. Use range of linking words to extend sentences giving opinions and reasons. Produce short phrases across a range of topics, using familiar structures.	Recognise familiar key words and structures in familiar contexts in short passages across a range of topics. Begin to deduce meaning of unfamiliar words using context. Use glossaries, for new vocabulary.	Use familiar words, phrases and structures to produce short passage. Vary writing frames or models. Use range of linking words to extend sentences giving opinions and reasons. Use glossaries independently.

Suggested key topics or suitable scheme that covers skills outlined above:

Suggested key topics or suitable scheme that covers skills outlined above	Additional suggested topics
<ul style="list-style-type: none"> • Daily Routine • Time • Family • Getting along with people • Physical Descriptions of people • Characteristics and Personality • Weather 	<ul style="list-style-type: none"> • Christmas Shopping • New Year's Resolutions • House • Bedroom • Leisure & TV • Going out

- Countries
- Holidays
- Food
- Cafe and Restaurant

Suggested grammar content by end of Yr 8

- reflexive verbs
- using –er verbs
- the negative
- masculine and feminine nouns
- Être and avoir
- depuis+ present tense
- aller
- faire
- complex sentences
- -ir verbs
- -re verbs
- perfect tense with avoir & être
- irregular past participles
- c'était
- à + place
- vouloir
- modal verbs
- pouvoir
- devoir
- negative with modals
- adjectival position
- ce/cette/ces

- near future
- comparative & superlative
- using definite article after aimer
- using partitive article
- il faut + infinitive
- de with quantities
- dialogues
- prepositions à and en
- question words
- opinions
- asking open questions
- perfect tense practice
- comparative adjectives
- ne.... jamais
- varied adjectives
- near future
- conditional mood

Year 9:

Substantive Knowledge:

Listening	Speaking	Reading	Writing
<p>Understand familiar words in new contexts and the gist of longer passages across a range of topics.</p> <p>Deduce meaning of unfamiliar words using context as a matter of course.</p> <p>Understand familiar grammar.</p>	<p>Maintain pronunciation of letter strings, accents and other characters in extended speaking.</p> <p>Use intonation to express meaning.</p> <p>Vary and extend speaking frames or models.</p> <p>Use wide range of linking words to extend sentences, give opinions and justified reasons.</p> <p>Use familiar vocabulary in a variety of contexts across a range of topics.</p> <p>Apply familiar grammatical rules in guided tasks.</p>	<p>Understand familiar words in new contexts and the gist of longer passages across a range of topics.</p> <p>Use knowledge of word families and affixes to deduce meaning of unfamiliar words using context.</p> <p>Use dictionary independently to find meaning of individual words.</p> <p>Understand familiar grammar.</p>	<p>Vary and extend writing frames or models to produce extended passages.</p> <p>Use wide range of linking words to extend sentences, give opinions and justified reasons.</p> <p>Use familiar vocabulary in a variety of contexts across a range of topics.</p> <p>Apply familiar grammatical rules in guided tasks.</p> <p>Use a dictionary independently</p>

- infinitives to mean ‘-ing’

Key Stage 4

Year 10 &11

Substantive Knowledge:

AO1: Listening – understand and respond to different types of spoken language.	AO2: Speaking – communicate and interact effectively in speech.	AO3: Reading – understand and respond to different types of written language.	AO4: Writing – communicate in writing.
<p>Understand familiar words in new contexts and process longer passages with an increasing level of detail across a range of topics within the themes.</p> <p>Deduce meaning of unfamiliar words using context as a matter of course.</p> <p>Understand familiar grammar and tenses and how these alter meaning and understanding.</p> <p>Develop their ability to understand clearly articulated, standard speech at near normal speed.</p>	<p>Maintain pronunciation of letter strings, accents and other characters in extended speaking.</p> <p>Use intonation to express meaning. Vary and extend speaking frames or models, with a variety of tenses.</p> <p>Use wide range of linking words to extend sentences, give opinions and justified reasons.</p> <p>Use familiar vocabulary in a variety of contexts across a range of topics.</p> <p>Apply familiar grammatical rules in guided tasks, including a variety of tenses.</p>	<p>Understand familiar words in new contexts and process longer passages across a range of topics with increasing accuracy.</p> <p>Use knowledge of word families and affixes to deduce meaning of unfamiliar words using context.</p> <p>Use dictionary independently to find meaning of individual words.</p> <p>Understand familiar grammar, including a variety of tenses.</p> <p>Acquire new knowledge, skills and ways of thinking through the ability to understand and respond to</p>	<p>Vary and extend writing frames or models to produce extended passages with increasing accuracy.</p> <p>Use wide range of linking words to extend sentences, give opinions and justified reasons.</p> <p>Use familiar vocabulary in a variety of contexts across a range of topics.</p> <p>Apply familiar grammatical rules in guided tasks, including a variety of tenses.</p> <p>Use a dictionary independently.</p> <p>Develop ability to communicate confidently and coherently with</p>

	Develop ability to communicate confidently and coherently with native speakers, conveying what they want to say with increasing accuracy.	authentic written material, adapted and abridged, as appropriate, including literary texts.	native speakers in written form, conveying what they want to say with increasing accuracy.
--	---	---	--

KS4 Specification Topics, applying the above substantive knowledge

Following the AQA specification for GCSE French <https://www.aqa.org.uk/subjects/languages/gcse/french-8658>

This will enable students at KS4 to:

- develop their ability to communicate confidently and coherently with native speakers in speech and writing, conveying what they want to say with increasing accuracy
- express and develop thoughts and ideas spontaneously and fluently
- listen to and understand clearly articulated, standard speech at near normal speed
- deepen their knowledge about how language works and enrich their vocabulary to increase their independent use and understanding of extended language in a range of contexts
- acquire new knowledge, skills and ways of thinking through the ability to understand and respond to authentic spoken and written material, adapted and abridged, as appropriate, including literary texts
- develop awareness and understanding of the culture and identity of the countries and communities where French is spoken
- make appropriate links to other areas of the curriculum to enable bilingual and deeper learning, where the language may become a medium for constructing and applying knowledge
- develop language learning skills both for immediate use and prepare them for further language study in school, higher education or employment
- develop language strategies, including repair strategies

Yr 10	Term 1: Identity and Culture	Term 2: Identity and Culture	Term 3: Identity and culture	Term 4: Identity and Culture	Term 5: Local, national, international and global areas of interest	Term 6: Local, national, international and global areas of interest
	Me, my family & friends - relationships with family and friends - Marriage/partnership Assessment – Listening/Reading (week 7)	Technology in everyday life - Social media - Mobile technology Assessment – Listening/Reading & Writing (week 15)	Free-time activities - Music - Cinema and TV - Food and eating out - Sport Assessment – Listening/Reading & Writing (week 22)	Customs and Festivals Assessment – Speaking (week 27)	Home, town, neighbourhood and region	Social issues - Charity/voluntary work - Healthy/unhealthy living Assessment – Internal exam – Listening, reading & writing (week 35) Internal speaking exam (week 38)
Yr 10 Grammar Content	Reflexive verbs Direct object pronouns The future tenses	Present tense of regular and irregular verbs	Perfect tense Developing sentences Demonstrative pronouns Pronouns y & en	Reflexive verbs in the perfect tense Perfect infinitive Imperfect tense	Negatives Conditional mood Possessive pronouns	Vouloir que+subjunctive Imperfect tense

	Global issues - Environment - Poverty/homelessness Assessment – Writing (week 7)	Travel and Tourism Assessment – Internal exam (weeks 11&12)	My studies, life at school & college Assessment – Internal speaking exam (week 19)	Education post 16, jobs, career choice & ambitions Assessment – Ebacc internal exams (week 23). Exam prep, focus on speaking		
Yr 11 Grammar	Si + present Verbs of possibility	Revision of three tenses	Modal verbs Perfect Tense	Quand + future tense		

Content	Subjunctive Pluperfect tense (higher)		Conditional Mood	Passive voice in present tense Avoiding the passive voice		
----------------	--	--	------------------	--	--	--

Key Stage 5

Key Stage 5 – Statement

The KS5 curriculum is based on the AQA A Level specification. The curriculum has been designed using stimulating content to enable students to develop their linguistic skills alongside their understanding of the culture and society of countries where the target language is spoken.

Students study technological and social change, looking at diversity and the benefits it brings. They will study highlights of target language-speaking artistic culture, including music and cinema, and learn about political engagement and who wields political power in the target language-speaking world.

Students also explore the influence of the past on present-day target language-speaking communities. Throughout their studies, they will learn the language in the context of target language-speaking countries and the issues and influences which have shaped them. Students will study texts and film and have the opportunity to carry out independent research on an area of their choice.

Assessment tasks will be varied and cover listening, speaking, reading and writing skills

Year 12&13

Substantive Knowledge:

A01	A02	A03	A04
Understand and respond: <ul style="list-style-type: none"> in speech to spoken language including face-to-face interaction in writing to spoken language drawn from a variety of sources 	Understand and respond: <ul style="list-style-type: none"> in speech to written language drawn from a variety of sources in writing to written language drawn from a variety of sources. 	Manipulate the language accurately, in spoken and written forms, using a range of lexis and structure.	Show knowledge and understanding of, and respond critically and analytically to, different aspects of the culture and society of countries/communities where the language is spoken.

Internal Assessment	
Progress checks	Termly
Yr 12 Internal Exams	Yr12 Term 6
Yr 13 Internal Exams	Yr13 Term 3

French KS5 Specification Topics - applying the above substantive knowledge

Following the AQA specification for A-Level French <https://www.aqa.org.uk/subjects/languages/as-and-a-level/french-7652>

Social issues and trends

Aspects of French-speaking society: current trends

- **La famille en voie de changement (TB unit 1)**
 - Grands-parents, parents et enfants – soucis et problèmes
 - Monoparentalité, homoparentalité, familles recomposées
 - La vie de couple – nouvelles tendances
- **La « cyber-société » (TB unit 2)**
 - Qui sont les cybernautes ?
 - Comment la technologie facilite la vie quotidienne
 - Quels dangers la « cyber-société » pose-t-elle ?
- **Le rôle du bénévolat (TB unit 3)**
 - Qui sont et que font les bénévoles ?

- Le bénévolat – quelle valeur pour ceux qui sont aidés ?
- Le bénévolat – quelle valeur pour ceux qui aident ?

Aspects of French-speaking society: current issues

- **Les aspects positifs d'une société diverse (TB unit 7)**
 - L'enrichissement dû à la mixité ethnique
 - Diversité, tolérance et respect
 - Diversité – un apprentissage pour la vie
- **Quelle vie pour les marginalisés ? (TB unit 8)**
 - Qui sont les marginalisés ?
 - Quelle aide pour les marginalisés ?
 - Quelles attitudes envers les marginalisés ?
- **Comment on traite les criminels (TB unit 9)**
 - Quelles attitudes envers la criminalité ?
 - La prison – échec ou succès ?
 - D'autres sanctions

Political and artistic culture

Artistic culture in the French-speaking world

- **Une culture fière de son patrimoine culturel (TB unit 4)**
 - Le patrimoine sur le plan national, régional et local
 - Comment le patrimoine reflète la culture
 - Le patrimoine et le tourisme
- **La musique francophone contemporaine (TB unit 5)**

- La diversité de la musique francophone contemporaine
- Qui écoute et apprécie cette musique ?
- Comment sauvegarder cette musique ?
- **Cinéma – le septième art (TB unit 6)**
 - Pourquoi le septième art ?
 - Le cinéma – une passion nationale ?
 - Evolution du cinéma – les grandes lignes

Aspects of political life in the French-speaking world

- **Les ados, le droit de vote et l'engagement politique (TB unit 10)**
 - Pour ou contre le droit de vote ?
 - Les ados et l'engagement politique – motivés ou démotivés ?
 - Quel avenir pour la politique ?
- **Manifestations, grèves – à qui le pouvoir ? (TB unit 11)**
 - Le pouvoir des syndicats
 - Manifestations et grèves – sont-elles efficaces ?
 - Attitudes différentes envers ces tensions politiques
- **La politique et l'immigration (TB unit 12)**
 - Solutions politiques à la question de l'immigration
 - L'immigration et les partis politiques
 - L'engagement politique chez les immigrés

Works

- Film “Au Revoir les Enfants” and/or “La Haine”

- PLUS BOOK “No et moi”

Planning

Phases of learning – year 12

Phase 1

For the first two years of teaching new specification, students will need to gain new skills, different from GCSE. We recommend these teaching steps:

- separate writing and speaking from memorising and learning by heart
- grammar learning for writing and speaking
- grammar programme links with the new specification thematic aspects

Phase 2

Introduction to reading and listening skills developed through theme-related texts and materials. There is also study of either a film or a book.

Framework for developing:

- vocabulary
- comprehension skills, including summary-writing
- essay-writing skills in the context of the chosen work
- speaking skills
- translation skills, both from and into the target language.

Phase 3

- Focus on film and book study.
- Exam skills

Phases of learning – year 13

Phases 1 and 2

Practice in:

- speaking
- comprehension skills
- transfer of meaning skills linked to the themes in the second year programme.

Phase 3

Teaching-time devoted to the independent research carried out by the students. The research task is a significant part of speaking assessment.

Phase 4

Intensive practice of assessment and exam skills and tasks.

Year 12

Time	Phase	Content
September – October	Phase 1: intensive grammar programme linked to thematic content.	<ul style="list-style-type: none">• Aspects of French-speaking society: current trends.• Artistic culture in the French-speaking world.
November – Easter	Phase 2: development of all skills through theme-linked teaching and learning.	<ul style="list-style-type: none">• Aspects of French-speaking society: current trends• Artistic culture in the French-speaking world.• Chosen film or book.
Easter – end of year	Phase 3b: teaching on film or book to meet A-level requirements. Developing skills in speaking, essay writing, listening, reading, summary writing and translation into and from target language.	Study skills required for independent research and the development of an independent research action plan ☑ setting targets, milestones and deadlines for the Summer holiday and beyond.

Year 13

Time	Phase	Content
September – October	Phase 1: development of skills in the two theme areas of year 13. Intensive first phase of teaching and learning for the second work.	<ul style="list-style-type: none">Aspects of French-speaking society: current issues and aspects of political life in the French-speaking world.Study of second work.
October – December	Phase 2: as for phase 1 with less time spent on the 2nd work and more time spent on social issues.	<ul style="list-style-type: none">Aspects of French-speaking society: current issues and aspects of political life in the French-speaking world.Study of second work.
January – March	Phase 3: phase 1 and 2 continued. Content and skills practice with independent research (ie outcomes are shared with teacher, planning and preparation for speaking).	The content and skills aspects of the A-level course are now completed.
March – study leave	Phase 4: intensive and comprehensive exam preparation.	All skills targeted on a timely basis according to the needs and priorities of the schedule of the exams.

Assessment

Time allocated to the various demands of the course reflects the weightings given to the different assessments or examinations. Assessment has been divided into 3 main areas for the A-level course:

A-level:

1. Essay writing skills and the study of 2 works (film + book) - 20%
2. All other skills - 80% (including the research project)
3. Time needed to support and oversee independent research project for the speaking assessment

Assessment of cultural knowledge

Students will not be expected to rely on any particular cultural knowledge in comprehension tasks. However, they are assessed on some new features in the listening and reading, such as summary writing and a return to quality of language.

In the speaking test (AO4) students demonstrate what they know of the culture and society whose language they have studied. In the essays on films and books, they will be assessed on the knowledge of the films and books as AO4. Sub-themes and their aspects provide a framework for developing and extending lexical and grammatical knowledge.

German KS5 Specification Topics – applying the above substantive knowledge

Following the AQA specification for A-Level German: <https://www.aqa.org.uk/subjects/languages/as-and-a-level/german-7662>

Social issues and trends

Aspects of German-speaking society

- **Familie im Wandel (TB unit 1)**
 - Beziehungen innerhalb der Familie
 - Partnerschaft und Ehe
 - Verschiedene Familienformen
- **Die digitale Welt (TB unit 2)**
 - Das Internet
 - Soziale Netzwerke
 - Die Digitalisierung der Gesellschaft
- **Jugendkultur: Mode, Musik und Fernsehen (TB unit 3)**
 - Mode und Image
 - Die Bedeutung der Musik für Jugendliche

- Die Rolle des Fernsehens

Multiculturalism in German-speaking society

- **Einwanderung (TB unit 7)**
 - Die Gründe für Migration
 - Vor- und Nachteile der Einwanderung
 - Migrationspolitik
- **Integration (TB unit 8)**
 - Maßnahmen zur Integration
 - Hindernisse für die Integration
 - Die Erfahrungen verschiedener Migrantengruppen
- **Rassismus (TB unit 9)**
 - Die Opfer des Rassismus
 - Die Ursprünge des Rassismus
 - Der Kampf gegen Rassismus

Political and artistic culture

Artistic culture in the German-speaking world

- **Feste und Traditionen (TB unit 4)**
 - Feste und Traditionen – ihre Wurzeln und Ursprünge
 - Feste und Traditionen – ihre soziale und wirtschaftliche Bedeutung heute
 - Vielfältige Feste und Traditionen in verschiedenen Regionen
- **Kunst und Architektur (TB unit 5)**
 - Künstler und Architekten

- Kunst und Architektur im Alltag
- Kunst und Architektur – Vergangenheit, Gegenwart, Zukunft
- **Das Berliner Kulturleben damals und heute (TB unit 6)**
 - Berlin – geprägt durch seine Geschichte
 - Theater, Musik und Museen in Berlin
 - Die Vielfalt innerhalb der Bevölkerung Berlins

Aspects of political life in the German-speaking world

- **Deutschland und die Europäische Union (TB unit 10)**
 - Die Rolle Deutschlands in Europa
 - Vor- und Nachteile der EU für Deutschland
 - Die Auswirkungen der EU-Erweiterung auf Deutschland
- **Die Politik und die Jugend (TB unit 11)**
 - Politisches Engagement Jugendlicher
 - Schwerpunkte der Jugendpolitik
 - Werte und Ideale
- **Die Wiedervereinigung und ihre Folgen (TB unit 12)**
 - Friedliche Revolution in der DDR
 - Die Wiedervereinigung – Wunsch und Wirklichkeit
 - Alte und neue Bundesländer – Kultur und Identität

Works

- Film “Good Bye, Lenin!”

- PLUS BOOK “der Vorleser”

Planning

Phases of learning – year 12

Phase 1

For the first two years of teaching new specification, students will need to gain new skills, different from GCSE. We recommend these teaching steps:

- separate writing and speaking from memorising and learning by heart
- grammar learning for writing and speaking
- grammar programme links with the new specification thematic aspects

Phase 2

Introduction to reading and listening skills developed through theme-related texts and materials. There is also study of either a film or a book.

Framework for developing:

- vocabulary
- comprehension skills, including summary-writing
- essay-writing skills in the context of the chosen work
- speaking skills
- translation skills, both from and into the target language.

Phase 3

- Focus on film and book study.
- Exam skills

Phases of learning – year 13

Phases 1 and 2

Practice in:

- speaking
- comprehension skills
- transfer of meaning skills linked to the themes in the second year programme.

Phase 3

Teaching-time devoted to the independent research carried out by the students. The research task is a significant part of speaking assessment.

Phase 4

Intensive practice of assessment and exam skills and tasks.

Year 12

Time	Phase	Content
September – October	Phase 1: intensive grammar programme linked to thematic content.	<ul style="list-style-type: none"> • Aspects of German-speaking society
November – Easter	Phase 2: development of all skills through theme-linked teaching and learning.	<ul style="list-style-type: none"> • Aspects of German-speaking society • Artistic culture in the German-speaking world. • Chosen film or book.
Easter – end of year	Phase 3b: teaching on film or book to meet A-level requirements. Developing skills in speaking, essay writing, listening, reading, summary writing and translation into and from target language.	Study skills required for independent research and the development of an independent research action plan ☑ setting targets, milestones and deadlines for the Summer holiday and beyond.

Year 13

Time	Phase	Content
September – October	Phase 1: development of skills in the two theme areas of year 13. Intensive first phase of teaching and learning for the second work.	<ul style="list-style-type: none"> • Multiculturalism in German-speaking society. • Study of second work.

Time	Phase	Content
October – December	Phase 2: as for phase 1 with less time spent on the 2nd work	<ul style="list-style-type: none"> • Multi-culturalism in German-speaking society. • Study of second work.
January – March	Phase 3: phase 1 and 2 continued. Content and skills practice with independent research (ie outcomes are shared with teacher, planning and preparation for speaking).	<ul style="list-style-type: none"> • Aspects of political life in the German-speaking world <p>The content and skills aspects of the A-level course are now completed.</p>
March – study leave	Phase 4: intensive and comprehensive exam preparation.	All skills targeted on a timely basis according to the needs and priorities of the schedule of the exams.

Assessment

Time allocated to the various demands of the course reflects the weightings given to the different assessments or examinations. Assessment has been divided into 3 main areas for the A-level course:

A-level:

4. Essay writing skills and the study of 2 works (film + book) - 20%
5. All other skills - 80% (including the research project)
6. Time needed to support and oversee independent research project for the speaking assessment

Assessment of cultural knowledge

Students will not be expected to rely on any particular cultural knowledge in comprehension tasks. However, they are assessed on some new features in the listening and reading, such as summary writing and a return to quality of language.

In the speaking test (AO4) students demonstrate what they know of the culture and society whose language they have studied. In the essays on films and books, they will be assessed on the knowledge of the films and books as AO4. Sub-themes and their aspects provide a framework for developing and extending lexical and grammatical knowledge.

Futura Maths

Curriculum Framework

Maths Curriculum Framework

Intent:

Our long-term aim is to produce an ambitious, engaging, connected curriculum accessible to all pupils in the Futura Learning Partnership. Pupils will make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems.

The intent of our mathematics curriculum is to design a curriculum, which is accessible to all and will maximise the development of every child's ability and academic achievement and preparation for their journey into the wider world. We aim to deliver lessons that are creative and engaging. We intend for our pupils to be able to apply their mathematical knowledge across the curriculum. Pupils who grasp concepts rapidly should be challenged through being offered rich and sophisticated problems before any acceleration through new content.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims:

Underpinning the intent are the following **key substantive and disciplinary concepts**:

Contents

Year	Number	Algebra	Shape and Measure	Data	Ratio and Proportion
EYFS	Page 2	N/A	Page 10	N/A	N/A
1	Page 2	N/A	Page 10	N/A	N/A
2	Page 2	N/A	Page 10	Page 15	N/A

Appendix at end of document

- EYFS to Yr6 yearly plan
- KS3 and KS4 calendar of dates for 2021-22

Number	Substantive knowledge
EYFS	<i>For disciplinary knowledge: See 'White Rose' small steps</i>
	<p>Mathematics ELG: Number Children at the expected level of development will: - Have a deep understanding of number to 10, including the composition of each number; 14 - Subitise (recognise quantities without counting) up to 5; - Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts. ELG: Numerical Patterns Children at the expected level of development will: - Verbally count beyond 20, recognising the pattern of the counting system; - Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity; - Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.</p>
Year 1	<i>For disciplinary knowledge: See 'White Rose' small steps</i>
<p>PV</p> <ul style="list-style-type: none"> Count to 10 forward & backwards from any given number. Count, read, write numerals to 10 in words & numerals. Given a number, count 1 more or 1 less. Use objects and pictures to represent numbers. Use language of equal to, more than, less than Read & write numbers to 100 in numerals. <p>Addition and subtraction</p> <ul style="list-style-type: none"> Represent and use number bonds and related facts within 10. Read & interpret mathematical statements involving +, - and = signs. Add & subtract 1-digit numbers to 10, including zero. Solve one-step problems using CPA. Missing number problems. <p>Multiplication and division</p> <ul style="list-style-type: none"> Solve one-step problems by calculating the answer, using concrete resources and arrays with teacher support (Summer) <p>Fractions</p> <ul style="list-style-type: none"> Recognise, find and name a half as one of two equal parts of an object, shape or quantity. Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity. 	
Year 2	<i>For disciplinary knowledge: See 'White Rose' small steps</i>
<p>PV</p> <ul style="list-style-type: none"> Count in steps of 2, 3 and 5 from 0, and in tens from any number, forwards and backwards. Read and write numbers to at least 100 in numerals and words. Identify, represent and estimate numbers using different representations, including a number line. Recognise the place value of each digit in a two-digit number (tens and ones) Compare and order numbers from 0 – 100 using < .> and = signs. Use place value and number facts to solve problems. Recall and use addition and subtraction facts to 20. Derive and use related facts up to 100. Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot. Recognise and use the inverse relationship between + and -, using this to check calculations and missing number. <p>Four operations</p>	

- Add and subtract numbers using concrete and pictorial and mentally, including: a two-digit number and ones, a two digit number and tens, two two-digit numbers and adding three one-digit numbers.
- Solve problems with addition and subtraction: using concrete and pictorial representations, including those involving quantities and measure.
- Applying their increasing knowledge of mental and written methods.
- Recall and use multiplication and division facts for 2, 5 and 10 multiplication tables, including recognising odd and even numbers
- Show that multiplication of two numbers can be done in any order (**commutative**) and division of one number by another cannot.
- Calculate mathematical statements for multiplication and division within the multiplication tables and write them using x and ÷ and = signs.
- Solve problems involving multiplication and division, using arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.

Fractions

- Recognise, find, name and write fractions $\frac{1}{2}$, $\frac{1}{4}$, $\frac{2}{4}$, $\frac{3}{4}$ of a length, shape, set of objects or quantity.
- Recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$.
- Write simple fractions for example $\frac{1}{2}$ of 6 = 3.

Year 3

For disciplinary knowledge: See 'White Rose' small steps

PV

- Count from 0 in multiples of 4,8, 50 & 100
- Find 10 or 100 more or less than a given number
- Identify, represent & estimate numbers using different representations
- Read & write numbers up to 1000 in numerals and in word
- Recognise the place value of each digit in a three-digit number (hundreds, tens, ones).
- Solve number problems & practical problems involving these ideas

Addition and subtraction

- Estimate the answer to a calculation and use inverse operations to check answers.
- Add and subtract numbers mentally, including a three-digit number & ones; A three-digit number and tens; a three-digit number and hundreds
- Add and subtract numbers with up to three digits, using formal written methods or columnar addition & subtraction
- Solve problems including missing number problems, using number facts, place value, and more complex addition and subtraction

Multiplication and division

- Recall & use multiplication & division facts for the 3,4 & 8 multiplication tables
- Write & calculate mathematical statements for multiplication & division using the multiplication tables that they know including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.
- Solve problems, including missing number problems, involving multiplication & division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects

Fractions

- Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit number of quantities by 10
- Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.
- Recognise and use fractions as numbers; unit fractions and non-unit fractions with small denominators

- Recognise and show using diagrams, equivalent fractions with small denominators
- Compare and order unit fractions, and fractions with the same denominators
- Add and subtract fractions with the same denominator within one whole (e.g. $5/7 + 1/7 = 6/7$)
- Solve problems that involve all of the above

Year 4

For disciplinary knowledge: See 'White Rose' small steps

PV

- Count in multiples of 6,7,9,25 &1000
- Count backwards through zero to include negative numbers
- Identify, represent & estimate numbers using different representations
- Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value
- Find 100 more or less than a given number
- Recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, & ones)
- Order & compare numbers beyond 1000
- Round any number to the nearest 10, 100 or 1000
- Solve number & practical problems that involve all of the above and with increasingly large positive numbers.

Addition and subtraction

- Estimate & use inverse operations to check answer to a calculation
- Add & subtract numbers with up to 4 digits using the formal written method or columnar addition & subtraction where appropriate
- Solve addition & subtraction two-step problems in contexts deciding which operations & methods to use and why

Multiplication and division

- Recall multiplication & division facts for the multiplication tables up to 12 x 12
- Use place value know & derived facts to multiply and divide mentally, including multiplying by 0 and 1; dividing by 1; multiplying together three numbers
- Recognise and use factor pairs and commutativity in mental calculations
- Multiply two-digit & three-digit number by a one-digit number using formal written layout
- Solve problems involving multiplying & adding, including using the distributive law to multiply two digit by one digit, integer scaling problems and harder correspondence problems such as n objective are connected to m objects
- Count up & down in hundredths; recognise that hundredth arise when dividing an objective by one hundredths & dividing tenths by ten.
- Recognise and show, using diagrams, families of common equivalent fractions
- Add & subtract fractions with the same denominator

Fractions

- Recognise & write decimal equivalent of any number of tenths or hundredths
- Recognise & write decimal equivalents to $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$
- Round decimals with one decimal place to the nearest whole number
- Compare numbers with the same number of decimal places up to two decimal places
- Find the effects of dividing a one or two-digit number by 10 and 100

- Identifying the value of the digits in the answer as ones, tenths and hundredths
- Solve simple measure & money problems involving fractions & decimals to two decimal places.

Year 5

For disciplinary knowledge: See 'White Rose' small steps

PV

- Compare numbers to at least 1,000,000
- Count forwards or backwards in multiples of 10.
- Interpret negative numbers in context.
- Round numbers up to 1,000,000 to nearest 10, 100, 1,000, 10,000, 100,000
- Read Roman numerals up to 1000

Addition and subtraction

- Add and subtract numbers mentally.
- Add and subtract whole numbers with more than 4 digits.
- Solve addition and subtraction multi step problems in context.

Multiplication and division

- Multiply and divide numbers by 10, 100 and 1000.
- Identify all multiples and factors of a number, including factor pairs.
- Recognise and use squared and cubed numbers.
- Use multiples, squares and cubes to solve problems involving multiplication and division.
- Know and use the vocabulary of prime numbers, establishing knowledge of prime numbers up to 100.
- Multiply a 4-digit number by a one- or two-digit number using a formal written method.
- Divide numbers of up to 4-digits by a one-digit number using a formal written method.
- In solving problems, understand the use of the equals sign.

Fractions

- Multiply proper fractions and mixed numbers by whole numbers.
- Read and write decimal numbers as fractions.
- Solve problems involving multiplication and division, including scaling.

Decimals and percentages

- Read, write, order and compare numbers up to 3 decimal places.
- Round decimals with two decimal places to the nearest whole number and to one decimal place.
- Solve problems involving number up to three decimal places.
- Recognise the percent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.
- Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a multiple of 10 or 25.
- Recognise and write decimal equivalents of any number of tenths or hundredths.
- Find the effect of dividing a one- or two-digit number by 10 or 100, identifying the value of the digits in the answer as ones, tenths and hundredths.
- Solve simple measure and money problems involving fractions and decimals to two decimal places.
- Convert between different units of measure [for example, kilometre to metre].

Year 6

For disciplinary knowledge: See 'White Rose' small steps

PV:

- Compare and order numbers up to 10,000,000.
- Round any whole number to a required degree of accuracy.
- Use negative numbers in context and calculate intervals across zero.

- Solve number and practical problems that involve all the above.

4 Operations:

- Solve addition and subtraction multi step problems in contexts, deciding which operations and methods to use and why.
- Multiply multi-digit number up to 4 digits by a 2-digit number using the formal written method of long multiplication.
- Divide numbers up to 4 digits by a 2-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding as appropriate for the context.
- Divide numbers up to 4 digits by a 2-digit number using the formal written method of short division, interpreting remainders according to the context.
- Perform mental calculations, including with mixed operations and large numbers.
- Identify common factors, common multiples and prime numbers.
- Use their knowledge of the order of operations to carry out calculations involving the four operations.
- Solve problems involving addition, subtraction, multiplication and division.
- Use estimation to check answers to calculations and determine in the context of a problem, an appropriate degree of accuracy.

Fractions:

- Use common factors to simplify fractions.
- Use common multiples to express fractions in the same denomination.
- Compare and order fractions, including fractions > 1
- Generate and describe linear number sequences (with fractions)
- Add and subtract fractions with different denominations and mixed numbers, using the concept of equivalent fractions.
- Multiply simple pairs of proper fractions, writing the answer in its simplest form [for example $1/4 \times 1/2 = 1/8$]
- Divide proper fractions by whole numbers [for example $1/3 \div 2 = 1/6$]
- Associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example $3/8$]
- Recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.

Decimals:

- To identify whether partitions of numbers are correct using knowledge of up to 3dp place value.
- Identify the number using the given clues about the digits to three decimal places.
- Multiply and divide numbers by 0.1/10/100/1000.

Percentages:

- To find equivalents between fractions and percentages.
- To find percentages of whole numbers.

Year 7

- Use of a scientific calculator
- BIDMAS – calculator and non-calculator
- Sequences – patterns, generating, *n*th term, quadratic
- 4 operations
- Time – reading time, calculations with time, interpreting timetables, time on calculator

<ul style="list-style-type: none"> • Money – functional calculations • Negatives – ordering, 4 operations. • Factors and multiples • Square & triangle numbers. • Fractions: comparing, simplifying, of an amount, converting FDP. • Percentages of an amount, <i>reverse percentages</i>
Year 8
<ul style="list-style-type: none"> • Calculations with negative integers (<i>and real numbers</i>) • Powers and roots • Substitution • HCF, LCM • <i>Prime factor decomposition</i> • <i>Estimation</i> • <i>Laws of indices/ powers of 10</i> • FDP – calculations with fractions (<i>including mixed numbers</i>), <i>reciprocals</i>.
Year 9
<ul style="list-style-type: none"> • Ordering real numbers (<i>including SURD/index form</i>), place value • Calculations – 4 operations • BIDMAS • Indices (<i>Inc negative/fractional</i>) • <i>Surds</i> • FDP – converting, ordering, mixed numbers, of amounts, percentages – increase/decrease, reverse, <i>compound interest, exponential growth/decay</i> • Rounding – estimation, <i>error intervals, bounds</i> • Standard form • Use of calculator
Year 10
<ul style="list-style-type: none"> • Factors, multiples and primes. • <i>Indices and powers</i> • <i>Surds</i> • Estimation (<i>using pi</i>), error intervals, standard form, <i>calculations/application of upper and lower bounds</i>
Year 11
Use of PLC only

Algebra – Substantive Knowledge

Year 1 *For disciplinary knowledge: See 'White Rose' small steps*

- Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems, such as $7 = ? - 9$

Year 2 *For disciplinary knowledge: See 'White Rose' small steps*

- Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and use this to check calculations and solve missing number problems.

Year 3

No explicit teaching

Year 4

No explicit teaching

Year 5

No explicit teaching

Year 6 *For disciplinary knowledge: See 'White Rose' small steps*

- Use simple formulae.
- Generate and describe linear number sequences.
- Express missing number problems algebraically.
- Find pairs of numbers that satisfy an equation with two unknowns.
- Enumerate possibilities of combinations of two variables.

Year 7

Expressions and Formulae:

- Simplifying and writing expressions
- Writing and using formulae
- Substitution
- *Brackets and Powers*
- *Factorising Expressions*

Equations:

- Expanding brackets
- Factorising single brackets (*double brackets*)
- Solving one and two step equations
- Changing the subject of a formulae
- *Rearranging equations with fractions, indices and brackets*

Year 8

Sequences and Graphs:

- Continuing sequences
- Nth term sequences
- Coordinates and line segments
- Linear graphs

Straight line graphs:

- Plotting linear graphs
- Linear graphs ($y=mx+c$) and interpreting graphs
- Gradient, midpoint, distance
- *Parallel and perpendicular lines*
- Solving linear equations graphically

Year 9

Algebra 1- Expressions

- Creating expressions,
- substitution,
- collecting like terms,
- expanding and factorising single (*double/triple*) brackets
- *Indices*

Algebra 2 – Algebraic manipulation 1

- Solving equations
- Solving inequalities
- Forming equations
- *Rearranging formulae*

Algebra 3 – Sequences

- nth term
- Special sequences
- Generating quadratics/ *nth term quadratics*

Algebra 4 – Linear Graphs

- Coordinates
- Plotting graphs (generating coordinates on calculator)
- Equation of a line
- *Parallel and perpendicular lines*

Year 10

Algebra 5 – Algebraic Manipulation 2

- Forming and solving multi step equations
- Changing the subject
- *Solving quadratics (inc quadratic formula)*
- *Solving simultaneous equations including quadratic*

Algebra 6 - Quadratics

- Expanding single and double brackets
- Factorising single and double brackets
- Solving quadratics
- *Completing the square*
- *Trig Graphs and Trig Transformations*

Algebra 7 – Harder graphs

- Quadratic graphs and function notation
- Solving quadratics (by factorising)
- Cubic and reciprocal graphs
- Real life graphs
- *Functions- inverse and composite*
- *Quadratic inequalities*
- *Circles and tangents*

Year 11

Algebra 8- Algebraic Manipulation 3

- Forming and solving equations
- Simultaneous equations

- *Iteration*
- *Algebraic fractions*
- *Proof*

Shape and Measure – Substantive Knowledge

EYFS [*For disciplinary knowledge: See 'White Rose' overview*](#)

- Use everyday language to talk about size, weight, capacity, position, distance, time and money to compare quantities and objects and to solve problems.
- Recognise, create and describe patterns.
- Explore characteristics of everyday objects and shapes and use mathematical language to describe them.

*OBSERVATIONS OF CHILDREN DEMONSTRATING THIS INDEPENDENTLY IS CRITICAL.

Year 1 [*For disciplinary knowledge: See 'White Rose' small steps*](#)

Shape

- Recognise and name common 2D shapes including: rectangles, squares, circles and triangles.
- Recognise and name common 3D shapes including: cuboids, cubes, pyramids and spheres

Measure

- Measure and begin to record lengths and heights.
- Compare describe and solve practical problems for: length and heights (for example, long/short, longer/shorter, tall/short, double/half)
- Measure and begin to record mass/weight, capacity and volume.
- Compare, describe and solve practical problems for mass/weight: (for example, heavy/light, heavier than, lighter than) capacity (for example, full/empty, more than, less than, half, half full, quarter)

Position and direction

- Describe position, direction and movement, including whole, half, quarter and three quarter turns

Money

- Recognise and know the value of different denominations of coins and notes.

Time

- Sequence events in chronological order using language (e.g. before and after, next, first today, yesterday, tomorrow, morning, afternoon and evening)
- Recognise and use language relating to dates, including days of the week, months and years.
- Tell the time to the hour and half past the hour and draw the hands on a clock face to show these times. Compare, describe and solve practical problems for time (e.g. quicker, slower, earlier, later).
- Measure and begin to record time (hours, minutes, seconds)

Year 2 [*For disciplinary knowledge: See 'White Rose' small steps*](#)

Shape

- Identify and describe the properties of 2D shapes, including the number of sides and line symmetry in a vertical line.
- Identify and describe the properties of 3D shapes, including the number of edges, vertices and faces.
- Identify 2D shapes on the surface of 3D shapes, (for example, a circle on a cylinder and a triangle on a pyramid.)
- Compare and sort common 2D and 3D shapes and everyday objects.

Measure

- Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ($^{\circ}\text{C}$); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels/
- Compare and order lengths, mass, volume/capacity and record the results using $<$, $>$ and $=$.

Position and direction

- Use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)
- Order and arrange combinations of mathematical objects in patterns and sequences.

Money

- Recognise and use symbols for pounds and pence; combine amounts to make a particular value.
- Find different combinations of coins that equal the same amounts of money.
- Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change.

Time

- Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.
- Know the number of minutes in an hour and the number of hours in a day.
- Compare and sequence intervals of time.

Year 3

[For disciplinary knowledge: See 'White Rose' small steps](#)

Measure

- Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)
- Add & subtract amounts of money to give change, using both £ & P in practical contexts
- Tell & write the time from analogue clock, including using Roman numerals from 1 to XII, and 12-hour and 24-hour clocks.
- Estimate and read time with increasing accuracy to the nearest minute; record & compare time in terms of seconds, minutes and hours; use vocabulary such as O'Clock, a.m/p.m, morning, afternoon, noon and midnight
- Know the number of seconds in a minute & the number of days in each month, year and leap year
- Compare durations of events (for example to calculate the time taken by particular events or tasks)
- Measure the perimeter of simple 2-D shapes

Properties of shape

- Draw 2-D shapes
- Make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations & describe them
- Recognise angles as a property of shape or a description of a turn
- Identify right angles, recognise that two right angles makes a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle
- Identify horizontal & vertical lines and pairs of perpendicular and parallel lines

Year 4

[For disciplinary knowledge: See 'White Rose' small steps](#)

Measure

- Convert between different units of measure(for example, kilometre to metre; hour to minute)
- Estimate, compare and calculate different measures, including money in pounds & pence
- Read, write & convert time between analogue & digital 12 & 24 hour clocks

- Solve problems involving converting from hours to minutes; minutes to seconds; years to months, weeks to days
- Measure & calculate the perimeter of a rectilinear figure (including squares) in centimeters & metres
- Find the area of rectilinear shapes by counting squares

Properties of shape

- Compare & classify geometric shapes, including quadrilaterals & triangles, based on their properties & sizes

Position and direction

- Identify lines of symmetry in 2-D shapes presented in different orientations
- Identify acute & obtuse angles & compare & order angles up to two right angles by size
- Identify lines of symmetry in 2-D shapes presented in different orientations
- Complete a simple symmetric figure with respect to a specific line of symmetry
- Describe positions on a 2-D grid as coordinates in the first quadrant
- Describe movements between positions as translations of a given unit to the left/right and up/down
- Plot specified points and draw sides to complete a given polygon

Year 5

For disciplinary knowledge: See 'White Rose' small steps

Measure:

- Measure and calculate the perimeter of rectilinear shapes in m and cm.
- Calculate the area of rectangles using standard units.

Properties of shape:

- Identify 3-D shapes, including cubes and other cuboids, from 2-D representations.
- Use the properties of rectangles to deduce related facts and find missing lengths and angles.
- Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.
- Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.
- Draw given angles and measure them in degrees. Identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line and $\frac{1}{2}$ a turn (total 180°) other multiples of 90°

Position and Direction:

- Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

Converting units:

- Convert between different units of metric measure [for example, km and m; cm and m; cm and mm; g and kg; l and ml]
- Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints.
- Solve problems involving converting between units of time.

Year 6

For disciplinary knowledge: See 'White Rose' small steps

Properties of shape:

- Draw 2-D shapes using given dimensions and angles.
- Compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals and regular polygons.
- Recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles

Position and Direction:

- To check the accuracy of given co-ordinates for a variety of shapes where there will be more than 1 error to identify.
- Draw and translate simple shapes over 4 quadrants

Converting units:

- Solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.
- Use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3 dp.
- Convert between miles and kilometers.

Perimeter, Area and Volume:

- Recognise that shapes with the same areas can have different perimeters and vice versa.
- Recognise when it is possible to use formulae for area and volume of shapes.
- Calculate the area of parallelograms and triangles.
- Calculate, estimate and compare volume of cubes and cuboids using standard units, including cm³, m³ and extending to other units (mm³, km³)

Year 7

Area and Volume:

- Triangle, rectangle, parallelogram, trapezium
- Compound area
- Volume cube/cuboids
- Naming 2D/3D shapes and their properties
- Surface area

Lines and Angles:

- Angles in parallel lines, triangles, *quadrilaterals*, *polygons*
- Drawing and estimating angles/triangles

Year 8

Area, Perimeter and Volume:

- Area and perimeter recap (Y7)
- Circles - area and circumference
- Volume and SA of prisms
- *Volume of cylinders, cones, spheres*

2D and 3D Shapes:

- Nets
- Plans and elevations
- Shapes and properties
- *Pythagoras*
- *Applied volume and SA.*
- *SOH CAH TOA*

Transformations:

- Congruence, *similarity*
- Translation, rotation, reflection, enlargement
- *Combining transformations*

Year 9

Working in 2D:

- Measuring lines and angles
- Area and perimeter of 2D shapes and circles
- Circles
- Metric conversion (1D)
- *Arcs and sectors*

Angles and Polygons

- Angle facts
- Angles in polygons
- Angles in parallel lines
- Bearings
- *Metric conversion 2D and 3D*

Triangles

- Pythagoras (*in 3D*)
- Trigonometry (*in 3D*)

Working in 3D

- Naming 3D shapes
- Nets, plans, elevations
- Volume prisms, cones, spheres
- Surface area
- Conversion of 2D and 3D units
- *Frustums*

Year 10**Vectors and Transformations**

- Vectors (adding, resultant, algebraic)
- Transformations – translation, rotation, reflection, enlargement

Circles and Harder Area

- Recap circles area/perimeter
- Arcs and sectors
- Shaded Area
- Loci and construction of triangles
- *Circle Theorems*
- *Area of a triangle ($1/2absinc$)*

Measures

- All compound measures
- Distance (and *velocity*) time graphs
- Bearings and maps
- *Speed, density, pressure*

Year 11**Triangles and Similarity**

- Similarity in 1D, 2D and 3D
- *Sine rule and cosine rule*
- Congruency
- *Exact trig values*

Data – Substantive Knowledge	
Year 1	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
No explicit teaching, however use of data within measure e.g. recording different heights, sizes...	
Year 2	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
Statistics	
<ul style="list-style-type: none"> • Interpret and construct simple pictograms, tally charts, block diagrams and simple tables. • Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity • Ask and answer questions about totalling and comparing categorical data. 	
Year 3	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
Statistics	
<ul style="list-style-type: none"> • Interpret & present data using bar charts, pictograms & tables • Solve one-step & two-step questions (for example “How many more?” and ‘How many fewer?’) using information presented in scaled bar charts & pictogram & tables 	
Year 4	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
Statistics	
<ul style="list-style-type: none"> • Interpret & present discrete & continuous data using appropriate graphical methods, including bar charts and time graphs. • Solve comparison sum & difference problems using information presented in bar charts, pictograms, table and other graphs. 	
Year 5	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
Statistics:	
<ul style="list-style-type: none"> • Solve comparison, sum and difference problems using information presented in a line graph. • Complete, read and interpret information in tables, including timetables. 	
Year 6	<i>For disciplinary knowledge: See ‘White Rose’ small steps</i>
Algebra:	
<ul style="list-style-type: none"> • Use simple formulae. • Generate and describe linear number sequences. • Express missing number problems algebraically. • Find pairs of numbers that satisfy an equation with two unknowns. • Enumerate possibilities of combinations of two variables. 	
Year 7	
Analysing and Displaying Data	
<ul style="list-style-type: none"> • Data collection • Two way tables and bar charts • averages and range • Grouped data • Further graphs • Pie charts • Correlation 	
Probability	
<ul style="list-style-type: none"> • Language of probability • Comparing probabilities • Mutually exclusive events • Estimating probability and expectation 	

- Experimental probability
- *Probability diagrams*
- *Tree diagrams*

Year 8

Graphs and Charts

- Pie charts
- Stem and leaf
- comparing distributions
- Scatter graphs
- Misleading graphs
- Time series

Year 9

Presenting and Organising Data

- Organising data
- Presenting data
- Interpreting timetables
- *Histograms*
- *Box Plots*

Comparing Distributions

- Frequency diagrams
- Averages and spread
- scatter graphs and correlation
- Time series
- *Cumulative Frequency*

Year 10

Probability

Single Events

- Theoretical probability
- Experimental probability and expectation
- Two way tables
- *Sampling*

Two Events

- sample space diagrams,
- frequency trees
- tree diagrams
- *venn diagrams and set notation*
- *histograms*
- combinations

Year 11

- Estimating averages and spread
- Modal groups
- *Complex tree diagrams and venn diagrams*

Ratio and Proportion – Substantive Knowledge

Futura Music

Curriculum Framework

Music Curriculum Framework

Intent:

In the Futura Learning Partnership, our intention is that children develop a life-long love of music. Through the musical experiences and opportunities offered to them throughout their education, each child will develop a musical identity which is personal to them, this may be in the form of a performer, composer and/or as an active listener who, in the future, will become a participator in the cultural life of the UK.

In EYFS, KS1 and KS2 music acts as an integral part of the school day, be that singing whilst packing up, or listening to a new piece of music whilst walking into assembly. Our music curriculum plan, guided by the EYFS framework and National Curriculum, ensures that all children from EYFS and Year 9 experience a

stimulating, practical and holistic curriculum which explores music through singing, performing, composing and listening. Every student in the Futura Trust will have been taught the substantive and disciplinary knowledge required for GCSE Music, and therefore possibly A-Level, should they wish to study Music at KS4 and KS5.

Alongside this we encourage all students to develop their musicianship in a variety of extra-curricular activities both in and outside school. Inevitably, the cultural capital of each student will be developed throughout their musical education within the Trust yet each individual school also aims to meet the cultural interests, and needs, of the community in which our schools are based – all musical cultures and welcomed and embraced.

We strive to ensure all students find Music an engaging and fulfilling subject in which they embrace the discipline of practice, the challenge of analysis and the excitement of creating and finding their own musical voice.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **disciplinary and substantive concepts**

Primary Music Curriculum design and structure

The Primary music curriculum is divided into four main sections (singing, listening/appraising, performing and composing). The progression of substantive and disciplinary knowledge can be seen as children move from EYFS through to Year 6. Possible contexts (and some examples of music) are included at the beginning, which may be appropriate to all year groups. **Bold indicates key goals to be achieved at the end of each stage.** This scheme has been developed between primary and secondary staff, to ensure progression within the Futura Learning Partnership

Within each key stage, some suggested vocabulary is given for each year group which is to be acquired cumulatively throughout the primary phase.

Year Group	Singing	Listening and Appraising	Performing	Composing
Possible contexts	<ul style="list-style-type: none"> ♪ Use songs for daily routines such as: tidying up, lining up, washing hands etc. ♪ Singing/rapping the alphabet, days of the week, months of the year, seasons, times tables, phonics songs etc. ♪ Learn songs which help explain and remember historical periods and events 	<p>https://www.bbc.co.uk/teach/ten-pieces for example:</p> <ul style="list-style-type: none"> ♪ The Planets (Gustav Holst) ♪ In the hall of the Mountain King (Grieg) ♪ The Four Seasons (Vivaldi) ♪ West Side Story (Leonard Bernstein) 	<ul style="list-style-type: none"> ♪ Perform to their own class. ♪ Perform to other classes or key stages. ♪ Invite parents in at the end of the day. ♪ Shows, concerts, Christmas/ Easter performances etc. 	<ul style="list-style-type: none"> ♪ Create a soundscape linked to a story or historical/geographical journey. ♪ Add sound effects to accompany a poem, story or film clip. ♪ Composing using natural or body sounds (links to science, PE, nature etc).

	<p>e.g. London's burning, Ring of roses etc.</p> <ul style="list-style-type: none"> ♪ Key stage and whole school singing practices. ♪ Assemblies. ♪ Shows, concerts, Christmas/Easter performances. ♪ Singing in the community e.g. old people's home, supermarkets etc 	<ul style="list-style-type: none"> ♪ The Nutcracker Suite (Tchaikovsky) ♪ Rhapsody in Blue (Gershwin) ♪ Zadok the Priest (Handel) ♪ Mussorgsky (Night on a Bear mountain) ♪ Mussorgsky (Pictures at an Exhibition) ♪ Stravinsky (Firebird Suite) ♪ Ravi Shankar Symphony ♪ The Little Train Villa-Lobos ♪ Bizet Toreador ♪ Dvorak New World Symphony ♪ Storm from Peter Grimes (Benjamin Britten) ♪ Carnival of the Animals (Saint-Saens) ♪ Peter and the Wolf (Tchaikovsky) 	<ul style="list-style-type: none"> ♪ Recording performances on ipads etc and sharing e.g. on school's social media pages and/or website. ♪ Perming out of school e.g. on trips and camps (camp fire songs in groups). 	<ul style="list-style-type: none"> ♪ Links to art and pictures/ paintings. ♪ Use IT packages such a 'Garage Band' to compose: possible contexts could include creating new phone ringtones etc. ♪ Represent emotions and feelings (linked to PSHE). ♪ Using aspects of the school for a focus e.g. class song, school song etc.

Secondary Music Curriculum design and structure

In the Futura Learning Partnership, each school has different resources and a different amount of curriculum time with KS3. Following discussions with the secondary music teachers, it was decided to create a curriculum which ensured teacher autonomy and the opportunity to meet the musical needs and interests of the students in each school community. Keywords will be taught through listening, performing and appraising to each year group, with some schools able to cover more keywords than others. Topics are suggested, with greater detail available in SoL which will be shared with departments. Some suggested topics will not be possible in every school due to resources available.

Crucially, from Year 8 onwards, every topic links back to previous learning with musical concepts becoming more complex and challenging, in preparation for students to study Music at KS4 and beyond. Much of what is taught in Music is dependent on students having time to practise skills previously learnt but not yet refined. It should be noted that assessing in Music is holistic, with teachers quietly identifying HAPS and LAPS and offering challenge or support where appropriate. When possible, teachers will record performances in order to build up a catalogue of recordings tracking students' progress throughout KS3. These recordings may be uploaded onto MS Teams class page, with oral feedback included in the recording.

	Substantive	Disciplinary	Possible concepts
Year 7	<p>Keywords will be explicitly referred to in SoL. These words can be applied when listening, performing and composing.</p> <p>Texture – unison, homophonic, melody with accompaniment</p> <p>Melody – Conjunct, improvisation</p> <p>Tonality – Major key and minor key</p> <p>Harmony – Major and minor chords.</p> <p>Structure – Verse/chorus; binary (AB);</p> <p>Metre – 4/4, 3/4</p>	<p>Listening</p> <p>To be able to aurally identify the keywords listed in substantive knowledge in pieces of music explored. This could be through a short listening starter, or homework. Alternatively, it might be through breaking down a piece the students are performing, or analysing musical elements used in a composition.</p> <p>Performance</p>	<p>Singing project in Term 1 exploring different textures.</p> <p>Klezmer Music – Melody, time signature ($\frac{3}{4}$)</p> <p>Programme Music – Melody and texture (Peter and The Wolf and/or The Planets)</p> <p>Musical Futures – Performing current songs with analysis on structure, texture and time signatures.</p>

	<p>Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon). Instrumental techniques – arco, pizzicato</p> <p>Performance – dependent on resources. To be able to read a chord chart for guitar or ukulele. To be able to read tab, or musical notation, of simple two or four bar melodies. To be able to practise short diatonic melodies and chord progressions of I, IV, V.</p> <p>Composing To learn that a composition requires chords (harmony), melody and bass. To learn that a composition is structured and planned. If technology is available, to learn how to edit on a DAW (digital audio workstation) such as Soundtrap or GarageBand. To learn the difference between audio and MIDI.</p>	<p>To perform simple ensemble pieces with fluency and flow within an ensemble. Depending on experience and ability, their part might be individual bass line, chords or singing.</p> <p>To be able to identify areas needed for improvement and know how to practise effectively.</p> <p>Composing To compose a simple chord progression using chords I,IV and V. This might be entirely independent or options provided by the teacher. To structure a composition using four or eight bar phrasing. To compose simple melodies which blend with their chords. To select suitable tonalities for a composition. Challenge: To edit and refine a composition. Some students might chose to notate a short section of a composition, possibly using a notation package online.</p>	<p>Musique Concrete – DAW, audio/MIDI, structure, texture</p> <p>Graphic scores – Structure, texture,</p> <p>Musicals – Singing with expression, structure, tonality</p>
Year 8	<p>Keywords will be explicitly referred to in SoL. These words can be applied when listening, performing and composing. Words will be revisited from Year 7 in order to build up the bank of vocabulary required for GCSE.</p> <p>Texture – unison, homophonic, melody with accompaniment, polyphonic, octaves, monophonic</p>	<p>Listening To be able to aurally identify the keywords listed in substantive knowledge in pieces of music explored. This could be through a short listening starter, or homework. Alternatively, it might be through breaking down a piece the students are performing, or analysing musical elements used in a composition.</p>	<p>The Blues – Rock and Roll – Jazz A strong focus on chords I,IV, V and then vi. 7th chords. Structure of 12 bar blues to verse/chorus. Improvisation on a Blues scale which becomes composed melody.</p> <p>Folk Music – Simple and compound time signature. Phrase structure of A and B. Major and minor tonality</p>

<p>Melody – Conjunct, improvisation, disjunct, triadic, phrase lengths (counting bars)</p> <p>Tonality – Major key and minor key</p> <p>Harmony – Major and minor chords, chords I, IV, V, vi; 7th chords, diatonic.</p> <p>Structure – Verse/chorus; binary (AB); ternary (ABA), 12 bar blues, canon</p> <p>Metre – 4/4,3/4, simple and compound time (6/8)</p> <p>Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon, instruments of Blues and Jazz/Pop, sax, trombone, electric guitar, bass guitar. Keyboard instruments: Organ, harpsichord, synthesizer, piano</p> <p>Instrumental techniques – gliss, wah-wah, portamento.</p> <p>Performance – dependent on resources. To perform a variety of pieces in at least two of suggested keys. G major, E minor, F major, D minor, using chord charts To continue to practise reading tab, or musical notation, of 8 –16 bar melodies. To be able to practise short diatonic melodies and chord progressions of I, IV, V, vi .</p> <p>Composing To learn how to use stylistic features of at least two different musical genres eg The Blues; Electronic Dance Music; Ground Bass; Pop Music To learn that composing emerges from improvisation.</p>	<p>Performance To be able to practise independently and chunk music accordingly. To perform at least three different genres of music with fluency and commitment within an ensemble and/or as a soloist. To perform pieces which use chords I, IV, V, vi and offer variety between verse and chorus. To perform a piece in simple and compound time. To identify key musical elements within the performance. To be able to identify areas needed for improvement and know how to practise effectively. To draw links between different genres.</p> <p>Composing To compose a piece using chords I, IV, V and vi in a key in which they have already performed a song/piece. To compose in at least two different genres, using stylistic features learnt. Students might select from a bank of teacher recommendations. To improvise melody in any genre which can turn into a composition. To compose a piece with two distinct sections using contrasting features within one musical element eg contrasting textures; challenge = tonality or metre!</p>	<p>identification/familiarisation. Chords I,IV, V. Improvisation on a scale which results in composition. Melody – Conjunct and disjunct. Using notation and playing by ear.</p> <p>Minimalism and Electronic Dance Music – Structuring a composition through layering; chords I,IV,V; riffs, effects such as reverb and delay.</p> <p>Baroque Music – Performance (Bach’s Toccata in D minor; Pachelbel), ground bass; Texture focus. Notation used. Canon</p> <p>Classical Music – Beethoven's Fur Elise. Notation and playing by ear. Melody – conjunct, triadic, disjunct, diatonic.</p> <p>Musical Futures - Performing current songs with analysis on structure, texture, melody and time signatures.</p>
---	--	---

	<p>To learn that a composition requires contrast and variety. If technology is available, to learn how to use both piano roll and MIDI to realise a composition.</p>		
Year 9	<p>Fewer new keywords are introduced at Year 9 in order to consolidate complex concepts which have been introduced in Years 7 and 8. Keywords will be explicitly referred to in SoL. These words can be applied when listening, performing and composing.</p> <p>Texture – unison, homophonic, melody with accompaniment, polyphonic, octaves, monophonic, contrapuntal</p> <p>Melody – Conjunct, improvisation, disjunct, triadic, phrase lengths (counting bars), scalic</p> <p>Tonality – Major key and minor key, atonal</p> <p>Harmony – Major and minor chords, chords I, IV, V, vi; 7th chords, diatonic, chromatic, modulation, inversions</p> <p>Structure – Verse/chorus; binary (AB); ternary (ABA), 12 bar blues, canon, through-composed, strophic,</p> <p>Metre – 4/4, 3/4, simple and compound time (6/8), irregular time signatures (5/4), changing time signatures.</p> <p>Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon, instruments of Blues and Jazz/Pop, sax, trombone, electric guitar, bass</p>	<p>Listening To be able to aurally identify the keywords listed in substantive knowledge in pieces of music explored. This could be through a short listening starter, or homework. Alternatively, it might be through breaking down a piece the students are performing, or analysing musical elements used in a composition.</p> <p>Performance To continue to challenge themselves as a performer on an instrument or their voice. This might mean playing chords with one hand or moving onto playing inversions of chords on the keyboard. As a ukulele player or guitarist it might mean learning finger-picking techniques alongside strumming. For a vocalist it might mean using the voice more expressively, or exploring belting/scat/singing in harmony with one other person.</p> <p>Composing To develop greater independence as a composer, with a willingness to try compositional techniques learnt throughout KS3.</p>	<p>Reggae Music – melodic bass riffs, chords I, IV, V</p> <p>Rap and Hip-Hop – Structure, rhythm and beats/sampling.</p> <p>A Journey through the Decades– A variety of songs pop songs explored each week from a different decade. Pick out musical features, including modulation.</p> <p>Romantic Music – What makes a good melody? Time signatures. Instrumental developments.</p> <p>Whistle stop tour of musical cultures – Exploring different scales and instruments from Indian, South America, China, Japan</p> <p>Film Music – Teaching compositional devices and the concept of composing to a brief.</p> <p>Music and Revolution – Exploring how composers from Renaissance to present day have created their own musical voice through harmony, rhythm and melody.</p>

	<p>guitar. Instrumental techniques – gliss, wah-wah, portamento.</p> <p>New instruments of the Romantic period - tuba, bass drum/cymbals/snare drum, gong; bass clarinet, piccolo, contra-bassoon. Voices – soprano, alto, tenor, bass.</p> <p>Performance – dependent on resources. To perform a variety of pieces one of which includes a modulation. To continue to practise reading tab, or musical notation, of 8 –16 bar melodies. To explore different interpretations of one performance.</p> <p>Composing To learn how to use the stylistic features to create music of their own interest. To learn a variety of compositional devices (short activities (pedal note, chromaticism, major/minor/diminished 7ths) etc To learn that a composers respond to external briefs To learn how to collaborate with other composers.</p>	<p>To ability to compose to a simple brief, selecting suitable musical elements.</p>	
--	--	--	--

Vocabulary - Words in bold from Year 8 are new words. However, teachers need to reinforce previously learnt words. It should be noted that students need to be able to recall these words and aurally identify them within music.

Year 7:

Texture – unison, homophonic, melody with accompaniment; **Melody** – Conjunct, improvisation; **Tonality** – Major key and minor key

Harmony – Major and minor chords; **Structure** – Verse/chorus; binary (AB); **Metre** – 4/4, 3/4

Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon). Instrumental techniques – arco, pizzicato

Year 8:

Texture – unison, homophonic, melody with accompaniment, **polyphonic, octaves, monophonic; Melody** – Conjunct, improvisation, **disjunct, triadic, phrase lengths (counting bars); Tonality** – Major key and minor key; **Harmony** – Major and minor chords, **chords I, IV, V, vi; 7th chords, diatonic; Structure** – Verse/chorus; binary (AB); **ternary (ABA), 12 bar blues, canon; Metre** – 4/4,3/4, **simple and compound time (6/8)**

Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon, **instruments of Blues and Jazz/Pop, sax, trombone, electric guitar, bass guitar. Keyboard instruments: Organ, harpsichord, synthesizer, piano; Instrumental techniques** – gliss, wah-wah, portamento.

Year 9:

Texture – unison, homophonic, melody with accompaniment, polyphonic, octaves, monophonic, **contrapuntal**

Melody – Conjunct, improvisation, disjunct, triadic, phrase lengths (counting bars), **scalic**

Tonality – Major key and minor key, **atonal**

Harmony – Major and minor chords, chords I, IV, V, vi; 7th chords, diatonic, **chromatic, modulation, inversions**

Structure – Verse/chorus; binary (AB); ternary (ABA), 12 bar blues, canon, through-composed, strophic,

Metre – 4/4,3/4, simple and compound time (6/8), **irregular time signatures (5/4), changing time signatures.**

Timbre/sonority - Families of instruments and aurally identify different orchestral instruments from the Classical Period. (Violin, cello, double bass; trumpet and French Horn; Flute, clarinet, oboe, bassoon, instruments of Blues and Jazz/Pop, sax, trombone, electric guitar, bass guitar. Instrumental techniques – gliss, wah-wah, portamento.

New instruments of the Romantic period - tuba, bass drum/cymbals/snare drum, gong; bass clarinet, piccolo, contra-bassoon. Voices – soprano, alto, tenor, bass.

Year 7

Find your voice

The big picture: To create a musical community in which the students feel confident and happy singing and performing with one another. To establish the routines of the classroom in terms of looking after their voice, and instruments. To develop basic skills on instruments available to them in the classroom. It's also important for the teacher to get to know students' level of musicianship and identify those students who already have musical experience, or show real musical potential.

NB Musical Futures resources 'Just Play' offers lots of good resources and song ideas. **In every lesson listen to a piece of music and tap the beat. Clap on different beats. What's the time signature.**

Keywords: Texture – unison, melody with accompaniment; Structure – verse/chorus

Suggested tasks for voice:

Learning to warm up the voice. (Unison)

Singing as a class.

Call and response.

Singing rounds.

Select first song with simple chords (I & IV or I & V)

Suggestions: Dumb Ways to Die; The Best Day of my Life; Three Little Birds;

Suggested instrument activities. Teacher to select suitable songs:

Learning where C is on the keyboard (Youtube – C is to the Left of the two black keys)

Learn to play a chord on keyboard/ukulele.

Practise playing two chords with good technique.

Learning chords C, F G on ukulele.

Questions to pose

What is a chord? (Major chords)

What makes a good practice session?

Baseline assessment opportunities - must be formative, holistic and based on a variety of tasks.

Formative assessment – Identify HAPS and LAPS students.

Record students' performances in groups - at least twice, and upload to MS Teams with feedback recorded.

Questioning and possible Focus on Sound responses from homework.

Focus on Sound

Homework opportunities for students to start GCSE style listening exercises, embedding keywords.

Musique
Concrete

In order to maintain singing as a weekly activity, starters could include singing a variety of warm-ups and songs. These songs could be recorded, imported and used as part of this project. Example – Dr Who ostinato and melody.

The big picture: By the end of this project, students will have knowledge of how to record audio, and midi on a DAW. They will have basic IT skills such as copy and pasting, splitting a track, changing the pitch, reversing track. They will have created a track with recorded tracks, and possibly MIDI. They will have learnt the importance of structuring a piece, with reference to binary and ternary form.

Keywords: MIDI, audio, import, split track, structure – binary and ternary;

	<p>Suggested tasks: Record sounds in the classroom (chairs being moved, door shutting, chatter of the classroom). Students to manipulate in Soundtrap/GaragebandPractice Students to record Dr Who ostinato and opening melody. Then import into Soundtrap/Garageband and manipulate.</p> <p>Suggested tracks: 'Symphony pour un homme seul'. Dr Who - variety of versions Christophe Chassol – Big Sun (he recorded life on the island of La Reunion, then created music to 'match' the audio). Pink Floyd – Money The Beatles – Tomorrow Never Knows.</p> <p>Assessment opportunities: Listen and appraise compositions. Formative.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Programme Music	<p>In order to maintain singing as a weekly activity, starters could include singing a variety of warm-ups and songs. These could be linked to major and minor tonalities in order to link up with main project.</p> <p>Focus: Orchestral instruments, learning to aurally identify them. Composing using chords, motif, ostinato and melody.</p> <p>Keywords: Brass, woodwind, percussion, strings (challenge to identify which instrument belongs to which family). Tonality – Major and minor; motif; melody; dynamics</p> <p>Big picture: By the end of this project, students will have listened to a variety of orchestra instruments, and some will be able to aurally identify these instruments. They will have learnt that composers use compositional devices (ostinato; motif; pedal note; chord progression) and will have tried to use these in their own compositions. Depending on time, they might have created one final composition, or have worked on a variety of short compositions in order</p> <p>Suggested tracks: (NB Primary schools often use these pieces...) Pictures at an Exhibition The Planets</p>

	<p>Peter and The Wolf Danse Macabre Sea Interludes Carnival of the Animals</p> <p>Questions to pose Is this in a major tonality or minor tonality (teacher to sing major/minor scale over the piece to help students hear which feels better) Has the composer used dynamics? How many beats per bar?</p> <p>Suggested tasks Students to listen to a piece and asked to identify what the piece is about. Can they justify their answer using keywords displayed (linked to melody, dynamics, rhythm, tempo, structure). Teacher to break down how the piece is constructed, eg Mars – rhythmical ostinato, low brass repeating a motif. Students then given a set chords and tasked with composing a motif/rhythmical ostinato. Contrasts with Venus. Use broken chords instead, use an alternative tonality. Short, simple melodies which are conjunct or triadic. Suggested keys: C major and A minor.</p> <p>Assessment opportunities: Listen and appraise compositions. Formative.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Learning to improvise	<p>In order to maintain singing as a weekly activity, starters could include singing a variety of warm-ups and songs. Youtube backing track (Blues?) - Vocally improvise, students to copy. Offer opportunities for students to lead.</p> <p>The big picture: By the end of this project, students will have learnt that composing melody starts with improvising. This could be explored in a number of different ways: Indian music and ragas, ostinato and pentatonic (major and minor); Klezmer Music and the Hava Nagila scale.</p> <p>Keywords: Ostinato, improvise, beat, phrasing</p>

	<p>Suggested tasks: Klezmer Music: Learn Hava Nagila, section A and B. Learn the scale. Practise improvising. Students to compose their own melody based on their improvisations. Accompanied by D major and Gm chord.</p> <p>Ostinato: Class to compose a simple ostinato. To learn major pentatonic and minor pentatonic. To practise improvising.</p> <p>Questions to pose: How do you get better at improvisation? Why is improvisation always different? Can you be wrong when you improvise?</p> <p>Assessment opportunities: Record students improvising, supported by teacher playing chords. This could be two or four bars each and passed around the class. Identify LAPS and HAPS for improvising.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Musicals	<p>In order to maintain singing as a weekly activity, starters could include singing a variety of warm-ups and songs.</p> <p>Keywords: Metre – time signature of 4/4 or 3/4; melody – syllabic, conjunct, disjunct; texture – homophonic, melody with accompaniment, call and response. Techniques: Belting, falsetto, scat; Types of voices - soprano, alto, tenor, bass,</p> <p>The Big Picture: Students will learn how the voice can be used in different ways, such as belting and they will learn to identify different types of voice. Teachers may wish to explore one particular musical, or explore a variety of musicals. A selection of songs could be performed by the class – perhaps 3? Teachers may wish to create classroom arrangements, and encourage use of instruments, or ask all students to sing. Rehearsal technique will be a big focus. Additional focus might include exploring different types of ensembles which are used in musicals eg Hamilton versus West Side Story.</p> <p>Questions to pose: How does the music reflect the emotion of the character/scene? What’s the structure of the piece (strophic or verse/chorus) Which instruments can you hear? How many beats per bar? What’s the time signature? Does the tempo change?</p> <p>Suggested pieces</p>

	<p>Little Shop of Horrors (good for listening) Matilda (be mindful that primaries often use some of these songs for performances) Grease</p> <p>Assessment opportunities Record performances. Identify HAPS and LAPS.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
<p>Musical Futures (learning how to practise)</p> <p>Depending on levels of musicianship, this may be a topic you repeat in the year with different pieces which requires further challenge.</p>	<p>Keywords: Beat, introduction, verse, chorus, time signature, strumming pattern, ensemble, chunking, tab, playing by ear.</p> <p>The Big Picture: Using resources from Just Play, and other Musical Future resources, or teacher to create their own resources, students to experience playing as an ensemble. Lessons will focus on how to practise, teacher modelling which section their working on. Students asked to reflect on what they need to improve upon. Possible challenge could include students playing inversions on keyboard, adding the root in the left hand and full chord in the right hand, finger picking chords on ukulele or guitar.</p> <p>Suggested pieces Pieces with up to four chords, possible challenge of having different chords for the chorus. Wonderwall, Let It Be, Shape of You</p> <p>Questions to pose: How many chords are used? Do you see a pattern in the chords? What's the time signature? How many bars is the introduction/verse/chorus? What are you going to practise today? Describe what a good technique is when you play...piano/guitar/bass guitar/ ukulele/sing?</p> <p>Assessment opportunities Record performances. Identify HAPS and LAPS. Teacher to respond to the performances and needs of the students.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>

Throughout Year 8, refer to learning which took place in Year 7. Much of what is learnt in Year 8 is scaffolded from Year 7 and requires repetition and practice in order to improve. For example, aurally identifying instruments; identifying time signature, describe melody as conjunct; using three or four chords (why was that?), learning to improvise.

The Blues	<p>The big picture: Students to learn a new structure of 12 bar blues. By the end of the project they will have learnt degrees of the scale, in particular tonic, subdominant and dominant (I,IV, V). They will have played an active role in a performance of the Blues. Some students might be able to work out the 7ths. Students will revisit improvisation but now on a Blues scale. Depending on the class, the teacher may wish for students to create their own Blues piece, with lyrics which is performed to the class, or the teacher may decide to have a class Blues, with different students performing whilst the rest of the class sing. Students will also explore how The Blues was music of Black Musicians and Black Americans.</p> <p>Keywords: Chords I, IV, V, 12 bar Blues, lyric structure of AAB, 7ths, improvisation, pitch bends, Rock and Roll, Jazz, swing</p> <p>Suggested pieces: The Thrill Is Gone Billie's Blues Foolish Man's Blues Lisa's Blues (from The Simpsons)</p> <p>Questions to pose: What makes a good practice session? If G = 1, what numbers would we assign C and D? If C =1, what would chords IV and V be? What makes a good improvisation (encourage being able to sing it back) Can you vocalise the swing rhythm?</p> <p>Suggested activities: To learn chords I, IV and V in key of G major (Year 7 was based on C major, now move onto G major). To practise playing them in a 12 bar blues. TO explore the relationship of chords I,IV, V and apply it to different keys. To learn how to structure the lyrics of The Blues.</p>
-----------	---

	<p>To create a class Blues or small ensemble Blues. Each student to play a Blues, in a role selected by them (guitar, keyboard, chord, improvisation, vocals)</p> <p>Assessment opportunities: Hear small ensemble performances throughout the project. Holistic assessment. Teachers to identify their HAPS. Find out about musical experience.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
<p>Rock and Roll to Jazz</p>	<p>The Big Picture: To explore how The Blues moves into Rock and Roll. To learn that Rock and Roll emerge from Country and Western and The Blues. Two different approaches with Chuck Berry and Little Richard verses Elvis Presley. Stress how dominant Black musicians were in establishing all these styles but racism meant white musician popularised it amongst a white audience. Then to explore how Jazz emerged yet was still using chords I, IV and V but adding extra notes to the chord. Musical focus on chords I, IV and V and refining a performance. Stress how these chords should be used in composition. Students to perform a piece of Rock and Roll and jazz if time.</p> <p>Keywords: Harmony - chords I, IV, V; chord progression, verse/chorus (rock and roll), counting bars for a section, head (jazz), improvisation. Instrument identification.</p> <p>Suggested pieces: Maybelline – Chuck Berry Lucille – Little Richard Jailhouse Rock – Elvis Presley Watermelon Mann – Woody Hermann vs Herbie Hancock</p> <p>Suggested activities: To analyse Jailhouse Rock, compare the chord progression of the chorus to The Blues. Use a contrasting key in order to apply chords I, IV < V. This could then develop into a performance of the whole song. To move onto Watermelon Man. Students to learn the melody by ear, with notation available to those who want it. Explore the chord progression and analyse how V7 is used and the chord progression extended. Students to practise their improvisation skills.</p> <p>Questions to pose: How is this similar to The Blues? How has the order of chords changed?</p>

	<p>If D is 1, what are chords IV and V? Etc Which instrument is playing the melody/head/solo?</p> <p>Assessment opportunities: Hear small ensemble performances throughout the project. Holistic assessment. Teachers to identify their HAPS. Find out about musical experience.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Baroque Music	<p>The Big Picture: Introduce students to a timeline which will be started in Year 8 and continue into Year 9. These topics will be returned to during GCSE, and also develop students' cultural capital. To learn about the 'sound' of Baroque and to learn what the term texture means and how to aurally identify different textures. To learn about different compositional techniques of ground bass and canon. To practise identifying instruments of the orchestra.</p> <p>Keywords: Texture - unison, octaves, monophonic, homophony, polyphonic. Instruments – harpsichord; canon. If exploring Pachelbel's Canon, explore rhythm note values</p> <p>Suggested pieces: Bach's Toccata and Fugue Bach Brandenburg Concerto (good for exploring the small size of orchestra and use of harpsichord) Handel Zadok The Priest Purcell Queen of Sheeba Purcell When I am Laid In Earth Pachelbel's Canon in D major.</p> <p>Suggested Activities (IT or instruments) Students to analyse Bach's Toccata and Fugue in reference to texture. In order to understand the texture, students to learn to play it on keyboard. Challenge to play in octaves, and add chords. Students to then explore Pachelbel's Canon in D. Can students recreate it? Challenge given based on level of difficulty of part.</p> <p>Questions to pose: What's the tempo? What's the Italian term for that tempo? What's the time signature?</p>

	<p>Which instruments can you hear? What's the difference between a crotchet, quaver and semiquaver? (Aurally to identify) What's a ground bass?</p> <p>Assessment opportunities: Teacher to observe, and hear, individual student's work. Identify HAPS and LAPS.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Folk Music	<p>The Big Picture: Students to be introduced to local Folk Music – Music of the People, ever evolving. By the end of this project, students will have practised their instrumental skills on a chosen instrument and will have practised playing both melody and chords. They will perform in small ensembles and will have performed a piece in simple time and compound time. They will understand how to identify whether a piece is in simple or compound time. They will have listened to a variety of British folk music. Chords I, IV and V will also be referred to.</p> <p>Keywords: Diatonic, simple time (2/4, 4/4), compound time (6/8) , phrasing, binary, ternary.</p> <p>Suggested Pieces: Oh Poor Old a Man (4/4) Irish Washerwoman (6/8) New York Gills, by Bellowhead The Pat a Cake Polka The Rocky Road to Dublin Roaring Barmaid</p> <p>Suggested Activities: Learn a simple folk song in simple time. Oh Poor Old Man is a good piece. Students to learn section A and B, and then learn the chords as a challenge (in G major, I, IV and V). Teacher to record small ensemble performances. Then move onto a piece in compound time. Irish Washerwoman is a great example. Students to explore the difference between simple and compound. Students to perform in small groups and teacher to record.</p> <p>Questions to pose: How many beats per bar? Can you divide the beat into two or three (apple or pineapple)? Is it in simple or compound time? What's the time signature?</p>

	<p>Which instruments can you hear? How many bars is section A? What's the phrase structure of section A? Which chords are used? If G is I, what numbers would be give C and D? Which other pieces have to performed which have used chords I, IV and V?</p> <p>Assessment opportunities: Teacher to observe, and hear, individual student's work. Identify HAPS and LAPS.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
<p>Minimalism/ Electronic Dance Music</p>	<p>The big picture: By the end of this project, students will have learnt about key musical features of minimalism and explored how EDM stemmed from minimalism. They will have created two projects. One will be a minimalist piece using minimalist techniques and the other will be a piece of EDM. They will have listened to a variety of music and will be able to aurally identify key musical features. They will have learn how to edit on DAW.</p> <p>Keywords: Cell, motif, ostinato, phase shifting, region, automation, repetition, marimba, structure, loops, 'repeating motifs' 'repeating cells', 'repeating rhythms', drone (these final terms are related to GCSE)</p> <p>Suggested pieces: Clapping Music – Steve Reich Six Marimbas – Steve Reich Music for 18 Musicians – Steve Reich Electric Counterpoint – Steve Reich Glassworks – Philip Glass In C – Terry Riley</p> <p>EDM Pjanoo One More Time – Daft Punk Right Here, Right Now – Fat Boy Slim Praise You – Fat Boy Slim Inspector Norse, Todd Terje</p>

	<p>Suggested Activities: Minimalism: Listen to clapping music, compose a short motif, learn to phase shift it. Listen to Six Marimba, compose a motif, copy and paste, then take notes away so that it builds up – like Six Marimbas. Add a drone. Explore tuned percussion. EDM: Compose an EDM drum beat. Analyse Pjanoo – add chords like the piece. Analyse Go – Chemical Brothers, add a riff. Analyse Praise You – Develop the structure. Add drone.</p> <p>Questions to pose: Which words would you use to describe this piece? Which instruments can you hear? Stand up when the chords come in. Which bar does the bass/drums/vocal come in? How do we create contrast in a composition?</p> <p>Assessment Opportunities: Teacher to observe work in lesson and layout of piece on the screen.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
<p>Classical Music Possibly opera?!</p>	<p>The big picture: Following on from the Baroque unit, students will learn that Classical Music is from 1750-1820, and is the music of Mozart, among other composers. They will learn that the orchestra got bigger, the piano was ‘invented’ and that the common texture was melody with accompaniment – a big focus on melody. Suggest that Beethoven is included in this period as a ‘late composer’.</p> <p>Keywords: Classical, Mozart, texture – melody with accompaniment; four bar phrasing, diatonic, chromatic moments, tonality – major and minor; metre – simple or compound (linking to folk), sequence, conjunct and disjunct If time - chords I, IV, V..., inversions; opera arias,</p> <p>Suggested pieces: Fur Elise – Beethoven Mozart – Clarinet Concerto, 3rd movt (6/8) Mozart - Rondo Alla Turka – Good example of developing a melody. Mozart – Soave Via Sento (beautiful)</p> <p>Suggested activities</p>

Mozart – Voi Che Sapete, or Beethoven Fur Elise Listen, analyse the melody. Students to practise playing the melody. If doing Voi Che Sapete, analyse the chord structure, in key of G major. Chords I, IV, V and vi. Challenge: Imperfect and perfect cadence. How could the chords be played differently? Om-pa? Broken chord. Typical Classical textures. Compositional exercise using techniques from Mozart. Antecedent and consequent phrasing; chord progression with different harmonic rhythm?

Questions to pose:

- Is this melody conjunct or disjunct?
- When do we hear cadences?
- Which tonality is this piece? Major or minor?
- What's the time signature? (Year 7 – how many beats per bar)
- Which chords are used in this piece?
- If G = 1, what would the other chords be?

Assessment opportunities:

Fluency of performance, questioning. Observations of practice time. Level of difficulty – chords (bass line) or melody? How are the chords played?

Focus on Sound

Homework opportunities for students to start GCSE style listening exercises, embedding keywords.

Throughout Year 9, refer to learning which took place in Year 8 and Year 7. Much of what is learnt in Year 9 is scaffolded from Year 8 and 7 and requires repetition and practice in order to improve. For example, composing in a key using a chord progression, chords I, IV, V, vi; organising sounds in order to create an effective structure; learning about the journey of classical music from Baroque to Twentieth Century.

Reggae	<p>The big picture: By the end of the project, students will have learnt about the history of Reggae starting with R&B of WW2 and Big Bands to classic songs and the role of Dub and technology. They will have learnt about the socially conscious lyrics. They will have learnt about typical musical features and will be able to link it to chords I, IV and V. Students will have performed at least one song from the reggae repertoire, and may have also composed a song in a Reggae style using typical musical features. This is a topic at GCSE Music.</p>
--------	--

	<p>Keywords: Skank, off-beat, syncopation, chords I, IV, V. Toasting. Verse/chorus, melodic bass line.</p> <p>Suggested pieces: Stir It Up (good for I, IV, V); Lively Up Yourself 54-46 Was My Number – Toots and the Maytals Curly Dub – Lee Perry Pressure Drop – Toots and the Maytals Tikin Jah Foley – French Reggae</p> <p>Suggested activities: Analyse Lively Up Yourself. Students to learn different parts, including bassline, chords and melody. Perform the opening in small ensembles. Either learn another piece, teacher’s choice or encourage composition using key musical features. Modelled by the teacher.</p> <p>Questions to pose: How many bars is the intro/verse/chorus? What effects have been used? Referring to numerals, which chords have been used? Clap the rhythm of the bass line.</p> <p>Assessment opportunities: Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
Spoken Word - Rap, Hip-Hop and Grime	<p>The big picture: By the end of the project, students will have learnt about a range of spoken word genres spanning from toasting in Reggae, to 1980s hip-hop and present day Grime. They will analyse specific pieces, chosen by the teacher, and create a track using techniques the composer/producer has used. This may include drum beats and fills, chords, riffs, breaks, string accompaniment. Some students may wish to write their own lyrics, others may wish to perform raps which are socially conscious. Links should be made to EDM and the use of sampling of soul music and electronic music.</p> <p>Keywords: Structure, chord progression, sampling, hip-hop culture, Gospel, Disco, Electronic, Soul</p>

Suggested pieces:

Big for Your Boots – BBC Live Lounge, Stormzy
Dry Your Eyes – The Streets
Paid in Full – Erik B and Rakim
Rappers Delight -
Bring the Noise – Public Enemy
The Message
Planet Rock by Afrika Bambaata
Picture Me by Dave
Samples: Trans-Euro-Express – Kraftwerk; Funky Drummer,
Fresh Prince of Bel Air

Suggested activities:

Potential for lots of listening and analysis. Work chronologically through pieces and explore whether music is sampled and what style influence the song. Disco, electronic, gospel, Soul. Exploring drum machines and beats such as Roland TR808. Students could copy Stormzy's style through Big for your Boots and then use the same key, Em, to compose their own piece of Grime, including creating quick drum beats etc.

Questions to pose:

Which style of music is sampled?
Which bar do we first hear the...bass/vocal? etc
Which instruments have been used?

Assessment opportunities:

Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.

Focus on Sound

Homework opportunities for students to start GCSE style listening exercises, embedding keywords.

Film Music

The big picture: By the end of the project, students will have learnt a variety of compositional techniques used in film music. This will include the use of tritone, diminished 7th chords, tessitura, orchestration, chromatic, chromatic melody, leitmotif. Teachers may wish to develop one composition or work on different techniques each lesson. Students will be able to identify techniques within short film clips. These techniques can be used for GCSE music.

Keywords: tritone, diminished 7th chords, tessitura, orchestration, chromatic, diatonic, chromatic melody, leitmotif,

Suggested pieces:

Star Wars

Wall-E

Soul

Bernard Herrmann – Psycho (audio only!)

Suggested activities:

To ensure breadth of study, and teach a range of compositional devices, teachers may wish to focus on a different film and clip each week, break down the techniques used and then short compositional exercises. By the end of the topic students would have a range of compositional devices they could use in the future including use of leitmotif, constructing a diminished 7th chord, chromatic scales, selecting suitable timbres.

Questions to pose:

Which instrument plays the melody/leitmotif?

What's the time signature?

Identify the correct tempo term (Give multiple choice as Italian words)

How does the composer create tension?

Assessment opportunities:

Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.

Focus on Sound

Homework opportunities for students to start GCSE style listening exercises, embedding keywords.

Romantic Music

The big picture: By the end of the unit, students will have learnt about 19th century piano music and impressionism. They will be able to trace the development of the orchestra from Baroque to Romantic. They will explore the use of extended chords, and the impact poetry, art and nationalism had on composers. They will learn about this style of music through performance, with the possibility of using it within the starting point of a remix. This is a GCSE topic.

Keywords: Pedal (sustaining pedal), range, extended chords and how to construct (eg D9, D11, D13), rubato. If time, structure - strophic, through-composed, inversions, broken chord

Suggested pieces:

Chopin Raindrop Prelude

Chopin Ballade in F major (based on quite violent folk story)

Grieg Norwegian March

Satie – Gymnopedie

Schubert – Erlkonig (Youtube Oxford Lieder really good animation)

Faure Pavane

Verdi – Dies Irae (great for chromatic line in choir and lots of instruments/dynamics)

Suggested Activities

Introduce Satie’s Gymnopedie. Students to practise playing the chords or the melody. Explore the role of the pedal which enables notes to be sustained. If using IT, students to sample a small bit of the piece and create a remix. Beginning of Norwegian March has great chords inc major 7ths and inversions. Students to compose a chord progression using extended chords. Analyse Faure’s Pavane and the role of melody and broken chords. Students to attempt to perform. Students could compose a piece using a set chord progression but change the texture of the chords.

Questions to pose:

Which instruments play the melody?

What does the pedal on a piano do?

What’s the texture of this piece?

How could you change those chords?

Assessment opportunities:

Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.

Focus on Sound

Homework opportunities for students to start GCSE style listening exercises, embedding keywords.

Journey Around the World

The big picture: By the end of the project, students will be aware of a variety of musical cultures, chosen by the teacher. This may range, from Samba drumming, Indian Ragas, Salsa, Chinese Music, African drumming and vocal music. Students may either compose music in the style of these cultures, or perform pieces which are studied. Identification of different instruments would also be useful.

Selection of cultures may be dependent on the cultures within the school. This is a GCSE topic and the discipline of practice can be applied to BTEC Music.

	<p>Keywords: Dependent on choice of musical cultures. Each school to decide on their words.</p> <p>Suggested Musicians and country: Tinariwen; Amadou and Mariam; Diabate; Lamomali- Mali Ravi Shankar; Anoushka Shankar – India; Nitin Sawhney – Fusion of ALL styles! Inc Indian and Flamenco Immigrant and or Immigrants Explore contemporary artists from the region – remixes. Good source would be WOMAD.</p> <p>Suggested activities and pieces Students to learn through performing in some way, or taking compositional techniques. This could include learning about different types of scales, or rhythms. Possible opportunity to bring in a resident musician</p> <p>Questions to pose Where have you heard this style of Music? How is this music different to the music you listen to? How is this music similar to the music you listen to?</p> <p>Assessment opportunities: Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
A Journey Through the Decades	<p>The big picture: By the end of the project, students will have learnt about a variety of pop music genres chosen by the teacher. This may range from Soul, Disco, Rock, New Romantics, British Punk, Indie, Britpop, UK Garage. Students should be given the opportunity to hear a range of music and perform different songs. With each song performed, teachers should analyse, with the students, how the song is related to previous learning. Eg Harmony, tonality, melody, structure, texture etc. Some students may wish to compose a song in a particular genre. The use of technology would also be an interesting angle. Challenge may include learning how to modulate. This is a GCSE topic and the discipline of practice can be applied to BTEC Music.</p> <p>Keywords: Steady rock beat, back beat, modulation, inversions</p> <p>Suggested activities. Students to learn through performing in some way, or taking compositional techniques. This could include learning about use of instruments/instrumental effects. Possible opportunity to bring in a resident musician</p>

	<p>Questions to pose Find out what music you parents/carers/grandparents listened to as a child – great starting point and discussion! How is this piece different from the style we listen to last week? What’s the time signature? On which beat does the vocal come in? What’s the texture of the piece? Has the piece been influenced by other genres?</p> <p>Assessment opportunities: Observations of practice time. Teacher to make recordings as evidence. HAPS and LAPS to be identified.</p> <p>Focus on Sound Homework opportunities for students to start GCSE style listening exercises, embedding keywords.</p>
--	--

KS4 GCSE

Substantive knowledge

Performance	Composition	Listening
<p>To know how to practise on their chosen instrument in order to improve pitch and rhythmic accuracy.</p> <p>To explore a variety of performance repertoire which could be used for their performance.</p>	<p>To learn how to plan a composition, using appropriate musical elements, in order to meet the needs of a brief.</p> <p>To learn how to compose in a variety of textures (monophonic, unison, octaves, homophonic, polyphonic, call and response)</p>	<p>To learn how to aurally identify, and describe, key musical elements as stated in the exam specification, namely texture, melody, harmony, tonality, sonority, structure and rhythm.</p>

<p>To know how to apply performance directions to their performance in order to achieve an expressive performance.</p> <p>To know what a good performance on their instrument sounds like.</p>	<p>To learn how to compose in a chosen key using functional harmony.</p> <p>To learn how to use inversions and chromatic chords such as 7ths and secondary dominants in their chord progression.</p> <p>To learn how to modulate.</p> <p>To learn how to use instruments idiomatically in a composition.</p> <p>To learn how to improvise and compose convincing melody which blends with their chosen chord progression.</p> <p>To learn how develop melody in order to create melodic cohesion and unity within a piece.</p> <p>To learn how to notate a composition suitable to the genre chosen. This could be through music notation, tab, graphic score or detailed annotation.</p>	
--	---	--

Performing	Composition	Listening
<p>To be able to select appropriate repertoire for their chosen instrument.</p> <p>To perform with confidence, fluency, accuracy and expression both as a soloist and ensemble performer.</p>	<p>To compose to a set brief using appropriate musical elements, and be able to justify their response in a written programme note.</p> <p>To compose music using a variety of musical elements and compositional devices which demonstrate cohesion and development.</p>	<p>To be able to aurally identify, and describe, key musical elements as stated in the exam specification, namely texture, melody, harmony, tonality, sonority, structure and rhythm.</p> <p>To take compositional devices and techniques used by composers and song-writers and apply these techniques in their own compositions.</p>

--	--	--

KS5 Music, A-Level

Substantive knowledge

Performance	Composition	Listening and appraising
<p>To explore a variety of repertoire for their chosen instrument.</p> <p>To explore and understand how performers may interpret the same piece quite differently.</p> <p>To learn how to assemble a programme of music which demonstrates the best of their musical ability.</p> <p>To know how to practise effectively in order to achieve an exceptionally accurate and expressive performance.</p>	<p>To understand how composers create a piece using a variety of compositional devices and techniques linked to musical elements.</p> <p>To learn how to modulate to tertiary keys.</p> <p>To learn how to develop melody in order to create melodic cohesion and contrast.</p> <p>To learn how to use chromatic chords effectively within a key.</p>	<p>To be able to read a piano and orchestral score from Baroque, Classical and Romantic period.</p> <p>To learn how to identify a variety of musical features of two styles of music, such as Jazz and Pop, and explore the impact the musical elements have on the outcome of the piece.</p> <p>To learn the key musical concepts and keywords as stated by the A-Level specification.</p>

Disciplinary Knowledge

Performance	Composition	Listening and Appraising
<p>To be able to perform with accuracy and expression on their chosen instrument. This might be as a soloist or ensemble performer.</p> <p>To be able to identify areas of weakness in their performance and refine it accordingly.</p> <p>To perform with flair and commitment.</p>	<p>To be able to compose music which uses traditional compositional devices from set works they have studied.</p> <p>To compose with flair and creativity.</p> <p>To plan compositions ensuring both cohesion, unity and development.</p>	<p>To be able to analyse a blank score accurately, identifying features linked to harmony, tonality, structure, melody, sonority and texture.</p> <p>To be able to discuss how a composer 'handles' any specific musical element listed above.</p> <p>To be able to apply their understanding of how a composer has used musical elements in unfamiliar music.</p>

	To develop their own composing voice and justify their compositional choices.	To be able to select appropriate repertoire from given song-writers and composers in order to develop an argument relating to a specific question from the exam board. For example, 'Discuss how a successful song-writer uses balance and surprise in their music. You must refer to two composers'
--	---	--

Personal, Social, Health and Economic (PSHE)

Curriculum Framework

PSHE Curriculum Framework

Intent:

The purpose of the Futura Learning Partnership PSHE intent is to provide a framework for high quality PSHE education across phases which is accessible to all and ensures that each of our pupils will develop the knowledge, skills and attributes they need to keep themselves healthy, safe and prepared for life and work. The aim is to ensure our pupils understand more about how to play a positive and successful role within our society, both as a child and as an adult within the future. It should have an impact on both academic and non-academic outcomes for pupils, particularly the most vulnerable and disadvantaged. The aim is for a holistic PSHE learning journey spanning the pupil's school career, with a progressive, spiral curriculum that addresses real needs in a rapidly-changing world.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are 6 key **substantive knowledge concepts**:

Being me in my world	Includes understanding my place in the class, school and global community as well as devising Learning Charters.
Celebrating difference	Includes anti-bullying (cyber and homophobic bullying included) and diversity work.
Dreams and goals	Includes goal-setting, aspirations for yourself and the world and working together.
Healthy me	Includes drugs and alcohol education, self-esteem and confidence as well as healthy lifestyle choices.
Relationships	Includes understanding friendship, family and other relationships, conflict resolution and communication skills.
Changing me	This puzzle includes sex and relationships education in the context of coping positively with change. (includes age-appropriate sex education)

Each PSHE lesson is underpinned by the following 6 **disciplinary knowledge concepts**:

Connect us	Developing the ability to take enjoyment from their learning, to be inclusive learners and to build and maximise social skills. Children are encouraged to build positive relationships and take part in collaborative learning.
Calm me	Children gain awareness of the activity in their minds, relaxing them and quietening their thoughts and emotions to a place of optimum learning capacity.
Open my mind	Developing the ability to filter the many stimuli entering the child's mind at any given time. The aim here is to improve concentration and learning by filtering out activity around them.
Tell me or show me	Children are encouraged to introduce new information, concepts and skills, using a range of approaches and activities.

Let me learn	Developing children’s ability to manipulate, use and play with new information in order for it to make sense to them and for them to ‘accommodate’ it into their existing learning.
Help me reflect	Children are encouraged to reflect on their learning experiences and their progress. By reflecting, children can process and evaluate what they have learnt, which enables them to consolidate and apply their learning.

PSHE, RSE, SMSC and British Values Statement

The curriculum comprises not just of PSHE (Personal, Social, Health Education) but also includes resilience, mental health, emotional literacy, social and employability skills, British values, and SMSC (spiritual, moral, social, cultural development), as well as an inclusive philosophy including Relationship and Sex Education.

- **RSE**- All aspects of RSE (Relationships and Sex Education) are covered within the PSHE curriculum. Term 5 and 6, Relationships and Changing Me cover the main aspects. See appendix 1 for further details
- **FBV**- All areas relating to Fundamental British Value are covered within the PSHE curriculum. See appendix 2 for details
- **SMSC**- All areas relating to Spiritual, Moral, Social, Cultural development are covered within the PSHE curriculum. See appendix 3 for further details.

Appendix 1	See Jigsaw- Community Area- RSHE (Relationships and Changing ME)- Resources Jigsaw Mapping Documents (for RSHE)
Appendix 2	See Jigsaw- Community- Teachers- British Values Map
Appendix 3	See Jigsaw- Community- Teachers- SMSC Mapping Doc

JIGSAW

This PSHE curriculum follows the JIGSAW scheme of work. If schools have access to this scheme, then they can see the lesson plans and use the online resources. If schools do not have access to the scheme, then they can follow the curriculum plan below.

Termly Enrichment Activity

Each term, every school in the Futura Learning Partnership will take part in an enrichment activity or competition, based on the learning focus for PSHE. See below for details of each activity. We have also suggested wider community links which schools can get involved in charitable work if appropriate.

Term 1	Term 2	Term 3	Term 4	Term 5	Term 6
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
<p>Each school or class creates a display about what makes their school or class special.</p> <p>Suggested ideas:</p> <ul style="list-style-type: none"> - Each child makes a puzzle piece that fits together with the rest of the pieces. - Include words and picture of parts of their school that are special. 	<p>Each school or class hosts a talent show where children perform their unique talents.</p>	<p>Each class creates a Dreams and Goals display. Children think about what they want to achieve by the end of the school year.</p> <p>Suggested ideas:</p> <ul style="list-style-type: none"> -Make a time capsule -Display reaching your dreams and goals as a rollercoaster journey -Make dream catchers 	<p>Each class/school plans a healthy morning. Each class has to bring in a healthy snack/prepare a healthy lunch and all children take part in a healthy activity e.g. move a mile, danceathon.</p> <p>Suggested ideas:</p> <ul style="list-style-type: none"> -In Secondary Schools, this could be part of a cooking and/or PE lesson. -MasterChef competition 	<p>Focus on friendship.</p> <p>Create a Friendship display.</p> <p>Suggested ideas:</p> <ul style="list-style-type: none"> - Create a recipe for friendship - Write a friendship a poem - Take a selfie with a friend and describe why they are a good friend. 	<p>Each class or school creates a mini film on Sports Day. Film makers should interview children about how their bodies help them move and succeed in different sports.</p> <p>E.g. my strong arms help me throw the javelin, my long legs help me to run long distances.</p>
<p>Suggested community links:</p> <p>Off The Record (mental health charity)</p>	<p>Suggested community links:</p> <p>Local Care Home (to perform talent shows)</p> <p>Fund raising for charities linked to equality</p>	<p>Suggested community links:</p> <p>Successful Alumni (lead assemblies, talk to children about their journey to success)</p>	<p>Suggested community links:</p> <p>NHS</p> <p>Food banks</p> <p>Fund raising for charities linked to mental health</p>	<p>Suggested community links:</p> <p>Time 2 Share</p> <p>Equalities team</p> <p>Playground buddies</p>	<p>Suggested community links:</p> <p>WeSports</p> <p>Pride activities</p>

Early Years Foundation Stage substantive and disciplinary knowledge

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are **playing and exploring** - children investigate and experience things, and 'have a go'; **active learning** - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; **creating and thinking critically** - children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (**PSE, CL, PD**) underpin and are an integral part of children's learning in all areas.

Statutory ELG: Managing Self: Children at the expected level of development will: - Be confident to try new activities and show independence, resilience and perseverance in the face of challenge; Explain the reasons for rules, know right from wrong and try to behave accordingly; Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.

Statutory ELG: Building Relationships: Children at the expected level of development will: - Work and play cooperatively and take turns with others; Form positive attachments to adults and friendships with peers; Show sensitivity to their own and to others' needs.

Statutory ELG: Self-Regulation: Children at the expected level of development will: - Show an understanding of their own feelings and those of others, and begin to regulate their behaviour accordingly; Set and work towards simple goals, being able to wait for what they want and control their immediate impulses when appropriate; Give focused attention to what the teacher says, responding appropriately even when engaged in activity, and show an ability to follow instructions involving several ideas or actions.

EFYS PSED Skills – Based on the JIGSAW SOW

<u>Being Me in My World</u>	<u>Celebrating Difference</u>	<u>Dreams and Goals</u>	<u>Healthy Me</u>	<u>Relationships</u>	<u>Changing Me</u>
<ul style="list-style-type: none"> - Understanding how it feels to belong. - Recognising and managing feelings. - Enjoying working with others to make school a good place to be. - Understanding it is good to be kind. - Understanding children's rights and how we all learn and play. - Learning what being responsible means. 	<ul style="list-style-type: none"> - Understanding everyone is good at different things. - Understanding being different makes us special. - Understanding we are all different but the same in some ways. - Explaining why my home is special to me. - Explaining how to be a kind friend. - Understanding which words to use to stand up for myself if someone is unkind. 	<ul style="list-style-type: none"> - Persevering to tackle challenges. - Recognizing I am able to not give up and achieve my goal. - Setting a goal and working towards it. - Use kind words to encourage others. - Understanding that what I learn now is linked to the job I might like to do when I am older. - Saying how I feel when I achieve a goal and knowing what it means to feel proud. 	<ul style="list-style-type: none"> - Understanding the need for exercise to keep my body healthy. - Understanding how both movement and rest are good for my bod. - Being able to make healthy eating choices. - Understanding why sleep is good for me. - Knowing the importance of washing my hands properly. - Understanding what a stranger is and how to keep myself safe. 	<ul style="list-style-type: none"> - Identifying the jobs I do in my family and belonging. - Knowing how to make friends. - Thinking of ways to problem solve and stay friends. - Understanding the importance of kind words. - Using strategies to manage my feelings. - Knowing how to be a good friend. 	<ul style="list-style-type: none"> - Naming body parts. - Knowing how to stay healthy. - Understanding we all grow from babies to adults. - Expressing my feelings about moving on. - Talking about worries or fears of moving into Year One. - Sharing memories of Reception.

First-hand experiences and pupil offer:

PSED at Foundation Stage is introduced directly through carpet times based on the JIGSAW SOW. All weekly lessons are accompanied by weekly celebrations of children showing they have achieved the Learning Intention and activities that can be added to weekly provision to enhance children's understanding.

The first-hand experiences children should be offered are:

- Weekly carpet times to teach a specific area or skill.
- Opportunities to discuss the way they are feeling.
- Strategies for Self-Regulation.
- Books and stories within the classroom that cover a variety of PSED skills.

Key Vocabulary

Year 1 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Identify feeling special and safe and being part of a class. Identify rights and responsibilities, rewards and feeling proud. Understand consequences. Understand the Learning Charter.	Discuss similarities and differences. Understanding bullying and knowing how to deal with it. Know how to make new friends. Celebrate the differences in everyone.	Set goals. Identify successes and achievements. Identify learning styles. Work well and celebrate achievement with a partner. Tackle new challenges Identify and overcoming obstacles. Identify feelings of success	Know important of keeping myself healthy. Identify healthier lifestyle choice. Understand how to keep clean. Identify how to keep safe. Know the importance of medicine safety/safety with household items and road safety.	Belonging to a family Making friends/being a good friend. Physical contact preferences. People who help us Qualities as a friend and person. Self-acknowledgement Being a good friend to myself. Celebrating special relationships.	Life cycles – animal and human. Changes in me. Changes since being a baby. Differences between female and male bodies (correct terminology). Linking growing and learning. Coping with change Transition.

			Link health and happiness.		
--	--	--	----------------------------	--	--

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me

<p>Explain why my class is a happy and safe place to learn.</p> <p>Give different examples where I or others make my class happy and safe.</p>	<p>Tell you some ways that I am different and similar to other people in my class, and why this makes us all special.</p> <p>Explain what bullying is and how being bullied might make somebody feel.</p>	<p>Explain how I feel when I am successful and how this can be celebrated positively.</p> <p>Say why my internal treasure chest is an important place to store positive feelings.</p>	<p>Explain why I think my body is amazing and can identify a range of ways to keep it safe and healthy.</p> <p>Give examples of when being healthy can help me feel happy.</p>	<p>Explain why I have special relationships with some people and how these relationships help me feel safe and good about myself. I can also explain how my qualities help these relationships.</p> <p>Give examples of behaviour in other people that I appreciate and behaviours that I don't like.</p>	<p>Compare how I am now to when I was a baby and explain some of the changes that will happen to me as I get older. I can use the correct names for penis, testicles, anus, vagina, vulva, and give reasons why they are private.</p> <p>Explain why some changes I might experience might feel better than others.</p>
--	---	---	--	---	---

Year 2 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
<p>Discuss hopes and fears for the year, rights and responsibilities, rewards and consequences.</p> <p>Establish a safe and fair learning environment.</p> <p>Make valuing contributions and choices.</p> <p>Identify different feelings.</p>	<p>Identify assumptions and stereotypes about gender.</p> <p>Understand bullying Know to stand up for self and others.</p> <p>Learn to make new friends.</p> <p>Define gender diversity Celebrate difference and remaining friends.</p>	<p>Know how to set realistic goals.</p> <p>Understand how to persevere.</p> <p>Identify learning strengths and how to learn with others.</p> <p>Know how to work in a group and cooperate.</p> <p>Contribute to and share success.</p>	<p>Define and show motivation.</p> <p>Understand the importance of healthy choices, good nutrition and relaxation.</p> <p>Identify healthier snacks.</p>	<p>Discuss different types of family.</p> <p>Identify physical contact boundaries.</p> <p>Understand friendship and conflict.</p> <p>Discuss secrets.</p> <p>Identify trust and appreciation.</p> <p>Express appreciation for special relationships.</p>	<p>Define life cycles in nature Understand growing from young to old.</p> <p>Know how to increase independence.</p> <p>Identify differences in female and male bodies (correct terminology)</p> <p>Express assertiveness</p> <p>Prepare for transition.</p>

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me

<p>Explain why my behaviour can impact on other people in my class.</p> <p>Compare my own and my friends' choices and can express why some choices are better than others.</p>	<p>Explain that sometimes people get bullied because they are seen to be different; this might include people who do not conform to gender stereotypes.</p> <p>Explain how it feels to have a friend and be a friend. I can also explain why it is OK to be different from my friends.</p>	<p>Explain how I played my part in a group and the parts other people played to create an end product.</p> <p>Explain how our skills complemented each other.</p> <p>Explain how it felt to be part of a group and can identify a range of feelings about group work</p>	<p>Explain why foods and medicines can be good for my body comparing my ideas with less healthy/ unsafe choices.</p> <p>Compare my own and my friends' choices and can express how it feels to make healthy and safe choices</p>	<p>Explain why some things might make me feel uncomfortable in a relationship and compare this with relationships that make me feel safe and special.</p> <p>Give examples of some different problem-solving techniques and explain how I might use them in certain situations in my relationships.</p>	<p>Use the correct terms to describe penis, testicles, anus, vagina, vulva and explain why they are private.</p> <p>Explain why some types of touches feel OK and others don't.</p> <p>Tell you what I like and don't like about being a boy/ girl and getting older, and recognise that other people might feel differently to me.</p>
--	--	--	--	---	---

Year 3 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Setting personal goals Self-identity and worth Positivity in challenges Rules, rights and responsibilities Rewards and consequences Responsible choices Seeing things from others' perspectives	Families and their differences Family conflict and how to manage it (child-centered) Witnessing bullying and how to solve it Recognising how words can be hurtful Giving and receiving compliments	Difficult challenges and achieving success Dreams and ambitions New challenges Motivation and enthusiasm Recognising and trying to overcome obstacles Evaluating learning processes Managing feelings Simple budgeting	Exercise Fitness challenges Food labelling and healthy swaps Attitudes towards drugs Keeping safe and why it's important online and off line Respect for myself and others Healthy and safe choices	Family roles and responsibilities Friendship and negotiation Keeping safe online and who to go to for help Being a global citizen Being aware of how my choices affect others Awareness of how other children have different lives Expressing appreciation for family and friends	How babies grow Understanding a baby's needs Outside body changes Inside body changes Family stereotypes Challenging my ideas Preparing for transition

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Explain how my behaviour can affect how others feel and behave. Explain why it is	Describe different conflicts that might happen in family or friendship groups and how words can be used	Explain the different ways that help me learn and what I need to do to improve.	Identify things, people and places that I need to keep safe from, and can tell you some strategies for keeping	Explain how my life is influenced positively by people I know and also by people from other countries.	Explain how boys' and girls' bodies change on the inside/outside during the growing up process and can tell you

<p>important to have rules and how that helps me and others in my class learn.</p> <p>Explain why it is important to feel valued.</p>	<p>in hurtful or kind ways when conflicts happen.</p> <p>Understand the impact that these words can have.</p> <p>Explain how being involved with a conflict makes me feel and can offer strategies to help the situation. e.g. Solve It Together or asking for help.</p>	<p>Demonstrate confidence and positivity when I share my success with others.</p> <p>Explain how these feelings can be stored in my internal treasure chest and why this is important.</p>	<p>myself safe and healthy including who to go to for help.</p> <p>Express how being anxious/ scared and unwell feels.</p>	<p>Explain why my choices might affect my family, friendships and people around the world who I don't know.</p>	<p>why these changes are necessary so that their bodies can make babies when they grow up.</p> <p>Recognise how I feel about these changes happening to me and can suggest some ideas to cope with these feelings.</p>
---	--	--	--	---	--

Year 4 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Being part of a class team Being a school citizen Rights, responsibilities and democracy (school council) Rewards and consequences Group decision-making Having a voice What motivates behaviour	Challenging assumptions Judging by appearance Accepting self and others Understanding influences Understanding bullying Problem-solving Identifying how special and unique everyone is First impressions	Hopes and dreams Overcoming disappointment Creating new, realistic dreams Achieving goals Working in a group Celebrating contributions Resilience Positive attitudes	Healthier friendships Group dynamics Smoking Alcohol Assertiveness Peer pressure Celebrating inner strength	Jealousy Love and loss Memories of loved ones Getting on and Falling Out Girlfriends and boyfriends Showing appreciation to people and animals	Being unique Having a baby Girls and puberty Confidence in change Accepting change Preparing for transition Environmental change

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Explain why being listened to and listening to others is important in my school community. Explain why being democratic is important and can help me and others feel valued.	Explain a time when my first impression of someone changed as I got to know them. Explain why bullying might be difficult to spot and what to do about it if I'm not sure.	Plan and set new goals even after a disappointment. Explain what it means to be resilient and to have a positive attitude.	Recognise when people are putting me under pressure and can explain ways to resist this when I want to. Identify feelings of anxiety and fear associated with peer	Recognise how people are feeling when they miss a special person or animal. Give ways that might help me manage my feelings when missing a special person	Summarise the changes that happen to boys' and girls' bodies that prepare them for making a baby when they are older. Explain some of the choices I might make in the future and some of

	I can explain why it is good to accept myself and others for who we are.		pressure.	or animal.	the choices that I have no control over. Offer some suggestions about how I might manage my feelings when changes happen.
--	--	--	-----------	------------	--

Year 5 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Planning the forthcoming year Being a citizen Rights and responsibilities Rewards and consequences How behaviour affects groups Democracy, having a voice, participating	Cultural differences and how they can cause conflict Racism Rumours and name-calling Types of bullying Material wealth and happiness Enjoying and respecting other cultures	Future dreams The importance of money Jobs and careers Dream job and how to get there Goals in different cultures Supporting others (charity) Motivation	Smoking, including vaping Alcohol Alcohol and anti-social behaviour Emergency aid Body image Relationships with food Healthy choices Motivation and behaviour	Self-recognition and self-worth Building self-esteem Safer online communities Rights and responsibilities online Online gaming and gambling Reducing screen time Dangers of online grooming SMARRT internet safety rules	Self- and body image Influence of online and media on body image Puberty for girls Puberty for boys Conception (including IVF) Growing responsibility Coping with change Preparing for transition

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Compare my life with other people in my country and explain why we have rules, rights and responsibilities to try and make the school and the wider community a fair place.	Explain the differences between direct and indirect types of bullying and can offer a range of strategies to help myself and others if we become involved (directly or indirectly) in a bullying situation.	Compare my hopes and dreams with those of young people from different cultures. Reflect on the hopes and dreams of young people from another culture and explain how	Explain different roles that food and substances can play in people's lives. I can also explain how people can develop eating problems (disorders) relating to body image pressures and how smoking	Compare different types of friendships and the feelings associated with them. Explain how to stay safe when using technology to communicate with my friends, including how	Explain how boys and girls change during puberty and why looking after myself physically and emotionally is important. Summarise the process of conception.

<p>Explain how the actions of one person can affect another and can give examples of this from school and a wider community context.</p>	<p>Explain why racism and other forms of discrimination are unkind. I can express how I feel about discriminatory behaviour.</p>	<p>this makes me feel.</p>	<p>and alcohol misuse is unhealthy.</p> <p>Summarise different ways that I respect and value my body.</p>	<p>to stand up for myself, negotiate and to resist peer pressure.</p> <p>Apply strategies to manage my feelings and the pressures I may face to use technology in ways that may be risky or cause harm to myself or others.</p>	<p>Express how I feel about the changes that will happen to me during puberty. I accept these changes might happen at different times to my friends.</p>
--	--	----------------------------	---	---	--

Year 6 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Identifying goals for the year Global citizenship Children’s universal rights Feeling welcome and valued Choices, consequences and rewards Group dynamics Democracy, having a voice Anti-social behaviour Role-modelling	Perceptions of normality Understanding disability Power struggles Understanding bullying Inclusion/exclusion Differences as conflict, difference as celebration Empathy	Personal learning goals, in and out of school Success criteria Emotions in success Making a difference in the world Motivation Recognising achievements Compliments	Taking personal responsibility How substances affect the body Exploitation, including ‘county lines’ and gang culture Emotional and mental health Managing stress	Mental health Identifying mental health worries and sources of support Love and loss Managing feelings Power and control Assertiveness Technology safety Take responsibility with technology use	Self-image Body image Puberty and feelings Conception to birth Reflections about change Physical attraction Respect and consent Boyfriends/girlfriends Sexting Transition

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Explain how my choices can have an impact on people in my immediate community and globally. Empathise with others in my community and globally and explain	Explain ways in which difference can be a source of conflict or a cause for celebration. Show empathy with people in situations where their difference is	Explain different ways to work with others to help make the world a better place. Explain what motivates me to make the world a better place.	Explain when substances including alcohol are being used anti-socially or being misused and the impact this can have on an individual and others.	Identify when people may be experiencing feelings associated with loss and also recognise when people are trying to gain power or control. Explain the feelings	Describe how a baby develops from conception through the nine months of pregnancy, and how it is born. Recognise how I

<p>how this can influence the choices I make.</p>	<p>a source of conflict or a cause for celebration.</p>		<p>Identify and apply skills to keep myself emotionally healthy and to manage stress and pressure.</p>	<p>I might experience if I lose somebody special and when I need to stand up for myself and my friends in real or online situations. I can offer strategies to help me manage these feelings and situations.</p>	<p>feel when I reflect on becoming a teenager and how I feel about the development and birth of a baby.</p>
---	---	--	--	--	---

Year 7 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
<p>Know that everyone is unique</p> <p>Identify personal influences</p> <p>Define peer pressure</p> <p>Identify online safety consequences (including sexting)</p> <p>Know online legislation</p> <p>Know sources of help and support</p>	<p>Define bullying</p> <p>Define prejudice & discrimination</p> <p>Identify some ways the Equality Act protects against prejudice and discrimination</p> <p>Describe bystanders and their impact on bullying</p> <p>Define stereotyping</p> <p>Challenge negative behaviour and attitudes</p> <p>Know sources of help and support</p>	<p>Celebrate success and learn from mistakes</p> <p>Identify future goals (including employment)</p> <p>Know some planning skills and how to overcome challenges</p> <p>Identify safe & unsafe choices (including substances, gangs, exploitation)</p> <p>Know some emergency first aid</p> <p>Know sources of help and support</p>	<p>Define stress and anxiety</p> <p>Describe ways for managing mental health (including physical activity)</p> <p>Describe the effects of substances, nutrition, sleep, vaccination and immunisation</p> <p>Know importance of information on making health choices</p> <p>Know sources of help and support</p>	<p>Describe characteristics of healthy relationships</p> <p>Define consent</p> <p>Describe ways in which relationships can change</p> <p>Describe some emotions within friendships</p> <p>Define discerning and assertiveness</p> <p>Describe risks associated with sexting</p> <p>Know sources of help and support</p>	<p>Describe the changes that happen during puberty changes</p> <p>Describe what is meant by FGM and breast flattening/ironing</p> <p>Describe some of the responsibilities of parenthood</p> <p>Identify types of committed relationships</p> <p>Describe influences of media and the impact on self-esteem and self-image</p> <p>Know sources of help and support</p>

Disciplinary knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me

<p>Recognise that my identity is affected by a range of factors.</p> <p>Understand how peer pressure operates within groups.</p> <p>Achieve an appropriate level of independence from others while maintaining positive relationships with them.</p> <p>Recognise how I present myself online can affect what others think and feel about me which can have consequences for myself and others.</p> <p>Understand what can influence my behaviour online.</p> <p>Maintain positive on and offline relationships.</p>	<p>Identify what is important for me and what I expect from myself, taking into account the beliefs and expectations that others (e.g. friends, family, school staff) have of me</p> <p>Challenge my own and others' attitudes and values, and accept difference in others</p> <p>See the world from other people's points of view and take account of their intentions, preferences and beliefs</p> <p>Know I have choices in how I allow others to influence me</p> <p>Understand the wide range of roles in society and the variety of individuals that operate within them</p> <p>Understand what stereotyping means and its potential impact</p> <p>Know that I am a unique individual, and I can think about myself and others on many different levels (e.g. physical characteristics,</p>	<p>Identify my dreams and goals and recognise that these may change over time</p> <p>Set goals and challenges for myself, set criteria for success and celebrate when I achieve them</p> <p>Identify some of the skills that may benefit my future, including employment</p> <p>Know how to bring about change in myself and others</p> <p>Use my experiences, including mistakes and setbacks, to make appropriate changes to my plans and behaviour</p> <p>Anticipate and plan to work around or overcome potential obstacles</p> <p>Identify barriers to achieving a goal and identify how I am going to overcome them</p> <p>Explain how responsible choices enable me to move towards my dreams and goals</p> <p>Give an example of when an irresponsible or unsafe</p>	<p>Explain ways to help myself when I feel stressed and describe techniques, I use to manage my emotions</p> <p>Understand how health can be affected by emotions and know a range of ways to keep myself well and happy</p> <p>Recognise when I feel stressed and the triggers associated with this</p> <p>Understand how physical activity can help combat stress</p> <p>Understand that how I express my feelings can have a significant impact both on other people and on what happens to me</p> <p>Know about different substances and the effects they have on the body and why some people use them</p> <p>Know what makes me feel good and know how to enjoy myself (e.g. to feel calm, elated, energised, focused, engaged, have fun, etc.) - in ways that</p>	<p>Identify characteristics and benefits of positive, strong, supportive, relationships</p> <p>Understand what expectations might be of having a romantic/attraction relationship</p> <p>Understand what is meant by consent</p> <p>Recognise the range of positive qualities people bring to relationships</p> <p>Understand why respect for the other person's wishes is important in relationships</p> <p>Identify the supportive relationships in my life and recognise the characteristics of these relationships</p> <p>Know that relationships change and suggest how to manage this</p> <p>Recognise that my emotions and feelings can change regularly</p> <p>Identify why people sometimes fall out and suggest ways to manage</p>	<p>Understand the changes that happen during puberty</p> <p>Understand that practices such as female genital mutilation and breast ironing are forms of abuse</p> <p>Know where to access help if I am worried or concerned about puberty or abuse</p> <p>Express how I feel about the changes that happen during puberty, and that people develop at different rates, and what to do if I am concerned</p> <p>Know how a baby is conceived naturally and know that there are other ways a baby can be conceived, e.g. IVF</p> <p>Understand how a baby develops inside the uterus and is born</p> <p>Express the different feelings and choices that people may have and make about conception, pregnancy and having a baby</p>
--	---	--	--	--	--

	<p>personality, attainments, attitudes, values, etc.)</p> <p>Understand that positive and negative discrimination can take different forms and how it can affect people's lives</p> <p>Understand the impact of bullying, prejudice and discrimination on those involved and can think through how this can be alleviated</p> <p>Know where and how to get help if I am on the receiving end of bullying, prejudice or discrimination</p> <p>Understand what bullying is and what it is not and some of the motivations behind bullying behaviours</p> <p>Understand how respect has an impact on relationships</p> <p>Empathise with people who face prejudice and discrimination and can suggest ways to tackle this positively</p> <p>Know how it feels to be included and excluded.</p>	<p>choice could affect a person's dreams and goals</p> <p>Understand that an irresponsible or unsafe choice could affect my dreams and goals</p> <p>Demonstrate how to respond to a situation requiring first aid</p> <p>Give an example of when an irresponsible or unsafe choice could affect a person's dreams and goals</p> <p>Understand that the choices I make affect my relationships, health and future</p> <p>Take responsibility for my life, believe that I can influence what happens to me and make wise choices</p>	<p>are not damaging to myself and others</p> <p>Understand the positive impact of healthy lifestyle choices such as good nutrition, exercise and sleep on my body and mind</p> <p>Explain why everyone needs to take responsibility for their health</p> <p>Understand the role of vaccinations and can explain differing views on this</p> <p>Recognise that decisions about my health depend on having access to accurate information</p> <p>Summarise some key things I can do to sustain my wellbeing</p> <p>Express my emotions and empathise with others</p>	<p>conflict within my friendship group</p> <p>Identify emotions that can be associated with falling out</p> <p>Understand that discernment is an important skill when being a consumer of media</p> <p>Understand how discernment is important in relationships and recognise when to use assertiveness in some of my relationships</p> <p>Understand the personal and legal consequences of sexting</p> <p>Suggest skills which will keep my relationships happy and healthy</p> <p>Apply assertiveness to my relationships when appropriate</p> <p>Summarise behaviours and attitudes that could make a relationship healthy or unhealthy</p> <p>Explain my understanding of respect and authenticity</p>	<p>Appreciate that a baby comes with responsibilities</p> <p>Know there are different types of committed stable relationships and that some people may choose to have children or not</p> <p>Make links between positive, healthy family relationships and effective parenting</p> <p>Identify some of the roles and responsibilities of being a parent</p> <p>Understand that stable intimate relationships can be linked to happiness</p> <p>Know that the media can have a positive or negative impact on a person's self-esteem or body image</p> <p>Understand how self-image is linked to self-esteem and know where to go for help if I am worried about my body image or self-esteem</p> <p>Apply strategies to build my self-esteem</p>
--	---	--	--	---	--

					<p>Understand some of the emotional changes during puberty</p> <p>Know where to access support if I am worried about adolescence</p> <p>Know some ways to support myself and others during times of change</p> <p>Summarise the potential impact of changes in puberty on how I feel and suggest ways to cope with the changes</p>
--	--	--	--	--	--

Year 8 substantive and disciplinary knowledge

Substantive knowledge					
Being me in my world	Celebrating differences	Dreams and goals	Healthy me	Relationships	Changing me
Self-identity. Family and identity. Stereotypes. Personal beliefs and judgements. Managing expectations. First impressions. Respect for the beliefs of others. Active listening. Other mapping documents available through JIGSAW membership include:

Community Area- RSHE (Relationships and Changing ME)- Resources - Jigsaw Mapping Documents (for RSHE)

Community- Teachers- British Values Map

Community- Teachers- SMSC Mapping Doc

KS5 – Post 16

Our Programme:

The Futura Sixth wider support programme builds on progression each year. It interleaves topics and explores them in a wider context and greater depth as the students mature. Whilst the main programme hones in on PSHE, RSE and SMSC, we cover Fundamental British Values at regular intervals throughout the Sixth Form working with a programme called 'Votes for schools' this engages students in everyday news topics and provides the opportunity for debate and decision.

Disciplinary knowledge					
Health, Safety and Diversity	Personal Finance	RSE Relationships and Sex Education	Drugs and Risk Education	Statutory Health and Wellbeing	Careers, Progression and Destinations
To learn about the recent history of the LGBT movement in the UK To explain why its important Britain celebrates equality and diversity To explore and challenge LGBT+ prejudices and stereotypes that are out there	To understand the history of trade unions in the UK What do we mean by the terms risk and reward To evaluate if industrial action achieves its aims more often than not To understand the range of taxes that exist in the UK and the purpose of paying taxes To be able	To define and describe the human fertilisation process at a cellular level To explore what makes women and men fertile and understand ways to improve fertility To understand the various ways women can become pregnant including IVF Treatment	To consider the differences classification of drugs To explore the legal classifications of 36 drugs To understand key aspects of the UK's drug policy To consider the differences classification of drugs To explore why people take illegal drugs	How immunity to disease and infection can be acquired Describe the difference between communicable and non-communicable diseases. To evaluate the impact on society when there is a pandemic virus with no vaccination available	To define my own skills, qualities an interests To be able to make plans and decisions about post 16 education To evaluate what support I need and be able to set Targets and goals to achieve To understand what personal branding is To understand why and how

<p>To describe healthy and unhealthy expressions of anger To explore what happens both physically and emotionally when someone gets angry To identify a range of techniques to manage conflict and anger</p> <p>I know the risk factors and common symptoms for skin cancer I understand how to talk to someone with cancer I understand some of the diagnostic and treatment tools used for cancer</p>	<p>to work out the income tax paid on a range of different salaries To evaluate whether the UK's progressive tax system is fair</p> <p>Will understand the different types of bank account Understand the range of mobile banking only services Be able to evaluate which account would be most suitable for different situations</p> <p>To describe the different types of employment available To understand the different things that motivate people to work To understand the purpose of a P45, P60 and other paperwork related to employment</p> <p>I understand the impact getting into debt can have on myself and my family I can identify priority and no-priority debts I know how to access reliable advice on debt counselling</p>	<p>To describe the risks associated with house parties and alcohol To explore alcohol abuse and drink spiking and the risks associated with both To evaluate what and who impacts our decisions about our own health and the choices we make</p> <p>To increase awareness of the importance of a young person's sexual health To explore common myths about pregnancy and fertility Explore where to access further support, guidance and advice about sexual health</p> <p>To understand how a variety of different forms of contraception work To be able to identify which types of contraception would be best used by different types of people To explore which forms of contraception protect against pregnancy, STI's or both</p>	<p>To evaluate what support networks are available to help support those in need</p> <p>To understand the impact drugs can have on the individual, their family and friends To explore real life stories of those mixed up with drugs To evaluate what support networks are available to help those at risk of abusing drugs</p> <p>To learn more about LSD and the impact this drug has on society To explore the physical and mental impact on LSD users To evaluate what support networks are available to help support those who use drugs as a coping mechanism or addicted to drugs</p> <p>To learn more about MDMA / Ecstasy and the impact this drug has on society To explore the physical and mental impact on Magic Mushroom users To</p>	<p>To describe the importance of dental Hygiene and the impact sugar can have on tooth decay To understand how to manage cholesterol levels in the body To explain how a poor diet can lead to many health risks</p> <p>To explore what makes a healthy breakfast and healthy pack lunch To understand the rainbow of healthy food to have in every meal To evaluate the impacts of obesity on individuals</p> <p>To understand the complexity of eating disorders and their possible causes To understand that there are identifiable symptoms of the most prevalent eating disorders To understand what help is available for prevention and treatment of eating disorders</p> <p>To understand the short and long term impacts stress can have on our</p>	<p>to build a personal brand To understand my core key values that drive me and define me</p> <p>To understand the application process To identify the skills needed for a successful application process To understand the different component parts of an application form</p> <p>To understand how to prepare for an interview To understand the do's and don'ts during an interview To practice a mock interview</p>
---	---	---	--	--	--

	<p>To understand the importance of multiple sources of income To understand how the government raises and spends money To know what universal credit is and other state benefits available in the UK</p> <p>To understand the difference between insurance and assurance To explore a variety of types of insurance and understand the process of taking out insurance To evaluate the differences sources of financial advice that is available</p>		<p>evaluate what support networks are available to help support those who use drugs as a coping mechanism or addicted to drugs</p> <p>To learn more about Spice (Synthetic Cannabinoid) and the impact this drug has on society To explore the physical and mental impact on Spice (Synthetic Cannabinoid) users To evaluate what support networks are available to help support those who use drugs as a coping mechanism or addicted to drugs</p> <p>To understand how alcohol impacts the body To explore the consequences of alcohol misuse To evaluate the negative impact alcohol use is having on wider society I can explain how alcohol is measured and what limits are for adults To explore the consequences of alcohol consumption To evaluate when introducing alcohol</p>	<p>bodies and our life . To understand the science behind fight, flight or freeze response to stress</p> <p>To identify the components of a healthy diet To understand the difference between good cholesterol and bad cholesterol To understand how to replace unhealthy snacks and foods with healthier alternatives</p>	
--	--	--	---	--	--

			<p>to a situation can lead to very dangerous consequences</p> <p>To define the term substance misuse and understand the way drugs effect users To explore why people misuse substances To evaluate what support networks are available to help support those in need</p>		
--	--	--	--	--	--

Year 13 substantive and disciplinary knowledge

Health, Safety and Diversity	Personal Finance	RSE Relationships and Sex Education	Drugs and Risk Education	Statutory Health and Wellbeing	Careers, Progression and Destinations
Stem Cell Research + Medical Ethics Why not to Carry a knife	Inflation, Money and Careers Value for Money & Making More Going Abroad & Understanding Foreign Currency Managing a Household Budget Payment Methods Used in the UK Borrowing Money and the Risks (Debt) Foreign Exchange Rates	Porn and its impact on Society Respect Love and Relationships Revisiting STI's Menstrual Charting	Drugs - Cannabis Products Drugs - New Psychoactive Substances (Old Legal Highs) Drugs - Festivals and Nitrous Oxide Drugs and their Classifications Drugs and the War on Drugs Crack Cocaine - Drugs Ed HEROIN - Drugs Ed GHB - Drugs Ed	Improving Body Image Causes of Mental Health Looking after Health and Wellbeing Stress 3 Life Events Sleep & Exercise Stress 4 Balancing Stress and Relaxation Physical Health & Wellbeing	Writing a Personal Statement CV Writing Post 16 Options

Disciplinary knowledge					
Health, Safety and Diversity	Personal Finance	RSE Relationships and Sex Education	Drugs and Risk Education	Statutory Health and Wellbeing	Careers, Progression and Destinations

<p>To be aware of stem cell research and other forms of donation, including stem cell donation To understand the positives and negatives of stem cell research and gene technology To evaluate the medical ethics of gene technology and stem cell research</p> <p>To explain why it is wrong to ever carry a knife To understand the legal, emotional and physical consequences of carrying a knife To understand how knife crime impacts families and communities</p>	<p>Understand how the value of money can change over time To understand what causes inflation To evaluate how governments can try to control inflation</p> <p>I understand the importance of getting value for money What do we mean by the terms risk and reward How to evaluate whether the risk involved is worth the reward.</p> <p>I can identify major world currencies I can evaluate the different methods that can be used to pay for things abroad I know how to get the best value travel cards</p> <p>To explore how to calculate from an annual salary Gross Pay and Net Pay. To understand how an average house hold budget might look like To explore how the life choices we make can impact our financial situation</p>	<p>Understand the differences and similarities between sex in real relationships and that which is featured in pornography Explore how common access to pornographic material can affect attitudes and beliefs towards sex, relationships and self</p> <p>To understand the importance of respecting others and especially those we are in a relationship with To be able to describe what love is and what love is not To evaluate what support is available for someone in an abusive relationship</p> <p>To understand the way STI's spread and the groups at higher risk To increase awareness of the process of a young person's sexual health consultation at a clinic. To understand the differences between viral STI's and bacterial STI's</p>	<p>To understand the different forms and street names given to cannabis To explore why some people take cannabis To evaluate whether cannabis should be legalised in the UK</p> <p>To define the term New Psychoactive Substances and give examples To explore why NPS drugs are so dangerous to society To understand how to protect yourself from peer pressure to experiment with NPS drugs</p> <p>To understand the risks associated with parties and festivals and experimenting with drugs To understand how to stay safe at a festival or a party To evaluate whether drug testing tents at festivals will reduce drug related deaths at festivals</p> <p>To consider the differences classification of drugs To explore the legal classifications of 36</p>	<p>To recognise the impact of social media on body image Understand the concept of appearance ideals and where pressure to achieve them comes from. Be able to evaluate diet culture in the UK and its impacts</p> <p>To explore the nature nurture debate regarding Mental Health causes To be able to recognise many of the common symptoms of some mental health illnesses To be able to reflect and evaluate your own healthy lifestyle choices</p> <p>To be able to evaluate how healthy my own lifestyle is To explore what can improve and impeded on physical health and wellbeing To explore coping strategies for mental health and positive emotional wellbeing</p> <p>To understand the importance of being able to pick up and put down</p>	<p>To understand what a personal statement is To explore when a personal statement may be needed To be confident in writing a personal statement that reflects your abilities and ambitions</p> <p>To understand the purpose of a CV To understand how to create a clear and concise CV</p> <p>To be aware of a range of options available after Year 11 To be able to explore and know where to research the best progression pathway To start to decide what post 16 route you might like to take</p>
---	--	---	---	--	---

	<p>Understand how different payment cards work Be able to identify advantages and disadvantages of each method Be able to evaluate the most useful method of payment in different circumstances</p> <p>To understand that planned and unplanned borrowing are different types of debt and that I have responsibility to check credit/debt arrangements I may enter into. To understand the benefits and risks of borrowing money. Will be able to work out the cost of different personal loans based on fixed rates on interest</p> <p>I Understand how foreign exchange markets make money I understand the importance of shopping around for the best exchange rates I can work out foreign exchange calculations</p>	<p>To describe the purpose of menstrual charting and Fertility charting To know how to create your own menstrual chart To understand the support a GP or Gynaecologist can give with fertility and Menstrual health</p>	<p>drugs To understand key aspects of the UK's drug policy</p> <p>To describe how drugs are manufactured and trafficked globally To explore how different countries are dealing with the drugs trade To evaluate how governments can tackle the illicit drugs trade</p> <p>To learn more about Crack Cocaine and the impact this drug has on society To explore the physical and mental impact on Crack Cocaine users To evaluate what support networks are available to help support those who use drugs as a coping mechanism or addicted to drugs</p> <p>To learn more about Heroin and the impact this drug has on society To explore the physical and mental impact on Magic Mushroom users To evaluate what support networks are available to help support those who</p>	<p>stress To explore the common sources of stress To understand that a lot of the joys we have in life, particularly those which relax us or give us a sense of well-being relate to times when we are not thinking</p> <p>To have a range of strategies to manage social media wellness To understand the importance of striking a balance between stressful activities and relaxing activities To describe the prolonged effects on the body</p> <p>To explain the importance of exercise in maintaining a healthy lifestyle. To explore what happens when you adopt unhealthy lifestyle choices Careers Objective: To understand the work and role of a physiotherapist</p>	
--	--	---	--	--	--

			<p>use drugs as a coping mechanism or addicted to drugs</p> <p>To learn more about GHB and the impact this drug has on society To explore why GHB is the drug of choice for those committing sexual assaults To evaluate whether the UK government needs to do more to protect people from being victims of sexual assault and rape due to GHB</p>		
--	--	--	--	--	--

Futura Physical Exercise (PE) Curriculum Framework

Physical Education Curriculum Framework

Intent:

The purpose of the Futura Learning Partnership cross-phase Physical Education curriculum is to foster a life-long love for a variety of physical activities and sporting opportunities. Through this engaging curriculum they will develop a range of transferrable skills, language, knowledge and understanding which can be used in multiple settings. A student will be provided with many opportunities to develop wider personal, social and moral skills which could include resilience, communication, teamwork, independence, leadership, analysis and evaluation. Our students will develop their understanding of what engenders a healthy lifestyle both physically and the contribution this has on good mental health and well-being. Opportunities will be provided to experience a broad range of different sports safely, through participation and observations, in both the curricular and extra-curricular provision. Community links are established and advertised to encourage our students to have further opportunities for continuing participation through school extra-curricular activities and local clubs and sports. Our relevant, engaging and challenging curriculum means that students who have studied PE at a Futura school will continue to enjoy learning about Physical Education, physical activity and a variety of sports throughout their lives.

The curriculum overview has been created to develop a range of activities for students, whilst also providing specific support/opportunities for activities that are likely to be used in GCSE/A level assessment, along with links to extra-curricular opportunities.

Through creating a structured programme, specific SOL can be created for each activity which enables clear progression through years 1-11.

This allows all Futura schools to meet Ofsted requirements and those of the National Curriculum.

Leaders, teachers and students need to be able to articulate the learning journey and this structure allows this to happen.

Where activities have been suggested, an alternative can be taught in schools where this better suits the local context. An example of this could be, when gymnastics has been suggested, trampolining could be used instead if the school has the provision for this.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive and disciplinary concepts:**

P2 – EYFS

P4 – KS1

P6 – KS2

P19 – KS3

P26 – KS4

P30 - KS5

P35 - KS3 Schemes of Assessment

P 38 - Curriculum Mapping

Early Years Foundation Stage

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are playing and exploring-children investigate and experience things, and 'have a go'; active learning-children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; creating and thinking critically-children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (PSE, CL, PD) underpin and are an integral part of children's learning in all areas

Birth 2 Five Range 6 statements- Moving and Handling

- Chooses to move in a range of ways, moving freely and with confidence making changes to body shape, position and pace of movement such as slithering, shuffling, rolling, crawling, walking, running, jumping, skipping, sliding and hopping
- Experiments with different ways of moving, testing out ideas and adapting movements to reduce risk

- Jumps off an object and lands appropriately using hands, arms and body to stabilise and balance
- Negotiates space successfully when playing racing and chasing games with other children, adjusting speed or changing direction to avoid obstacles
- Travels with confidence and skill around, under, over and through balancing and climbing equipment
- Shows increasing control over an object in pushing, patting, throwing, catching or kicking it

Being Imaginative and Expressive

- Initiates new combinations of movements and gestures in order to express and respond to feelings, ideas and experiences
- Chooses particular movements, instruments/sounds, colours and materials for their own imaginative purposes

ELG – Physical Development

Gross Motor

- Negotiate space and obstacles safely, with consideration for themselves and others;
- Demonstrate strength, balance and coordination when playing;
- Move energetically, such as running, jumping, dancing, hopping, skipping and climbing.

Being Imaginative and Expressive

- Perform songs, rhymes, poems and stories with others, and – when appropriate – try to move in time with music.

EYFS Key Skills

EYFS Key Skills		
Games Travel in a range of ways Moves energetically Can change directions easily Negotiates space and obstacles safely Controls balls, beanbags, hoops and other equipment	Gymnastics Jump off of objects and lands appropriately Travel under, over and through different equipment Balance using arms and legs to stabilise Change body shape confidently.	Dance Move in time with music Respond to music by choosing movements Adapt movements when appropriate

The first-hand experiences and knowledge the children should be offered are:

- Regular PE sessions including games, dance and gymnastics opportunities.
- Daily opportunities to develop gross motor skills in the indoor and outdoor provision
- A range of equipment to navigate, explore and use including large, multi-levelled equipment and smaller resources.
- Opportunities to develop coordination
- Discussions to reflect on developing skill and effect of exercise
- Appropriate stimuli for expression through dance including a range of music

Key Vocabulary –Balance, move, travel, obstacle, under, over, through

Year Group	Substantive Knowledge	Disciplinary Knowledge	Possible Context
1	<u>Gymnastics</u> <ul style="list-style-type: none"> • Jumping: static and seating • Balances: Points and patches • Body shapes: Wide, narrow, curved 	<u>Gymnastics</u> <ul style="list-style-type: none"> - Copying skills and begin to link these together to form short sequences. - Develop basic control of movements. 	<u>Gymnastics</u> <ul style="list-style-type: none"> - Create movement phrases, with a start and finish position, using low apparatus that link at least one jump and one balance together. - work individually and in pairs
	<u>Games</u> <ul style="list-style-type: none"> • Handling a ball • Sending a ball • Receiving a ball • Chasing a ball 	<u>Games</u> <ul style="list-style-type: none"> - Practice and develop co-ordination of movement and skills. 	<u>Games</u> <ul style="list-style-type: none"> - Kicking - Striking - Tracking - Catching - Throwing <p>Develop these skills indoors and outdoors with a variety of size of balls, quoits, bean bags etc.</p>
	<u>Dance</u> <ul style="list-style-type: none"> • Copy basic motifs. • Repeat basic dance motifs. 	<u>Dance</u> <ul style="list-style-type: none"> - Copy movements, linked to a suitable stimulus, working individually and with a partner, to create short phrases. 	<u>Dance</u> <ul style="list-style-type: none"> - Create basic motifs using topic based ideas <p>Work individually and in pairs</p>

2	<u>Gymnastics</u> <ul style="list-style-type: none"> • Jumping: Turning, spinning, twisting • Balances: On isolated parts of the body • Rolls: Rocking and roll 	<u>Gymnastics</u> <p>-Copy and repeat skills and link these together with movement to create fluent sequences with a variety of simple dynamics.</p> <p>-Show basic control and body tension with use of some dynamics within sequences.</p>	<u>Gymnastics</u> <p>-Create short sequences, with a start and finish position, using low apparatus that link three or more acts together and I incorporate some change in dynamics (body shape, level).</p>
	<u>Games</u> <ul style="list-style-type: none"> • Handling a ball • Sending a ball • Receiving a ball • Chasing a ball 	<u>Games</u> <p>-Using a variety of equipment, Practice and develop co-ordination of movement and skills with increasing precision, control and accuracy.</p> <p>-Apply skills and movement, in small sided non-competitive and competitive games.</p>	<u>Games</u> <ul style="list-style-type: none"> - Kicking - Striking - Tracking - Catching - Throwing <p>Develop these skills indoors and outdoors with a variety of size of balls, quoits, bean bags etc</p> <p>Apply skills in game situations</p>
	<u>Dance</u> <ul style="list-style-type: none"> • Copy basic motifs. • Repeat basic dance motifs. • Remember dance motifs • Develop short, linked phrases <p>Basic dynamics: change of speed, change of level, change of shape.</p>	<u>Dance</u> <p>Copy repeat and link phrases, in response to a stimulus.</p> <p>-Perform movements with control and precision working individually, with a partner.</p>	<u>Dance</u> <ul style="list-style-type: none"> - Create basic motifs using topic based ideas - Remember, repeat a series of actions - Work individually and in pairs

Transition point 1:

Gymnastics

<p>HANDS</p> <p>I can plan and repeat simple sequences of actions. I can perform the basic gymnastic actions with some control and balance. I can use directions and levels to make my work look interesting</p>	<p>HEAD</p> <p>I can use shapes when performing other skills. I can describe how my body feels during exercise I am beginning to provide feedback using key words. I can feedback to others and recognise elements of high quality</p>	<p>HEART</p> <p>I am proud of my work and confident to perform in front of others. I can work safely with others and apparatus.</p>
---	--	---

-Invite KS2 PE lead / Year 3 teachers to review performances in dance, gym and games at the end of the unit to moderate assessment.
 -Sports premium funding to help with assessment – release teachers to focus on assessment with PE lead/sports coach to take lessons.
 -Year 2 to have some PE lessons in the Year 3 setting (bridging unit – KS1 Version of talent ID).

<p>3</p>	<p><u>Gymnastics</u></p> <ul style="list-style-type: none"> • Balance: Points /patches • Rolls: Straight, barrel, forward • Jump: Straight, star, tucked 	<p><u>Gymnastics</u></p> <p>-Link balances, rolls and jumps together to form a sequence individually and with a partner which demonstrate matching and contrasting shapes using a variety of apparatus.</p> <p>-Show some body tension, control and precision when balancing, rolling, and jumping when performing actions individually and in a sequence.</p>	<p><u>Gymnastics</u></p> <p>Create a sequence that includes: -a balance -A jump -A roll -A travel movement</p>
	<p><u>Dance</u></p> <ul style="list-style-type: none"> • Canon • Unison • Pathways • Dynamics • Formation 	<p><u>Dance</u></p> <p>-Communicate, remember and repeat movements on a theme through developing a range of phrases which show a variety of dynamics as well as control and precision.</p> <p>Perform individually and with a partner.</p>	<p><u>Dance</u></p> <p>-Cross curricular link to topic work</p>

	<p><u>Games</u></p> <ul style="list-style-type: none"> • Tracking a ball • Throwing a ball • Catching a ball • Dribbling a ball • Forehand • Backhand • Ready position • Underarm bowling • Overarm bowling 	<p><u>Games</u></p> <p>Practice and apply skills in a range of small sided non-competitive and competitive games showing control and precision, developing tactics and strategies to be successful.</p>	<p>Tops Games Task Cards</p> <p>Netball</p> <p>Football</p> <p>Handball</p> <p>Hockey</p> <p>Basketball</p> <p>Dodgeball</p> <p>Tag rugby</p> <p>Cricket</p> <p>Rounders</p> <p>Tennis</p> <p>Badminton</p> <p>Volleyball</p>
	<p><u>Athletics</u></p> <ul style="list-style-type: none"> • Running: Spiriting, over an obstacle • Throwing a ball: push and pull • Jumping: Height and distance 	<p><u>Athletics</u></p> <p>Practice and improve skills through non-competitive and competitive events developing individual performance with a focus on personal improvement</p> <p>Perform running, throwing and jumping actions with developing control and accuracy.</p>	<p><u>Athletics</u></p> <p>-Sprinting</p> <p>-Distance running</p> <p>-Relays</p> <p>-Hurdles</p> <p>-Javelin</p> <p>-Shot put</p> <p>-Hammer</p> <p>-Discus</p> <p>-Long jump</p> <p>-High jump</p> <p>-Long Jump</p> <p>TOPS cards: Athletics</p>
	<p><u>Outdoor and Adventurous Activities</u></p> <ul style="list-style-type: none"> • Follow and give simple instructions and apply rules 	<p><u>Outdoor and Adventurous Activities</u></p>	<p><u>Outdoor and Adventurous Activities</u></p> <p>-Problem solving games and activities</p> <p>-Orienteering</p>

	<ul style="list-style-type: none"> Orientate and follow a diagram/map <p>Plan and attempt to solve problems</p>	<p>-Develop skills of working collaboratively in team to use different strategies to solve problems, while giving and following instructions.</p> <p>-Develop skills of orientation by following a variety of different diagrams and maps to complete a task</p>	TOPS Cards: Athletics
	<p>Analysis and improvement</p> <p>To offer feedback as a class and opportunities to improve that specific skill</p>	<p>Analysis and improvement</p> <p>Using criteria set for that specific activity to peer assess</p>	Each activity will have feedback opportunities (mainly as a class). To then act on that feedback to improve.
	<p>Competitive sports and activities outside of school</p> <p>Children offered opportunities to compete in a range of activities</p>	<p>Competitive sports and activities outside of school</p> <p>Skills taught in PE lessons to be further developed through inter-school competitions and through extra-curricular provision where possible.</p> <p>Additional links to outside clubs would be provided (For that specific year group)</p>	
4	<p><u>Gymnastics</u></p> <ul style="list-style-type: none"> Balances: Individual/partner, shoulder, bridges Rolls: Straight, barrel, forward, straddle Jumps: using rotation Travel: Pathways 	<p><u>Gymnastics</u></p> <p>-Link balances, rolls and jumps together to form more complex sequences, with a wider variety of travelling actions, including apparatus working individually and with a partner. Sequences will include actions that require weight to be taken on different parts of the body through inverted movements and varying dynamics when performing with a partner.</p>	<p><u>Gymnastics</u></p> <p>Create a sequence with a partner, using apparatus, to include:</p> <ul style="list-style-type: none"> -a Jump -A roll -Individual balance -Partner balance -Inverted movement

		-Show body tension, control and precision when balancing, rolling, and jumping when performing actions individually and in a sequence.	
	<u>Dance</u> <ul style="list-style-type: none"> • Canon • Unison • Pathways • Dynamics • Formation • Reaction/action 	<u>Dance</u> <ul style="list-style-type: none"> -Communicate, remember and adapt choreographed phrases, individually and with a partner, to represent an idea. -Use pathways, levels, shapes, directions and timings to express and show a change to show variety with developing fluency and control in response to a stimulus. 	<u>Dance</u> <ul style="list-style-type: none"> -Cross curricular links to relevant topic work
	<u>Games: Striking and fielding</u> <ul style="list-style-type: none"> • Direct hit • Running between the wickets • Intercepting the ball with 1 hand • Overarm bowling • The pull shot • Stopping bouncing ground ball 	<u>Games: Striking and fielding:</u> <ul style="list-style-type: none"> -Choose where to direct a hit from a bowled ball -Use and apply basic rules of the game -Apply speed and decision -Play confidently in a variety of roles: fielder, bowler etc -Track and intercept the ball -Bowling with consistency 	<ul style="list-style-type: none"> -Cricket -Rounders
	<u>Games: Net/Wall</u> <ul style="list-style-type: none"> • Ready position • Forehand to targets • Intro to backhand • Moving to return the serve • Partner doubles • Scoring points 	<u>Games: Net/Wall</u> <ul style="list-style-type: none"> -Choose ways to send the ball to make it difficult for the opponent -Play the role of umpire -Explore shots on both sides of the body -Use a small range of racquet/hand skills 	<ul style="list-style-type: none"> -Mainly Tennis -Cricket -Rounders

		<ul style="list-style-type: none"> -Use basic defensive tactics -Work with a partner/small group to return the ball -Play competitively 	
	<p><u>Games: Invasion</u></p> <ul style="list-style-type: none"> • Basic passing • Picking up and running with the ball • Keeping possession • Evading defenders • Running into space • Pacing 	<p><u>Games: Invasion</u></p> <ul style="list-style-type: none"> -Working with a team mate to make it difficult for the opposition -Use defensive tactics -Play using marking techniques -Send and receive the ball with accuracy -Keep possession of the ball and run -Show speed and endurance -Use and apply the basic rules of the game 	<ul style="list-style-type: none"> - Hockey - Tag Rugby - Netball - Basketball - Football
	<p><u>Athletics</u></p> <ul style="list-style-type: none"> • Running: over time/distance, relays • Throwing: push and pull • Jumping: distance and height 	<p><u>Athletics</u></p> <ul style="list-style-type: none"> -Practice and improve skills of running, throwing and jumping through non-competitive and competitive practices and events while developing individual performance with a focus on personal improvement. -Perform running, throwing and jumping actions with some control and accuracy. 	<p><u>Athletics</u></p> <ul style="list-style-type: none"> -Sprinting -Distance running -Relays -Hurdles -Javelin -Shot put -Hammer -Discus -Long jump -High jump -Long Jump <p>TOPS cards: Athletics</p>

	<u>Outdoor and Adventurous Activities</u> <ul style="list-style-type: none"> • Accurately follow and give instructions and apply rules • Orientate and follow a diagram/map by identifying key symbols • Plan and apply strategies to solve problems 	<u>Outdoor and Adventurous Activities</u> <p>-Develop skills to successfully collaborate in teams and be successful in completing a range of problem solving tasks, while following and understanding rules.</p> <p>-Use skills of orientation by following a variety of different diagrams and maps to complete a task using a key and its symbols accurately.</p>	<u>Outdoor and Adventurous Activities</u> <p>-Problem solving games and activities</p> <p>-Orienteering</p> <p>-TOPS cards</p>
	Analysis and improvement To offer feedback as a class and opportunities to improve that specific skill	Analysis and improvement Using criteria set for that specific activity to peer assess	Each activity will have feedback opportunities (mainly as a class). To then act on that feedback to improve.
	Competitive sports and activities outside of school Children offered opportunities to compete in a range of activities	Competitive sports and activities outside of school Skills taught in PE lessons to be further developed through inter-school competitions and through extra-curricular provision where possible. Additional links to outside clubs would be provided (For that specific year group)	
5	<u>Gymnastics</u> <ul style="list-style-type: none"> • Balances: Symmetrical/ asymmetrical, shoulder, handstand, bridges • Rolls: Straight, forward, straddle, backwards 	<u>Gymnastics</u> <p>-Link balances, rolls and jumps together to form longer sequences, which include more complex actions that require weight to be taken through inverted movements.</p>	<u>Gymnastics</u> <p>-Create and perform a partner sequence that links six different actions; rolls, balances, jumps, inverted movements and travel. Additional links to outside clubs would be provided.	Football, Basketball, Cricket, Netball, Gymnastics, Athletics, Inclusive competitions.
SWIMMING Delivered across Key Stage 1 & 2 where appropriate	<ul style="list-style-type: none"> • Water confidence in shallow water • Water confidence deep water • Basic stroke development; alternating and simultaneous strokes, breaststroke, front crawl, backstroke • Developing endurance • Water Safety and hazards • Safe self-rescue skills 	<p>-Develop and confidently show basic skills: face in the water, floating, push and glide, jumping in, swimming under water</p> <p>-Effectively use strokes to achieve different outcomes adapting for a range of purposes and intended outcomes.</p> <p>-Swim for at least 25m including some deep water swimming, showing a consistently strong stroke</p> <p>-Be able to use appropriate survival and self-rescue skill</p>	<p>Whole class swimming lessons</p> <p>Top Up & intensive Learn to Swim sessions</p>

Transition point 2:

<u>HANDS</u> I can select and combine my skills, techniques and ideas and apply them accurately and appropriately, consistently showing precision, control and fluency. When performing I can draw on what I know about strategy, tactics and composition.	<u>HEAD</u> I can analyse and comment on skills and techniques and how these are applied in my own and others' work. I can modify and refine skills and techniques to improve my performance.	<u>HEART</u> I can Involve and motivate others to perform better I can accept critical feedback and make changes to get better.
---	---	--

	I can explain how the body reacts during different types of exercise and warm up and cool down in ways that suit the activity. I can explain why regular safe exercise is good for my fitness and health.	I can take the lead in small groups & communicate ideas effectively.
--	---	--

- Transition documents – general completed by schools, along with end of year 6 assessments with student specific information. – don't think these are in place

- Talent ID sessions to give an idea of generic performance for assessment.

- Local Sports Coordinators & Sports Partnerships to work with Primary schools to develop links and support the transition process.

- Festival opportunities for children at secondary schools, along with Sports leaders / ambassadors helping to run events in Primary schools

-Sports premium funding to help with assessment – release teachers to focus on assessment with PE lead/sports coach to take lessons.

-Transition day/week? Could we have one? Event for year 6 to secondary.

- Teacher “swap” days to see how PE is running in the other school to help professional development and feedback to appropriate schools.

7	Team games Basic techniques and strategies <ul style="list-style-type: none"> - Passing and receiving - Tackling - Shooting / scoring - Attacking and defending - Movement of the ball - Communication - Rules of the activity / sport - Hitting the ball - Throwing and catching 	Team games Ability to transfer skills into different sports (e.g. passing in football and hockey) and into competitive environments (game situations). Ability to transfer knowledge of similar rules and different components of sports (such as positioning) across to other sports. Positive approach to PE and the understanding of a healthy and active lifestyle.	Netball, Hockey, Rugby, Football, Badminton (doubles), Tennis (doubles), Table tennis (doubles), rounders, cricket, softball, Danish longball, Basketball, Dodgeball.

	Competitive sports and activities outside of school - Opportunities for students to compete in a range of activities.	Competitive sports and activities outside of school. Skills taught in PE lessons to be further developed through extra-curricular provision where possible. Additional links to outside clubs would be provided.	Sports teams offered in netball, hockey, rugby, football, tennis, cricket, athletics and rounders. Also links to local clubs advertised where available.

*KS3/4 - Not all areas have to be taught in all year groups. E.g. OAA could be taught in year 7 and 8, but not in year 9.

**KS4 – Follows similar format to KS3, but includes Health and Fitness as these can be taught for lifelong participation and understanding.

*** In line with Ofsted guidance, Futura PE curriculum should follow the same skills and activities, but could use different sports to do these in (if the same sports are not possible due to different facilities or school specific contexts e.g. one school may do gymnastics, where another may do dance or trampolining).

KS3 Schemes of Assessment

Curriculum Team: Physical Education – Scheme of assessment		Year: 7
<p>Year 7 Learning outcomes: Students will be assessed in a range of skills which can be transferred over a variety of sports and activities. Team and Individual Sports: Passing and receiving, Tackling, Shooting / scoring, Attacking and defending, Movement of the ball, Communication, Rules of the activity / sport, Hitting the ball, Throwing and catching, Racket skills/techniques, Specific skills to each athletics event. Dance/Gymnastics: Levels, Types of movement, Shapes/balances, Transitions, Pace, Creativity, Stillness, Choreography, Key terminology. OAA: Problem solving and adventurous activities skills.</p>		
Working towards	HANDS <i>The physical domain refers to physical development and tactical application.</i>	
	Assessed through practical lessons	
Extending 7 – 9	(a) Demonstrate, with precision, control and fluency, an extensive range of appropriate skills and techniques in challenging activities. (b) Make effective decisions and apply a range of tactics in challenging activities.	
Secure 5 – 6	(a) Demonstrate, with some accuracy and success, skills and techniques across a variety of sports in competitive activities. (b) Apply tactics across a variety of activities with some success.	
Developing 1 – 4	(a) Demonstrate, with some accuracy and success, skills and techniques across a variety of activities in moderately pressured practices. (b) Apply basic tactics in passive practices.	
	HEART <i>The affective domain refers to emotions, behaviours, attitudes and motivation.</i> This is to be assessed through Attitude, Independence, Readiness (AIR) reviews. (Grades 1 -4)	
	HEAD <i>The cognitive domain refers to performance analysis and application of theory.</i> To be assessed through end of rotation theory assessments (MS Teams)	

Curriculum Team: Physical Education – Scheme of assessment		Year: 8
<p>Year 8 Learning outcomes: Students will be assessed in a range of skills which can be transferred over a variety of sports and activities. Team and Individual Sports: Passing and receiving, Tackling, Shooting / scoring, Attacking and defending, Movement of the ball, Communication, Rules of the activity / sport, Hitting the ball, Throwing and catching, Racket skills/techniques, Specific skills to each athletics event. Dance/Gymnastics: Levels, Types of movement, Shapes/balances, Transitions, Pace, Creativity, Stillness, Choreography, Key terminology. OAA: Problem solving and adventurous activities skills.</p>		
Working towards	HANDS <i>The physical domain refers to physical development and tactical application.</i>	
	Assessed through practical lessons	
Extending 7 – 9	(a) Demonstrate, with consistent precision, control and fluency, an extensive range of appropriate skills and techniques in very challenging activities. (b) Consistently make effective decisions and apply a range of tactics in challenging activities.	
Secure 5 – 6	(a) Demonstrate, with consistent accuracy and success, skills and techniques across a variety of sports in competitive activities. (b) Apply tactics in competitive activities.	
Developing 1 – 4	(a) Demonstrate, with some accuracy and success, skills and techniques across a variety of activities in high pressured practices. (b) Apply tactics with some success.	
	HEART <i>The affective domain refers to emotions, behaviours, attitudes and motivation.</i> This is to be assessed through Attitude, Independence, Readiness (AIR) reviews. (Grades 1 -4)	
	HEAD <i>The cognitive domain refers to performance analysis and application of theory.</i> To be assessed through end of rotation theory assessments (MS Teams)	

Curriculum Team: Physical Education – Scheme of assessment		Year: 9
Year 9 Learning outcomes: Students will be assessed in a range of skills which can be transferred over a variety of sports and activities including: Team and Individual Sports: Passing and receiving, Tackling, Shooting / scoring, Attacking and defending, Movement of the ball, Communication, Rules of the activity / sport, Hitting the ball, Throwing and catching, Racket skills/techniques, Specific skills to each athletics event. Dance/Gymnastics: Levels, Types of movement, Shapes/balances, Transitions, Pace, Creativity, Stillness, Choreography, Key terminology. OAA: Problem solving and adventurous activities skills.		
Working towards	HANDS <i>The physical domain refers to physical development and tactical application.</i>	
	Assessed through practical lessons	
Extending 7 – 9	(a) Demonstrate, with outstanding precision, control and fluency, an extensive range of appropriate skills and techniques in exceptionally challenging activities. (b) Consistently make outstanding decisions and apply a range of tactics, often with creativity, in challenging activities.	
Secure 5 – 6	(a) Demonstrate, with consistent accuracy and success, a range of appropriate skills and techniques in challenging activities. (b) Apply complex tactics to activities.	
Developing 1 – 4	(a) Demonstrate, with some accuracy and success, skills and techniques across a variety of sports in competitive activities. (b) Apply tactics across a variety of activities with some success.	
	HEART <i>The affective domain refers to emotions, behaviours, attitudes and motivation.</i> This is to be assessed through Attitude, Independence, Readiness (AIR) reviews. (Grades 1 -4)	
	HEAD <i>The cognitive domain refers to performance analysis and application of theory.</i> To be assessed through end of rotation theory assessments (MS Teams)

Year 7 2021-2022 Curriculum Map

Week beginning (4/5 week blocks)	Girls 1 (E)	Girls 2 (W)	Boys 1 (L)	Boys 2 (S)
06.09.2021 – 04.10.2021	Netball	Badminton	Rugby	Dance
11.10.2021 – 15.11.2021	Badminton	Netball	Dance	Rugby
Theory 1	Theory focus for blocks one and two – Warm-up and cool-down			
22.11.2021 – 13.12.2021	Hockey	Gymnastics	Football	Badminton
04.01.2022 – 24.01.2022	Gymnastics	Hockey	Badminton	Football
Theory 2	Theory focus for blocks three and four – Bones and functions of the skeleton			
31.01.2022 – 28.02.2022	PS/SHA/OAA (2 weeks SH, 2 weeks outside)	Dance	Hockey	PS/SHA/OAA (2 weeks outside, 2 weeks SH)
07.03.2022 – 04.04.2022	Dance	PS/SHA/OAA (2 weeks SH, 2 weeks outside)	PS/SHA/OAA (2 weeks outside, 2 weeks SH)	Hockey
Theory 3	Theory focus for blocks five and six – Muscles of the body			
15.04.2022 – 16.05.2022	Athletics	Athletics	Athletics	Athletics
23.05.2022 – 20.06.2022	Tennis	Striking and fielding	Tennis	Striking and fielding
27.06.2022 – 18.07.2022	Striking and fielding	Tennis	Striking and fielding	Tennis
Theory 4	Theory focus for blocks seven, eight and nine – All theory from year 7			

Year 8 2021-2022 Curriculum Map

Week beginning (4/5 week blocks)	Girls 1 (E)	Girls 2 (W)	Boys 1 (L)	Boys 2 (S)
06.09.2021 – 04.10.2021	Netball	Badminton	Rugby	Gymnastics
11.10.2021 – 05.11.2021	Badminton	Netball	Gymnastics	Rugby
Theory 1	<i>Theory focus for blocks one and two – Warm-up and cool-down + Skeleton and Muscles</i>			
23.11.2021 – 13.12.2021	Hockey	Gymnastics	Football	Badminton
04.01.2022 – 24.01.2022	Gymnastics	Hockey	Badminton	Football
Theory 2	<i>Theory focus for blocks three and four – Components of fitness (Cardiovascular endurance, Muscular endurance, Speed)</i>			
31.01.2022 – 28.02.2022	Fitness	Dance	Hockey	Fitness
07.03.2022 – 04.04.2022	Dance	Fitness	Fitness	Hockey
Theory 3	<i>Theory focus for blocks three and four – Components of fitness (Flexibility, Agility, Strength)</i>			
25.04.2022 – 16.05.2022	Athletics	Athletics	Athletics	Athletics
23.05.2022 – 20.06.2022	Tennis	Striking and fielding	Tennis	Striking and fielding
27.06.2022 – 18.07.2022	Striking and fielding	Tennis	Striking and fielding	Tennis
Theory 4	<i>Theory focus for blocks seven, eight and nine – All theory from year 7 and 8</i>			

Year 9 2021-2022 Curriculum Map

Week beginning (4/5 week blocks)	Girls 1 (E)	Girls 2 (W)	Boys 1 (L)	Boys 2 (S)
06.09.2021 – 04.10.2021	Netball	Gymnastics	Rugby	Badminton
11.10.2021 – 15.11.2021	Gymnastics	Netball	Badminton	Rugby
Theory 1	<i>Theory focus for blocks one and two – Warm-up and cool-down + Skeleton and Muscles</i>			
22.11.2021 – 13.12.2021	Dance	Badminton	Football	Gymnastics
04.01.2022 – 24.01.2022	Badminton	Dance	Gymnastics	Football
Theory 2	<i>Theory focus for blocks three and four – Components of fitness (Cardiovascular endurance, Muscular endurance, Speed – Recap) Introduce Co-ordination, Balance and Reaction time</i>			
31.01.2022 – 18.02.2022	Hockey	Fitness	Basketball	Fitness
07.03.2022 – 04.04.2022	Fitness	Hockey	Fitness	Basketball
Theory 3	<i>Theory focus for blocks three and four – Components of fitness (Flexibility, Agility, Strength - Recap) Introduce greater detail in Strength - Maximal, Static, Dynamic, Explosive</i>			
25.04.2022 – 16.05.2022	Athletics	Athletics	Athletics	Athletics
23.05.2022 – 30.06.2022	Tennis	Striking and fielding	Tennis	Striking and fielding
27.06.2022 – 18.07.2022	Striking and fielding	Tennis	Striking and fielding	Tennis
Theory 4	<i>Theory focus for blocks seven, eight and nine – All theory from year 7, 8 and 9</i>			

Year 10/11 2021-2022 Curriculum Map

Week beginning Week beginning (4/5 week blocks)	Girls 1 (X/Y1)	Girls 2 (X/Y2)	Boys 3 (X/Y3)	Boys 4 (X/Y4)
06.09.2021 – 04.10.2021	Fitness (Glastonbury/AS)	Netball	Rugby	Badminton

27.06.2022 – 18.07.2022	Tennis	Striking and fielding	Tennis	Striking and fielding

Futura Religious Education (RE) Curriculum Framework

Religious Education Curriculum Framework

Intent:

At Futura Learning Partnership, we are independent of the local authority and not required to follow the national curriculum or the local RE syllabus. However our curriculum must reflect: 'that religious traditions in Great Britain are in the main Christian, whilst taking account of the teachings and practices of the other principle religious traditions present in Great Britain.' [Education Reform Act 1988]. Section 48 of the 2005 Education Act requires the inspection of religious education in schools which have a religious character. This is the Statutory Inspection of Anglican and Methodist Schools (SIAMS).

As a result, the Futura intent for Religious Education is that all children develop an awareness of major world religions and world views, including their impact on society and culture. Our pupils should be able to appreciate and respect faiths and beliefs which may be different to their own, which will equip them for their adult life, employment as well as lifelong learning. Through RE lessons, children will be able to engage with challenging questions of meaning and purpose, which will equip them to continue their studies of RE in secondary school where they will deepen their understanding of different world faiths as well as more general philosophical and ethical questions. Our pupils will be given the opportunity to develop their own religious, spiritual and philosophical

beliefs in a safe environment. Children will be able to reflect, consider, analyse, interpret and evaluate different issues which are prevalent in our society, whilst also promoting mutual respect and tolerance in line with British Values.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive and disciplinary knowledge concepts:**

Year group	Substantive Knowledge	Disciplinary Knowledge	Possible Context
EYFS	<p>Talk about the lives of the people around them and their roles in society.</p> <p>Understand the past through settings, characters and events encountered in books read in class and storytelling.</p>	<p>To start to look at different customs and festivals from around the world and cultures.</p> <p>Know some similarities and differences between different religious and cultural communities in this country, drawing on their experiences and what has been read in class.</p>	<p>To be able to compare and understand the world around them.</p>
1	<p>To ask relevant questions about a religion, person or idea</p> <p>To use key texts, artefacts and symbols to understand key aspects of a religion</p> <p>To recall facts about religions studied.</p> <p>To use religious vocabulary and start to explain the significance and meaning of the facts/practices.</p>	<p>To start to think through the enquiry question using some facts and beginning to see there could be more than one answer.</p> <p>I can verbalise and/or express my own thoughts.</p> <p>To reflect on my own feelings towards a</p>	<p>Retell, recognise and find meaning</p> <p>Explore and respond sensitively</p> <p>Begin to express ideas and opinions.</p>

		<p>religion, key figure or concept.</p> <p>To develop the ability to consider the thoughts, feelings, experiences, attitudes, beliefs and values of others</p> <p>To distinguish between the features of different religions</p>	
2	<p>To ask relevant questions about a religion, person or idea</p> <p>To use key texts, artefacts and symbols to understand key aspects of a religion</p> <p>To recall facts about religions studied.</p> <p>To use religious vocabulary and start to explain the significance and meaning of the facts/practices.</p>	<p>To start to think through the enquiry question using some facts and beginning to see there could be more than one answer.</p> <p>I can verbalise and/or express my own thoughts.</p> <p>To reflect on my own feelings and experiences towards a religion, key figure or concept.</p> <p>To develop the ability to consider the thoughts, feelings, experiences, attitudes, beliefs and values of others</p> <p>To distinguish between the features of different religions</p>	<p>Retell, recognise and find meaning</p> <p>Explore and respond sensitively</p> <p>Begin to express ideas and opinions.</p>

3	<p>To recall facts about religions I have studied, select the facts that are most significant to the enquiry and explain their importance</p> <p>To know how to use a variety of sources to gather information about a religion, person or concept</p> <p>To use artefacts, symbols and works of art to draw meaning</p> <p>To recall information about a religion's key text</p> <p>To develop the power of imagination to identify feelings such as love, wonder, forgiveness and sorrow</p> <p>To distinguish between opinion, fact and belief</p>	<p>To apply my knowledge to the enquiry question and give an answer supported by one or more facts. To express own opinions and start to support them with rationale</p> <p>Interpret religious language from a religious text and how this inspires followers</p> <p>To reflect on my own feelings, experiences and attitudes towards a religion, key figure or concept.</p> <p>To distinguish between the features of different religions</p>	<p>Describe, discover and respond fully.</p> <p>Observe and suggest reasons.</p> <p>Suggest reasons and respond thoughtfully</p>
4	<p>To recall facts about religions I have studied, select the facts that are most significant to the enquiry and explain their importance</p> <p>To know how to use a variety of sources to gather information about a religion, person or concept</p> <p>To use artefacts, symbols and works of art to draw meaning</p>	<p>To apply my knowledge to the enquiry question and give an answer supported by one or more facts. To express own opinions and start to support them with rationale</p> <p>Interpret religious language from a religious</p>	<p>Describe, discover and respond fully.</p> <p>Observe and suggest reasons.</p> <p>Suggest reasons and respond thoughtfully</p>

	<p>To recall information about a religion's key text</p> <p>To develop the power of imagination to identify feelings such as love, wonder, forgiveness and sorrow</p> <p>To distinguish between opinion, fact and belief</p>	<p>text and how this inspires followers</p> <p>To reflect on my own feelings, experiences, attitudes and beliefs towards a religion, key figure or concept.</p> <p>To distinguish between the features of different religions</p>	
5	<p>To use primary and secondary sources to find out about beliefs and values of a world religion. To recall facts about religions and explain differences in practice and interpretation within and between religion/belief systems.</p> <p>To use artefacts, symbols, works of art and poetry to draw meaning</p> <p>To recall information about a religion's key text</p> <p>To distinguish between opinion, fact and belief</p>	<p>To weigh up evidence and different arguments/aspects relevant to the enquiry question and express my answer. To express my own thoughts having reflected on them in relation to other people's.</p> <p>To evaluate the effectiveness of sources when gathering information.</p> <p>Evaluate the use of a religion's key text in how</p>	<p>Reflect and make connections between different ideas.</p> <p>Consider, compare and contrast.</p> <p>Offer ideas and clear responses.</p>

	<p>To recognise bias, caricature, prejudice and stereotyping</p>	<p>followers live their lives, including the impact of their moral choices</p> <p>To reflect on my own feelings, experiences, attitudes, beliefs and values towards a religion, key figure or concept.</p> <p>To develop the ability to see the world through the eyes of others</p> <p>To develop the ability to debate issues of religious significance with reference to evidence, argument, opinion and statements of faith</p> <p>To distinguish between the features of different religions</p>	
6	<p>To use primary and secondary sources to find out about beliefs and values of a world religion. To recall facts about religions and explain differences in practice and interpretation within and between religion/belief systems.</p>	<p>To weigh up evidence and different arguments/aspects relevant to the enquiry question and express my answer. To express my own thoughts having reflected on them in relation to other people's.</p>	<p>Reflect and make connections between different ideas.</p> <p>Consider, compare and contrast.</p> <p>Offer ideas and clear responses.</p>

	<p>To use artefacts, symbols, works of art and poetry to draw meaning, as well as any other cultural ...</p> <p>To recall information about a religion's key text</p> <p>To distinguish between opinion, fact and belief</p> <p>To recognise bias, caricature, prejudice and stereotyping</p>	<p>To evaluate the effectiveness of sources when gathering information and know what might count as good evidence when understanding religion/s.</p> <p>Evaluate the use of a religion's key text in how followers live their lives, including the impact of their moral choices</p> <p>To reflect on my own feelings, experiences, attitudes, beliefs, values and ultimate questions towards a religion, key figure or concept.</p> <p>To develop the ability to see the world through the eyes of others and to see issues from their point of view</p> <p>To develop the ability to debate issues of religious significance with reference to evidence, argument, opinion and statements of faith</p>	
--	---	--	--

		To distinguish between the features of different religions	
7	To enquire into why we study RE, looking at philosophical questions, learning about the earliest religions, different creation stories and finding out about the beliefs and values of two major world faiths. To compare practices and belief systems and recall information about religion's key texts and major festivals.	To reflect on my own beliefs and assumptions about the world, compared to other people's, and express these coherently. To weigh up evidence and different arguments relative to the enquiry question and express my answer, using key words and sources of wisdom and authority.	Define, describe, explain, evaluate, make connections, compare and contrast. Analyse ideas and offer clear and thoughtful responses.
8	To explore different views of life after death, and look at themes such as war, terrorism and peace from different religious and non-religious perspectives, focusing on a case study. To examine the topics of prejudice and discrimination, comparing how major inspirational figures have changed the course of history, inspired by their faith.	To evaluate different ideas about the afterlife, including my own. To apply what I learn to real life events and issues, and better understand the reasons behind warfare and terrorism, and also	Define, describe, explain, evaluate, make connections, compare and contrast. Analyse ideas and offer clear and thoughtful responses and articulate my own fully justified opinion.

		<p>issues of prejudice and discrimination.</p> <p>To reflect on my own behaviour in the world and my own moral code.</p>	
9	<p>To investigate and evaluate different aims of punishment, using case studies. To examine different ethical theories such as utilitarianism, deontology and situation ethics. To evaluate how different religions deal with the problem of evil and suffering.</p>	<p>To formulate a coherent argument regarding how we should deal with criminals, evaluating different approaches to the application of justice.</p> <p>To reflect on how different ethical theories are applied to real life issues like infertility treatment, A.I. and to think more critically about moral issues in general.</p> <p>To weigh up the arguments, both religious and non-religious about the relative value of pain and suffering in the world.</p>	<p>Define, describe, explain, evaluate, make connections, compare and contrast. Analyse ideas and offer clear and thoughtful responses, evaluating different viewpoints and articulating my own fully justified opinion.</p>

Glossary of key terms (and suggested topics)

EYFS

Enquiry Theme and Question	Religion	Vocabulary	Meaning
<p>Special People What makes people special?</p>	<p>Christianity</p>	<p>Jesus</p>	<p>The central figure of Christian devotion. The second person of the trinity.</p>

	Judaism	Moses	A prophet who became a religious leader, to whom the authorship of the Torah is traditionally attributed.
Christmas What is Christmas?	Christianity	Mary	The mother of Jesus, also referred to as Mother of God (as Christians believe Jesus was God incarnate).
		Joseph	Mary's husband, Jesus' earthly father.
		Frankincense	An aromatic resin used in incense and perfumes.
		Myrrh	An anointing oil.
Celebrations How do people celebrate?	Hinduism	Nowruz	Persian New Year
		Holi	The festival of colours, celebrated in the Spring.
		Vishnu	A Hindu aspect of God who, with Brahma and Shiva, forms the Trimurti.
Easter What is Easter?	Christianity	Jesus	The central figure of Christian devotion. The second person of the trinity.
		Palm Sunday	The Sunday before Easter; it commemorates Jesus' triumphal entry into Jerusalem.
		The Last Supper	The Passover meal that Jesus shared with his 12 disciples, commemorated on the Thursday before Easter. This meal is commemorated in Communion or Eucharist.
		Cross	The shape of wood that Jesus was nailed to when he was crucified on Good Friday.
		Tomb	

			The cave where Jesus was laid after his crucifixion – dug out of the ground with a stone rolled in front of it.
Story Time What can we learn from stories?	Christianity	Parable	Story with a moral or meaning about everyday life told by Jesus.
	Islam	Allah	The Islamic name for God in the Arabic language.
	Hinduism	Brahmin	Member of the social grouping from which priests are drawn.
	Sikhism	Sadhana	Sikh spiritual practice to remember God – may be praying or meditating.
		Guru Nanak	The first Guru and founder of the Sikh faith (1469-1539)
Special Places What makes places special?	Christianity	Church	Christian place of worship.
		Font	Receptacle to hold water during a Baptism.
		Altar	Table used for the celebration of Eucharist.
		Lectern	Stand supporting the Bible for reading from in Church.
	Islam	Mosque	Islamic place of worship.
		Minaret	Slim tower used as a high point from which to make the call to prayer.
		Musalla	Prayer hall.
Mihrab		An ornamental indentation in the wall of a mosque, which marks the direction of the qiblah.	

		Minbar	Raised platform in the front area of a mosque, from which sermons or speeches are given.
		Qur'an	The Islamic holy book revealed to the Prophet Muhammad.
	Judaism	Synagogue	Jewish place of worship used for public prayer, study and meeting.
		Ark	The focal point of the synagogue containing Torah scrolls.
		Torah	Jewish Law/Teaching. The five books of Moses.
		Prayer Shawls	Tallit: a four cornered garment with fringes.
		Kippah	Head covering worn during prayers or Torah study.

Year 1

Enquiry Theme and Question	Religion	Vocabulary	Meaning
Creation Story Does God want Christians to look after the world?	Christianity	Creation Story	Found in Genesis Chapter 1, the first book of the Bible (the Christian sacred text).
		Adam	The first man.
		Eve	The first woman.
Christmas Story What gifts might Christians in my town have given Jesus if he had been born here rather than in Bethlehem?	Christianity	Mary	The mother of Jesus, also referred to as Mother of God (as Christians believe Jesus was God incarnate).
		Joseph	Mary's husband, Jesus' earthly father.
		Frankincense	

		Myrrh	An aromatic resin used in incense and perfumes. An anointing oil.
Jesus as a Friend Was it always easy for Jesus to show friendship?	Christianity	Zacchaeus	An unpopular tax-collector whom Jesus befriended.
		Mary, Martha and Lazarus	Siblings who were friends of Jesus. Christians believe Jesus brought Lazarus back from the dead.
Easter – Palm Sunday Why was Jesus welcomed like a king or celebrity by the crowds on Palm Sunday?	Christianity	Palm Sunday	The Sunday before Easter: it commemorates Jesus' triumphal entry into Jerusalem.
		Palm cross	A cross made out of a palm, given to Christians who go to church on Palm Sunday.
Shabbat Is Shabbat important to Jewish children?	Judaism	Shabbat	Day of spiritual renewal and rest beginning at sunset on a Friday and finishing at nightfall on Saturday.
		Challah	Bread eaten on Shabbat, usually plaited.
Rosh Hashanah and Yom Kippur Are Rosh Hashanah and Yom Kippur important to Jewish children?	Judaism	Rosh Hashanah	'beginning of the year. Jewish new year. Feast of Trumpets.
		Yom Kippur	Day of Atonement. The holiest day of the year. Day to ask forgiveness and reflect.
		Shofar	Ancient musical horn made of ram's horn (or other Kosher animal).
Chanukah Does celebrating Chanukah make Jewish children feel close to God?	Judaism	Chanukah	An 8-day festival of lights to celebrate the re-dedication of the temple following the Maccabean victory over the Greeks.
		Chanukiah	Nine-branched candle stick used at Chanukah.
		Latkes	Potato pancakes.

		Synagogue	Jewish place of worship used for public prayer, study and meeting.
		Dreidel	A four-sided spinning top, played with during the Jewish holiday of Chanukah.
		Judas Maccabee	A Jewish priest and a son of the priest Mattathias. He led the Maccabean Revolt against the Seleucid Empire.

Year 2

Enquiry Theme and Question	Religion	Vocabulary	Meaning
What did Jesus teach Is it possible to be kind to everyone all of the time?	Christianity	Samaritan	One belonging to a race who did not normally associate with Jews.
		Parable	Story with a moral or meaning about everyday life.
Christmas – Jesus as a gift from God Why do Christians believe God gave Jesus to the world?	Christianity	Advent	The period beginning on the 4 th Sunday before Christmas. Literal translation is “coming” so this is a time of preparation, waiting for Jesus’ birth.
Passover How important is it for Jewish people to do what God asks them to do?	Judaism	Pesach	Festival commemorating the Exodus from Egypt.
		Seder	Home-based ceremonial meal during Pesach.
		Hagadah	Book used at Pesach.
		Matzah	Flat, cracker-like bread.
		Charoset	Sweet, dark-coloured paste made of apple, cinnamon, nuts etc.
		Zeroah	Roasted bone to remind Jews of the Pesach offering that was offered in the Temple in Jerusalem.

		Beitzah	Hard-boiled egg.

		Purgatory	In Catholicism, a place you can go after you die but before you reach heaven, for the purification of your soul

		<p>Enoulment</p> <p>Humanists</p> <p>Eulogy</p>	<p>The idea of when the soul comes into the body of a foetus</p> <p>People who are atheists and who focus on understanding the world using only human reason, experience and empathy and do not believe in a supernatural power/force or life after death</p> <p>A speech or piece of writing that is a tribute to someone who has just died</p>
<p>War, Terrorism and Peace A look at the reasons that wars occur using the Darfur War as a case study. Also an examination of the Just War Theory and its development.</p>	<p>Christianity Islam Buddhism</p>	<p>Civil War</p> <p>Persecution</p> <p>Genocide</p> <p>Dictator</p> <p>Injustice</p> <p>Exploitation</p> <p>Just War Theory</p>	<p>A war between citizens of the same country</p> <p>Hostility and ill-treatment, especially because of race, or political or religious beliefs</p> <p>The deliberate killing of a large number of a group of people from a particular nation or ethnic group</p> <p>A form of government in which one person or a small group of people have unlimited constitutional power</p> <p>Relating to unfairness or undeserved outcomes and/or the absence or opposite of justice</p> <p>The act of treating someone unfairly in order to benefit from their work</p> <p>A Christian theory developed by St Thomas Aquinas defining the criteria</p>

		<p>Proportionate force</p> <p>Holy War</p> <p>Jihad</p> <p>Greater Jihad</p> <p>Lesser Jihad</p> <p>Pacifism</p> <p>Political</p> <p>United Nations</p>	<p>under which wars can justifiably be fought</p> <p>Action taken which is proportionate to the threat using the least amount of force to achieve the objective</p> <p>A war declared or waged in support of a religious cause</p> <p>Literally “to strive”</p> <p>The internal struggle to follow God’s will</p> <p>The physical struggle or “holy war” in defence of Islam</p> <p>A commitment to peace and opposition to all forms of violence</p> <p>Relating to the government, power structure or public affairs of a country</p> <p>The intergovernmental organization that aims to maintain peace and security and develop friendly relations among nations</p>
<p>Prejudice & Discrimination A look at the reasons for prejudice and discrimination and an exploration of multi-faith and multi-ethnic Britain. An examination of inspirational figures like Martin Luther King and Malcolm X and a look at the Civil Rights movement and</p>	<p>Christianity Islam Buddhism Hinduism</p>	<p>Prejudice</p> <p>Discrimination</p>	<p>Judging someone or a group of people/community without actually having genuine knowledge of them</p> <p>Acting upon prejudice and treating someone differently because of their race, gender, religion, sexuality etc.</p>

<p>the Black Lives Matter movement</p>		<p>Segregation</p> <p>Stereotype</p> <p>Multi-faith society</p> <p>Multi-ethnic society</p> <p>Tolerance</p> <p>Racism</p> <p>Civil Rights</p>	<p>A policy in America which enforced in law the separation of white and non-white people in all areas of life</p> <p>Unfairly labelling people with a fixed idea or image eg. Blonde women are stupid</p> <p>A society where there are a number of different religions practiced and people who are atheist and agnostic too</p> <p>A society that contains a number of different ethnicities (racial groups living together)</p> <p>A willingness to accept behaviour and beliefs that might be different to your own</p> <p>The belief in the natural superiority of one race over another</p> <p>Equal treatment for all without discrimination based on gender, race,</p>
--	--	--	--

		Boycott	age, disability, religion, sexuality and nationality When you stop using or buying something, or dealing with a person or organization as an act of non-violent protest
--	--	---------	--

Year 9

Enquiry Theme and Question	Religion	Vocabulary	Meaning
Crime and Punishment What are the different types of crime? What are your views of what the purpose of punishment is? What are the different theories of punishment? What is forgiveness? What is social justice?	Christianity	Crime	An act against the law
		Sin	An action which breaks a religious teaching
		Justice	Either rewarding or punishing people based on their actions, ensuring that society is fair
		Deterrence	The idea that punishments should put people off committing crimes
		Retribution	The idea that punishments should make people pay for what they have done
		Reform	The idea that punishments should try and change the person so that they don't try to commit crimes again
		Protection	

		<p>Forgiveness</p> <p>Capital Punishment</p>	<p>The idea that punishments should protect society and also sometimes the criminal</p> <p>Stopping blaming someone for something that they have done and moving on</p> <p>A punishment which results in the death of the criminal and is carried out by the state</p>
<p>Ethical Issues A look at the concepts of absolute and relative morality, an exploration of utilitarianism, deontology and situation ethics as moral approaches and an examination of topics like infertility treatment, genetic engineering and Artificial Intelligence</p>	<p>Christianity Islam Buddhism</p>	<p>Absolute morality</p> <p>Relative morality</p> <p>Utilitarianism</p> <p>Deontological ethics</p>	<p>The idea that there are moral rules which must always be obeyed, e.g. "Do not steal"</p> <p>The idea that what you do depends upon the situation and /or consequences, e.g. it may be ok to steal if you are starving and have no money</p> <p>The idea of promoting the most happiness for the most people</p> <p>In this case it is your duty to ensure that you never use another person as a means to an end (for your own gain). You should never do something</p>

		<p>Situation ethics</p> <p>Infertility</p> <p>IVF</p> <p>Artificial insemination</p> <p>Surrogacy</p> <p>Genetic engineering</p> <p>Cloning</p> <p>Artificial Intelligence</p>	<p>unless you are happy for everyone else to do it as well</p> <p>Your decision should result in the most loving outcome. The type of love is selfless love; like the love a mother/father has for their child.</p> <p>Being unable to have children</p> <p>In vitro fertilisation. A process where an egg is fertilised outside of the womb</p> <p>A process whereby semen is introduced into the women's womb by artificial means. This can be either sperm from a donor or, sperm from a partner</p> <p>An arrangement whereby a woman hosts a pregnancy on behalf of another person</p> <p>Deliberately changing the characteristics of a creature by altering its genes.</p> <p>A clone is an exact genetic copy of something.</p> <p>Recreating intelligent behaviour in computers</p>
<p>Evil and suffering What is the difference between natural and moral</p>	<p>Christianity Islam Buddhism</p>	<p>Empathy</p>	<p>Being able to see things from someone else' perspective</p>

<p>evil? Christian and Buddhist perspectives on the purpose and origin of pain and suffering. Can pain ever be beneficial?</p>		<p>Natural evil</p> <p>Moral evil</p> <p>Evil</p> <p>Omnibenevolent</p> <p>Omnipotent</p> <p>Omniscient</p> <p>Free will</p> <p>Dukkha</p> <p>The Four Noble Truths</p>	<p>Suffering caused by nature. For example, natural disasters</p> <p>Suffering caused by humans using their free will. For example murder</p> <p>profound wickedness or immorality</p> <p>The idea that God is all loving</p> <p>The idea that God is all-powerful</p> <p>The idea that God is all-knowing</p> <p>The idea that we are free to make our own moral choices in life</p> <p>The idea of suffering within Buddhism</p> <p>The Buddhist idea that life involves suffering and to overcome this we must stop craving. To do this we must follow The Middle Way which is living without too little or too much</p>
<p>Atheism What are the different varieties of atheism? What is the role of the enlightenment (evolutionary theory and Big Bang theory) in shaping the rise of secularism in the</p>	<p>Christianity, monotheism</p>	<p>Negative/implicit atheist</p> <p>Agnostic</p>	<p>Someone with no opinion about God or who is not convinced that God exists</p>

<p>West? A look at Marxism and Humanism.</p>		<p>Religious atheist</p> <p>Protest atheist</p> <p>Postmodernist</p> <p>Positive atheism</p> <p>Cosmology</p> <p>Marxism</p> <p>Empiricism</p> <p>Psychological</p> <p>Sociological</p> <p>The Big Bang</p>	<p>Someone who doesn't know whether God exists or not</p> <p>Someone who has some religious beliefs but doesn't believe in God</p> <p>Evil and suffering show that God isn't real</p> <p>Both statements "God is real" and "God is not real" are true – it just depends on the person</p> <p>Someone convinced that God does not exist and who tries to convince others</p> <p>The study of the universe and its origins</p> <p>The idea that religion is a tool that is used by the rich and powerful to oppress the working classes</p> <p>A belief that all knowledge about reality can be gained through the 5 senses</p> <p>To do with the mind</p> <p>To do with society</p>
--	--	---	--

		<p>Copernicus' theory</p> <p>Humanist</p>	<p>The idea that the universe started as a tiny singularity around 15 billion years ago and exploded to create the entire cosmos</p> <p>The radical idea (at the time) that the earth orbits around the sun and in turn spins once daily on its own axis</p> <p>Someone who does not believe in anything supernatural like God, but believes in the power of human intelligence</p>
--	--	---	---

Futura Science

Curriculum Framework

Science Curriculum Framework

Intent:

The purpose of the Futura Learning Partnership cross-phase Science curriculum is to help students understand and question the world around them. It gives them the scientific knowledge and skills that they need in order to be successful in their future lives and make a contribution to the wider community. Students are empowered with a strong knowledge base that they can then use to evaluate important issues, analyse evidence and problem solve. They develop the confidence to form their own opinions and articulate themselves effectively. Our engaging and challenging curriculum means that students who have studied Science at a Futura school will continue to enjoy learning about Science and how the world works throughout their lives.

Inclusion: Our curriculum is ambitious for all and strives to address inclusion and disadvantage in its intent and implementation

Aims: Underpinning the intent are key **substantive and disciplinary concepts**

P4 – Substantive knowledge

P7 – Disciplinary knowledge/scientific skills

P10 – KS1 contexts for disciplinary knowledge

P11 – KS1 contexts for substantive knowledge

P24 – KS2 contexts for disciplinary knowledge

P25 – KS2 contexts for substantive knowledge

See accompanying Excel document for KS3 and KS4

Curriculum structure

Our cross phase science curriculum is not explicitly split into key stages, but fully covers the National Curriculum. *It focuses on 10 big ideas that are spiralled in increasing complexity over the course of the 9 years (Forces; Electricity and electromagnets; Energy; Waves; Matter; Reactions; Earth; Organisms; Ecosystems; Genes).* Scientific skills are developed throughout a student's time with us, focusing on 4 key areas that develop pupils scientific competences; planning investigations, investigate, analyse and thinking like a scientist.

Early Years Foundation Stage

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. The three Characteristics of Effective Teaching and Learning are **playing and exploring** - children investigate and experience things, and 'have a go'; **active learning** - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements; **creating and thinking critically** - children have and develop their own ideas, make links between ideas, and develop strategies for doing things. In addition, the prime areas of learning (**PSE, CL, PD**) underpin and are an integral part of children's learning in all areas.

Birth to Five Range 6 statements – Understanding the World - The World

Looks closely at similarities, differences, patterns and change in nature
 Knows about similarities and differences in relation to places, objects, materials and living things
 Talks about the features of their own immediate environment and how environments might vary from one another
 Makes observations of animals and plants and explains why some things occur, and talks about changes

ELG – Understanding the World – The World: Children at the expected level of development will:

Explore the natural world around them, making observations and drawing pictures of animals and plants
 Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class
 Understand some important processes and changes in the natural world around them

Birth to Five Range 6 statements – PSED – Managing Self

Eats a healthy range of foodstuffs and understands need for variety in food
 Describes a range of different food textures and tastes when cooking and notices changes when they are combined or exposed to hot and cold temperatures
 Describes physical changes to the body that can occur when feeling unwell, anxious, tired, angry or sad

EYFS Science Skills

<p><u>Asking simple questions and recognising that they can be answered in different ways</u></p> <p>Adults supporting children to ask questions and find the answers in free play.</p>	<p><u>Observing closely, using simple equipment</u></p> <p>Within provision children will have access to simple equipment such as magnifying glasses.</p>	<p><u>Performing simple tests</u></p> <p>Some tests such as floating and sinking and forces available through provision.</p>	<p><u>Identifying and classifying</u></p> <p>Using books as part provision to identify bugs and other wildlife.</p>	<p><u>Using their observations and ideas to suggest answers to questions</u></p> <p>Questioning by teachers and other adults to support.</p>	<p><u>Gathering and recording data to help in answering questions.</u></p> <p>With support from adults children gather and record data.</p>
---	---	--	---	--	---

First-hand experiences and pupil offer:

Science at Foundation Stage is introduced indirectly through activities that encourage children to explore, observe, think, make decisions, and discuss. This is scaffolded through skilful adult interaction. Children will have opportunities to explore a range of scientific skills such as discussion, observation, scientific vocabulary, analysis, perspectives and interpretations and empathy. They experience first-hand artefacts and materials which they use to inspire learning.

The first-hand experiences children should be offered are:

- First-hand discussions with children about changes they notice and the world around them.

- Opportunities within provision for children to explore nature, make observations and experiment.
- Exploring the school environment and local area.
- Books and learning time focussed around scientific concepts like habitats, other countries and seasons.
- Opportunities for growing plants.
- Opportunities for making food.

Key Vocabulary

<u>Animals Including Humans</u> Herbivore, carnivore, omnivore, human, fish, birds, animal, face, hair, leg, knee, arm, elbow, back, head, toes, ear, hands, eye, fingers, mouth, nose	<u>Plants</u> Tree, trunk, fruit, branch, petals, roots, leaves, bulb, flowers, seed, stem	<u>Materials</u> Material, metal, wood, rock, plastic, glass, hard, soft, paper, fabric, shiny, smooth, rough	<u>Seasonal Changes</u> Summer, Spring, Autumn, Winter, day, night, light, dark, Season, Moon, Sun	<u>Forces, Earth and Space</u> Earth, Moon, Planet, space, Sun, star	<u>Sound, Light and Electricity</u> Loud, quiet, volume, sound
---	---	--	---	---	---

Substantive knowledge

Year Group	Substantive Knowledge - Biology	Substantive Knowledge - Chemistry	Substantive Knowledge - Physics
The 10 big ideas			
	Forces		Matter
	Electricity and electromagnets:		Reactions
	Energy		Earth
	Waves		Organisms

	Ecosystems		Genes
1	Identifying Plants and structures Naming and grouping animals and humans	Naming properties of materials	Seasonal changes
2	Plant Growth & requirements of life Lifecycles & habitat & requirements for life Food Chains Exercise, food & hygiene	Suitability of materials and changing solids	
3	Functions of parts of plants, inc. water transport Skeleton & muscles Diet including nutrition	Rocks	Magnets & forces Light Waves
4	Habitat changes Comparing plant requirements Food webs Teeth and digestion	States of Matter Water Cycles	Sound Electricity
5	Comparing life cycles Impact of drugs, lack of exercise and poor Nutrition - non-communicable diseases Circulatory and respiratory system	Complex properties and testing materials	Earth & Space Forces, including gravity & resistance mechanisms
6	Classification of plants and animals Reproduction & changes to old age	Dissolving & separating materials Reversible and irreversible reactions Basic particle theory	Evolution Electricity Light

7	<p>Cells and organisation Skeletal and Muscular Systems Animal reproduction Plant reproduction (including fruit formation and seed dispersal) Health Relationships in an ecosystem Inheritance, chromosomes, DNA and genes</p>	<p>The particulate nature of matter Atoms, elements and compounds Pure and impure substances Chemical Reactions The Periodic Table Physical change Particle Model</p>	<p>Energy Changes and transfers Changes in Systems Describing motion Forces Pressure in fluids Balanced Forces and Motion Energy in matter Space Physics</p>
8	<p>Nutrition and digestion Gas exchange Systems Plants and Photosynthesis Respiration Natural Selection and evolution</p>	<p>Chemical Reactions continued The Periodic Table continued Earth structure - Earth and rocks Earth atmosphere- Climate Chemical energy</p>	<p>Calculations of fuel uses and costs in the domestic context Observed Waves Sound Waves Energy and Waves Light Waves Current electricity Static electricity Magnetism</p>
9	<p>Cells and Organisation Continued The Particulate nature of matter (chem in NC) Health</p>	<p>Atoms, Elements and Compounds continued The Periodic Table Continued The Particulate Nature of Matter continued Earth Atmosphere continued Chemical Energy continued</p>	<p>Energy Changes and Transfers continued Changes in Systems continued Energy in Matter continued Forces continued The Particulate Nature of Matter Continued Physical Change Continued Particle Model Continued Energetics (chem in NC)</p>
10	<p>Ecology Organisation (systems) Bioenergetics Homeostasis and response Ecology and evolution</p>	<p>Bonding and Structure Energy changes Chemical reactions Chemical calculations and organic I</p>	<p>Work and energy Electricity Forces and motion Waves</p>

11	Inheritance	Rates of reaction Organic II (separate only)	Magnetism and forces Separate physics (Separate only)
----	-------------	---	--

Disciplinary knowledge / scientific skills

Year Group	Planning investigations devise questions, estimate risk, plan variables	Investigate Using appropriate techniques test hypothesis and collect data	Analyse Present data, analyse patterns, draw conclusion and discuss limitations	Thinking like a scientist Construct explanations, review theories, critique claims, justify opinions	Possible Context
1	Ask simple questions.	Observe closely.			
2	Ask simple questions and recognise that they can be answered in different ways.	Observe closely using simple equipment to perform simple tests.	Use observations and ideas to suggest answers to questions.		
3	Ask relevant questions and use different types of scientific enquiries to answer them.	Gather data to help in answering questions.	Record data in a table and draw simple bar graphs.	Explain what is meant by a theory.	
4	Use results in a variety of ways to help in answering questions.	Set up simple practical enquiries which are fair tests.	Report on findings from enquiries including oral and written explanations, based on graphical data.	Use straightforward scientific evidence to state whether it supports a theory.	

5	Plan different types of scientific enquiries to answer questions.	Make systematic and careful observations, taking accurate measurements using a range of equipment. Make simple predictions.	Report and present findings from enquiries in line graphs and use these to describe patterns.	Use scientific words to report findings and suggest scientific ideas.	
6	Plan different types of scientific enquiries to answer questions.	Make predictions for results. Record data and results with increasing complexity.	Present findings from enquiries and comment on the degree of trust in the results.	Identify scientific evidence that has been used to support or refute ideas or arguments.	
7	Write an investigative question. Use variable terms: independent; dependant and control with confidence. Identify hazards and how to reduce the risk. List all the variables and focus on ones that effect the dependent variable. e.g. Chemistry – Reaction of Mg and Acid. Physics – Heat loss of different objects	Gather sufficient data for the investigation and repeat if appropriate, calculating means. Prepare a table for spaces to record all measurements. e.g. Biology - sampling Chemistry – pH of different substance	Decide a suitable chart or graph type based on the type of data collected and correctly label the independent and dependent variables. Describe the pattern found in a conclusion. e.g. Biology - Continuous and discontinuous variation Chemistry – Cooling curve	List all the facts, scientific ideas, data or conclusions that support an idea. Comment on the strength of the data in support of a claim. e.g. Chemistry – particle model Physics – energy in food	
8	Identify how to control each variable and ones that cannot be controlled. e.g. Biology – effects of exercise Biology – photosynthesis	See if repeated measurements are close. Design tables with space for further calculations. e.g. Chemistry – speed of chemical reaction Physics – resistance in a wire	Draw appropriate curve or straight line of best fit. Comment on the strength of the findings. Suggest ways to improve the method. e.g. Chemistry – speed of a chemical reaction Biology - Photosynthesis	Evaluate scientific methods and identify the reasoning behind a conclusion. e.g. Biology – Food tests Chemistry – reactivity series through experiment	
9	1 - Explain how to investigate a given question.	Carry out the method carefully and consistently,	Explain the choice of type of graph and line of best fit,	Comment on whether the evidence is scientifically	

	<p>2 - Weigh up benefits and risks of a particular investigation.</p> <p>3 - Explain why some variables are difficult to control.</p> <p>e.g.</p> <p>1-Physics – ionising radiation</p> <p>2-Biology – data for non-communicable diseases</p> <p>3-Chemistry – pollution/acid rain experiment</p>	<p>taking precise measurements to minimise error and be able to identify and remove anomalies.</p> <p>e.g.</p> <p>Physics – energy in a spring/elastic band</p> <p>Physics – weight/mass calculations</p>	<p>identifying any outliers. Justify whether anomalous results can be explained or ignored. Suggest ways to reduce measurement errors.</p> <p>e.g.</p> <p>Physics – energy in a spring/elastic band</p>	<p>accurate and relevant to the claim. Identify secondary sources which would improve or justify the conclusion. Be able to explain how you a conclusion can be defended under criticism.</p> <p>e.g.</p> <p>Biology – non-communicable diseases</p>	
10	<p>Understand how scientific methods and theories develop over time.</p> <p>Appreciate the power and limitations of science and consider any ethical issues which may arise.</p> <p>Use data to make predictions.</p>	<p>Use scientific theories and explanations to develop hypotheses.</p> <p>Apply a knowledge of a range of techniques, instruments, apparatus, and materials to select those appropriate to the experiment.</p> <p>Make and record observations and measurements using a range of apparatus and methods.</p>	<p>Construct and interpret frequency tables and diagrams, bar charts and histograms.</p> <p>Recognise or describe patterns and trends in data presented in a variety of tabular, graphical and other forms.</p> <p>Draw conclusions from given observations.</p> <p>Comment on the extent to which data is consistent with a given hypothesis.</p>	<p>Assess whether sufficient, precise measurements have been taken in an experiment.</p>	
11	<p>Use a variety of models such as representational, spatial, descriptive, computational and mathematical to solve problems, make predictions and to develop scientific explanations and understanding of familiar and unfamiliar facts.</p>	<p>Carry out experiments appropriately having due regard for the correct manipulation of apparatus, the accuracy of measurements and health and safety considerations.</p>	<p>Plot two variables from experimental or other data.</p> <p>Carrying out and represent mathematical and statistical analysis.</p> <p>Draw conclusions from given observations.</p>	<p>Evaluate methods and suggest possible improvements and further investigations.</p>	

	Evaluate risks both in practical science and the wider societal context, including perception of risk in relation to data and consequences.	Read measurements off a scale in a practical context and record appropriately.	Identify which of two or more hypotheses provides a better explanation of data in a given context.		
--	---	--	--	--	--

Key Stage 1 Contexts for Disciplinary Knowledge

In science, disciplinary knowledge is the knowledge needed to collect, understand and evaluate scientific evidence. In Key Stage 1 the focus is on three key areas that develop pupils' scientific competences; planning investigations, investigating and analysing.

Planning investigations	<p><u>Questions</u></p> <p>Pupils should explore the world around them and be given opportunities to devise their own questions through a variety of different types of scientific enquiry and recognise that questions can be answered in different ways. They should begin to use secondary sources to find answers.</p>
Investigate	<p><u>Observe closely using simple equipment to perform simple tests and use appropriate techniques to test hypothesis and collect data.</u></p> <p>Pupils should have opportunities to observe closely, use simple features to compare objects, materials and living things. They should begin to identify, sort and group objects, materials and living things giving reasons for their choices. Pupils should use simple measurements and scientific equipment to gather data, carry out simple tests and record simple data.</p>

Analyse	<p><u>Present data, analyse patterns, draw conclusion.</u></p> <p>Pupils should be supported to identify patterns and relationships in their results and given opportunities to discuss their results and how they found them out. They should record and communicate their findings in a range of ways and begin to use simple scientific language to express their conclusions.</p>
----------------	--

Key Stage 1 Contexts for Substantive Knowledge

Scientific knowledge and conceptual understanding is developed through the disciplines of biology, chemistry and physics. It is essential that pupils develop secure understanding of knowledge and concepts in order to progress to the next stage. Pupils are given opportunities to experience different types of scientific enquiries to help them answer scientific questions about the world around them.

Year 1

Children should be given the opportunity to ask questions throughout each subject area		
Substantive Knowledge	Disciplinary Knowledge	Possible contexts
Biology - Organisms.		
Identifying Plants and structures	Observe plants in the surrounding environment.	<p><u>Where do plants grow?</u> Observe a variety of plants growing in the school environment. Pupils use a camera/Ipad to take photographs and group photographs identifying and labelling common features.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Where is the plant/tree growing? • Can you describe the habitat where it grows?

	<p>Identify and classify types of trees and flowering plant.</p>	<ul style="list-style-type: none"> • Are all the plants the same in the habitat? • What are the similarities/differences of the plants in this habitat? • What do you notice about these plants? • Why might the plants look different? • What happens to it during different seasons? <p><u>How can we compare plants and trees?</u></p> <p>Go on a welly walk around the school grounds and collect different leaves.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What does a leaf look like? • How are these leaves different/similar? • What shape/colour is your leaf? • Where did you find your leaf? How do you think it got there? • Does your leaf have hairs/veins? Why do you think they are there? • Does your leaf look the same on both sides? <p>Look closely at a variety of different wild and garden plants, including deciduous and evergreen trees. Draw a detailed picture of a plant/make a model/playdough plant and label basic structure.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Where is the stem/leaf/petal/root? • Why does a plant have roots? • Why do plants have flowers? • Can you tell me the name of this part? • What does each part of the plant do? <p><u>What do plants need to grow?</u></p> <p>Give children the opportunity to grow flowers and vegetables, recording through photographs, labels and captions how they have changed over time.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Where is the best place to grow flowers/vegetables? • What do they need to grow? • How do you know?
--	--	---

		<ul style="list-style-type: none">• How have they changed? Why do you think they have changed?
Naming and grouping animals and humans	<p>Recognise and label basic parts of animals including humans.</p> <p>Identify, name, sort and group different types of animals.</p> <p>Observe differences between animals.</p>	<p><u>What are the basic parts of the human body and senses?</u> Name and label a diagram of the human body including parts of the body associated with each sense.</p> <p>Give pupils opportunities to use their senses:</p> <ul style="list-style-type: none">• Identify common smells in scent pots e.g. herbs• Taste a variety of fruits and describe the taste (be aware of allergies)• Use feely bags and describe what is inside the bag• Identify various common recorded sounds• Work in pairs, one child describes a picture the other draws it, then look at the picture and draw. Was it easy to draw a picture without seeing it? <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none">• What different parts of the body have you drawn?• What does that part of the body do?• What does this part help us to do?• Which part of the body helps us to smell etc?• What do you think happens inside? <p><u>Are all animals the same?</u> Using photographs or toy animals label and sort into groups: amphibians, fish, reptiles, birds and mammals identifying similarities and differences.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none">• What are the main features of amphibians?• What are the main features of fish?• What are the main features of reptiles?

		<ul style="list-style-type: none"> • What are the main features of birds? • What are the main features of mammals? • What are the differences between the different types of animals? • What are the similarities between the animals? • How will you group your animals? <p>Learn about looking after different types of pets from the 5 animal groups and what they need to survive: food, water, warmth, shelter. Make a class pet/animal book to display work.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What do animals need to survive? • What happens if animals cannot get these things? <p>Identify and group carnivores, herbivores and omnivores. Identify some features of each e.g. carnivores have sharper teeth for tearing meat.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What is a carnivore/herbivore/omnivore? • How could you sort them? <p>What labels will you write for your groups?</p>
Chemistry - Matter		
<p>Naming properties of materials</p>	<p>Interact with and compare a variety of materials, recognising their properties.</p> <p>Use materials in different real-life contexts</p>	<p><u>What are the properties of different materials?</u></p> <p>Explore and name everyday materials and their properties – use feely bags for different materials and pupils use their sense of touch to describe.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What does it feel like? Provide a list of adjectives to describe materials for children to use if needed. • Have you felt anything similar before? • Is it easy to guess the material using only your sense of touch? Why/why not? <p>Write material property labels and display with materials for children to sort and group.</p>

	<p>Begin to test different materials.</p>	<p>Give pupils the opportunity to explore materials independently suggesting what they could be used for.</p> <p><u>Which materials will be suitable to make a pet bed?</u> Make a pet bed using suitable materials describing why they have chosen each material.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Which pet are you making a bed for? • What do you think makes a good pet bed? • What properties of materials will be most suitable for your bed? • How will we join the materials together? • How will you know if your bed is successful? <p><u>Which materials are most suitable to make a bridge?</u> Children investigate a variety of known materials and decide which materials will be most suitable to make a bridge.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Which bridge shapes are we testing? • How will we know which bridge shape is the strongest? • How can we make it a fair comparison? • How many pennies do you predict this bridge will hold? • How will you know when to stop counting the pennies? Where will you write that down? • Which bridge shape did you find to be the strongest? The weakest? <p>What do you think makes a good bridge?</p>
Physics - Earth		
Seasonal changes	Observe changes in the environment and weather throughout the year.	<u>What do we know about different seasons?</u> Look at a variety of photographs, including photographs of the school

	<p>Monitor and record simple weather data.</p>	<p>playground showing the four seasons.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What is the weather like in winter/spring/summer/autumn? • What is the temperature in each of the four seasons? • What happens to the trees/plants in each of the four seasons? • What happens to the day length in the four seasons? • Why have things changed? • What have you observed? <p>Observe and list changes that occur in the four seasons including weather, day length, deciduous plants.</p> <p>Make a season wheel. Draw and label the four seasons including observations recorded on the list.</p> <ul style="list-style-type: none"> • Can you use your seasons wheel to describe what happens in each of the four seasons? <p><u>What do we know about the weather?</u></p> <p>Record the weather in a chart in terms 1, 3, 4, 6 (four seasons) and compare similarities and differences.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What is the difference in the weather in the four seasons? <p>Are there any similarities in the weather in the four seasons?</p>
<p>Key Vocabulary Year 1</p>		
<p><u>Plants</u> tree, leaves, flowers, blossoms, buds, petals, fruit, roots, bulb, seed, trunk, branches, stem, deciduous, evergreen, habitat, vegetables. Animals inc humans Fish, amphibians, reptiles, birds, mammals, carnivores, herbivores, omnivores, pets, wild, habitats Head, neck, arms, elbows, legs, knees, face, ears, eyes, hair, mouth, teeth, senses, touch, smell, taste, hearing, sight</p> <p><u>Naming materials</u></p>		

Wood, plastic, glass, metal, water, rock, hard, soft, stretchy, stiff, shiny, dull, rough, smooth, bendy, waterproof, absorbent, opaque, transparent, floating, sinking, brick, fabric, paper, elastic, foil

Seasonal changes

Season, autumn, spring, summer, winter, weather, Sun, Earth, day, night, wind, rain, sunny, snow, cloudy, hot, cold

Working Scientifically

Question, equipment, test, name, sort, same, similar, different

Year 2

Substantive Knowledge	Disciplinary Knowledge	Possible Context
Children should be given the opportunity to ask questions throughout each subject area and recognise different ways of answering them.		
Biology - Organisms		
<p>Plant Growth and requirements of life</p>	<p>Observe plants growing from seeds, recording changes over time.</p> <p>Test the impact of different conditions on plants.</p>	<p><u>What do we know about plant growth?</u> Pupils grow a variety of seeds and bulbs including sunflowers and beans which germinate and grow quickly so that children can record each stage as it happens.</p> <p><u>What do plants need to stay healthy? How can we test this?</u> Identify that plants need light and water to stay healthy. Pupils investigate what happens to plants, seeds or bulbs when one of the variables (light or water) is changed. Children raise questions they would like to investigate, e.g. How long can plants last without water/light? Does it matter if the plant is inside or outside? How will less light affect the plant? Discuss the importance of a fair test. Pupils measure growth and record in a chart/graph. Discuss their findings.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What do you notice about the plants? Can you see any differences? • Why might the plants look different?

	<p>Test the effects of physical activity on the human body.</p> <p>Identify ways to stay clean and healthy.</p>	<p>least sugar/most healthy to most sugar/unhealthiest food/drink.</p> <p>Make a healthy cereal bar using the Eatwell guide and choosing healthy options/healthy sugars.</p> <p><u>What happens to your body when you exercise?</u> Children take part in physical activity and list changes to their body. Identify why it is important for us to exercise focusing on the role of the heart, lungs and muscles.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Why is it important to exercise? • What happens to our bodies when we exercise? • How does exercise help our body to be healthy? <p><u>Why do we need to stay clean?</u> Discuss the importance of hygiene to keep your body healthy. Look at the way germs/viruses are spread through not washing your hands.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • How can we keep our bodies clean? • Why is it important to keep clean? • What could happen to us if we did not keep clean? <p><u>How are viruses transferred?</u> <u>Glitter experiment.</u> Pupils put glitter on their hands and touch objects to show how germs can be transferred easily. Pupils use a cloth, water then soap to clean glitter off their hands and decide the best method to clean their hands describing reasons for ideas.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • How do germs transfer from one person to another? • How easy is it for germs to transfer to different surfaces? • What is the best way to clean germs from our hands or surfaces?
--	--	--

		Can you write instructions on a poster to tell people how to clean their hands effectively?
--	--	---

Biology - Ecosystems		
Lifecycles and Requirements for life	Observe changes over time in living things.	<p><u>What is a lifecycle?</u> Pupils look at a variety of life cycles, human, animal, insect and plant. Understand that each stage shows growth and match offspring to parents. Identify the main stages of each and draw, label and discuss what happens at each stage.</p> <p><u>How do we know if something is alive?</u> Identify the basic needs of humans for survival: food, water, air/oxygen and discuss what would happen if one of these requirements were missing. Pupils sort photographs/objects into groups labelled living, dead or never alive and give reasons for their groupings.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • Are any of these alive? • Did any of these used to be alive? • Have any of these never been alive? • How do you know? <p>What else could go in that hoop? Pupils investigate a variety of habitats including microhabitats on the school grounds.</p>

<p>Habitats</p>	<p>Observe habitats in the surrounding environment.</p> <p>Identify and compare different habitats.</p>	<p><u>What is a habitat?</u> Pupils investigate a variety of habitats including desert, rainforest, ocean, woodland, polar, woodland, meadow. Describe each habitat specifically looking at climate, plants and animals. Give pupils the opportunity to look at secondary sources to research information.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • How are you going to answer the question? • Where are you going to gather your data? • How can we investigate different types of habitats? • How could you record which animal lives in which habitat? • What does this part on your chart/map mean? • Do any animals/ plants share their habitats? Why might this be? What are the characteristics of these habitats? <p>Identify adaptations of plants and animals which allow them to survive in their habitat and how their requirements for life are met in their habitat.</p> <p><u>How can we investigate microhabitats?</u> Pupils identify different microhabitats in the school grounds and take photographs/video clips, recording in a tally chart the minibeasts which live there and describe the conditions of the habitat.</p> <p>Pupils draw pictures/take photographs of two microhabitats and compare similarities and differences and discuss whether the conditions of the microhabitat affect the number and type of plants and animals that live there.</p> <p><u>Question to support discussion</u></p> <ul style="list-style-type: none"> • Drawing on what you know about habitats, what is a microhabitat? • What would live in a microhabitat? • What different types of microhabitats are there? • Can you describe a microhabitat? <p>How will we investigate different microhabitats? How will you record what you find in each microhabitat?</p>
------------------------	--	---

<p>Food Chains</p>	<p>Identify and compare the different parts of food chains and their dependency on one another.</p>	<p><u>What is a food chain?</u> Look at a variety of food chains of animals in different habitats. Identify that the animals and plants in a habitat are linked together through their food chain and depend on one another for survival. Play games giving pupils the opportunity to sort photographs or objects into food chains and describe them ensuring they use the scientific vocabulary 'producer' to describe plants and 'consumers' to describe animals which eat the plants and other animals in the food chain. Ensure pupils understand the role of the sun in the food chain and that plants need sunlight in order to make food and grow.</p> <p>Challenge pupils to make the longest food chain they can and label. Pupils create a food chain with humans as a consumer and discuss.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • What is a producer? • What is a consumer? • What does a food chain always begin with? • What does it mean if a consumer is dependent on a producer? <p>Can you explain what happens in a food chain?</p>
<p>Chemistry- Matter</p>		
<p>Suitability of materials and changing solids</p>	<p>Identify more complex features of materials Test the suitability of materials in different contexts. Gather and record data about the effectiveness of materials in different contexts. Used gathered data and observations to predict the suitability of a material.</p>	<p><u>How can we investigate the suitability of different materials?</u> Pupils identify the suitability of materials for various jobs through creating investigations to test a variety of materials and their properties, e.g. the most suitable material to make a visor to test whether a material is transparent, translucent or opaque.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • How could you test it? • Which is the most / least transparent? How do you know? • What other words could you use to describe the materials? • Does everyone in your group agree? Can you explain to the others why you have put that material there? • Can you tell me another way to test this object?

		<p>Pupils predict and reason why one material is more suitable than another based on simple tests carried out e.g. to investigate which materials are suitable to make a boat they will test materials which are waterproof and will float.</p> <p>Record results in table/chart.</p> <p><u>Questions to support discussion</u></p> <ul style="list-style-type: none"> • How will you know if it is waterproof? • How much water will you use? How long will you put it in the water for? • Can you order the materials: most to least waterproof? • Do you think everyone else will find the same result? <p>How else could you test the material?</p>
--	--	---

Key Vocabulary Year 2

Plant Growth and requirements of life

Seed, bulb, young, mature, healthy, growth, water, light, temperature, storing food, stage

Lifecycles and habitats

Living, dead, healthy, adult, young, baby, toddler, child, teenage, egg, chick, chicken, pupa, caterpillar, butterfly, spawn, tadpole, frog, lamb, sheep, lifecycle, habitat, micro-habitat, environment, shelter, seashore, ocean, woodland, rainforest

Food chains

Consumer, producer, predator, prey, herbivores, carnivores, omnivores

Exercise and nutrition

Hygiene, food, food groups, carbohydrate, protein, fat, sugar, dairy, fruit, vegetable, healthy, unhealthy, muscles, energy, teeth

Suitability of materials

Wood, plastic, glass, metal, water, cardboard, rock, hard, soft, stretchy, stiff, shiny, dull, rough, smooth, bendy, waterproof, absorbent, opaque, transparent, translucent, floating, sinking, brick, fabric, paper, elastic, foil, squashing, bending, twisting, stretching, suitable

Working Scientifically

Question, equipment, test, name, sort, same, similar, different, record, results, table, predict

Key Stage 2 Contexts for Disciplinary Knowledge

In science, disciplinary knowledge is the knowledge needed to collect, understand and evaluate scientific evidence. In Key Stage 2 the focus is on four key areas that develop pupils' scientific competences; planning investigations, investigating, analysing and thinking like a scientist.

Key stage 2

Planning investigations	<u>Questions</u> Pupils should develop their ability to ask scientific questions and use scientific enquiries to answer them. They should begin to plan their own different types of enquiries, taking variables into consideration.
Investigate	<u>Observe closely using simple equipment to perform simple tests and use appropriate techniques to test hypothesis and collect data.</u> Pupils should have opportunities to gather data from practical enquiries, becoming more systematic and ensuring measurements are accurate, while recording data effectively. They should be aware of fair testing principles and begin to apply these when they are carrying out enquiries. They should make predictions based on their scientific understanding.
Analyse	<u>Present data, analyse patterns, draw conclusions.</u> Pupils should be supported to present their results using increasingly complex methods. Bar graphs should be used before they progress onto line graphs. They should explain their results both orally and in writing. Pupils should also begin to comment on how trustworthy their results are and explain why this is.
Thinking Like a Scientist	<u>Construct explanations, review theories, critique claims, justify opinions</u>

	Pupils should be taught what a theory is and to recognise when straightforward scientific evidence supports a theory. They should be able to use scientific vocabulary to report the findings of investigations and use their findings to suggest, support and refute their own ideas and arguments.
--	--

Key Stage 2 Contexts for Substantive Knowledge

Scientific knowledge and conceptual understanding is developed through the disciplines of biology, chemistry and physics. It is essential that pupils develop secure understanding of knowledge and concepts in order to progress to the next stage. Pupils are given opportunities to experience different types of scientific enquiries to help them answer scientific questions about the world around them. All possible contexts for KS2 taken from PSST Focused Assessments found at: <https://pstt.org.uk/resources/curriculum-materials/assessment>

Year 3

Children should be given the opportunity to ask questions and perform enquiries throughout each subject area. They should begin recognise scientific theories and the evidence used by scientists to support these.		
Substantive Knowledge	Disciplinary Knowledge	Possible context
Biology - Organisms		
Functions of parts of plants, inc. water transport	Identify parts of the process for pollination, water transport and seed dispersal.	<u>Celery / Carnation Experiment</u> Put a piece of celery or a carnation in food-coloured water. Predict what will happen and record results. What will happen if the stalk is split and put in two separate containers with differently coloured water sources? Discuss the part of the plant that allows the water to be transported.
Skeleton & muscles		

Diet including nutrition	<p>Identify the different muscles and parts of the skeleton.</p> <p>Compare the functions of different muscles.</p> <p>Compare the muscles and skeletons of different animals.</p>	<p><u>Human skeleton investigation</u> Discuss differences between human skeletons, taking care when discussing differences between children in class. Consider which bones can be more easily measured e.g. skull, foot, part of arm/leg etc. Ask children to use these ideas to create a question to be investigated, e.g. Are adult heads bigger than children’s heads? Do taller children have longer arms/bigger feet etc? Am I/Are you a square? (look at arm span versus height) Ask children to explain how they will answer their question. Support them to carry out their pattern seeking enquiries to answer their own questions.</p>
	<p>Identify the impact of different food groups on the body.</p> <p>Compare nutritional information of different foods.</p> <p>Identify nutritional needs for different animals.</p>	<p><u>What is on Your Plate?</u> Using resources such as the Eatwell guide, discuss what each food group does for a body, introducing a full range of vocabulary by examining the nutritional information on food products. Make links between each food group and how they affect / are used by the human body.</p>
Physics – Earth, Magnets and forces, Light		
Rocks	<p>Observe different types of rocks and soils.</p> <p>Identify and classify different types of rocks.</p> <p>Identify composition of soil layers</p> <p>Test the properties of rocks.</p> <p>Identify how fossils are formed.</p>	<p><u>Rock Reports</u> Provide a purpose for the investigation e.g. to find the best material for a new paved area in school. Suggest that you would like to find out which rock would last the longest/be the least wearing/the strongest. Decide whether to do a rub test and/or a scratch test etc. Rub: Children to rub rocks on sandpaper and collect scrapings onto white paper. Scratch: Try scratching the rocks with e.g. a fingernail, a matchstick, a metal nail etc. Ask children to order the rocks and justify their selection of strongest rock. How will you report your findings (to persuade), e.g. draw, write, present?</p>

<p>Magnets and forces</p>	<p>Test the magnetic properties of various materials.</p> <p>Record results of tests in simple tables.</p>	<p><u>Magnet Tests</u> Provide the children with a collection of magnets and other materials (e.g. card, fabric, tissue, thin wood, aluminium foil, paperclips) to explore. Ask them to find out ways to test whether the magnets are all equally strong e.g. through paper/card or layers of each, how close magnet needs to be before it attracts a paper clip etc. Ask the children to report their findings verbally, e.g. explaining how they carried out their investigation to their peers. As a class, discuss the different ways of testing magnet strength and talk about the advantages and disadvantages of each approach. Discuss why it is a good idea to try different ways of answering a question (to get a more reliable answer).</p>
<p>Light</p>	<p>Observe shadows and reflections and the effect of the absence of light.</p> <p>Identify the dangers of direct sunlight.</p> <p>Record data on shadows and reflection.</p>	<p><u>Shadow Making</u> Provide the children with a collection of materials to explore (some transparent, some translucent and some opaque). Ask the children to investigate which materials form shadows when a torch is shone on them (e.g. colour, darkness, no shadow?) Ask them to record their observations to answer the question about which materials form a shadow (e.g. draw, write, sort, photo, order, table). Can they categorise or order the materials and/or shadows in some way?</p>
<p>Key Vocabulary Year 3</p>		
<p>Functions of parts of plants, inc. water transport Roots, stem, trunk, leaves, fruit, flowers, structure, flowering, transport, support, nutrition, reproduction, life cycle, pollination, seed formation, seed dispersal, pollinators, fertiliser</p> <p>Skeleton & muscles Bones, limbs, movement, support, function, nutrition, growth</p> <p>Diet including nutrition</p>		

nutrition, growth, healthy, unhealthy, hygiene, food, food groups, carbohydrate, protein, fat, sugar, dairy, fruit, vegetable, healthy, unhealthy, muscles, energy, teeth

Rocks

Fossils, soil, organic, grains, crystals, sedimentary, layers

Magnets & forces

Surfaces, attract, repel, poles, magnetic, strength

Light

Dark, reflective, shadow, opaque, translucent, transparent, mirror, light source, Sun

WS

Compare, microscope, investigate, pattern, measure, enquiry, gather, data, tables, bar charts, similarities, differences, changes, record, scientific idea

Year 4

Substantive Knowledge	Disciplinary Knowledge	Possible Context
Children should be given the opportunity to ask questions and perform enquiries throughout each subject area. They should begin recognise scientific theories and the evidence used by scientists to support these.		
Biology –Ecosystems, Organisms		
Comparing Plant Requirements	Identify requirements for life and growth of plants. Test and observe the effect of not having one or more of the requirements for growth. Draw bar graphs based the data.	Plant Growing Choose a relatively fast-growing plant suitable for indoor growth. Discuss the different requirements for growth and talk about how we can control these by planting and placing our plants in different places. Get the children to label and place the plants in as many different places as possible, perhaps also placing one that will not be watered. Have the children make predictions about how the plants will grow and get them to collect measurements regularly before presenting these results in a bar graph.

<p>Habitat Changes</p>	<p>Observe and identify changes in the environment, particularly those that pose a danger to living things.</p> <p>Identify ways in which the environment can be protected.</p>	<p><u>Local Survey</u></p> <p>Recap previous work on classifying and habitats. Consider school grounds/local area as a habitat and go on a search for living things (incl. plants) in the grounds. Take a camera/draw/make lists of larger things and collect smaller things. Classify the living things into groups e.g. vertebrates / invertebrates / plants. Create subsets within groups e.g. flowering / non-flowering plants, birds / mammals/ invertebrates etc.</p> <p>Ensure the habitat for each creature or plant is recorded and discuss whether there a relationship between a habitat and the types of living thing found there.</p>
<p>Food Webs</p>	<p>Identify and record different parts of a food web and their dependency on one another.</p> <p>Identify the impact of removing part of the food web.</p>	<p><u>Local Survey Continued</u></p> <p>If a local survey has already been carried out for habitats, use the same information, otherwise go out into the school grounds or local area and search for living things.</p> <p>Use this to compile a food web, describing the relationships or producers and consumers and how these are linked to one another.</p>

<p>Teeth and Digestion</p>	<p>Identify different parts of the digestive system and their functions.</p> <p>Observe and model the process of digestion using simple equipment.</p> <p>Identify different teeth and their functions.</p>	<p>Teeth (Eggs) in Liquid</p> <p>Discuss how children look after their teeth. Explain that we will be using hard boiled eggs to represent teeth to investigate tooth decay. As a class set up a fair test to investigate the effects that different liquids have on teeth e.g. cola, water, vinegar, milk, sports drink and orange juice. Discuss how they can make the comparison fair, i.e. as to quantity of liquid, types of containers, time and location (if using milk do they all need to be in the fridge?)</p> <p>Leave for one week, although children can check on the experiment daily to see if they can notice and changes. After one week, unveil the eggs by tipping into a white bowl and photograph. Children to record their observations (look, feel, smell, etc.) and rate the eggs in order of damage to shell observed. Children to consider how they could improve the test and what further questions arise that they could investigate.</p>
<p>Chemistry- Matter, Earth</p>		
<p>States of Matter</p>	<p>Identify and compare materials based on their state.</p> <p>Observe changes in materials as they change state.</p> <p>Test and measure the effect of temperature on materials.</p> <p>Record results of testing in tables and bar graphs.</p>	<p>Dunking Biscuits</p> <p>Discuss context/problem e.g. dunk breacktime biscuit in tea and leave in too long.</p> <p>Discuss possible questions to investigate, e.g. Which is the best biscuit type/brand/shape? Which is the best cup/temperature for dunking? Share ideas for how to test the biscuits e.g. time how long to fall, count dunks before falls etc.</p> <p>Different groups could investigate different things to pool evidence for recommendations.</p> <p>Discuss practicalities: kit/time available etc. Work in groups to carry out dunking investigations.</p> <p>Pause to share ideas and discuss problems.</p> <p>Discuss findings across the class and consider fairness and accuracy of methods.</p>

		Ask children to talk about / draw a diagram / write about their findings, with a focus on suggesting improvements to their method.
Water Cycles	Identify different parts of the water cycle and relate them to states of matter.	<p><u>Drying Day</u></p> <p>Plan an investigation to reach a conclusion within a real-life context, e.g. Where is the best place to dry your washing? Which conditions are the best to dry materials by evaporation? Make a list of different places/conditions (e.g. temperature or draughtiness). Discuss how to know if it is dry e.g. dry to touch, handprint no longer visible, no imprint on tissue.</p> <p>In small groups, children to decide on the type of material (cloth/paper towels), quantity of water, locations to test evaporation (e.g. could arrange washing lines in different locations around the school) and how often to observe/check. Provide measuring equipment including thermometers, jugs, rulers. Pupils could record their method before/after set up.</p> <p>N.B. Paper towels can dry in an afternoon, heavy fabric will take longer.</p>
Physics – Waves, Electricity		
Sound	<p>Identify the way sound is made, including the strength of vibrations, and how this enables humans to hear.</p> <p>Observe and compare different objects and the sounds they produce.</p> <p>Test materials, measuring their insulation against sound.</p>	<p><u>Investigating Pitch</u></p> <p>Show children some homemade ‘musical instruments’: elastic bands over shoe box, ‘straw flute/pan pipes’, ‘sound sandwich’ (lolly stick and straw harmonica), stretched balloon ‘drum skin’ over tube, glass bottle containing water to blow or tap. Explore how to play them to make a sound and ask the children to suggest which parts are vibrating. Ask children to record a range of questions that they could investigate, focusing on changing pitch (e.g. How does the width of the elastic band affect pitch?) Children then work in small groups investigating their questions, considering different ways to alter pitch.</p>

<p>Electricity</p>	<p>Identify the function of various components by constructing simple circuits.</p> <p>Test complete and incomplete circuits.</p> <p>Identify appliances which run on electricity.</p> <p>Test different materials for conductivity.</p> <p>Record results of tests in a table.</p>	<p>Does it Conduct Electricity?</p> <p>Introduce the terms conductors and insulators. Example context: soldiers wear 'smart' clothing which conducts electricity: http://www.bbc.co.uk/news/technology-17580666 E.g. a soldier in the desert that has ripped part of 'smart' clothing losing part of the GPS circuit, so unable to provide location for rescue. Explain that the soldier has a pack containing a variety of objects: which could be used to complete a circuit to activate the GPS? Provide each group with a 'soldier's backpack' containing a collection of objects/ materials (including different metals and plastics). Discuss how to find out whether electricity can pass through the materials. Groups test by putting materials into a gap in a circuit with a bulb/buzzer. Focus pupil recording/presenting on explaining what the results show. E.g. they could produce a radio or video message to send to the soldier explaining how to produce a working circuit and why they are confident that this will work, providing scientific evidence and a list of all possible conductors (in case some are damaged). Recap on the terms insulators and conductors.</p>
---------------------------	--	--

Key Vocabulary Year 4

Living things and habitat changes

Environment, classification key, local, wider, negative effect, positive effect, population, pollution, deforestation, pollinators, impact, nature reserves, recycling, vertebrates, invertebrates, fish, amphibians, reptiles, birds, mammals, snails, slugs, worms, spiders, insects

Comparing plant requirements

Growth, light, water, air, nutrients, soil, space

Food webs

Food chains, consumer, producer, predator, prey, herbivores, carnivores, omnivores

Teeth and digestion

Digestive system, mouth, tongue, teeth, incisors, molars, canine, chewing, biting, tearing, oesophagus, stomach, small intestine, large intestine, damage, plaque, decay

States of Matter

Solid, liquid, gas, state, heated, cooled, melting, freezing, temperature, degrees Celsius, thermometer, evaporation, condensation, pool, shape, container, substance, material, properties

Water Cycles

evaporation, condensation, precipitation, temperature, vapour, clouds, rain, snow

Sound

Vibration, volume, pitch, travel, medium, insulation, soundproof, particles

Electricity

Conductors, insulators, circuit, components, cell, wire, bulb, switch, buzzer, lamp, battery, motor, loop, series

WS

Enquiry, investigation, conclusion, prediction, record, report, compare, data, chart, table, key, fair tests, scientific ideas, measure, equipment, evidence, findings

Year 5

Substantive Knowledge	Disciplinary Knowledge	Possible Context
Children should be given the opportunity to ask questions and perform enquiries throughout each subject area. They should begin recognise scientific theories and the evidence used by scientists to support these.		
Biology –Ecosystems, Organisms		

<p>Comparing life cycles</p>	<p>Identify similarities and differences between lifecycles of mammals, amphibians, insects and birds.</p>	<p><u>Lifecycle Research</u> Ask children to research the life cycles of two different species using a range of secondary sources. This could be in small groups or individually. Discuss possibilities for presenting their research (if possible, provide a purpose e.g. presenting to younger children/parents etc.) For example, different children could choose to make a model, a mime/drama, a rap/song or a poster/book. Agree on criteria for successful presentation of research e.g. clear order to life cycle, comparison between two life cycles, use of scientific vocabulary etc. Children present their research to the intended audience. Groups could peer assess against agreed success criteria.</p>
<p>Impact of drugs, lack of exercise and poor nutrition and non-communicable diseases</p>	<p>Identify how these factors might affect specific parts of the body or general health.</p>	<p><u>Drugs Education</u> Using an appropriate scheme of work, discuss how various legal and illegal drugs can affect the human body.</p>

Circulatory and respiratory system

Identify different parts of the circulatory and respiratory system and their functions.

Heart Rate Poses

Previous lesson: measuring pulse rate at rest and after exercise (measuring and recording focus).

This lesson: Discuss previous findings about pulse rate: can be hard to measure, but generally found that pulse rate increases after exercise. Recap why: blood carries oxygen around the body, the muscles need more oxygen during exercise, so your heart works harder to supply more oxygen.

But what if your body is still e.g. headstand, raised arms, balance, yoga pose, plank?

Focus individual recording on predictions and explanations.

Discuss with the children how to plan and carry out a test into a stationary exercise. Consider how long the pose should last, comparison with resting pulse rate, whether one child or several children should be tested, how to carry out the tests safely.

Ask the children to carry out the test and record results as in a group. Discuss findings.

Chemistry- Matter, Earth		
<p>Complex properties and testing materials</p>	<p>Use fair testing to demonstrate the suitability of various materials for a range of everyday purposes.</p>	<p><u>Insulation Layers</u> You want to see which cup will keep your tea warm for longer. Show different cups of hot water, e.g. paper cup, stacked paper cups, thermos mug. Measure the temperature of the water, repeat after about one hour (e.g. at the beginning and end of lunchtime). Activity Use the results of the pre-activity to make predictions about insulation (e.g. a good insulator has more layers / traps air / made of....). Provide a collection of different materials and invite the children to discuss their ideas about which might be good for keeping the drink warm. The children could order the materials according to which will be best insulators or select one to test for layering and record their predictions, giving reasoning based on the previous test results. Children plan and carry out an investigation to test their predictions.</p>
<p>Earth & Space</p>	<p>Record the observable effects of the movement of the Moon around the Earth and the Earth around the Sun. Identify the objects in the Solar System and their movement around the Sun.</p>	<p><u>Solar System Research</u> Use an animation, photo or video clip to begin a discussion about our solar system. Raise questions about different planets in our solar system e.g. movement, relative movement, size etc. Provide books or access to the internet. Help to phrase search questions. How will you share your research? Agree options e.g. labelled diagram or model, information leaflet, drama, animation, presentation etc. Small groups could research different planets or different features. Present/share outcomes with rest of the class. Groups could peer assess against agreed success criteria e.g. clarity.</p>

Physics – Forces

Forces, including gravity & resistance mechanisms

Observe and test the effects of water resistance, air resistance, friction and gravity.

Test the impact that levers and pulleys have on the amount of force required to move objects.

Aqua dynamics

Challenge pairs to make a ball of plasticine or blue-tack fall as slowly as possible through water (size will depend on how big your container is e.g. a large transparent plastic box or tall measuring cylinder – if using cylinder, put plasticine on string for retrieval).

Ask children to explain why they think it will fall more slowly e.g. draw and label design or hold up and explain. Ask children to identify the control variables e.g. depth of water, mass of plasticine, position of drop. Test designs e.g. repeating in groups or as a whole class with a number of the children timing.

Discuss test results and their trustworthiness. Use the test results to predict which shapes will fall fastest. If time, challenge pairs to change the shape so that it falls quickly through the water.

Key Vocabulary Year 5

Comparing life cycles

Food chains, consumer, producer, predator, prey, herbivores, carnivores, omnivores

Impact of drugs, lack of exercise and poor nutrition, non-communicable diseases

Diet, exercise, drugs, lifestyle, function, internal organs, substances

Circulatory and respiratory system

Blood, heart, vessels, arteries, veins, chambers, red blood cells, white blood cells, platelets, lungs, pressure, oxygen, carbon dioxide, transport

Complex properties and testing materials

Properties, hardness, solubility, transparency, conductivity, electrical, thermal, magnetic, insulation, heat loss

Earth & Space

Sun, Moon, Earth, hemisphere, solar system, axis, orbit, planets, stars, spherical, rotation, waning, waxing, gibbous, crescent

Forces, including gravity & resistance mechanisms

Gravity, air resistance, water resistance, friction, mechanisms, levers, pulleys, gears, effect, movement, acting in pairs

WS

Planning, enquiries, investigation, variables, accuracy, precision, repeat readings, recording, conclusions, fair test, compare, evidence, control

Year 6

Substantive Knowledge	Disciplinary Knowledge	Possible Context
<p>Children should be given the opportunity to ask questions and perform enquiries throughout each subject area. They should begin recognise scientific theories and the evidence used by scientists to support these.</p>		
<p>Biology –Organisms, Genes</p>		
<p>Classification of plants and animals</p>	<p>Identify the broad scientific categories that living things can be sorted into by observing similarities and differences in their characteristics.</p>	<p><u>Invertebrate Research</u> (To be completed after some input on animal classification). Show children some invertebrate film clips (e.g. David Attenborough). Explain that their task is to research different invertebrates (show eggs). Discuss: how will you share what you have found out? Agree options e.g. poster, labelled diagram or model (playdough), written report, information leaflet, drama, animation etc. Give small groups a different invertebrate group to focus on (annelids, molluscs, insects, arachnids, crustaceans and myriapods). Each group must give an example and describe the features which make it a member of its classification group. Present/share with rest of the class. Groups peer assess against agreed success criteria.</p>
<p>Reproduction and changes to old age</p>	<p>Observe the changes in humans to old age.</p> <p>Identify and compare the reproductive process in some animals, including humans, and plants.</p>	<p><u>Growth Survey</u> What could we measure to show how humans develop as they grow older? Groups decide e.g. forearm length, arm span, foot length, etc. Discuss how we could measure this and the number of children/adults we would need to measure. How accurate do our measurements need to be? Decide on how many decimal places or unit. Ensure that children understand that they also need to record the age of the person. Children go to different year groups to measure specified number of children. Bring data together to create class table. Ask groups to create scatter graphs to present the data, can use ICT to do this.</p>

<p>Evolution</p>	<p>Identify the way that offspring vary from their parents.</p> <p>Observe how variation leads to adaptation in different environments.</p> <p>Identify the changes in living things over long period of time, observing fossils to understand how scientists use these as evidence.</p>	<p><u>Fossil Habitats</u></p> <p>Show a picture of a fossilised skeleton/creature and discuss the children's ideas about fossils, what it was, what it ate, where it lived etc. (Could provide only one part to start with, or parts to different groups, to show how we only have part of the information). Discuss strong/weak evidence e.g. strong evidence that has skeleton/teeth etc, place where fossil was found suggests habitat, similarities with modern creatures suggest colour etc.</p> <p>Provide children with photos or real/resin fossils (trilobite, ammonite, ichthyosaurus etc, plus any found locally or linked/displayed at local museums). Ask them to use the fossils and their own research to develop ideas about the creatures e.g. labelled drawing with size, possible appearance, diet, habitat, what other fossils could exist eg what prints could be left behind.</p> <p>Could colour code or star ideas for which there is the strongest evidence.</p>
<p>Chemistry- Reactions</p>		
<p>Dissolving & separating materials</p> <p>Reversible and irreversible reactions</p> <p>Basic particle theory</p>	<p>Investigate reversible changes including dissolving and mixing.</p> <p>Observe irreversible changes and identify the formation of new materials.</p>	<p><u>Dissolving Investigation</u></p> <p>Ask children to think of everyday example of dissolving solids in water (e.g. sugar in tea, salt in cooking water). Ask them to suggest ways of making the sugar dissolve faster (e.g. stirring, temperature of the water, size of sugar grains, volume of water). Ask them to choose a factor to investigate and to plan a fair test. Post it planners or planning boards could be used to focus on types of variable. Carry out tests and discuss outcomes.</p>

Physics – Electricity, Waves		
<p>Electricity</p>	<p>Identify circuit symbols.</p> <p>Record simple circuits in diagrams.</p> <p>Test the effect of various components, particularly cells, on the operation of other components, such as lamps or buzzers.</p> <p>Record results of tests in tables.</p>	<p><u>Bulb Brightness</u></p> <p>Provide a mix of basic circuit components and challenge pairs or trios to make a quick simple circuit. Compare and discuss the differences in bulb brightness and how to measure/observe this e.g. light seen through layers of paper, datalogger, observation.</p> <p>Main task: to investigate how they can change the brightness of the bulb choosing from the available equipment (to include different lamps, cells and different thickness/length of high resistance/fuse wires). Each pair/trio to generate a list of variables which could be changed in their circuit and how they will observe/measure the effect of this change. Create a scientific question which identifies the ‘change’ and ‘measure’. Record their plan e.g. question, variables and diagram of test circuit. Carry out and discuss investigations.</p>
<p>Light</p>	<p>Identify the way light travels and reflects off of objects.</p> <p>Identify the way humans see by reflected light entering the eye.</p> <p>Test the effect of light brightness and position on the size and position of shadows.</p> <p>Record measurements in tables and graphs.</p>	<p><u>Light Questions</u></p> <p>Provide a discussion-starting stimulus e.g. pictures of light in different contexts: shining through clouds, shadow puppets, headlights, eye. Explore children’s ideas around light.</p> <p>Challenge small groups to raise questions about light e.g. 20. Then ask them to sort these into groups for how they could be answered e.g. research, direct observation, testing, we may never know... Share questions from different groups, supporting children to turn some into a form which could be investigated. Select questions which could be: answered now by research; answered in a later lesson by observation or investigation; placed on the class ‘Wonder Wall’ to consider at the end of term.</p> <p>(Before the children can plan different types of enquiries, they need to recognise how they might find out the answer to questions. Once able to recognise the different types they will then be able to independently choose an appropriate enquiry type and plan accordingly).</p>

Key Vocabulary Year 6

Classification of plants and animals

Kingdom, phylum, class, order, family, genus, species, characteristics, organisms, micro-organisms, subdivide, classifying

Reproduction & changes to old age

Sexual, asexual, cells, puberty, adolescent, gestation

Dissolving & separating materials inc. reversible and irreversible reactions
dissolving, filtering, sieving, evaporating, reversible, irreversible, particles, reaction

Evolution

Inheritance, adaptation, characteristics, variation, reproduction, survival, extinction, endangered, gene

Electricity

Conductors, insulators, circuit, components, cell, wire, bulb, switch, buzzer, lamp, battery, motor, loop, series, symbols, parallel, voltage

Light

Dark, reflection, shadow, opaque, translucent, transparent, mirror, light source, Sun, spectrum, optical

WS

Planning, enquiries, investigation, variables, accuracy, precision, repeat readings, recording, conclusions, fair test, compare, evidence, control, predict, scatter graph, line graph, bar chart, table, relationship

Futura KS3 Curriculum Plan 2021-22

	Unit	Year 7	Approx. hours	Unit	Year 8	Approx. hours	Unit	Year 9	Approx. hours	
Term 1	Y7 Intro	Introduction to Secondary Science	7 Content + 1 Test = 8	Biology 3: Life Processes and Evolution	Nutrition and Digestion	13 Content + 1 Rev + 1 Test + 1 Improvement = 16	Biology 5: Cells & Transport	Cells and Organisation Continued	13 Content + 1 Rev + 1 Test + 1 Improvement = 16	
	Biology 1: Cells and Organisms	Cells and Organisation	12 Content + 1 Rev + 1 Test + 1 Improvement = 15		Gas Exchange Systems			The Particulate nature of matter (chem in NC)		
		Skeletal and Muscular Systems			Natural Selection and Evolution					
Term 2	Chemistry 1: Matter	The Particulate Nature of Matter	12 Content + 1 Rev + 1 Test + 1 Improvement = 15	Chemistry 3: Earth	Earth Structure - Earth and Rocks	11 Content + 1 Rev + 1 Test + 1 Improvement = 14	Chemistry 5: Atomic structure & The periodic table	Atoms, Elements and Compounds continued	15 Content + 1 Rev + 1 Test + 1 Improvement = 18	
		Physical Change (Under Physics in NC)						Earth Atmosphere - Climate		The Periodic Table Continued
		Particle Model (Under Physics in NC)								The Particulate Nature of Matter continued
		Atoms, Elements and Compounds								Energy Changes and Transfers continued
Term 3	Physics 1: Forces	Pure and Impure Substances	17 Content + 1 Rev + 1 Test + 1 Improvement = 20	Physics 3: Waves	Observed Waves	11 Content + 1 Rev + 1 Test + 1 Improvement = 14	Physics 5: Energy & Forces	Changes in Systems continued	12 Content + 1 Rev + 1 Test + 1 Improvement = 15	
		Describing Motion						Sound Waves		Energy in Matter continued
		Forces						Energy and Waves		Forces continued
		Pressure in Fluids						Light Waves		
		Balanced Forces and Motion								
Space Physics										
		Futura-Aligned Assessment 1	1 Rev + 1 Test + 1 Improvement		Futura-Aligned Assessment 3	1 Rev + 1 Test + 1 Improvement		Futura-Aligned Assessment 5	1 Rev + 1 Test + 1 Improvement	
Approx classroom hours required terms 1-3 = 61				Approx classroom hours required terms 1-3 = 47				Approx classroom hours required terms 1-3 = 52		
Term 4	Biology 2: Genetics and Ecology	Plant Reproduction (including fruit formation and seed dispersal)	17 Content + 1 Rev + 1 Test + 1 Improvement = 20	Biology 4: Bioenergetics	Plants and Photosynthesis	12 Content + 1 Rev + 1 Test + 1 Improvement = 15	Biology 6: Microbes & Disease	Cells and Organisation Continued	14 Content + 1 Rev + 1 Test + 1 Improvement = 17	
		Animal Reproduction						Respiration		Health
		Inheritance, Chromosomes, DNA and Genes								
Term 5	Chemistry 2: The Periodic Table and	The Periodic Table	12 Content + 1 Rev + 1 Test + 1 Improvement = 15	Chemistry 4: Predicting Reactions	The Periodic Table Continued	14 Content + 1 Rev + 1 Test + 1 Improvement = 16	Chemistry 6: The Earth's Atmosphere & Resources	Earth Atmosphere continued	15 Content + 1 Rev + 1 Test + 1 Improvement = 18	
		Chemical Reactions						Chemical Reactions Continued		Chemical Energy continued
Term 6	Physics 2: Energy	Energy Changes and Transfers	13 Content + 1 Rev + 1 Test + 1 Improvement = 15	Physics 4: Electricity and Magnetism	Calculations of fuel uses and costs in the domestic context	17 Content + 1 Rev + 1 Test + 1 Improvement = 20	Physics 6: Atomic Structure	The Particulate Nature of Matter Continued	14 Content + 1 Rev + 1 Test + 1 Improvement = 17	
		Changes in Systems						Current Electricity		Physical Change Continued
		Energy in Matter						Static Electricity		Particle Model Continued
								Magnetism		Energetics (chem in NC)
		Futura-Aligned Assessment 2	1 Rev + 1 Test + 1 Improvement		Futura-Aligned Assessment 4	1 Rev + 1 Test + 1 Improvement		Futura-Aligned Assessment 6	1 Rev + 1 Test + 1 Improvement	
Approx classroom hours required terms 4-6 = 53				Approx classroom hours required terms 4-6 = 54				Approx classroom hours required terms 4-6 = 55		

Futura Science Year 7 - Detailed Curriculum Overview

Lessons with no National Curriculum content (**N/A**) should be the first to be cut if time is an issue

Unit	Year 7 Lessons	National Curriculum
Y7 Intro	Lab safety and equipment	Basic introduction to working scientifically (scientific attitudes, experimental skills and investigations, analysis and evaluation, and measurement)
	The Bunsen Burner	
	Hazard Symbols	
	Writing a method and testing hypotheses	
	Making accurate measurements	
	Drawing graphs	
	Planning an investigation	
Biology 1: Cells and Organisms	Animal cells	<i>Cells as the fundamental unit of living organisms. The functions of the cell membrane, cytoplasm, nucleus and mitochondria.</i>
	Plant cells	<i>The functions of the cell wall, cell membrane, cytoplasm, nucleus, vacuole, mitochondria and chloroplasts; the similarities and differences between plant and animal cells</i>
	Using microscopes	<i>How to observe, interpret and record cell structure using a light microscope</i>
	Specialised cells	<i>The structural adaptations of some unicellular organisms</i>
	Levels of organisation	<i>The hierarchical organisation of multicellular organisms: from cells to tissues to organs to systems to organisms</i>
	Role of diffusion	<i>The role of diffusion in the movement of materials in and between cells</i>
	Structure and function of skeleton	<i>The structure and functions of the human skeleton, to include support, protection, movement and making blood cells</i>
	Muscles (inc. measuring force exerted)	<i>Biomechanics – the interaction between skeleton and muscles, including the measurement of force exerted by different muscles</i>
	Antagonistic muscles	<i>The function of muscles and examples of antagonistic muscles</i>
	Smoking	<i>The effects of recreational drugs (including substance misuse) on behaviour, health and life processes</i>
	Drugs	
	Alcohol	
Chemistry 1: Matter	Particle model: States of matter	<i>The properties of the different states of matter (solid, liquid and gas) in terms of the particle model</i>
	State changes - Particle model	<i>Changes of state in terms of the particle model; the differences in arrangements, in motion and in closeness of particles explaining changes of state</i>
	State changes - Density	<i>Similarities and differences, including density differences, between solids, liquids and gases; shape and density, the anomaly of ice-water transition</i>
	Particle model: Diffusion	<i>Gas pressure; Brownian motion in gases; diffusion in terms of the particle model; diffusion in liquids and gases driven by differences in concentration</i>
	Physical and chemical changes	<i>The difference between chemical and physical changes</i>
	Atoms, molecules, elements, compounds, and mixtures	<i>Atoms and molecules as particles; a simple (Dalton) atomic model. Differences between atoms, elements and compounds; chemical symbols and formulae for elements and compound.</i>
	Conservation of mass	<i>Conservation of material and of mass, and reversibility, in melting, freezing, evaporation, sublimation, condensation, dissolving; conservation of mass in changes of state and chemical reaction</i>
	Pure and impure substances	<i>The concept of a pure substance; mixtures, including dissolving; the identification of pure substances</i>
	Filtration	<i>Simple techniques for separating mixtures: filtration, evaporation, distillation and chromatography</i>
	Evaporation and distillation	
	Fractional distillation	
	Chromatography	<i>Chromatography</i>
Physics 1: Forces	Speed	<i>Speed and the quantitative relationship between average speed, distance and time (speed = distance ÷ time)</i>
	Distance-time graphs	<i>The representation of a journey on a distance-time graph</i>
	Velocity-time graphs	N/A
	Acceleration	N/A - taught as change in velocity/time taken
	Forces: Balanced and Unbalanced	<i>Forces as pushes or pulls, arising from the interaction between two objects; using force arrows in diagrams, adding forces in one dimension, balanced and unbalanced forces; relative motion: trains and cars passing one another.</i>
	Contact forces and effects of forces	<i>Forces: associated with deforming objects, stretching and squashing (springs), with rubbing and friction between surfaces, with pushing things out of the way, and resistance to motion of air and water. Opposing forces and equilibrium: weight held by stretched spring or supported on a compressed surface; forces being needed to cause objects to stop or start moving, or to change their speed or direction of motion (qualitative only); change depending on direction of force and its size.</i>
	Stretching - Hooke's law	<i>Force-extension linear relation; Hooke's Law as a special case</i>
	Pressure in solids	<i>Pressure measured by ratio of force over area – acting normal to any surface</i>
	Pressure in fluids	<i>Atmospheric pressure decreases with increase of height as weight of air above decreases with height; pressure in liquids increasing with depth</i>
	Floating and sinking	<i>Upthrust effects, floating and sinking</i>
	Work done	<i>Work done and energy changes on deformation; forces measured in newtons, measurements of stretch or compression as force is changed</i>
	Moments	<i>Moment as the turning effect of a force</i>
	Non-contact forces	<i>Non-contact forces: gravity forces acting at a distance on Earth and in space, forces between magnets and forces due to static electricity</i>
	Mass, Weight & Gravity	<i>Gravity force, weight = mass x gravitational field strength (g), on Earth g=10 N/kg, different on other planets and stars; gravity forces between Earth and Moon, and between Earth and Sun (qualitative only);</i>
	Solar system and stars	<i>Our Sun as a star, other stars in our galaxy</i>
	Day, Night and seasons	<i>The seasons and the Earth's tilt, day length at different times of year, in different hemispheres</i>
	The Universe	<i>Other galaxies; the light year as a unit of astronomical distance</i>
Characteristics and variation	<i>differences between species; the variation between individuals within a species being continuous</i>	

Biology 2: Genetics and Ecology	Types of variation - continuous and discontinuous	or discontinuous, to include measurement and graphical representation of variation.
	DNA, chromosomes, and genes	A simple model of chromosomes, genes and DNA in heredity, including the part played by Watson, Crick, Wilkins and Franklin in the development of the DNA model
	Alleles and inheritance	Heredity as the process by which genetic information is transmitted from one generation to the next;
	Human reproductive systems and cells (male and female)	Reproduction in humans (as an example of a mammal), including the structure and function of the male and female reproductive systems, menstrual cycle (without details of hormones), gametes, fertilisation, gestation and birth, to include the effect of maternal lifestyle on the foetus through the placenta
	Puberty	
	The menstrual cycle	
	Fertilisation in humans	
	Pregnancy and embryonic development	
	Flower structure	Reproduction in plants, including flower structure, wind and insect pollination, fertilisation, seed and fruit formation and dispersal, including quantitative investigation of some dispersal mechanisms
	Pollination and fertilisation	
	Seed dispersal	
	Investigating seed dispersal	
	Food chains and webs (and ecosystems)	The interdependence of organisms in an ecosystem, including food webs and insect pollinated crops; the importance of plant reproduction through insect pollination in human food security; how organisms affect, and are affected by, their environment, including the accumulation of toxic materials
	Pyramids of number, biomass and energy	
	Predator-Prey Relationships (Interdependence)	
Humans in ecosystems (food security and bioaccumulation)		
Chemistry 2: The Periodic Table and Chemical Reactions	Periodic table - introduction	The principles underpinning the Mendeleev Periodic Table; the Periodic Table: periods and groups, metals and non-metals
	Development of the periodic table - Mendeleev	
	Physical and chemical properties	The varying physical and chemical properties of different elements
	Chemical reactions (using formulae)	Chemical reactions as the rearrangement of atoms, representing chemical reactions using formulae and using equations
	Combustion	Combustion
	Thermal decomposition	Thermal decomposition
	Acids, alkalis and the pH scale	Defining acids and alkalis in terms of neutralisation reactions; the pH scale for measuring acidity/alkalinity and indicators
	Neutralisation	Reactions of acids with alkalis to produce a salt plus water
	Reactions of acids and metals	Reactions of acids with metals to produce a salt plus hydrogen
	Reactions of metals and water	N/A
	Reactions of metals with oxygen	Oxidation reactions (also in Y8 in terms of electrons)
Catalysts	What catalysts do	
Physics 2: Energy	Forms of Energy	Energy as a quantity that can be quantified and calculated; the total energy has the same value before and after a change; comparing the starting with the final conditions of a system and describing increases and decreases in the amounts of energy associated with movements, temperatures, changes in positions in a field, in elastic distortions and in chemical compositions; using physical processes and mechanisms, rather than energy, to explain the intermediate steps that bring about such changes; other processes that involve energy transfer: changing motion, dropping an object, completing an electrical circuit, stretching a spring, metabolism of food, burning fuels
	Energy transfers	
	Energy in food	
	Burning fuels	
	Sankey diagrams and Energy efficiency	N/A
	Thermal energy introduction (heat transfer)	Heating and thermal equilibrium: temperature difference between two objects leading to energy transfer from the hotter to the cooler one, through contact (conduction) or radiation; such transfers tending to reduce the temperature difference: use of insulators
	Conductors and insulators	
	Conduction	
	Convection	
	Radiation	
	Insulation	
Contraction and expansion	Changes with temperature in motion and spacing of particles; internal energy stored in materials	
Simple machines	Simple machines give bigger force but at the expense of smaller movement (and vice versa): product of force and displacement unchanged	

Futura Science Year 8 - Detailed Curriculum Overview

Lessons with no National Curriculum content (N/A) should be the first to be cut if time is an issue

Unit	Year 8 Lessons	National Curriculum
Biology 3: Life Processes and Evolution	Balance diet and food groups	<i>Content of a healthy human diet: carbohydrates, lipids (fats and oils), proteins, vitamins, minerals, dietary fibre and water, and why each is needed; calculations of energy requirements in a healthy daily diet; The consequences of imbalances in the diet, including obesity, starvation and deficiency diseases</i>
	Food tests	N/A
	Digestive system	<i>The tissues and organs of the human digestive system, including adaptations to function and how the digestive system digests food (enzymes simply as biological catalysts); the importance of bacteria in the human digestive system</i>
	Bacteria and Enzymes in digestion	
	The effect of temperature on enzymes	N/A
	The human respiratory system	<i>The mechanism of breathing to move air in and out of the lungs, using a pressure model to explain the movement of gases, including simple measurements of lung volume</i>
	Gas exchange	<i>The structure and functions of the gas exchange system in humans, including adaptations to function; t the role of leaf stomata in gas exchange in plants</i>
	Effect of exercise on breathing rate	<i>The impact of exercise, asthma and smoking on the human gas exchange system</i>
	The human circulatory system	N/A
	Natural selection	<i>The variation between species and between individuals of the same species means some organisms compete more successfully, which can drive natural selection</i>
	Evolution	
	Mutation and extinction	<i>Changes in the environment may leave individuals within a species, and some entire species, less well adapted to compete successfully and reproduce, which in turn may lead to extinction</i>
	Maintaining biodiversity	<i>The importance of maintaining biodiversity and the use of gene banks to preserve hereditary material</i>
Chemistry 3: Earth	Structure of the Earth and its atmosphere	<i>The composition of the Earth; the structure of the Earth and its atmosphere</i>
	Weathering and erosion	
	Sedimentary rocks	
	Metamorphic rocks	<i>The rock cycle and the formation of igneous, sedimentary and metamorphic rocks</i>
	Igneous rocks	
	The rock cycle	
	Earth's resources	<i>Earth as a source of limited resources and the efficacy of recycling</i>
	Reduce, re-use, recycle	
	The greenhouse effect	<i>The production of carbon dioxide by human activity and the impact on climate</i>
	Global warming and climate change	
Carbon cycle	<i>The carbon cycle</i>	
Physics 3: Waves	Waves - introduction	<i>Waves on water as undulations which travel through water with transverse motion; these waves can be reflected, and add or cancel – superposition</i>
	Sound and speed of sound	<i>Sound waves are longitudinal; frequencies of sound waves, measured in hertz (Hz); echoes, reflection and absorption of soun. Sound needs a medium to travel, the speed of sound in air, in water, in solids.</i>
	The microphone and the Loudspeaker	<i>Sound produced by vibrations of objects, in loud speakers, detected by their effects on microphone diaphragm and the ear drum; auditory range of humans and animals</i>
	The ear and Hearing	
	Uses of sound	<i>Pressure waves transferring energy; use for cleaning and physiotherapy by ultra-sound; waves transferring information for conversion to electrical signals by microphone</i>
	Light	<i>The similarities and differences between light waves and waves in matter; light waves travelling through a vacuum; speed of light</i>
	Reflection	<i>The transmission of light through materials: absorption, diffuse scattering and specular reflection at a surface; use of ray model to explain imaging in mirrors, the refraction of light and action of convex lens in focusing (qualitative)</i>
	Refraction	
	Absorption and transmission	N/A
	The camera and the eye	<i>Use of ray model to explain imaging in the pinhole camera; the human eye: light transferring energy from source to absorber leading to chemical and electrical effects; photo-sensitive material in the retina and in cameras</i>
Colours of light	<i>Colours and the different frequencies of light, white light and prisms (qualitative only); differential colour effects in absorption and diffuse reflection</i>	
Biology 4: Bioenergetics	Respiration	<i>Aerobic and anaerobic respiration in living organisms, including the breakdown of organic molecules to enable all the other chemical processes necessary for life; a word summary for aerobic respiration; the process of anaerobic respiration in humans, and a word summary for anaerobic respiration; the differences between aerobic and anaerobic respiration in terms of the reactants, the products formed and the implications for the organism</i>
	Aerobic respiration	
	Anaerobic respiration	
	Fermentation	<i>The process of anaerobic respiration in micro-organisms, including fermentation</i>
	Fermentation investigation	N/A
	Plant organs and minerals	<i>Plants gaining mineral nutrients and water from the soil via their roots</i>
	Importance of plants	<i>The dependence of almost all life on Earth on the ability of photosynthetic organisms, such as plants and algae, to use sunlight in photosynthesis to build organic molecules that are an essential energy store and to maintain levels of oxygen and carbon dioxide in the atmosphere</i>
	Photosynthesis	<i>The reactants in, and products of, photosynthesis, and a word summary for photosynthesis; plants making carbohydrates in their leaves by photosynthesis</i>
	Leaf adaptations	<i>The adaptations of leaves for photosynthesis</i>
	Uses of glucose (testing a leaf for starch)	N/A
	Photosynthesis investigation	N/A
Seed germination	N/A	
Metals and non-metals	<i>The properties of metals and non-metals; the chemical properties of metal and non-metal oxides with respect to acidity</i>	

Chemistry 4: Predicting Reactions	Periodic table - recap	<i>The principles underpinning the Mendeleev Periodic Table; the Periodic Table: periods and groups, metals and non-metals</i>
	Atomic model and electronic structure	<i>N/A</i>
	Group 1: The Alkali metals	<i>How patterns in reactions can be predicted with reference to the Periodic Table</i>
	Group 7: The Halogens	
	Group 0: The Noble gases	<i>N/A</i>
	Reactivity series	<i>The order of metals and carbon in the reactivity series</i>
	Displacement reactions	<i>Oxidation and displacement reactions; the use of carbon in obtaining metals from metal oxides</i>
	Oxidation and reduction	
	Energy changes - cooling curves	<i>Energy changes on changes of state (qualitative)</i>
	Endothermic and exothermic reactions	<i>Exothermic and endothermic chemical reactions (qualitative)</i>
	Ceramics	<i>Properties of ceramics, polymers and composites (qualitative)</i>
	Polymers	
Composites		
Physics 4: Electricity and Magnetism	Energy resources	<i>Comparing energy values of different foods (from labels) (kJ); fuels and energy resources</i>
	Fossil fuels	
	Renewable energy resources	
	Power	<i>Comparing power ratings of appliances in watts (W, kW); comparing amounts of energy transferred (J, kJ, kW hour); domestic fuel bills, fuel use and costs</i>
	Static electricity	<i>Separation of positive or negative charges when objects are rubbed together: transfer of electrons, forces between charged objects</i>
	Electricity introduction (components inc. fruit batteries)	<i>N/A</i>
	Electrical conductors and insulators	<i>N/A</i>
	Measuring current	<i>Electric current, measured in amperes, in circuits</i>
	Measuring Voltage	<i>Potential difference, measured in volts, battery and bulb ratings</i>
	Series circuits	<i>Electric current, measured in amperes, in circuits, series and parallel circuits, currents add where branches meet and current as flow of charge</i>
	Parallel circuits	
	Resistance	<i>Resistance, measured in ohms, as the ratio of potential difference (p.d.) to current; differences in resistance between conducting and insulating components (quantitative)</i>
	Magnets	<i>Magnetic poles, attraction and repulsion</i>
	Magnetic fields	<i>Magnetic fields by plotting with compass, representation by field lines</i>
	Permanent and temporary magnets	<i>Earth's magnetism, compass and navigation</i>
	Electromagnetism	<i>The magnetic effect of a current, electromagnets, D.C. motors (principles only). The idea of electric field, forces acting across the space.</i>
Uses of electromagnets (inc. motors)		

Futura Science Year 9 - Detailed Curriculum Overview

Unit	Year 9 Lessons	National Curriculum
Biology 5: Cell Biology & Transport	Plant and animal cells	cells as the fundamental unit of living organisms, the functions of the cell wall, cell membrane, cytoplasm, nucleus, vacuole, mitochondria and chloroplast, the similarities and differences between plant and animal cell, the structural adaptations of some unicellular organisms
	Prokaryotic cells	
	Specialised cells	
	Microscopy - principles of	cells as the fundamental unit of living organisms, including how to observe, interpret and record cell structure using a light microscope
	Practical - Microscopy	
	DNA, chromosomes introduction	heredity as the process by which genetic information is transmitted from one generation to the next
	Asexual reproduction	reproduction in plants
	Mitosis	
	Stem cells	cells as the fundamental unit of living organisms,
	Diffusion	the role of diffusion in the movement of materials in and between cells
	Practical - Osmosis (Practical and theory)	N/A
Practical - Osmosis		
Active transport		
Chemistry 5: Atomic structure & The periodic table	Atoms, elements, compounds and mixtures	differences between atoms, elements and compound, mixtures, including dissolving
	Models of the atom	a simple (Dalton) atomic model
	Atomic structure	
	Isotopes	N/A
	History of the Periodic Table	
	Electronic structure	chemical symbols and formulae for elements and compound, the varying physical and chemical properties of different elements, the principles underpinning the Mendeleev Periodic Table, the Periodic Table: periods and groups; metals and non-metals, how patterns in reactions can be predicted with reference to the Periodic Table, the properties of metals and non-metals
	The periodic table	
	Group 1	
	Group 7	
	Reactions of the halogens	chemical symbols and formulae for elements and compounds, chemical reactions as the rearrangement of atom, representing chemical reactions using formulae and using equation, displacement reactions
	Noble Gases	chemical symbols and formulae for elements and compounds
	Solids liquids and Gases	the properties of the different states of matter (solid, liquid and gas) in terms of the particle model
	Separating mixtures	
	Practical - Separation techniques	mixtures, including dissolving, simple techniques for separating mixtures: filtration, evaporation, distillation and chromatography
Practical - Chromatography		
Physics 5: Energy & Forces	Energy stores	other processes that involve energy transfer: changing motion, dropping an object, completing an electrical circuit, stretching a spring, metabolism of food, burning fuel, energy as a quantity that can be quantified and calculated; the total energy has the, same value before and after a change, comparing the starting with the final conditions of a system and describing increases and decreases in the amounts of energy associated with movements, temperatures, changes in positions in a field, in elastic distortions and in chemical compositions
	Energy transfers	
	Efficiency	N/A
	Conduction, convection & radiation	heating and thermal equilibrium: temperature difference between two objects leading to energy transfer from the hotter to the cooler one, through contact (conduction) or radiation; such transfers tending to reduce the temperature difference: use of insulators
	Wasted energy and insulation	
	Non-renewable energy	fuels and energy resources.
	Renewable energy	
	Contact and non-contact forces	forces as pushes or pulls, arising from the interaction between two objects, forces measured in newtons, non-contact forces: gravity forces acting at a distance on Earth and in space, forces, between magnets and forces due to static electricit, opposing forces and equilibrium: weight held by stretched spring or supported on a compressed surface.
	Weight and gravitational fields	gravity force, weight = mass x gravitational field strength (g), on Earth g=10 N/kg, different on other planets and stars; gravity forces between Earth and Moon, and between Earth and Sun (qualitative only)
	Free body diagrams and resultant forces	using force arrows in diagrams, adding forces in one dimension, balanced and unbalanced forces
	Practical: Springs	forces: associated with deforming objects; stretching and squashing – springs; measurements of stretch or compression as force is changed, force-extension linear relation; Hooke's Law as a special case
Practical: Springs		
Biology 6: Microbes & Disease	Types of pathogen	
	Bacterial diseases	
	Viral diseases	
	Protist and fungal diseases	how organisms affect, and are affected by, their environment
	Plant defence against pathogens	
	Transmission & physical and chemical defences	
	The immune response	
	Vaccinations	
	Antibiotics	
	Monoclonal antibodies	N/A
	Culturing microorganisms	
	Practical: Antiseptics	
	Drug testing	
Pain killers and drug discovery		
Chemistry 6: The Earth's Atmosphere & Resources	Early Atmosphere	the composition of the atmosphere
	Changing Atmosphere	
	Greenhouse effect	
	Climate Change	the carbon cycle, the production of carbon dioxide by human activity and the impact on climate.
	Carbon Footprint	
	Pollutants	N/A
	Impact of pollutants	
	Using the Earth's resources	the composition of the Earth, Earth as a source of limited resources
	Water treatment (making potable water)	
	Practical: Water treatment (making potable water)	N/A
	Treating waste water	
Phytomining and bioleaching		
Life Cycle Assessment	the composition of the Earth, Earth as a source of limited resources and the efficacy of recycling	
Recycling and Reuse		
Physics 6: Atomic Structure	Describing atoms	
	How our model of the atom has changed	a simple (Dalton) atomic model (chemistry in NC)
	The nature and properties of radiation	
	Half life (and half life equations)	
	Irradiation and contamination	N/A
	Background radiation	
	Uses of radiation	
	Nuclear fission	
	Nuclear fusion	
	Practical: Density	
	The particle model	the properties of the different states of matter (solid, liquid and gas) in terms of the particle model, including gas pressure, changes of state in terms of the particle model (chemistry NC), conservation of material and of mass, and reversibility in melting, freezing

	The particle model and changes in state	of state in terms of the particle model (kinetic theory), conservation of material and of mass, and reorganizing, in melting, freezing, evaporation, sublimation, condensation, dissolving, similarities and differences, including density differences, between solids, liquids and gases
	Internal energy	changes with temperature in motion and spacing of particles internal energy stored in materials.

Futura Science KS4 Biology - Detailed Curriculum Overview

Unit	KS4 Lessons	Links to prior learning	Unit Summary			
Biology A - Ecology	Ecosystems - Communities, biotic and abiotic factors	<i>Year 7 - Biology 2: Genetics and Ecology Year 8 - Chemistry 3: Earth Year 9 - Chemistry 6: The Earth's Atmosphere & Resources</i>	The Sun is a source of energy that passes through ecosystems. Materials including carbon and water are continually recycled by the living world, being released through respiration of animals, plants and decomposing microorganisms and taken up by plants in photosynthesis. All species live in ecosystems composed of complex communities of animals and plants dependent on each other and that are adapted to particular conditions, both abiotic and biotic. These ecosystems provide essential services that support human life and continued development. In order to continue to benefit from these services humans need to engage with the environment in a sustainable way. In this unit we will explore how humans are threatening biodiversity as well as the natural systems that support it. We will also consider some actions we need to take to ensure our future health, prosperity and well-being.			
	Food chains, webs and pyramids - Sep. Bio.					
	Adaptations (plants and animals)					
	Competition					
	Predator-prey relationships					
	Sampling techniques (and maths skills)					
	RP: Sampling required practical (random sampling)					
	Deforestation and peat bog destruction					
	Water cycle					
	The human population explosion					
	Pollution: Land, air and water					
	Carbon cycle					
	Climate change (and it's impact)					
	Maintaining biodiversity					
Biology B - Organisation (Systems)	Organisation (Cells, tissues organs) - Hierarchy	<i>Year 7 - Biology 1: Cells and Organisms Year 8 - Biology 3: Life Processes and Evolution Year 9 - Biology 5: Cell Biology & Transport</i>	In this unit we will learn about the human digestive system which provides the body with nutrients and the respiratory system that provides it with oxygen and removes carbon dioxide. In each case they provide dissolved materials that need to be moved quickly around the body in the blood by the circulatory system. Damage to any of these systems can be debilitating if not fatal. Although there has been huge progress in surgical techniques, especially with regard to coronary heart disease, many interventions would not be necessary if individuals reduced their risks through improved diet and lifestyle.			
	Structure and adaptations of the digestive system					
	RP: Food tests required practical					
	Properties of enzymes					
	Enzymes of the digestive system					
	RP: Enzymes required practical 1					
	RP: Enzymes required practical 2					
	Respiratory system in context of exchange surfaces					
	Blood and blood vessels					
	Heart structure and function					
	Diseases of the heart and treatments					
	Non-communicable diseases and data strengths					
	Cancer					
	Biology C - Bioenergetics			Plant tissues organs and systems	<i>Year 7 - Biology 1: Cells and Organisms Year 8 - Biology 4: Bioenergetics Year 9 - Biology 5: Cell Biology & Transport</i>	In this unit we start with learning how the plant's transport system is dependent on environmental conditions to ensure that leaf cells are provided with the water and carbon dioxide that they need for photosynthesis. We will then explore how plants harness the Sun's energy in photosynthesis in order to make food. This process liberates oxygen which has built up over millions of years in the Earth's atmosphere. Both animals and plants use this oxygen to oxidise food in a process called aerobic respiration which transfers the energy that the organism needs to perform its functions. Conversely, anaerobic respiration does not require oxygen to transfer energy. During vigorous exercise the human body is unable to supply the cells with sufficient oxygen and it switches to anaerobic respiration. This process will supply energy but also causes the build-up of lactic acid in muscles which causes fatigue.
Plant transport (including linking to active transport)						
Evaporation and transpiration inc. factors affecting						
Photosynthesis overview						
Factors affecting photosynthesis (and using photosynthesis)						
RP: Limiting factors of photosynthesis 1						
RP: Limiting factors of photosynthesis 2						
Uses of glucose						
Aerobic respiration						
Anaerobic respiration						
Respiration investigation - exercise						
Metabolism and the liver						
Biology D - Homeostasis & Response		Principles of homeostasis	<i>Year 7 - Biology 2: Genetics and Ecology Year 8 - Biology 4: Bioenergetics Year 9 - Biology 6: Microbes & Disease (separate biology only), Biology 5: Cell Biology & Transport</i>	Cells in the body can only survive within narrow physical and chemical limits. They require a constant temperature and pH as well as a constant supply of dissolved food and water. In order to do this the body requires control systems that constantly monitor and adjust the composition of the blood and tissues. These control systems include receptors which sense changes and effectors that bring about changes. In this unit we will explore the structure and function of the nervous system and how it can bring about fast responses. We will also explore the hormonal system which usually brings about much slower changes. Hormonal coordination is particularly important in reproduction since it controls the menstrual cycle. An understanding of the role of hormones in reproduction has allowed scientists to develop not only contraceptive drugs but also drugs which can increase fertility.		
		Nervous system and reflex arc				
	RP: Reaction times required practical					
	The brain - Sep. Bio.					
	The eye - Sep. Bio.					
	Common problems of the eye - Sep. Bio.					
	Endocrine system overview inc. reproductive hormones					
	Glucoregulation & treatment of diabetes					
	Hormones and the menstrual cycle					
	Contraception					
	Fertility treatments					
	Plant hormones and responses - Sep. Bio.					
	RP: Tropisms required practical 1 set up - Sep. Bio.					
	Plant diseases and defences recap - Sep. Bio.					
RP: Tropisms required practical 2 collect results - Sep. Bio.						
Thermoregulation - Sep. Bio.						
Kidneys structure and function - Sep. Bio.						
Kidneys - ADH and dialysis - Sep. Bio.						
Kidney failure - Sep. Bio.						
Biology E - Ecology & Evolution	Recap - interdependence and carbon cycle	<i>Year 7 - Biology 2: Genetics and Ecology Year 8 - Biology 3: Life Processes and Evolution Year 9 - Chemistry 6: The Earth's Atmosphere & Resources</i>	Content from the Biology A unit is recapped at the start of this unit as part of the spiralling curriculum. Variation generated by mutations and sexual reproduction is the basis for natural selection; this is how species evolve. Charles Darwin, as a result of observations on a round the world expedition, backed by years of experimentation and discussion and linked to developing knowledge of geology and fossils, proposed the theory of evolution by natural selection. Evidence for Darwin's theory is now available as it has been shown that characteristics are passed on to offspring in genes. There is further evidence in the fossil record and the knowledge of how resistance to antibiotics evolves in bacteria. An understanding of these processes has allowed scientists to intervene through selective breeding to produce livestock with favoured characteristics.			
	Decomposition - Sep. Bio.					
	RP: Decay required practical - 1 - do the prac. - Sep. Bio.					
	RP: Decay required practical - 2 - analysis - Sep. Bio.					
	Factors affecting food security - Sep. Bio.					
	Sustainable food production (biotechnology) - Sep. Bio.					
	Variation/adaptation & competition recap					
	Recap Sampling techniques (quadrats and transects)					
	Classification & new systems of classification					
	Theories of evolution - Sep. Bio.					
	Evidence for evolution & natural selection					
	Speciation - Sep. Bio.					
	Fossils and extinction					
	Evolution - bacteria resistance					
Selective breeding						
Biology F - Inheritance	Types of reproduction	<i>Year 7 - Biology 2: Genetics and Ecology, Year 8 - Biology 3: Life Processes and Evolution Year 9 - Biology 5: Cell Biology & Transport</i>	In this section we will discover how the number of chromosomes are halved during meiosis and then combined with new genes from the sexual partner to produce unique offspring. Gene mutations occur continuously and on rare occasions can affect the functioning of the animal or plant. These mutations may be damaging and lead to a number of genetic disorders or death. Very rarely a new mutation can be beneficial and consequently, lead to increased fitness in the individual. Once new varieties of plants or animals have been produced it is possible to clone individuals to produce larger numbers of identical individuals all carrying the favourable characteristic.			
	Recap - DNA, chromosomes and structure of DNA					
	Meiosis					
	DNA and the genome - Sep. Bio.					
	DNA structure and Protein synthesis - Sep. Bio.					
	Mendel's work - Sep. Bio.					
	Inheritance - including sex determination					
	Inheritance of genetic diseases					
	Screening for genetic disorders					

Variation		Scientists have now discovered how to take genes from one species and introduce them in to the genome of another by a process called genetic engineering. In spite of the huge potential benefits that this technology can offer, genetic modification still remains highly controversial.
Recap - Stem Cells		
Therapeutic Cloning		
Cloning - Sep. Bio.		
Monoclonal antibodies - Sep. Bio. - Recap		
Genetic engineering		
Ethics of genetic technologies (inc. crops)		

Futura Science KS4 Chemistry - Detailed Curriculum Overview			
Unit	KS4 Lessons	Links to prior learning	Unit Summary
Chemistry A - Bonding & structure	Forming ions	Year 7: Chemistry 2 - The periodic table and chemical reactions Year 8: Chemistry 4 - Predicting Reactions	Chemists use theories of structure and bonding to explain the physical and chemical properties of materials. Analysis of structures shows that atoms can be arranged in a variety of ways, some of which are molecular while others are giant structures. Theories of bonding explain how atoms are held together in these structures. Scientists use this knowledge of structure and bonding to engineer new materials with desirable properties. The properties of these materials may offer new applications in a range of different technologies.
	Ionic Bonding		
	Ionic structures and properties		
	Covalent bonding		
	Covalent structures and properties		
	Giant covalent structures: diamond and graphite		
	Fullerenes and graphene		
	Metallic structure and properties (metallic bonding)		
	Alloys		
	Polymers		
	Ceramics, composites and polymers - Sep. Chem.		
	Nanoparticles - Sep. Chem.		
Transition metals - Sep. Chem.			
Chemistry B - Energy Changes	Balancing equations	Year 8: Chemistry 4 - Predicting Reactions	Energy changes are an important part of chemical reactions. The interaction of particles often involves transfers of energy due to the breaking and formation of bonds. Reactions in which energy is released to the surroundings are exothermic reactions, while those that take in thermal energy are endothermic. These interactions between particles can produce heating or cooling effects that are used in a range of everyday applications.
	Relative formula mass		
	Exothermic and endothermic reactions

	Energy Change in reactions (energy level diagrams)		
	Bond Enthalpy - HT		
	Identifying Gases		
	Reactions with Oxygen		
	Reactivity Series		
	Extraction with Carbon		
	Redox		
Chemistry C - Chemical Reactions	Acid and Metal Reactions	Year 7: Chemistry 2 - The periodic table and chemical reactions Year 8: Chemistry 4 - Predicting Reactions	Understanding of chemical changes began when people began experimenting with chemical reactions in a systematic way and organizing their results logically. Knowing about these different chemical changes meant that scientists could begin to predict exactly what new substances would be formed and use this knowledge to develop a wide range of different materials and processes. It also helped biochemists to understand the complex reactions that take place in living organisms. The extraction of important resources from the earth makes use of the way that some elements and compounds react with each other and how easily they can be 'pulled apart'. Some interactions between ions in an electrolyte result in the production of electricity. Cells and batteries use these chemical reactions to provide electricity. Electricity can also be used to decompose ionic substances and is a useful means of producing elements that are too expensive to extract any other way

RP: Electrolysis			
RP: Electrolysis			
Chemistry D - Chemical calculations & organic I	Moles - HT	Year 7 - Physics 2 - Energy, Year 7 Chemistry 1 - Matter, Year 9 Chemistry 6 - The Earth's Atmosphere & Resources	Chemists use quantitative analysis to determine the formulae of compounds and the equations for reactions. Given this information, analysts can then use quantitative methods to determine the purity of chemical samples and to monitor the yield from chemical reactions. Chemical reactions can be classified in various ways. Identifying different types of chemical reaction allows chemists to make sense of how different chemicals react together, to establish patterns and to make predictions about the behaviour of other chemicals. Chemical equations provide a means of representing chemical reactions and are a key way for chemists to communicate chemical ideas. The chemistry of carbon compounds is so important that it forms a separate branch of chemistry. A great variety of carbon compounds is possible because carbon atoms can form chains and rings linked by C-C bonds. This branch of chemistry gets its name from the fact that the main sources of organic compounds are living, or once-living materials from plants and animals. These sources include fossil fuels which are a major source of feedstock for the petrochemical industry.

	Alkanes and alkenes (And testing for them)		
	Fractional distillation		
	Combustion		
Cracking			
Chemistry E - Rates of Reaction	Measuring Rates	Year 7 - Chemistry 2 - The periodic table and chemical reactions Year 8 - Chemistry 4 - Predicting Reactions, Year 9 - Chemistry 5 - Atomic Structure and the periodic table	Chemical reactions can occur at vastly different rates. Whilst the reactivity of chemicals is a significant factor in how fast chemical reactions proceed, there are many variables that can be manipulated in order to speed them up or slow them down. Chemical reactions may also be reversible and therefore the effect of different variables needs to be established in order to identify how to maximise the yield of desired product. Understanding energy changes that accompany chemical reactions is important for this process. In industry, chemists and chemical engineers determine the effect of different variables on reaction rate and yield of product. Whilst there may be compromises to be made, they carry out optimisation processes to ensure that enough product is produced within a sufficient time, and in an energy-efficient way.

Chemistry F - Organic II (Separate Only)	Combustion of alkenes - Sep. Chem.	Year 7 - Physics 2 - Energy Year 8 - Chemistry 4 - Predicting Reactions, Year 9 - Chemistry 6 - The Earth's Atmosphere & Resources	The chemistry of carbon compounds is so important that it forms a separate branch of chemistry. A great variety of carbon compounds is possible because carbon atoms can form chains and rings linked by C-C bonds. This branch of chemistry gets its name from the fact that the main sources of organic compounds are living, or once-living materials from plants and animals. These sources include fossil fuels which are a major source of feedstock for the petrochemical industry. Chemists are able to take organic molecules and modify them in many ways to make new and useful materials such as polymers, pharmaceuticals, perfumes and flavourings, dyes and detergents. Instrumental methods provide fast, sensitive and accurate means of analysing chemicals, and are particularly useful when the amount of chemical being analysed is small. Forensic scientists and drug control scientists rely on such instrumental methods in their work.

Futura Science KS4 Physics - Detailed Curriculum Overview

Unit	KS4 Lessons	Links to prior learning	Unit summary
Physics A - Work and Energy	Phys A - Work & Energy Stores (Yr 10)	Year 7 - Physics 2 - Energy Year 9 - Physics 5 - Energy and Forces	<p>This unit builds on the idea that stores of energy are needed to make most things happen. It looks in detail about the equations required to calculate quantitative amounts of energy in objects and energy transferred. The unit applies the particle model to the concept of latent, specific heat capacity and gas pressure and allows students opportunity to develop investigation skills to find the best thermal insulator.</p>
	Work done & calculating work done		
	Power		
	GPE Stores & calculations		
	KE and elastic energy stores & calculations		
	Energy changes calculations (energy dissipation and efficiency)		
	Specific heat capacity		
	RP: Specific heat - required practical		
	RP: Specific heat - required practical		
	Heating and insulating buildings		
	Specific latent heat		
	Investigating energy (Sep. Phys.) - insulation		
	Gas pressure and temperature		
Expanding and compressing gases (Sep Phy)			
Physics B - Electricity	Electric circuits / symbols	Year 8 - Physics 4 - Electricity and magnetism	<p>Electric charge is a fundamental property of matter everywhere. This unit develops the understanding of the differences in the microstructure of conductors, semiconductors and insulators. Students will appreciate that many circuits are powered with mains electricity, but portable electrical devices must use batteries of some kind. The separate only content delves further into other applications of electricity including transformers, static electricity and electric fields.</p>
	Current and charge		
	Potential difference and resistance		
	RP: Investigating resistance required practical 1		
	RP: Investigating resistance required practical 2

	Ohm's law - ohmic conductors		
	Current voltage characteristics - filament lamps		
	RP: Investigation I-V graphs - required practical		
	Resistors in series and parallel		
	Resistance and sensors (thermistors and LDRs)		
	AC, DC and mains electricity		
	Cables and plugs		
	Electrical power and PD		
	Electrical currents and energy transfer		
	Appliances and efficiency		
	Transformers Sep. Phys		
Transformer calculations Sep. Phys			
Static electricity Sep. Phys			
Effect of static Sep. Phys			
Electric fields and static safety Sep. Phys			
Physics C - Forces and motion	Forces recap	Year 7 - Physics 1-Forces	<p>This unit focuses on forces that cause motion. Students look at both vertical and horizontal motion causes by different forces. They will practice applying the equations for motion, they will use practical</p>
	Scalar and vector quantities		
	Centre of mass		
	Distance and displacement		
	Speed calculations		
	Distance time graphs		

Physics C - Forces and motion	Velocity time graphs Velocity and acceleration (and moving in a circle) Equations of uniform acceleration Falling under gravity (mass, weight and T-V) Forces and breaking Momentum	Year 9 - Energy and Forces	the equations for motion, they will use practical equipment to develop investigative skills and to prove hypothesis. Momentum is introduced in its simplest form and built upon in Physics E.
Physics D - Waves	Radioactivity revision - sources and decay equations Nuclear fusion and fission recap - Sep. Phys. Transverse and longitudinal waves Properties of waves Reflection and Refraction of waves RP: Required practical waves 1 RP: Required practical waves 2 The EM spectrum & general properties Light, IR, Microwaves and radiowaves RP: Infra-red radiation required practical 1 RP: Infra-red radiation required practical 2 Communications UV waves, X Rays and Gamma X Rays in Medicine	Year 7 - Physics 1 Forces, Year 8 - Physics 3 - Waves, Year 9 - Physics 6 - Atomic structure	The beginning part of this unit recaps on radioactivity which is taught in year 9 as a cultural capital opportunity. At this point it is separte science studenst developing this concept. The unit then intoroduces waves, properties of waves and applications of waves. It has a high component of applied science and links to many career oppurtunities particulaly in the medical profession.
Physics E - Magnestism and forces	Permanent and induced magnets Magnetic fields Magnetic fields from electric currents & electromagnets Using electromagnets FLHR & the motor effect The loudspeaker - Sep. Phys. The generator - Sep. Phys. Uses of generators - Sep. Phys. Newton's first law RP: Acceleration required practical 1 RP: Acceleration required practical 2 Inertia, mass and Newton's second law Newton's third law Momentum Using conservation of momentum - Sep. Phys Impact forces - Sep. Phys Moments - Sep. Phys. Pressure at surfaces - Sep. Phys Pressure in fluids - Sep. Phys. Atmospheric pressure - Sep. Phys. Upthrust and flotation - Sep. Phys.	Year 7 - Physics 1 - Forces Year 8 - Physics 4 - Electricity and magnetism Year 9 - Physics 5 - Energy and forces	The first section of physics E covers the phenomenum of magnetism and its applications. Physics students take the application of interacting electrical and magnetic fields and apply this to how motors, speakers and generators work. The unit links to the production of electricity and can be linked to chemical/environmental effects of electricty production. The latter section returns to forces and motion looking at pressure, momentum and Newtons laws of motion.
	Sound waves Sep. Phys Uses of ultrasound Sep. Phys Seismic waves Sep. Phys		

Physics F - Separate physics	Reflection of light - Sep. Phys.	Year 7 - Physics 1 - Forces, Year 8 - Physics 3 - Waves, Year 9 - Physics 5 - Energy & Forces	This unit looks at sound, light and seismic waves in detail. It covers diffraction, reflection, refraction of waves and how these principles can be applied. Students will investigate the behaviour of light through lenses and make links to careers using the properties of light and lenses. The unit then moves onto space and its contents including the formation of stars, the motion of celestial objects and the theory of the big bang
	Refraction of light - Sep. Phys.		
	RP: Refraction of light - Sep. Phys		
	Light and colour - Sep. Phys		
	Lenses - Sep. Phys.		
	Using Lenses - Sep. Phys		
	Emission and absorption - Sep. Phys.		
	Black body radiation - Sep. Phys.		
	The solar system - Sep. Phys.		
	The life cycle of a star - Sep. Phys.		
	Orbital motion and satellites - Sep. Phys.		
	Red shift - Sep. Phys.
